Page 6 Page 8 1 1 study in the world on farmers and their families, true? brief news article that's put out by the National 2 2 A. The largest? To be honest with you, I don't Institute of Environmental Health Sciences, and this one 3 3 know for a fact that it is the largest study on farmers. happens to be about the AHS, and it's dated 4 But it is a very large study, yes. 4 December 29th, 2017. 5 5 Q. You know that the AHS, the Agricultural Health Do you see that, sir? The date is down in the 6 Study, was sponsored by the National Cancer Institute, 6 right hand corner. 7 7 A. 2017 yes. National Institute of Health, and NIEHS, National 8 8 Institute for Environmental Health Sciences, right? Q. And that is -- is that after you --9 9 Is that date after you published your first A. The -- the AHS paper that was published with 10 the 2018 publication date lists the Cancer Institute and 10 initial report in this case? 11 11 NIEHS, the National Institute of Environmental Health A. Okay. First initial report, what are you 12 12 referring to for that? Sciences, as the funding source for the study, yes. 13 13 Q. Yeah. And if you look at the study itself, it Q. I am referring to -- let's see. I am referring 14 14 is entitled National Cancer Institute, 2018, Glyphosate to the expert report of Dr. Charles Jameson, Ph.D., in 15 Use in Cancer Incidents, in the Agricultural Health 15 support of general causation on behalf of plaintiffs. 16 16 Study, true? That is dated May 12, 2017. 17 17 MS. WAGSTAFF: Object to form. You are familiar with that, right? 18 18 MS. WAGSTAFF: And, Counsel, I will give you a A. I would have to look at the paper to see what 19 19 it says. But my understanding is it does -- the little leeway to talk about this expert deposition 20 20 National Cancer Institute is not part of the title of that was his general initial deposition. But as you 21 21 know, this -- this deposition is very limited in the paper. 22 22 Q. Okay. I will show you that in a minute. But scope to the 2018 AHS study, and he is not prepared 23 the -- the paper by -- that you are referring to is the 23 to talk about the scope of his deposition that you 24 24 one with the lead author is Gabriella Andreotti? have -- or of the expert report that you have 25 25 A. That's correct. deposed him on for eight hours already. Page 7 Page 9 1 1 Q. The title of that paper is "Glyphosate Use and MR. HOLLINGSWORTH: I am not going to ask him 2 2 Cancer Incidence in the Agricultural Health Study"? many questions about that report. 3 3 A. Yes, that's -- to the best of my recollection, MS. WAGSTAFF: Okay. 4 4 that's the exact title, yes. MR. HOLLINGSWORTH: But he has referred to it. 5 Q. And the Agricultural Health Study is something And he has referred to the Agricultural Health Study 6 that has sometimes been referred to in this case and in 6 in his supplemental report. I do have just a few 7 7 your -- and in your reports in this case as the AHS, questions about it. 8 8 MS. WAGSTAFF: All right. right? 9 9 A. That's correct, yes. BY MR. HOLLINGSWORTH: 10 10 Q. So let's go back to Exhibit 1, sir. This is Q. Are you aware --11 11 MR. HOLLINGSWORTH: Can you hand me, please, the National Institute of Health -- Environmental --12 12 Environmental Health Sciences publication on 13 13 December 29, 2017. MS. WAGSTAFF: Are we going to start with 27? 14 14 Do you see that? Okav. 15 15 MR. HOLLINGSWORTH: 27-1. A. Yes. 16 16 MS. WAGSTAFF: Yeah. Q. And if you look down in the last paragraph of 17 (Exhibit 27-1 was marked for identification.) 17 this, and you go to the -- to the second sentence, the 18 18 NIHS states that, quote, "The AHS is the largest study Q. Sir, I have marked as an exhibit for this 19 19 of farmers and their families in the world." deposition number -- as number 27-1, a one-page article 20 20 that I am handing to you and counsel. Did I read that correctly? 21 21 A. That's what this document says, yes. A. Uh-huh. 22 22 Q. If you look -- look at the bottom -- strike MS. WAGSTAFF: I object to counsel testifying. 23 23 Q. Did I read that correctly? 24 24 Let me start out with what's at the top. A. That's what the document says, yes. 25 This is a -- this is -- this is actually a 25 Q. Okay. And is it fair to state that the AHS

Page 10 Page 12 1 1 collects comprehensive data on pesticide exposure? covered glyphosate and other compounds, including 2 2 A. Well, based on -- on what I know about the malathion. Do you recall that? 3 3 MS. WAGSTAFF: Objection to we are getting study on reading the various publications, I don't know 4 that I could agree that it collects the most compre --4 close to outside the scope of this deposition. 5 5 or collects comprehensive data, no. MR. HOLLINGSWORTH: Well --6 6 A. I -- I did serve on Monograph 12 Working Group. Q. Do you see the second -- the third sentence in 7 7 Q. Yeah. Do you recall that when you referred to the paragraph we were just referring to on Exhibit --8 8 the agriculture health study in Monograph 112 on A. Uh-huh. 9 9 Q. -- 21 dash -- 27-1? glyphosate, there is a reference to the malathion 10 10 A. Right. portion of Monograph 112 for a more detailed data about 11 11 Q. This is the NIEHS publication where they state, the Agricultural Health Study; do you recall that? 12 12 quote, "The study collects comprehensive data on MS. WAGSTAFF: Wait, wait. Stop really quick. 13 13 pesticide exposure." Can we go off the record, please? Can we go off the 14 14 Do you see that? record? 15 15 A. I see where this document says that, yes. MR. HOLLINGSWORTH: Yes. 16 16 Q. Is it fair to state that the study, the AHS THE VIDEOGRAPHER: Is that a "yes"? 17 17 MS. WAGSTAFF: Yes. study that I am referring to, collects comprehensive 18 18 THE VIDEOGRAPHER: Give me a second, please. data on factors that might modify exposures to 19 pesticides? 19 Going off the video record at 9:16. 20 20 (Recess from 9:16 a.m. until 9:18 a.m.) A. I am sorry. Could you repeat the question. 21 21 THE VIDEOGRAPHER: We are back on the video Q. Is it fair to state that the AH study collects 22 22 comprehensive data on factors that might modify record at 9:18 a.m. 23 exposures to pesticides? 23 MS. WAGSTAFF: Just real quick before we start. 2.4 24 A. I would -- I would agree that it collects data While we were off the record, Mr. Hollingsworth and 25 25 I had a conversation about the scope of PTO 34 and on factors that might modify exposures, yes. Page 11 Page 13 1 1 Q. And is it fair to state that the study has the deposition we are here to do today. We have a 2 2 developed and validated improved the methods for slight disagreement about the scope of his 3 3 pesticide exposure assessment? questions. 4 4 A. In my opinion I could say they tried, but I I have agreed to allow him to continue asking, 5 5 don't think they were successful in this particular but there may come a point in the very near future 6 6 study. I think the exposure data is flawed. when I have to instruct Dr. Jameson not to answer 7 7 Q. Do you see in this publication by NIEHS on and we need to get the Court on the phone. 8 8 December 12, 2017, where it is stated in the third But go ahead and proceed. 9 9 sentence that the study has developed, quote, "has MR. HOLLINGSWORTH: And during the time that we 10 10 developed and validated improved methods for pesticide were off the record, I explained to Ms. Wagstaff 11 11 exposure assessment"? that I am limiting my questions to the section of 12 12 MS. WAGSTAFF: Objection to counsel testifying. the Monograph 112 which includes glyphosate and a 13 13 A. This document does state that the AHS has couple of other chemicals, among which was a 14 14 developed and validate improved methods. chemical called malathion. That refers to the 15 15 Q. Now, during your career, did you work at the quality and the validation methods and the various 16 National Institute of Health? 16 statistical analyses that were done as part of the 17 17 A. Yes. agricultural study, and that is the only aspect of 18 18 Q. And did you work at the National Institute of that Monograph that I want to briefly question 19 19 Dr. Jameson about. I do not intend to ask him any Environmental Health Sciences? 20 A. Yes. 20 questions about malathion per se or about the IARC

21

22

23

24

25

Q. Now, when you were looking at the AHS study in

Q. You served on a group called Monograph 112 that

connection with the IARC report -- do you have that in

22

23

24

25

mind?

A. Okay.

review of glyphosate per se.

talk about the IARC today.

MS. WAGSTAFF: All right. Along that lines,

So you can answer if you remember or if you

the -- the -- I -- he was -- he is not prepared to

Page 14 Page 16 1 Q. And I am looking at the paragraph which says, recall. 2 2 THE WITNESS: Okay. quote, "Great efforts were made in the Agricultural 3 3 BY MR. HOLLINGSWORTH: Health Study to assess exposure among agricultural 4 Q. Okay. Do you recall that the Working Group 112 4 pesticide applicators and their spouses." 5 5 evaluated other chemicals besides glyphosate, including Do you see that? 6 6 A. Yes. malathion for one? 7 7 Q. Did you -- are you testifying today that you A. Yes. They reviewed a number of different 8 8 disagree with that? pesticides. 9 9 Q. And you were a member of the animal subgroup MS. WAGSTAFF: Objection; misstates his 10 for the review of those various pesticides, including 10 testimony. 11 11 glyphosate and malathion, right? A. Well, based on my evaluation of the most recent 12 A. I was. 12 AHS publication in 2018, which is the purpose of this 13 13 Q. Do you recall that in -- in -- there is a deposition, I would have to say that --14 14 section in the monograph on glyphosate which discusses Well, the sentence reads, "Great efforts were 15 the Agricultural Health Study? 15 made in the Agricultural Health Study to assess exposure 16 16 A. I am familiar with that, yes. among agricultural pesticide applicators and their 17 17 Q. And there is a part of that section which says spouses." It just says "great efforts were made." It 18 18 didn't say what the efforts were. for a more detailed evaluation of the Agricultural 19 19 Health Study, look to the section on malathion. Q. Okay. 20 20 You recall that? A. In this first sentence anyway. 21 A. I -- I think there is a reference, such a 21 I mean, it has been a while since I have looked 22 22 reference in there, but I -- I need to look at the -at this, so I --23 Q. Okay. 23 Q. Okay. Is it fair to state that the 24 2.4 A. -- Monograph itself to refresh my memory. questionnaires and algorithms that have been done to 25 25 Q. Sure. I am going to show you what I will mark test the Agricultural Health Study for -- for quality Page 15 Page 17 1 1 as 27-2, a copy of the -- of a few pages of the had undergone several tests for reliability and accuracy 2 2 malathion monograph that refer to the AHS methodology. that had provided considerable insight into the quality 3 3 of this exposure assessment -- exposure assessment that And this -- this is the entire monograph on malathion, 4 4 but I am only going to look at two or three pages of the AHS did? Do you see that? 5 5 this be. A. Is that what you are saying is in this? 6 6 (Exhibit 27-2 was marked for identification.) Q. This -- I am looking at the second sentence. 7 7 MS. WAGSTAFF: I will let the record reflect And I am asking you if you think --8 8 A. Oh, the second sentence. that this is a 124-page typed document. 9 Q. Now, the malathion monograph is one that you 9 Q. -- as you sit here today it's fair to state 10 10 worked on in your capacity as head of the animal that the questionnaires and the algorithms that have 11 11 subgroup; is that right, sir? been extensively described have undergone several tests 12 12 MS. WAGSTAFF: Objection to using this as -for reliability and accuracy that have been provided --13 13 unless we go into more detail on malathion, which is that have provided considerable insight into the quality 14 14 outside the scope of PTO 34. of this exposure assessment, referring to the AHS, AHS 15 15 A. I did work on the malathion monograph, yes. itself? 16 16 MS. WAGSTAFF: And doctor --Q. Okay. If you will look at -- there -- there 17 are two discussions in this document about the 17 Q. Is that fair to state? 18 18 MS. WAGSTAFF: Dr. Jameson, if you need to read Agriculture Health Study that are referred to in -- from 19 19 the glyphosate section of the monograph. And one is at the entire section on the Agricultural Health Study 20 page 9. 20 right now, please do so. 21 21 A. Yeah, let me refresh my memory on this first. If you look at that for me, please, there is a 22 22 description of the Agricultural Health Study at But I -- I -- but I would like to say, when I wrote my 23 23 subsection A on the second column on the right. The initial report, I was asked to write a report on 24 24 right-hand column, I should say. glyphosate.

25

25

A. Uh-huh.

And so when I wrote the report on glyphosate, I

Page 18

concentrated only on glyphosate. Reviewing the IARC monograph, I looked at the glyphosate section. Even though it may have referred to the -- to the malathion, I -- I didn't take the time to look back at the malathion study.

I remember that there were concerns expressed at the monograph meeting about the accuracy or adequacy of the data in the AHS and especially as it relates to exposure and misclassifications. So I was well aware of the fact of the problems with it, but I didn't address them in my expert report because my -- the purpose of my report was to discuss glyphosate and its carcinogenicity and not to evaluate the adequacy or -- or if each study was -- or outline the flaws in each and every study that I looked at.

Q. Okay. There is another section of this I would like you to look at, at page 15, please, in the right-hand column. There is a sentence in the first -- in the second full -- the second full sentence in that paragraph that begins, "The AHS being a cohort study..."

Do you see that?

2.1

MS. WAGSTAFF: It's on the right-hand side.

A. On the right-hand side. "The AHS being a cohort study..." Oh, okay. I gotcha.

Q. Yeah. Is it fair to state that the AHS, since

cohort studies, recall bias tends to -- tends to happen, doesn't it?

Page 20

A. In case control studies?

O. Yes.

A. Well, you can have recall bias in case control and cohort studies.

Q. But because exposure is obtained before the onset of the cancer in the cohort study, recall bias is not expected in cohort studies, is it?

A. Well, in most cases that -- that -- that probably would be the case. But -- but the methodology used in the Agricultural Health Study to -- at the initial sign-up of the applicate -- of the pesticide applicators, if you will, that was flawed; because they were asking them to recall their past exposures to -- to the pesticide. And that could lead to recall bias. So the methodology that was used in the Agricultural Health Study is flawed.

Q. That recall bias is the same as any case control study, right?

A. Well you can have -- I -- that's what I said. You can have recall bias in case control studies. But you can also have it in cohort studies.

And that is the case in the AHS study because of the method that they used to -- the questionnaire

Page 19

it's a cohort study, avoids recall bias?

MS. WAGSTAFF: Objection to pulling this sentence out of a 124-page typed document that the witness has testified he has not seen in years. And it is outside the scope of PTO 34.

If you need to read that entire section,

Dr. Jameson, please do.

A. Okay. Let me --

Q. Is it -- do you -- do you --

MS. WAGSTAFF: I mean, if you want to ask him --

Q. Can you answer the question --

MS. WAGSTAFF: -- if that's what the words says on the paper, you can answer.

Q. Can you answer the question, Dr. Jameson, whether the AHS because it's a cohort study avoids recall bias?

A. Okay. The sentence in -- in -- that you are referring to in this copy of the malathion --

Q. Yes.

A. -- that's what this paper says, yes.

Q. Yes. Would you agree that that's a fair thing to say about the AH study in general?

A No

Q. Okay. In case control studies as opposed to

Page 21

that they used to get exposure information from the subjects when they first signed up.

Q. The subjects that signed up in the prospective cohort study, which was the AHS, didn't know whether they were going to get cancer or not, did they?

A. No. But that's not the issue. The recall bias is on exposure. The recall bias is them recalling what they have -- what pesticides they have used and been exposed to in the previous -- previously before they -- when they signed up for this -- for this study.

Q. That --

A. And going back, you know, years of memory is -- is -- I mean, they could remember, "Well, I used, I used pesticide X and herbicide Y the past year or past couple of years so I will put that down." But 20 years ago or 15 years ago, they can't remember what -- every pesticide they may have been exposed to. It's just human nature not to remember those things.

So there is a major flaw in the AHS study for gathering exposure information right at the get-go, right at the very beginning.

Q. But that error would be, because it's a prospective cohort study, would be nondifferential; and in most cases in nondifferential cohort studies such as the AHS, that error would not inflate risk estimates,

Page 22 Page 24 1 1 would it? want to ask you about, the malathion section on the AHS. 2 2 A. No, that's not true. If you look at page 21, sir, in the left-hand column, 3 MS. WAGSTAFF: Objection; misstates testimony. 3 down at the bottom at the sentence that begins, "For 4 You have not established it's nondifferential. 4 individuals..." 5 5 Q. Okay. Okay. Would you -- would you read, A. Okay. 6 6 Q. The -- the IARC group said that, "For please --7 7 individuals in the AHS who do not complete a phase 2 Would you look, please, at the second sentence 8 8 of -- after the sentence that I just referred to you on re-interview five years after enrollment, an imputation 9 9 page 15 of Exhibit 27-2, which is the malathion portion method was used..." 10 10 of the IARC Monograph 112. Do you see that? 11 11 A. The second sentence past the one you? A. Yes. 12 12 O. Yes. Q. "And that permitted the inclusion of all 13 13 MS. WAGSTAFF: Objection again to cherryparticipants in a phase 2 analysis." According to this 14 14 picking sentences out of a 124-page document. document, in the left-hand column. 15 15 A. So is that the -- I'm sorry. Do you see that? 16 16 Q. The one that begins, "Misclassification..." A. Okay. Yes. 17 17 MS. WAGSTAFF: The next sentence. Q. And it states that the imputation method was 18 18 based on baseline data from -- meaning baseline data A. Oh, that's the next sentence. I'm sorry. 19 19 "Misclassification of pesticide exposure cannot from the original interviews; do you see that? 20 20 be excluded because exposure was retrospective and A. Okay. 21 21 self-reported." Right. Q. And do you see that based on a paper by 22 22 Q. As is typical for most case control studies, Heltshe, et al., which is cited at the end of this 23 true? 23 section, that imputation method was determined to have 24 2.4 MS. WAGSTAFF: Object to form. no major impact on the main results for many of the 25 25 Q. Do you see that -pesticides? Do you see that? Page 23 Page 25 1 1 A. I see that sentence, yeah. MS. WAGSTAFF: Objection. Please include the 2 2 Q. Okay. And my question is: Isn't it fair to rest of the sentence which relates only to 3 3 state that with a prospective cohort study like AHS, parathion, diazinon and malathion, not glyphosate. 4 4 that error would be nondifferential and in most I object to incomplete sentences. 5 5 scenarios would not inflate risk estimates? Q. Do you see that? 6 6 A. I don't necessarily agree with that statement, A. I see where it says --7 7 MS. WAGSTAFF: Please read the rest of the 8 8 Q. Okay. When you were -- when you were writing sentence. 9 the malathion section of this monograph, did you raise 9 A. -- which led -- which to the observation that 10 10 your concern about that during the discussion at the neither missing data nor imputation had major impacts on 11 11 IARC meeting? the main results of many of the pesticides, including 12 12 parathion, diazinon, and malathion. But it says nothing A. I don't recall if I did or not. 13 13 MS. WAGSTAFF: Objection; outside the scope of about glyphosate. 14 14 Q. Yes. In your report, sir, you refer to the 15 15 O. Is it true that in the case of case control paper by Dr. Heltshe, which is cited at the end of the 16 16 section from the malathion monograph that you just read. studies, that error would be differential and therefore 17 would affect the accuracy of risk estimates and tend to 17 Heltshe, et al., 2012? 18 18 make the risk estimates exaggerated? A. Uh-huh. 19 19 A. That may be possible. Not necessarily fact, O. That's --20 but that may be possible. 20 A. Yes. 2.1 21 Q. Now, in your supplemental report, you refer to Q. -- one of your references to your supplemental 22 22 report; true? the imputation method of analysis which was used by 23 23 Dr. Andreotti in the 2013 NCI study; true? A. True. 24 24 A. True. Q. Now, have you read Heltshe? 25 Q. And if you look at just -- the last question I 25 A. Yes.

Page 26 Page 28 1 1 Q. Heltshe and her coauthors specifically looked Q. Yeah. You disagree with that? 2 2 at glyphosate, didn't they, in addition to parathion and MS. WAGSTAFF: Objection; asked and answered. 3 3 malathion? A. Well, I --4 A. Right. 4 MS. WAGSTAFF: He said yes. 5 5 O. And the conclusions that she reached in her A. Do I agree with that? 6 6 Q. Do you agree with that? paper that you cited apply equally to glyphosate and 7 7 A. Do I agree that missing data is a common malathion; isn't that right? 8 8 A. I have to look -problem? 9 9 Q. Yes. MS. WAGSTAFF: Object. 10 10 A. -- at the paper to refresh my memory. MS. WAGSTAFF: Objection; asked and answered. 11 11 Q. Okay. Would you agree that missing data is a A. That's -- yes. That's what I said. 12 common problem in epidemiologic studies? 12 Q. Okay. I'm sorry. 13 13 MS. WAGSTAFF: Object to form. If you look down at the third sentence in the 14 14 first paragraph of this paper, it refers to multiple A. In my experience in reviewing epidemiology 15 15 papers, that that seems to be one of the major problems, imputation. Do you see that? 16 16 A. Yes. 17 17 (Exhibit 27-3 was marked for identification.) Q. And multiple imputation is one of the qualities 18 18 of AHS that you criticize and which you say has caused Q. Now I am going to mark for the record as 19 19 Exhibit 27-3 this Heltshe article that was one of the AHS to have invalid data and results; true? 20 20 references to your supplemental report. It's entitled A. I'm sorry. Could you repeat the question. 21 21 Q. Multiple imputation is a methodology that is "Using multiple imputation to assign pesticide use for 22 22 non-responders in the follow-up questionnaire in the used in evaluating epidemiologic studies that you said 23 Agricultural Health Study." 23 had been either -- either improperly applied or wrongly 2.4 24 Do you see that paper, sir? applied by the AHS and that that had resulted in 25 25 inaccurate data, and that was part of your supplemental A. Okay. Page 27 Page 29 1 1 Q. Could I ask you, why did you cite this paper as report; true? 2 2 A. Yes. The problem is the imputation that was a reference to your supplemental report in this case? 3 3 done in the AHS used flawed data to begin with. So if A. It was -- it was referenced because of the -- I 4 4 took a statement out of the AHS publication, and that you use flawed data, flawed exposure data to -- to begin 5 5 particular statement had this reference in it. And so with, your imputation is just going to exacerbate that, 6 6 that's why I included this reference because I took -and the data you get from that is -- is going to be 7 7 took a statement directly out of the AHS. And I guess probably worse than the data you put into it. So --8 8 just to be complete, I gave the reference that they were Q. Do you --9 9 referring to from that, from the AHS paper. A. -- that's why I said that the imputation was --10 10 Q. Okay. Is -- is Exhibit 27-3, the paper I just was not good in AHS study. Because the data they are 11 11 handed to you by Sonya Heltshe and other authors, using to -- to impuate, or whatever the proper term is, 12 12 several other authors, the article that you were is flawed. It's -- it is inaccurate. And so therefore, 13 13 bad data in, bad data out. referring to in your supplemental report? 14 14 Q. The authors of this study state that multiple 15 15 Q. Do you remember when I asked you whether it's imputation has been widely accepted and has been used to 16 16 fair to state that missing data is a common problem in account for missing data in large national surveys and 17 17 epidemiologic studies? studies. 18 18 A. I remember you asking the question, yes. Do you see that sentence? 19 Q. Do you see the very first phrase of this 19 A. I see that sentence.

20

21

22

23

24

25

article, which you cited as a supplemental reference, as

which states a quote. Quote, "Missing data is a common

a reference to your supplemental report I should say,

A. Right. That's what this said, the introduction

problem in epidemiologic studies"?

20

2.1

22

23

24

25

says, yes.

written in this introduction, yes.

O. Is that an unfair statement?

MS. WAGSTAFF: Objection; counsel testifying.

A. That's -- that's what this -- that's what's

A. No. Because in some studies, if you have

decent exposure data, good data, if you can use good

Case 3:16-md-02741-VC Document 1137-7 Filed 02/16/18 Page 10 of 50 Page 30 Page 32 1 1 data to impuate -- imputate --But I really want to look at the paper to refresh my 2 2 Q. Impute. memory of the exact amount. 3 3 Q. All right. A. Impute, excuse me. 4 -- to impute the exposures for the people who 4 A. The exact figure. 5 5 did not respond. But, as is the case for the AHS study, Q. Have you ever read any articles about the AHS you initially start off with flawed data, with bad data. 6 in which the authors have concluded that nondifferential 7 7 And so if you use bad data, you impute bad data. So exposure misclassification biases relative risk 8 8 that's why I say the AHS is not an adequate study. It's estimates towards the null? 9 9 flawed. It's fatally flawed. A. That sounds familiar, but I -- I -- I can't 10 10 Q. Yes. Had you read this article by Heltshe recall which specific paper it was in. 11 11 before today? Q. What -- Did you evaluate that factor in 12 A. Before today? 12 connection with writing the supplemental report? 13 13 O. Yes. A. Which factor is that again, please? A. Yes. 14 Q. That nondifferential exposure misclassification 15 Q. Okay. Heltshe disagrees with you, doesn't she? 15 biases relative risk estimates towards the null. 16 16 A. Well, yes, I guess she does in this A. Yeah, that would be part of the -- part of the 17 17 publication. But when was this published? In 2012. consideration, I guess. 18 18 Q. Yep. Q. Okay. Well, what aspect of that consideration 19 19 A. They -- well. I don't want to go into it, but affected you, your -- or played into your evaluation 20 20 she does disagree. that you have reported in your supplemental report? Q. She -- she concludes that multiple imputation, 21 21 A. I am sorry. Could you rephrase the question? 22 22 as applied to the AHS study itself, allows for bias Q. What aspect of the factor, which is the 23 reduction and improved efficiency in future analyses of 23 nondifferential exposure misclassification, tends to 24 24 the Agricultural Health Study, doesn't she? create a bias that causes relative risk estimates to 25 25 A. I don't know. Where are you reading from? move toward the null? What aspects of that factor did Page 31 Page 33 1 1 Q. I am reading from the last part of her paper on you take into consideration in writing your supplemental 2 page 46 -- 415. The last sentence. At the bottom of 2 3 3 the left-hand column. A. Well, if you -- if you look at the AHS study. 4 4 A. Yeah, I see that. And they indicate in that study that for the follow-up, 5 5 O. Okay. which -- which they got very poor response to, to begin 6 6 A. I mean that she -- she was saying multiple with. But in their follow-up questionnaire, they asked 7 7 imputation will allow for bias reduction, improved the subjects to list the pesticide exposures they had in 8 8 efficiency in future analysis of AHS. their last year of farming. So this was, like, up to a 9 9

21

22

23

24

25

A. -- see if that's accurate.

Q. All right. Isn't that exactly what the

Andreotti and her coauthors did to test the validity of the imputation method in the --

MS. WAGSTAFF: Object.

Q. -- NCI 2018 study?

MS. WAGSTAFF: Object to form.

A. That sounds, as I can best recall, that sounds about what they have reported in the -- in the paper.

ten-plus-year follow-up, but they were asking only for one year of -- what their exposure was in their past one year of farming.

So, for example, this, the misclassification that could lead to the null, is you have a situation of, for example, a farmer who the questionnaire was filled out in 2003, I think. And again, I'm -- the dates, the accurate dates I'm -- would look, have to look at the paper to get. But I think it was around 2003 is when the questionnaire went out.

And take a situation of a farmer that retired from farming in 2002. So he would then fill out the form and then say what he was exposed to in 2001.

Let's say in 2005, he started using GMO products. So therefore his exposure to glyphosate formulation, formulated products, would greatly increase. So he used GMOs from 2005 -- from 2000 -- I

Page 34 Page 36 1 am sorry, started in 2000 and -- and stopped in in two nondifferential. Can you -- can you --2 2 thousand and -- I am getting my dates. Two thousand A. But this is --3 3 and -- in 2000. Q. -- can you explain to me --4 So he did it for -- for maybe five years. 4 A. But I am not talking about people with 5 5 I am getting my dates mixed up or not following non-Hodge -- you know, if they have the non-Hodgkin's 6 6 out. lymphoma or not. 7 7 MS. WAGSTAFF: Do you need to write it down on What I am talking about is the exposures to 8 8 a piece of paper? these people are -- are -- are misclassified. 9 A. Yeah, let me -- let me write it down. 9 O. Uh-huh. 10 10 2003 is when the questionnaire went out. 2002, A. Because of the way the questionnaire was asked, 11 11 this farmer retires. So he needs to report, he is asked they asked, only asked for the last year of -- of 12 to report on his farming exposure in 2001. 12 farming. So they are missing the data from -- from, you 13 13 And in two -- in -know, the 19 -- 1998 or 1999 up to the 2003 or whatever 14 14 In 1999, he -- he started using GMOs and -- or when the -- when the questionnaire came out. 15 I'm sorry, let's say in 1998. He started using GMOs 15 Q. Okay. 16 16 when they first came out. A. So it's the -- it's the exposure 17 17 And then he stopped in 2000. misclassification. I am not talking -- I wasn't 18 18 So for the purpose of this, this questionnaire, referring to the nondifferential, you know, bias caused 19 19 he is asked what his exposure was in 2001. Well, he by people with NHL versus NHL. That's -- that's not the 20 stopped using the GMOs in 2000, so in 2001 his exposure 20 issue. The issue is a misclassification of exposure. 21 21 Q. Have you stated that the Agricultural Health 22 22 Q. Well, the imputation methodology in the case of Study is the only cohort study to have published 23 a nondifferential exposure, like a misclassification 23 findings on exposure to glyphosate and the risk of 24 24 like the one you are talking about, takes all of that cancer? 25 25 into account, doesn't it? A. It's the only cohort study that I'm aware of Page 35 Page 37 1 1 A. No. that has -- that has looked at exposure to glyphosate in Q. That's what Dr. Heltshe did? 2 3 3 Q. And the Andreotti publication in 2018, that is A. No. It doesn't take it into account. 4 4 Q. Okay. Do you know the difference between a the NCI 2018 study, is a publication that follows up on 5 nondifferential exposure misclassification and a the -- on the original AHS studies about glyphosate and 6 6 differential exposure misclassification for purposes of cancer: true? 7 7 epidemiology? MS. WAGSTAFF: Object to form. 8 A. That's not my strong point, but a --A. The 2018 Andreotti paper is -- is, yeah, like a 9 9 O. A nondifferential -ten-year follow-up, or I don't know the exact time 10 10 A. Nondifferential. frame. But it's a follow-up of the results of the -- of 11 11 Q. -- disclose -- exposure misclassification is what they are finding in that AHS study. 12 12 one that is made about someone who doesn't have NHL; MR. HOLLINGSWORTH: Okay. Can I have tab two, 13 13 whereas a differential exposure -please. 14 14 MS. WAGSTAFF: Object to form. (Exhibit 27-4 was marked for identification.) 15 15 Q. -- misclassification such as in a case control Q. I am going to mark as Exhibit 27-4 the 16 16 Andreotti paper -study is about someone who is a case, who already has an 17 17 A. Okay. 18 18 A. Uh-huh. Q. -- which is titled, "Glyphosate Use and Cancer 19 19 Incidence in the Agricultural Health Study." Q. And that makes a difference in his total recall 20 about his or her exposure to the chemical glyphosate in 20 And if you look at that, sir, on the top 21 21 left-hand corner, it is designated as National Cancer the first place, doesn't it?

22

23

24

25

22

23

24

25

A. Why do you say that?

Q. Because that's what -- that's what human health

epidemiologists say. There is a big difference between

differential exposure misclassifications and

A. The right-hand corner.

MS. WAGSTAFF: Right-hand.

MR. HOLLINGSWORTH: Sorry, right-hand corner.

Institute, 2018?

Case 3:16-md-02741-VC Document 1137-7 Filed 02/16/18 Page 12 of 50 Page 38 Page 40 1 Q. Yes. Q. And the next sentence is the next one I was 2 2 A. JNCI, National Cancer Institute, 2018, right. referring to also, which is that this lack of 3 3 Q. Yes. association was consistent for both exposure method 4 And I'm referring that -- to that as the "NCI 4 metrics, and this lack of association was consistent for 5 5 2018 study" for purposes of this deposition or also as unlagged and lagged analyses, and it was consistent 6 6 after further adjustment for pesticides linked to NHL in "the Andreotti paper." 7 7 And looking at this paper, the authors have previous AHL analyses. 8 8 concluded that this is a large prospective cohort study Do you see all of that? 9 9 where there has been no association found between A. I see that, yes. 10 glyphosate and lymphoid malignancies overall, including 10 Q. What is -- what is a lagged and unlagged 11 11 NHL and all its subtypes; true? analysis, and what's the purpose of that? Do you know? 12 12 A. A lagged analysis is where you take into A. That's what they are reporting in this paper as 13 13 their conclusion. account an extended period of time between the initial 14 14 Q. And they say that this lack of association was exposure and -- and the onset of the cancer that you are 15 consistent in two different exposure metrics, right? 15 looking at, whereas an unlagged is you are looking for 16 16 A. Where are you reading that? cancer very shortly after exposure took place. 17 17 Q. I am reading that -- well, did you recall that Q. Well, the lagged and unlagged exposure analysis 18 in there were two different exposure methods that they 18 that they did in this paper was to account for latency 19 talked about here. And the finding of no association 19 period, wasn't it? 20 20 between those exposures and any canc -- exposure to A. That's, basically, yeah, that's what I was 21 21 glyphosate and any cancer was the same, right? No saying, right. 22 22 association was found for cancer in glyphosate, true? Q. So they lagged the period from exposure by 5, 23 A. I am not -- I am -- I -- I don't know where you 23 10, 15, and 20 years --24 are reading that. Two different exposures? 24 A. Years. Right. 25 25 Q. Okay. On --Q. -- to try to account for latency, true? Page 41 Page 39 1 1 A. They do talk about different quartiles of A. That's accurate, yes. 2 2 exposure. Q. And the authors found that there was no 3 3 difference in the relative risk for a 5- or a 10- or a Q. Yeah. 4 4 A. They don't talk about two different kinds of 15- or 20-year lag period; true? 5 5 A. Well, that's what the authors say, but I don't 6 6 MS. WAGSTAFF: Just wait and let him reference agree with that. 7 7 Q. Okay. you. 8 8 A. Their data doesn't -- doesn't necessarily THE WITNESS: I am sorry. Sorry. 9 Q. Okay. If you look at -- if you look at page 7 9 reflect that. 10 10 of his study, sir. In the left-hand column, in the Q. Okay. Do you see the table where they talk 11 11 first full paragraph. about the results from the lagged and unlagged exposure? 12 Do you see the sentence that says that the 12 A. You are talking about --13 13 authors observed no associations between glyphosate use MS. WAGSTAFF: Can we take a break, a bathroom 14 14 and NHL overall or any of its subtypes? break when you finish your questions on lagged and 15 15 MS. WAGSTAFF: Objection; counsel testifying. unlagged? 16 16 MR. HOLLINGSWORTH: Sure. A. So this is page 7, the left-hand column, the 17 second paragraph. 17 A. So are you talking about Table 3? 18 18 O. Yep. Q. Table --19 19 MS. WAGSTAFF: Look. A. Page 6?

20

21

22

23

24

25

Q. Yes.

A. Okay.

A. No.

20

2.1

22

23

24

25

A. At the beginning?

paper, yes.

MS. WAGSTAFF: I have it here.

Q. Now, do you disagree with that?

A. Oh, "in our study we observed." Okay. Okay.

A. That's what they are reporting here in their

Q. And if you look at the four quartiles, they are

all basically finding -- finding a null conclusion on

relative risk. Do you see that in the column, sir?

	Case 3:16-md-02741-VC Document	1137-7	Filed 02/16/18 Page 13 of 50
	Page 42		Page 44
1	Q. Do you see the relative risk for the five-year	1	Q. But my question is: Are you an epidemiologist?
2	lag?	2	A. I am I consider myself a toxicologist. I do
3	A. For the five-year lag? Yes.	3	not consider myself an epidemiologist.
4	Q. Yes.	4	Q. You don't have a agree in epidemiology, do you?
5	And the relative risk for the 20-year lag?	5	A. No, sir, I do not.
6	A. Yes.	6	Q. And you have never designed an epidemiology
7	Q. Okay.	7	study, have you?
8	A. But there is a there is a significant	8	A. I haven't designed epidemiology studies, but I
9	increase in relative risk in the 20-year lag for both	9	have discussed the design of epidemiology studies with
10	the first quartile and the fourth quartile, so I	10	several colleagues at the NIHS in previous years.
11	Q. Do you call that significant?	11	Q. Were those people epidemiologists?
12	A. It's significant. It's greater than one. It's	12	A. Yes.
13	not to	13	Q. Okay. You have never conducted a cohort study
14		14	in people, have you?
15	Q. It's not statistically significant, is it?	15	* * ·
16	A. But it's significant.	16	A. Me personally? No
17	Q. What is the difference between	17	Q. Yes.
18	A. And then in epidemiology, what they are coming	18	A I have not.
	to to realize is that statistically statistical	19	Q. Have you ever conducted a case control study?
19 20	significance is not the final word in in in	20	A. Personally, I have not.
	identifying a significant effect, or an effect of cancer		Q. Have you ever published an epidemiology paper
21	upon exposure to a material.	21	on your own?
22	Q. Okay. Can you show me a paper that you are	22	A. Not on my own, no.
23	relying on that has been published which says that	23	Q. Have you ever been a lead author on a
24 25	statistical significance is not the final word?	24 25	publication that solely focused on epidemiology?
25	A. I can't right here now.	25	A. No.
	Page 43		Page 45
1	Q. Have you ever written to that effect?	1	Q. When you were on the Report on Carcinogens
2	A. I personally have not written to that effect,	2	Panel for the National Tox Program and you referred to
3	no. But I have read papers that that talk about	3	epidemiology review, you were working with people who
4	that.	4	were actually real epidemiologists when you were
5	Q. Which papers are you talking about?	5	evaluating epidemiology, weren't you?
6	A. I don't have the references to memory, so I	6	MS. WAGSTAFF: Object to form.
7	would have to get that information.	7	A. When I was at NIHS working on reported
8	Q. Are you an epidemiologist?	8	carcinogens, of course I worked with epidemiologists. I
9	A. I have been using epidemiology, reviewing	9	asked them to help in the preparation of background
10	epidemiology, and making evaluations based on	10	documents, and also to serve on the panels to review the
11	epidemiology for 30 years that I worked previous 30	11	data and apply the criteria for listing in the Report on
12	years that I have been working. In my role as director	12	Carcinogens. But I was also responsible for reviewing
13	of reported carcinogens, it was my responsibility to	13	these papers that they wrote, and accepting them, and
14	review epidemiology data and laboratory animal data,	14	making sure that their evaluations were accurate. So I
15	mechanistic data, and make evaluations, apply criteria	15	have I have been evaluating epidemiology data for
16	for materials to be listed in the reported carcinogens.	16	many years and using it in my job to identify
17	Q. But my	17	carcinogens.
18	A. Also I in for the International Agency for	18	Q. You have never been responsible for you
19	Research on Cancer, I have been asked to review many	19	yourself doing an epidemiologic analysis in connection
20	epidemiology papers, evaluate the data, and make a	20	with a Report on Carcinogens, have you?
21	cprociniology papers, evaluate the data, and make a	21	with a report on Carellogens, have you!

22

23

24

25

21

22

23

24

25

determination of the adequacy of --

A. -- of the data based on my evaluation of the

epidemiology. So I feel I am very qualified to review

the data in epidemiology paper and make an evaluation.

Q. Have you --

Report on Carcinogens?

A. I don't understand your question.

Q. You have never been solely responsible for an

analysis of the epidemiology in connection with your

MS. WAGSTAFF: Object to form.

Page 46

- A. What do you mean, solely? I don't understand.
- Q. You, yourself, only responsible for analyzing
 epidemiology in the Report on Carcinogens. Have you
 ever done that yourself?
 - A. I still -- I don't understand your question.
 - O. Yeah.

2.3

- A. It doesn't make sense to me.
- Q. Okay. Are you board certified in epidemiology?
 - A. No, sir, I am not.

MS. WAGSTAFF: We never took that break after lag or unlagged. Could we --

MR. HOLLINGSWORTH: Oh, I am sorry.

MS. WAGSTAFF: Do you want to keep going or could we --

MR. HOLLINGSWORTH: No. You can take a break whenever you would like.

THE VIDEOGRAPHER: This would be the end of media disc number one. The time is 10:05 a.m. We are going off the video record.

(Recess from 10:05 a.m. until 10:13 a.m.)

THE VIDEOGRAPHER: We are back on the video record. This is video media disc number two. The time is 10:13 a.m.

BY MR. HOLLINGSWORTH:

Q. Does IARC consider you to be an expert in

cancer in humans, or if there is data that is -- that it is noncarcinogenic in humans, so they ask me to evaluate the epidemiology data and vote my opinion on if the -- what the -- what the epidemiology data is saying about

the particular chemical or material under consideration.

Page 48

MS. WAGSTAFF: And --

Q. Your opinion --

MS. WAGSTAFF: Wait. Hold on. I am going to object to this entire line of questioning as outside the scope of PTO 34. Because you chose not to or forgot to discuss his epidemiology qualifications in his previous deposition when he gave epidemiology opinions does not render the fact that you can now ask him questions about this in this PTO 34 where you all ask the judge for another deposition on the impact of the 2018 AHS study. And whether or not IARC considers Dr. Jameson an epidemiologist is completely beyond that scope and is starting to border on harassment.

Q. Were you invited as a member of the subgroup on epidemiology?

MS. WAGSTAFF: Objection; outside the scope of PTO 34.

Once again, you don't have to answer. Do not answer.

Page 47

epidemiology?

MS. WAGSTAFF: Objection. He cannot speculate on what IARC considers. I instruct you not to answer on any speculation. You don't have to answer.

MR. HOLLINGSWORTH: Well, you can't instruct him not to answer unless it's about a privilege issue, just by the way. Okay?

MS. WAGSTAFF: I just did.

- Q. Has IARC ever appointed you as a part of the panel on epidemiology for any of the panels that you have sat on for IARC?
- A. I haven't been identified as an actual member of the epidemiology subgroup for IARC. But for every IARC meeting that I have been a subgroup member, I have been instructed to review the epidemiology data and make my own evaluation of the -- of what the data is -- it says. And if the data shows that the material under consideration is either -- could be -- should be classified as either a known -- I mean a -- sorry.

If the material -- As far as epidemiology is concerned, if the material we are evaluating, there is sufficient evidence that it causes cancer in humans, or there is limited evidence that it causes cancer in humans, or there is inadequate data that it causes

Page 49

This is beyond the scope of PTO 34. This has nothing to do with the 2018 AHS study. And if we need to get the judge --

MR. HOLLINGSWORTH: He has made -- he has made criticisms of the epidemiology in the 2018 paper.

And I am -- I think I am free to evaluate what his qualification to do that is, okay?

MS. WAGSTAFF: Actually, whether or not IARC invited him to be a member of -- I can't read the --

MR. HOLLINGSWORTH: Specifically, the glyphosate epidemiology subgroup is directly relevant to his qualification to testify in this case about that.

MS. WAGSTAFF: And you could have asked him all of that. You -- this is the third time you have deposed him.

MR. HOLLINGSWORTH: No.

MS. WAGSTAFF: I am just saying that if you get into the IARC and what IARC thought about him or what IARC invited him to do in glyphosate has nothing to do with the 2018 AHS study.

And if we need to get Judge Chhabari on the phone, we certainly can. It's only 7:15 in the morning there. I am not sure if we can. But if you would like to, then we certainly can.

Case 3:16-md-02741-VC Document 1137-7 Filed 02/16/18 Page 15 of 50 Page 50 Page 52 1 1 BY MR. HOLLINGSWORTH: individual from being a -- an expert in evaluating all 2 2 Q. Are you aware that these plaintiffs in this of the data as it relates to identifying a cancer 3 3 case have not identified you as an expert in hazard. 4 epidemiology? 4 And that's what I have been doing for the past 5 5 MS. WAGSTAFF: Objection. That is not --30 years. I have been evaluating all of the relevant 6 6 data to identify cancer hazard. So I would consider that's not accurate. We have identified him as an 7 7 epidemiologist. The letter that Ms. Pigman and myself an expert in epidemiology, in toxicology, in 8 8 Ms. Greenwald exchanged had nothing to do with our chemistry, genotoxicity, all of the relevant icity's, if 9 9 designations by topic. We put that in our briefing. you will, that pertain to cancer hazard identification. 10 10 And now you are just misstating the record. Q. Are you board certified in toxicology? 11 11 Q. Are you aware of that? A. I have been doing toxicology for over 20 12 12 years -- or 40 years, excuse me. And I started doing MS. WAGSTAFF: Objection. Not true. 13 13 toxicology before there was a board certification for A. I don't know what you are referring to. 14 14 MR. HOLLINGSWORTH: Do you have a copy of tab toxicology. You can look at the record. I have -- I 15 15 have been doing toxicology for 40 years. I have eight. 16 16 published in toxicology. I have been responsible for (Exhibit 27-5 was marked for identification.) 17 17 the Report on Carcinogens. I have participated in many Q. I am identifying for the record as 27-5, sir, a 18 18 copy of a letter to Ms. Pigman from Ms. Wagstaff, among IARC monographs, meetings to identify carcinogens. 19 19 others, in which you are identified as a specialist, an 20 20 Q. My question is: Are you board certified in expert specialist in toxicology. 21 21 toxicology? Do you see that? 22 A. I --22 MS. WAGSTAFF: Objection. Once again, you are 23 MS. WAGSTAFF: Objection; outside the scope of 23 giving half-truths and misstating the record. 2.4 24 As stated fully in our Daubert briefing, this 25 25 Answer if you can. absolutely did not limit any of the specialties of Page 51 Page 53 1 1 our experts, and was basically forced by Ms. Pigman A. I consider myself a toxicologist. 2 2 so that we could set up depositions. Q. Are you board certified? Can you answer that 3 3 We have briefed this in full. It is in our question? 4 4 papers. And you are providing a half-truth to the A. I consider myself a toxicologist. 5 record. This calls for a legal question. And Q. Do you have a degree in toxicology? 6 6 Mr. -- or Dr. Jameson has absolutely no knowledge of A. You don't -- what -- what the --7 7 this, and you know that. And it's not true. What does being board certified in toxicology

A. But, you know, toxicology is kind of a broad scope of things when you are talking about the hazard identification and that type of thing, in -- for --

In toxicology, we have to evaluate all of the data, all of the relevant data. So we look at both epidemiology, toxicology, genotoxicity, mechanistic studies, exposure data. I mean, all of that is taken into -- all of that is taken into consideration when you do an evaluation of a cancer hazard.

So just because -- just because someone has no -- doesn't have a college degree in a certain expertise in -- in toxicology or in genotoxicity or epidemiology or what have you, does not preclude that get you or mean?

- O. Do you have a board certification in toxicology?
 - A. What does "board certified in toxicology" mean?
 - Q. I am here to ask you the questions, sir.

All I ask you is whether you are board certified in toxicology or not. It's a common certification that most toxicologists who are experts in litigation have. Do you have that?

- A. I -- I -- I consider myself a toxicologist.
- O. Now, you had -- we were talking about imputation methodology. Do you recall that conversation we had and the reference to Dr. Heltshe --
 - A. Yes, sir.
 - Q. -- from your supplemental report?
- A. Yes, sir.
- 24 Q. In your supplemental report, which I will 25 identify for the record now as Exhibit 27-6.

Case 3:16-md-02741-VC Document 1137-7 Filed 02/16/18 Page 16 of 50 Page 54 Page 56 1 (Exhibit 27-6 was marked for identification.) use flawed data to impute what other people were exposed 2 2 Q. Do you have that, sir? to because they didn't respond to your questionnaire, 3 3 then you are going to get flawed imputed data. And all A. Yes, sir. 4 Q. If you look at page 1 of this report, do you 4 of that leads to wrong conclusions because the data is 5 5 see the reference to multiple imputation procedure? inaccurate. And so --6 Q. Do you have -- You use the word "could." Does 6 A. Towards the bottom of the first -- of the 7 7 that mean that it probably did or in fact did? second paragraph? 8 8 A. In my mind it did. O. Yes. 9 9 A. Yes. Q. Well, then why did you use the word "could"? 10 10 Q. And do you see your statement that "the use of A. Why did I use the word "could"? Well, in my 11 11 this speculative method," do you see that? mind if you use bad data in, it's bad data out. 12 12 A. Yes. Q. Uh-huh. 13 13 Q. The term "speculative method"? A. So the data from the -- from the -- that they 14 14 A. Right. initially got in the -- from the questionnaire in the 15 15 Q. "To estimate exposures for the non-responders AHS study is flawed. It's seriously flawed. The whole 16 16 could lead to serious misclassification of the study is seriously flawed. And so the imputation of the 17 17 exposures," do you see that? data gives you flawed data, so --18 18 Q. Can you point me to a publication that says A. Yes. 19 19 Q. This is -- this is your main, one of your main that the entire AHS study is seriously flawed? 20 criticisms of the Andreotti 2018 paper or the NCI 2018 20 MS. WAGSTAFF: Same objection as before. This 21 21 paper; true? report just came out. 22 22 A. Yes. A. Well, I mean, this paper is just published 23 Q. You say that the imputation methodology could 23 online recently, within the past month or so. And it 2.4 24 lead to misclassification, right? hasn't come out officially from JNCI yet. And so it 25 25 A. Correct. they haven't -- and people haven't had an opportunity to Page 55 Page 57 1 1 Q. What is the basis for your suggestion that really look at the paper and express their opinions. 2 2 Q. Has EPA looked at the NCI 2018 publication? these errors in fact led to miscalculation? Can you 3 3 A. I don't know. refer me to any publication or any statement by anyone 4 4 Q. Are you aware whether or not EPA has found that outside of this litigation that says that these -- the 5 5 imputation method in fact led to -- to misclassification imputation methodology and the other methods used by the 6 6 authors in the Andreotti paper to be valid? of exposure, please? 7 7 MS. WAGSTAFF: Objection to your phrase of A. I don't know. 8 8 "anyone outside this litigation." I would like the Q. Do you know whether EPA has found that those 9 9 record to reflect and remind that this article just conclusions are well supported from the Andreotti paper, 10 10 came out online in November. It has yet to be even including the imputation methodology? 11 11 published. We are sitting here on January 10th, A. I don't know. I haven't seen anything to that 12 12 2018. And the paper is titled 2018. So of course 13 13 no one has had the ability to review and critique it Q. Do you know whether EPA has concluded that the 14 14 NCI 2018 paper is evidence that glyphosate is not likely yet as appropriate. 15 15 MR. HOLLINGSWORTH: I object to all your to be carcinogenic to humans? 16 16 coaching objections, which are improper. A. I haven't seen anything to that effect. 17 17

18

19

20

21

22

23

24

25

MS. WAGSTAFF: Noted.

- Q. Can you answer my question?
- A. Okay. As -- as you pointed out, I said that this could lead to serious misclassification.
 - O. Yes.

18

19

2.0

21

22

23

24

25

- A. It could lead to misclassifications because of the seriously flawed data that they are using in -- in the -- in the study. The data that they initially got is seriously flawed. And as I indicated before, if you
- Q. Do you know of any publication or letter to the editor of a publication involving the AHS study which says that it is seriously flawed, as you have stated in your report at page 1?

MS. WAGSTAFF: Same objection.

A. No, I haven't seen any publications or editorials to that effect.

There is an editorial that did come out at the same time in -- on -- as the online publication came

And she -- she warned about the false negatives and getting low risk ratios from -- from data, and used benzene as an example. Benzene, as you know, is a well-established human carcinogen leukemogen. It's also been associated with non-Hodgkin's lymphoma. And early data that came out on benzene in the 1990s gave small relative risks from exposure to benzene, similar to what you have with the glyphosate issue. But there were hints. There were indications. There were low relative risks associated with the data that had been published on benzene.

Later on, they -- a -- there was a large case control study of petroleum workers, looking at their exposure to benzene and various lymphomas and leukemias. And it was finally demonstrated that in fact benzene is a human carcinogen associated with several different kinds of leukemia and also a strong association between benzene and non-Hodgkin's lymphoma.

So the glyphosate seems to be following a similar pattern where there are -- these are signs. Page 60

to know if she used that exact word, I request that you please provide him the paper, if you want to

know if she used the exact word. So --

MR. HOLLINGSWORTH: Well, she said -- he said that Elizabeth Ward supported his conclusion that the use of this speculative -- speculative method to estimated exposure to non-responders could lead to serious misclassification.

MS. WAGSTAFF: Exactly. And if he -- she -- he said it supported the conclusion. But you seem to be hung up on the word "speculative." So if you would like him to look and see if that exact word is used in the study, please provide him the study. If you do not care if the -- that exact word is used in the study, then you can continue on without providing him the study.

MR. HOLLINGSWORTH: I didn't say Elizabeth Ward is a study --

MS. WAGSTAFF: I mean editorial, sorry.

20 MR. HOLLINGSWORTH: Editor.

MS. WAGSTAFF: My bad.

MR. HOLLINGSWORTH: It's a letter.

THE WITNESS: Could I clarify? Your question to me wasn't if Elizabeth Ward's editorial supported the speculative nature of the imputative method.

Page 59

- 1 Even though you have low relative risks reported, it's 2 still real. And -- and glyphosate, like benzene, is a 3
 - carcinogen.
 - Q. Does Elizabeth Ward say that the imputation method used by Andreotti and others to evaluate the AHS report on information on glyphosate is speculative?
 - A. I have to look at the paper to see what she said about that.
 - Q. Did she say that it had, in fact, led to serious misclassification of exposures which invalidated the 2018 report that Andreotti -- that the NCI is going to publish by Andreotti?
 - A. I have to look at the paper to see what she said about that.
 - Q. Well, it's not a paper. It's only --
 - A. Well, an editorial.
 - Q. Yes. You cited it as a reference to your
- 18 two-page supplemental report, right? 19
 - A. Right.
 - Q. You cite Elizabeth Ward as your fifth --
 - A. Right.
 - Q. -- point?
- 23 Did she -- You don't recall whether she said 24 that the imputation method is, in fact, speculative?
 - MS. WAGSTAFF: If you -- if you would like him

Page 61

You were asked -- you asked me if I knew of any papers or editorials that had been published talking about the AHS study.

BY MR. HOLLINGSWORTH:

- Q. And your answer is yes, Elizabeth Ward is one of them?
 - A. Right.
- Q. My question is: Does Elizabeth Ward say that the use of the speculative method of imputation, which Andreotti and her coauthors used, in fact led to serious misclassification of exposure errors?
 - A. I have --

MS. WAGSTAFF: Again, if would you like him to use that word --

- O. You don't recall that?
- 16 A. I have to look at --

MS. WAGSTAFF: Hang on, Dr. Jameson.

You can provide him with the letter. This happened last deposition. If you are going to ask him questions about things, please provide him the

MR. HOLLINGSWORTH: I have a right to test

24 MS. WAGSTAFF: This isn't a memory test, I 25 mean.

Page 62 Page 64 1 1 MR. HOLLINGSWORTH: I -why don't you take a look if you need to. 2 2 MS. WAGSTAFF: That is what this is, then. 3 3 Q. How many references do you have here, sir? So your question is how they did it? 4 Five? 4 Q. Can you tell me how Dr. Heltshe and her 5 5 A. Five. coauthors assessed the imputation method in the 6 Q. Ward is one of them? 6 Agricultural Health Study? 7 7 A. Uh-huh. A. Well, they state in their paper that an 8 8 O. Okay. Heltshe was another, right? overreaching principle of multiple imputations is to 9 9 model the response to -- of interest, in this case the A. Correct. 10 10 MS. WAGSTAFF: Sitting here with a video camera use of pesticides in the interim period between 11 11 on you, while every word that you get taped, should administration of the phase 1 and phase 2 12 12 questionnaires. not also be a memory test. But if that's what you 13 13 They use co-variants from participants and want this to be, that's fine. 14 14 MR. HOLLINGSWORTH: I object to your coaching complete data from both phases, and then applied that 15 objections. They are improper. 15 model to participants missing phase 2 to obtain 16 16 estimates of the missing data. And --BY MR. HOLLINGSWORTH: 17 17 Q. And they came up with a conclusion, which was Q. Okay. Do you have any basis to disagree with 18 18 the statement that multiple imputation has been used to that there was no significant difference between the two 19 19 groups; that is, there was no difference between the account for missing data in large prospective cohort 20 20 group that was -- the 20 percent of the group that was studies, like the Agricultural Health Study? 21 21 from actual, actual data taken from the survey project A. Are you referring to something in -- in a 22 22 and the -- and then using the imputation method on that paper? 23 same group. They came up with essentially the same 2.3 Q. No. My question is, my question is whether you 24 24 results, didn't they? have any reason to agree with that statement? 25 25 A. And that's exactly my point. If you have bad A. As I indicated before, if you have good data to Page 63 Page 65 1 1 use in your imputation of what people possibly were data to begin with, when you impute that bad data, that 2 2 exposed to, then -- then it is proper to use that method flawed data from this flawed study, you are going to get 3 3 flawed data from -- from that exercise. And so you are to -- to guesstimate what non-responders may have been 4 4 just using -- you are just exacerbating the whole exposed to. 5 5 But if you have poor data or flawed data or bad problem of having flawed data, poor exposure assessment. 6 6 data, as you have in the Agricultural Health Study, it And that just exacerbates everything. And so your 7 7 is the old adage of bad data in, bad data out. You are conclusions are all thrown off because you don't know 8 8 just exacerbating the problem you have with poor what people were exposed to. 9 9 exposure data if you impute that data to estimate what O. Do you know of an author which -- a paper which 10 10 people may have been exposed to. So -has been published which supports your view that that 11 11 Q. You -approach by Heltshe is invalid because of the flawed 12 12 A. -- that's why I feel that AHS study is flawed, data that was used in the first place? 13 13 A. Okay. I didn't say the approach was invalid. seriously flawed. 14 14 Q. You -- you cited Dr. Heltshe as one of the five I said that the data that they used was flawed. 15 15 references to your supplemental report; true? O. Okay. 16 16 MS. WAGSTAFF: Objection; asked and answered. A. And so therefore the results that they get is 17 A. As -- as I indicated before, the reference is 17 flawed. 18 18 there because I took a direct quote out of an AHS study. Q. Okay. 19 19 And that reference was included in the direct quote, so A. So any conclusion you base on flawed data is 20 I included the reference for completeness. 20 invalid. So it's an invalid study. 2.1 21 Q. Can you point me to any publication which says Q. Can you describe for the record, please, how

22

23

24

25

Dr. Heltshe and her coauthors assess the imputation

MS. WAGSTAFF: I will request again that you

provide him with a copy. Actually, you have it. So

22

23

24

25

method?

that the AHS study, either the Drews study from '05 or

the use of flawed data and therefore is invalid?

the Andreotti study from 2018 on glyphosate, is based on

MS. WAGSTAFF: Object to outside the scope of

Page 66 Page 68 1 1 PTO 34 with respect to De Roos. Which is D-e space based all of their findings on is invalid in the first 2 2 3 3 Q. De Roos is one of the five references that you MS. WAGSTAFF: Objection. The paper just came 4 used in your supplemental report to the judge in this 4 5 5 case, isn't it? A. I am sorry. Would you repeat. I am sorry. 6 A. De Roos? 6 7 7 O. '05. Have you read or heard anything outside of this 8 8 A. '05. That was the initial publication of litigation at any time that said that the AHS study was 9 9 invalid because the information that they based all of the --10 10 Q. Yes. their findings on is invalid in the first place? 11 11 A. Right. MS. WAGSTAFF: Same objection. 12 12 Q. Yeah. A. So by outside -- define "outside of this 13 13 Can you answer my question? litigation." I'm sorry. 14 14 A. Was there --Q. Outside of any opinions that have been reached 15 15 Q. Can you answer my question? in this litigation, such as yours and other witnesses 16 16 A. What was the question? I'm sorry. for the plaintiffs, can you cite me to anything from the 17 17 MR. HOLLINGSWORTH: Can you read it back, worldwide medical literature that says what you say; 18 18 which is that the AHS study is invalid because the please, Donna. 19 19 THE REPORTER: "Can you point me to any information that they base all their findings on are 20 20 publication which says that the AHS study, either the invalid in the first place? 21 21 Drews study from '05 or the Andreotti study from 2018 on MS. WAGSTAFF: Objection. The paper just came 22 22 glyphosate, is based on the use of flawed data and out. 23 therefore is invalid?" 23 A. Setting here and now --24 24 A. Sitting here now, I can't. But I could MS. WAGSTAFF: Asked and answered. 25 25 probably find something if I'm given a little time. A. -- I can't. But then again, the paper, the Page 67 Page 69 1 1 Q. Are you aware, sir -paper just came out. People haven't had an opportunity 2 2 A. Of -- I'm sorry. Of the -- probably of the to really respond to it. 3 3 De Roos study. Not this 2018 paper, because it hasn't Q. Well, I am referring to the AHS study -- the 4 4 been out long enough for people to respond. AHS study that has been around since the '90s, and of 5 5 Q. Are you aware, sir, that there have been 250 the 250 papers --6 6 articles published in the medical literature, in the A. Oh. 7 7 epidemiology literature in particular about the AHS Q. -- that have been published. Can you point me 8 8 study, and based on the data that has been gathered in to a single one that says that the data they used and 9 9 the AHS study? introduced into this study through the surveys that are 10 10 referred to in all of the AHS studies is invalid in the MS. WAGSTAFF: Objection; foundation. A. 250? What were they? I -- I am sure there are 11 11 first place? 12 tons of -- of publications when the study started --12 A. I -- I -- I --13 13 MS. WAGSTAFF: Asked and answered. He has told Q. Yeah. 14 14 A. -- and during the study, but -you he could if he was given the opportunity. 15 15 Q. Can you point me to a single study that's been A. The -- the -- the one paper I may be able to 16 16 published anywhere that says what you say, which is that refer you to is the Gray 2000 paper; which is a review 17 this study is invalid because the data is invalid in the 17 of the AHS, and they have criticized the design and made 18 18 first place? recommendations for changing. So I know they were very 19 19 A. I -critical and skeptical about the adequacy of it. But 20 MS. WAGSTAFF: Objection; asked and answered. 20 this was before any publications of the data came out. 21 21 A. I can't here and now. But give me -- give me But they were -- they were concerned about some of the 22 22 an opportunity, and I will get something for you. data that may be generated based on the -- their

23

24

25

Q. Okay. Have you read or heard anything outside

of this litigation at any time that said that the AHS

study was invalid because the information that they

23

24

25

knowledge of what the AHS study was.

Q. Are you familiar with the logistic regression

model that Heltshe used to validate the data that was

	Page 70		Page 72
1	used in the AHS publication?	1	Q. Yes. None of those references in your report
2	A. Just what I read in his paper.	2	stated that the AHS collected flawed data, and that
3	Q. Are you aware that Heltshe and the other	3	flawed data has invalidated all of the results from the
4	authors in the study that you used as a reference in	4	AHS, do they?

It's funded by NIH. Q. That's the Federal Government? A. The Federal Government, yes. Q. Do you have any evidence to suggest anywhere in your experience that the AHS study is funded by

Page 76 Page 74 1 A. Being funded by NIH implies that it -- they are 1 Q. Are any of those people from Monsanto or 2 2 employed by Monsanto or are they consultants to 3 3 To my understanding, they are the sole funder Monsanto, to your knowledge? 4 of the AHS study. 4 A. I have no way of telling. 5 5 Q. When you worked for NIH -- did you work for Q. Now, the NCI 2018 study that you have, and it's 6 NIH? 6 been marked as an exhibit in this case, is going to be 7 7 A. Yes. published in the Journal of the National Cancer 8 8 Q. Did your paycheck come from the Federal Institute; isn't that right? 9 9 Government? A. That's correct. 10 10 A. Yes. Q. Do you agree that's a reputable scientific 11 11 Q. Did you consider NIH and NCI to be reputable 12 agencies? 12 A. It's a well-respected scientific journal, yes. 13 13 A. I would hope so. Q. It's considered to have a very high impact 14 14 factor, as impact factors are measured among scientific Q. Did you consider them to be authoritative in 15 the area of human health epidemiology? 15 journals, isn't it? 16 16 A. Yes, they are considered to be authoritative. A. That's true. 17 17 Q. It's in the top five percent of epidemiology Q. And I am including the National Cancer 18 18 Institute within that. Do you consider them to be journals, isn't it? 19 authoritative on human health epidemiology? 19 MS. WAGSTAFF: Object to form. 20 A. They are authoritative, but not infallible. 20 A. It is not an epidemiology journal. It is a 21 journal of the National Cancer Institute, so. 21 Q. Do you think those agencies do quality, high-22 22 quality and reliable scientific studies? Q. It's considered to be in the top five percent 23 A. To the best of my knowledge, they -- they do do 23 of oncology journals; true? 2.4 24 very good, high-quality scientific investigations. A. That's -- that's probably accurate. 25 25 Q. Is it fair to state that you have no basis to Q. Have you ever submitted an article for Page 75 Page 77 1 1 criticize the Agricultural Health Study based on the potential publication in the Journal of the National 2 2 sources of its funding? Cancer Institute? 3 3 MS. WAGSTAFF: Same objection. Discovery has A. I'm trying to think back. I mean, I worked for 4 4 not been completed on the fingerprint of Monsanto of the government for 40 years -- or 40 years ago. I may this study. be a coauthor on a paper that came out in JCNI. I would 6 6 A. Well, I would hope that the source of the have to refresh my memory from all my publications. I'm 7 7 funding would -- would... 8 8 I mean, the source of the funding hopefully Q. So you think there is a publication on your 9 9 would not influence the outcome of the study. I can't list from your CV that is a publication in JNCI? 10 10 MS. WAGSTAFF: Objection. guarantee that it wouldn't, but I hope it wouldn't. 11 11 Q. Does the source of the funding from NIH enhance A. I can't -- I -- I mean, like I said, I -- I 12 the reliability and quality of the AHS study in your 12 haven't wrote to memory all of my publications, so I 13 13 opinion? can't remember for sure. 14 14 MS. WAGSTAFF: Object to form. Q. Have you served as a peer reviewer for JNCI, 15 15 A. In my opinion it probably enhances the the Journal of the National Cancer Institute? 16 16 impression of the study in the general public and A. Not for JNCI, no. 17 probably the general scientific community. But if --17 Q. Do the papers published in the Journal of the 18 18 but -- but you have to look at the individual studies National Cancer Institute undergo a rigorous peer review 19 19 that are supported by NIH and how they are conducted and process? 20 how they are evaluated and the quality of the -- of the 20 A. A. Under "hazardous estimate conclusion." I state in my report, "Based on significant positive association observed in the studies discussed above, I conclude that there is evidence that glyphosate and glyphosate-based formulations are carcinogenic in humans."

So my conclusion of my report says that I believe it's carcinogenic in humans. So that is not inconsistent with what I have in my supplemental report.

- Q. Okay. Does the Andreotti article, which is the National Cancer Institute 2018 study, provide further evidence in your view that there is -- that glyphosate is carcinogenic in humans?
- 23 A. The Andreotti 2018 paper is of a flawed study. 24 The study is flawed. Therefore, it is -- it is very --25 it contributes no -- nothing to my original conclusion

- 1 I think you intended. Right?
 - A. Uh-huh.
 - Q. Okay. And if you look at Andreotti, the
- 4 Andreotti study, the 2018 NCI study, at page 5, you can

Page 88

Page 89

- 5 see that in the non-Hodgkin's lymphoma section of
- 6 Table 2, the number of NHL cases that Andreotti has by 7
 - 2017. Do you see that?
- 8 A. For non-Hodgkin's lymphoma?
 - O. Yes.
- 10 A. Uh-huh.
 - Q. 113, 104, 112, and 111?
 - A. Uh-huh.
- 13 Q. And the total of that is 440, right?
 - A. Right.
- 15 Q. So she had 92 -- AHS had 92 cases as of 2005, 16
 - and 440 cases as of 2017 and 2018; true?
 - A. Okay.
 - Q. Those are cases of people with NHL who had exposure to glyphosate, right?
 - A. Right.
 - Compared to 135 that didn't?
- 22 Q. Compared to 135 controls.
- 23 A. Controls.
 - Q. That didn't.
- 25 A. They were -- They had NHL, but weren't exposed

Page 87

that it's carcinogenic, that glyphosate is carcinogenic

The -- the Andreotti study, again, as I have said before, is based on very poor exposure data. The imputation of that data just exacerbates the -- the exposure information, making it a flawed study. And since it's a flawed study, it should not be used in consideration for the evaluation of the carcinogenic potential of glyphosate or glyphosate-based formulations.

And initially in my -- in my initial report, the De Roos study was also from -- from the AH -- part of the AHS study, the initial report from the AHS study. And it concluded that -- it concluded the same thing that this 2018 paper, that there was no association. But I didn't put any weight on that either.

- Q. Now, the De Roos study, you said, had an insufficient number of NHL cases, which was only 92, right?
 - A. Uh-huh.
- Q. And --
- 22 A. I -- I don't -- I am sorry. I don't know if I
- 23 said insufficient or just a small number. And I don't 24 remember the wording, but anyway.
 - Q. Okay. Well, I will take small. Small is what

1 to glyphosate?

Q. True.

- 3 A. So you have 440 cases of non-Hodgkin's lymphoma 4 from people exposed. 5
 - Q. Yes.
 - A. Versus 135 to people who weren't exposed.
- 7 That's like three times the level of non-Hodgkin's
 - lymphoma in exposed cases versus nonexposed cases.
 - Q. That's not the way you do the calculation in this cohort study, is it, sir? This is not a case control study?
- 12 A. No. But I am just pointing that out, that you 13 have a much significant -- a significantly higher number 14 of non-Hodgkin's lymphoma in people exposed to 15 glyphosate, versus those who were not exposed to 16 glyphosate.
 - Q. Well, that's because the test is on 57,000 people who used glyphosate, isn't it?
- 19 A. Well, I am just pointing out those numbers, 20 that's all.
 - Q. Okay. Did you look at -- to the right of those numbers of total cases on this chart, sir, Table 2 --
 - A. Okav.
- 24 Q. -- to see what the relative risks were?
- 25 A. Sure. .8.

Page 90 Page 92 Q. .83, .83 .88 and .87? A. No. "This evaluation has some limitations"? 2 2 A. For the different quartiles, right. Q. No. 3 3 Q. That's the null, right? That's the null A. No. 4 finding, true? MS. WAGSTAFF: Are you on page 7? 5 5 A. Right. Q. On page 7 of 8. In conclusion. 6 6 MS. WAGSTAFF: Oh. Q. And that's why Andreotti and her authors 7 7 Q. In the right-hand column at the bottom. concluded that there was, quote, "no association 8 8 MS. WAGSTAFF: Above "funding." apparent between glyphosate and any solid -- solid 9 9 tumors or lymphoid malignancies overall, including NHL Q. It's the conclusion of her paper. Do you see 10 10 and all its subtypes." True? that, sir? "In conclusion." 11 11 A. What? A. But that conclusion is based on flawed exposure 12 12 Q. Can you read that? data. 13 13 A. Oh, I'm sorry. I apologize. O. Okay. 14 14 A. So I mean the conclusion, you can't say that Q. It's okay. 15 because you don't know what these people were exposed 15 A. I was looking at it and didn't see it. 16 16 "In conclusion, we found no evidence of an 17 17 Q. Would you agree that the data as it exists now, association between glyphosate use and risk of any solid 18 18 as of the time of your supplemental report, still meets tumors or lymphoid malignancy, including non-Hodgkin's 19 19 the criteria for, quote, "limited," unquote, evidence of lymphoma and its subtypes." But again, that conclusion 20 20 carcinogenicity in humans as you set out at page 19 of is based on flawed data. 21 21 Q. Okay. You disagree with the conclusion? your report? 22 22 A. It -- it --A. I disagree with the conclusion, because her 23 23 conclusions are based on inclusion of the flawed The data as it stands today, including my 24 24 consideration of the 2018 Andreotti paper, I conclude exposure data to the people in the cohort. 25 25 that glyphosate is carcinogenic to humans, as I state in Q. Okay. Now, does the fact that the Andreotti Page 93 Page 91 1 1 my summary on page 31 of my initial report. paper had 440 cases of NHL compared to 92 -- it was 2 2 actually 71, but I will take 92 from your report. Does Q. Uh-huh. 3 3 If you look at -- you're referring to your the fact that there is so many more cases enhance the 4 4 conclusion in your initial report? value or the power of the conclusion that Andreotti and 5 5 A. In my initial report. her coauthors reached that you just read? 6 6 A. Define "powers" for me. I don't know what you Q. Yes. 7 7 A. Which I didn't know we were supposed to be mean by "power." 8 8 Q. What does "power" mean in terms of discussing here, but evidently we are. 9 9 Q. Okay. Well, you looked at your initial report epidemiology? You are the epidemiology expert. 10 10 According to you. because counsel asked you to look at it, so I'm just 11 11 asking you about that conclusion. A. You have more numbers to play with. 12 12 A. Okay. MS. WAGSTAFF: Object; argumentative. 13 13 Q. Okay? If you look at the conclusion of Q. There is more numbers between 92 and 440, isn't 14 14 Andreotti at page 7. there? 15 15 MS. WAGSTAFF: I only asked him to look at it A. One is bigger than the other, yes. 16 16 because you were referencing it. I didn't -- I Q. Does that make this study more powerful than 17 didn't start the questioning about it. Maybe I 17 the other one? 18 18 should have objected to it. A. It makes the second study have -- you have more 19 19 Q. If you look at Andreotti, page 7. numbers to play with, yes. 2.0 A. Okay. 20 Q. Your criticism, your initial criticism of the 21 21 De Roos 25 study was that there weren't enough NHL cases Q. In her "in conclusion" section, can you read 22 22 the first sentence? Do you see that in the bottom of among the exposed --23 23 A. Well, there was a small number of NHL cases, the right-hand column on page 7 of the Andreotti NCI 24 24 2018? compared to the number of NHL cases that were evaluated 25 MS. WAGSTAFF: Under "funding"? 25 in the case control studies.

- 5 A. But it's based on flawed data, though.
- Q. Yes.
- A. I mean the AML is -- or the AML.
- 8 Q. AHS.
- 9 A. AHL -- AHS, excuse me.
- 10 Q. When you said AML you meant --
- 11 A. I am thinking of the metabolite.
- 12 Q. It's all right.
 - A. The -- the conclusions that they have in here is based on flawed data.
 - O. Yeah.

The case control studies that you relied on had a total of 140 NHL cases, right?

- A. I would have to look up my report and see how many they had. But that sounds close to being right, I
- Q. And based on page 5 of Andreotti's paper, as we already discussed, sir, there are 440 NHL cases from the -- from the AHS cohort as of 2017 or 2018, right?
 - A. That's what they say here in the paper.
- Q. So that's a significantly bigger number than

- your reports, is the status of that information, those studies, overall, still sufficient to meet the term, quote, "limited," unquote, as you used it at page 19 of your initial report?
 - A. Based on my evaluation of the -- of all of the epidemiology data available at the time of my full report, which was -- when was that? Back in --
- Q. May.
 - A. May.

All of the epidemiology data, I -- I reached the conclusion that there is limited evidence --

Based on the criteria that I stated in my report, the epidemiology data meets the criteria for limited evidence of carcinogenicity, because a credible association is -- there is a credible association between exposure to glyphosate and glyphosate formulations and cancer in humans, but confounding can't be completely explained away.

But if you take the totality of all the data that's in my report, my conclusion stands as it is on page 31 of the hazard assessment conclusion that glyphosate and glyphosate formulation are carcinogenic in humans.

Q. Now, didn't the same flaws that you have alluded to today during your testimony and in your

Page 95

- 1 what you were talking about in your initial report; 2
- - A. It is a bigger number, correct.
 - Q. Now, do you agree that the AHS information as -- and the studies on the AHS as they currently exist, including the NHI, the -- sorry, sorry, the NIH 2018 Andreotti paper, still meet the criteria for, quote, "limited," unquote, evidence of carcinogenicity in humans, as you used at page 19 of your initial report?
 - A. I am sorry. Could you repeat that again? I --
 - Q. Do you agree that the epidemiology on the AHS cohort as to glyphosate specifically still meets the criteria for the term, quote, "limited," unquote, evidence of carcinogenicity that you used at page 19 of your initial report?

MS. WAGSTAFF: Objection; asked and answered.

- A. No. Because the AHS 2018 paper is based on flawed data, and so it is a flawed study and should not be included in any consideration of the cancer hazard of glyphosate or glyphosate formulations. So it adds nothing to -- to any evaluation because it is an inadequate study.
- Q. As to the epidemiology as a whole, including AHS and the case control studies that you referred to in

1 supplemental report, in the AHS study of farmers, exist 2 in 2005 during the De Roos --

- A. Yes.
- Q. -- study?
 - A. Yes.
 - MS. WAGSTAFF: Objection.
 - A. And there was no -- I'm sorry. There was no association then. And I took that into consideration in my evaluation that it was a -- you know, it showed no association. But there was enough evidence in the case control studies, in the many case control studies, both -- both reported individually and the meta-analysis that were done on the case control studies, that it met the criteria, my criteria for saying that there is limited evidence. There is a -- that a cred -- it is credible to say that glyphosate causes cancer in humans. But as far as the epidemiology studies are concerned, all the confounding and -- and other such issues could not be completely explained away.
 - Q. Isn't that opinion the same definition that IARC uses?
 - A. Very similar. And very similar to the definition used by the Report on Carcinogens.
 - O. Okay.
 - A. I mean, I wrote that criteria for the Report on

Page 97

Page 98 Page 100 1 Carcinogens, so. MS. WAGSTAFF: Objection. You asked and he 2 2 Q. Okay. Okay. answered it. You have to look and see. 3 3 Would you agree that the NCI 2018 study by A. I would have to look at the paper --4 Andreotti has the most glyphosate-exposed NHL cases of 4 O. Okay. 5 5 any epidemiology study ever? A. The information available. I don't -- I don't 6 A. No. 6 7 7 Q. Can you cite me to the study that has more Q. Okay. Well, you brought up NAPP so that's why 8 8 glyphosate-exposed NHL cases in it than the NCI 2018 I'm asking. 9 9 A. Yeah. Andreotti study of the AHS cohort? 10 10 A. I believe the NAPP has more NHL cases in it Q. Did you rely on NAPP in reaching the 11 11 than -- than the AHS study currently does. conclusions that you reached in this case? 12 12 A. No. Q. Okay. 13 13 THE REPORTER: Did you say N-A-P-P? MS. WAGSTAFF: Well, do you mean with respect 14 14 MS. WAGSTAFF: Yes, all caps. to this PTO 34 deposition? Because that's the only THE WITNESS: Yes. NAPP. North American 15 15 thing we are asking about right now. So to the 16 16 Pooled, North American Pooled -extent that you are asking whether he relied on NAPP 17 17 MS. WAGSTAFF: Project. with respect to PTO 34, sure. 18 18 THE WITNESS: Project. North American Pooled Is that how you understood the question. 19 Project is what it's called. 19 THE WITNESS: I assumed that what he was 20 BY MR. HOLLINGSWORTH: 20 referring to. 21 21 Q. Now, you say, you are saying that that has more MS. WAGSTAFF: Okay. 22 22 NHL cases than the AHS cohort? THE WITNESS: That about the -- about the AHS. 23 A. I believe it does. 23 My -- my supplemental report. 24 24 Q. Yeah. BY MR. HOLLINGSWORTH: 25 25 Have you read any of the work by Dr. Blair, who Q. Okay. I didn't see you --Page 99 Page 101 1 1 is an investigator on the national -- on the NAPP? A. I didn't reference it. I didn't. So I didn't 2 A. I have read papers, I have read papers by 2 use it. 3 3 Q. You didn't reference it in your initial report Dr. Blair, yes. 4 4 Q. Do you consider him to be a competent either, did you? 5 5 epidemiologist? A. No. 6 6 A. Yes. MS. WAGSTAFF: Object to the last question; 7 7 Q. Are you -- is it fair to say that he is 8 8 qualified to evaluate epidemiologic data? Q. Are you aware of any epidemiologic cases or any 9 A. I would believe so, yes, since he was head of 9 literature -- excuse me. Let me start over. 10 10 the epidemiology department at the National Cancer Are you aware of any epidemiologic literature 11 11 Institute. anywhere involving glyphosate and the association with 12 12 Q. Are you aware that Dr. Blair has reported a NHL or not, where there is an adjusted odd ratio that 13 13 null finding from the North American Pooled Project with shows a positive association that is statistically 14 14 respect to whether or not glyphosate is associated with significant? 15 15 non-Hodgkin's lymphoma? A. I am sorry. Say that again. 16 MS. WAGSTAFF: Objection; misstates record. 16 Q. Are you aware of any epidemiologic publication 17 A. I would have to look at that and see. I would 17 anywhere that reports for glyphosate and NHL an adjusted 18 18 have to look at the -- at the NAPP information and -odds ratio that shows a positive association that's 19 19 and verify that. I can't say that sitting here right statistically significant? MS. WAGSTAFF: Objection; scope. This is 20 now. 20 21 21 beyond PTO 34 and the impact of the 2018 AHS study Q. You understand my question? 22 22 A. Well, repeat it. on his opinion. You are asking general opinions 23 23 Q. Are you aware that Dr. Blair has reported a that should have been covered in his last 24 24 null finding from the NAPP regarding the association deposition, either of the last two depositions. 25 between glyphosate and non-Hodgkin's lymphoma? 25 Q. Can you answer?

Page 102 Page 104 1 A. I could give you references. Given the Q. Okay. This may be Marketing 101, but press 2 opportunity to go look them up, I could give you some 2 releases are usually used to generate excitement or buzz 3 references, yes. about a study, correct? 4 MS. WAGSTAFF: The deponent prepared for the 4 A. Well, it's to do that, and sometimes it's to 5 5 deposition pursuant to the scope outlined in PTO 34 answer questions. I know that there has been a lot of in Monsanto's request. 6 anticipation for an update of the information in the 7 MR. HOLLINGSWORTH: Okay. How much time do we Agricultural Health Study. And I think that both NIEHS 8 8 have left? and NCI were under pressure to get some additional 9 THE VIDEOGRAPHER: How much do you have? information out. And so they are just announcing to 10 10 MS. WAGSTAFF: Well, how much have we gone? everybody that they finally did. 11 11 MR. HOLLINGSWORTH: How much have we gone? Q. Okay. So it -- okay. So no further questions 12 THE VIDEOGRAPHER: Two hours and 13 minutes. 12 on that. You can put it aside. 13 13 MR. HOLLINGSWORTH: Okay. I'd like to stop now Let's look at the next exhibit, which is 27-2. 14 14 for just two or three minutes. And this is the malathion IARC monograph. 15 THE VIDEOGRAPHER: Going off the video record. 15 A. Okay. 16 16 Q. And just so the record is complete, malathion The time is 11:45 a.m. 17 17 was part of Monograph 112, which also included the (Recess from 11:45 a.m. until 12:13 p.m.) 18 18 THE VIDEOGRAPHER: We are back on the video glyphosate monograph, correct? 19 19 record. The time is 12:13 p.m. A. Correct. 20 20 Q. Okay. And you were part of that Working Group **CROSS-EXAMINATION** 21 21 112, correct? BY MS. WAGSTAFF: 22 22 Q. Dr. Jameson, I have a few follow-up questions A. Correct. 23 23 Q. Okay. And Mr. Hollingsworth said this earlier, based on Monsanto's counsel's questions from you this 24 24 but how are the malathion and glyphosate monographs morning. 25 25 related with respect to purposes of this litigation --Do you have the exhibits that Mr. Hollingsworth Page 103 Page 105 1 1 used in front of you? or of this deposition? 2 2 A. Since both malathion and glyphosate were A. Yes. 3 3 Q. If you could pull up Exhibit 27-1. included as some of the pesticides that were 4 4 investigated in the AHS study, when we did the review, 5 5 Q. Which was the first exhibit that he provided to the IARC review, rather than writing up the description 6 6 of the AHS study in each of the monographs -- because we you. 7 7 What is this document? were doing, I think, up to six monographs at that time, 8 8 and I don't know how many of the -- I don't recall how A. Well, it appears to me, in looking through it, 9 9 as a, more or less, a press release announce -- more or many of the pesticides we reviewed were also part of the 10 10 less announcing that the AHS 2018 paper is coming out, AHS study. So the decision was made by IARC to have 11 11 and just giving some general -- general information a -- the detailed description of the AHS study and the 12 12 malathion monograph, and then refer people to the about it. 13 13 malathion monograph for details of the designs and --Q. Okay. And does it appear that this press 14 14 release was issued by NIH, if you look up at the upper and -- of the study in the glyphosate and other 15 15 left-hand big block -monographs. 16 16 A. Yeah. Q. Okay. And you are speaking with just with 17 17 Q. -- logo? respect to the AHS --18 18 A. Right. And so does it appear that this is NIH doing a 19 19 press release on a study that NIH funded? Q. -- study, correct? 20 A. That's accurate. Actually, I think it looks 20 A. Correct, correct. 2.1 like it came from the National Institute of 21 Q. So it's fair to say that the malathion AHS 22 22 analysis was incorporated by reference in the glyphosate Environmental Health Sciences, NIEHS. And it's not 23 23 unusual for them to put press releases out about when monograph; is that correct? 24 24 they put a paper out that they think may be of interest A. That's correct. 25 25 Q. And that's sort of what Monsanto's lawyer

to a number of people.

Case 3:16-md-02741-VC Document 1137-7 Filed 02/16/18 Page 29 of 50 Page 106 Page 108 1 alluded to earlier this morning. carcinogen, correct? 2 2 A quick review of the malathion monograph A. That's correct. 3 3 during the break shows that it discusses AHS on pages 9 Q. Okay. Let's look at the next exhibit that 4 to 11, pages 15, 16, page 21, page 26 to 31, pages 33 to 4 Mr. Hollingsworth showed you, which is the Helsinki 5 5 36, pages 103 to 104. Would that -- is that -- I sort (sic), Exhibit 27-3. And if you look at page 414, I 6 6 would like to bring your attention to a sentence that of looked at it with you so --7 7 Mr. Hollingsworth did not read to you. A. Yeah, that's -- that's accurate. 8 8 Q. Would you agree with that? A. Okay. 9 9 Q. On the bottom right --A. Yeah, I would agree. 10 Q. So it's a pretty comprehensive analysis of the 10 MR. HOLLINGSWORTH: Where is this? 11 11 NIS study, is that correct? MS. WAGSTAFF: Page 414. It's 27-3. 12 A. Correct. 12 MR. HOLLINGSWORTH: Okay. 13 13 Q. So does this finally put to bed whether or MS. WAGSTAFF: I don't know what tab you have 14 14 not -- strike that. it as, but. 15 Does this finally put to bed Monsanto's 15 MR. HOLLINGSWORTH: Okay. 16 16 allegation that the IARC 112 Working Group did not BY MS. WAGSTAFF: 17 17 consider the AH data when they determined that Q. So if you look at the right-hand column, I can show you guys both sort of where this is. 18 18 glyphosate was a probable human carcinogen? 19 A. Absolutely. I mean, in our review of the data 19 Right here. 20 20 for glyphosate and malathion and I think several others, MR. HOLLINGSWORTH: Yep. 21 we definitely took into consideration the AHS study, the 21 Q. It starts with "For our imputation analysis..." 22 22 data, critically evaluated the data, and stated so in Do you see that sentence, Dr. Jameson? 23 the -- in the various monographs. That was someplace in 23 24 24 here where it -- where it makes a statement about the Q. Okay. If you could read that entire sentence 25 25 adequacy of the -- of the AHS study. I -- I -- I can't until the next period into the record, please. Page 107 Page 109 1 1 remember what page it was on but --A. It states that, "For our imputation analysis 2 2 Q. Well, if you look on page 21, it actually the, quote, outcome, unquote, of interest is the missing 3 3 pesticide use itself. Montgomery, et al., showed there

```
states, quote, "The Working Group considered the AHS to
 4
       be a highly informative study."
         A. Right.
 6
         O. Correct?
 7
         A. That's correct.
         Q. Okay.
 9
         A. Right.
10
         Q. And so it would be fair to -- well, strike
11
       that
12
             So in fact the IARC 112 committee did consider
13
       the AHS strengths when determining that glyphosate was a
14
       2A probable human carcinogen, correct?
15
         A. They did, they did review the strengths of the
16
       AHS study. But -- but I can recall several
17
       conversations that were held in the plenary session
18
       especially, that -- that there was several members of
```

the epidemiology subgroup who were -- who were

data that was being generated by in the AHS study.

Q. So I guess a more accurate question for me

would be: In fact the IARC 112 committee did consider

both the strengths and weaknesses of the AH study when

deciding that glyphosate was a 2A probable cause human

questioning the adequacy of some of the -- some of the

19

20

21

22

23

24

25

- A. It states that, "For our imputation analysis the, quote, outcome, unquote, of interest is the missing pesticide use itself. Montgomery, et al., showed there was little evidence for selection bias in phase 2 of the AHS. However, missing and random is an under -- untenable assumption with" -- Q. Testable.
 - A. I am sorry. -- "untestable assumption without additional data. Thus, it is possible that non-responders differ from responders in variables we have not measured."
 - Q. Thank you.

23

24

25

And so does that suggest that there are differences between the responders and non-responders in the 37 percent of folks who didn't respond to phase 2 of the 2018 AHS?

- A. Absolutely. That -- and again, flawed data gives flawed results.
- Q. All right. Next, unfortunately, I have to clear up the record on something that you really shouldn't have any involvement in.

But if we move to Exhibit 27-5, which is a letter Mr. Hollingsworth showed you, that Ms. Greenwald sent to Ms. Pigman, who is here today; and included Mr. Miller and myself as signatories on this letter.

Page 110 Page 112 1 Have you ever seen this letter before today? MR. HOLLINGSWORTH: Objection, objection. So 2 2 far outside of the area of his expertise, I just 3 3 Q. Do you have any idea of the meaning of this think it's unfathomable that you are doing this. 4 letter? 4 MS. WAGSTAFF: I started by saying I really 5 5 A. No. hate to do this, but --6 Q. All right. I am going to hand you what I will 6 MR. HOLLINGSWORTH: Well. 7 7 mark as Exhibit 27 --MS. WAGSTAFF: -- you produced a incomplete 8 THE REPORTER: Next in order? 8 record asking him. I would have never even broached 9 9 MS. WAGSTAFF: Yeah. this topic in this deposition. You used a letter 10 10 THE REPORTER: 27-8. between counsel to him to suggest and say, "you 11 11 MS. WAGSTAFF: Okay. It is two pages. realize that you are -- that counsel didn't disclose 12 (Exhibit 27-8 was marked for identification.) 12 this." So I am completing the record. I am 13 MS. WAGSTAFF: I don't how you want me to 13 completely confident that the -- Judge Chhabari will 14 14 connect these two pages, just -- they are not understand why I am doing this. 15 stapled. 15 So in fact what Monsanto's attorneys showed you 16 THE VIDEOGRAPHER: Need a stapler? 16 was a half-truth, and I just wanted to correct the 17 MS. WAGSTAFF: Yeah. 17 record on that. So we can -- you can move on. 18 BY MS. WAGSTAFF: 18 MR. HOLLINGSWORTH: Objection to the basis for 19 Q. When Mr. Hollingsworth was asking you questions 19 your statement that it's a half-truth. There is 20 about Exhibit 27-5, you will recall that I was objecting 20 absolutely no basis for that, as I'm sure Judge 21 as to an incomplete record? 21 Chhabari will see. 22 A. Uh-huh. 22 BY MS. WAGSTAFF: 23 Q. I wanted to complete the record here. If you 23 Q. All right. Did Monsanto's lawyers acknowledge 24 will -- These are e-mails from Ms. Pigman, who is an 24 that we declined their request to withdraw those 25 attorney for Hollingsworth LLP to Ms. Greenwald. I am 25 sections of the report in that e-mail, Dr. Jameson? Page 111 Page 113 1 cc'ed on at least one of them. 1 A. It appears to. 2 2 You will see the first is a e-mail from MR. HOLLINGSWORTH: Objection. 3 Ms. Greenwald to Ms. Pigman on May 16, 2017. I will MS. WAGSTAFF: Okay. 4 4 represent to you that the letter that Mr. Hollingsworth MR. HOLLINGSWORTH: Not within his area of 5 5 showed you as 27-5 was the attachment that Robin, as she expertise. 6 6 calls herself in this e-mail, is sending to Ms. Pigman. MS. WAGSTAFF: He can read English. 7 7 You will see Ms. Pigman asks -- you will see BY MS. WAGSTAFF: 8 8 Ms. Pigman asks Robin to clarify if we will withdraw Q. Okay. Do you recall when Mr. Hollingsworth 9 9 opinions not stated in that letter. asked you if you were an epidemiologist, and I believe 10 10 you answered that you were a toxicologist; is that If you will turn to the -- turn to the next 11 11 page, which is a July 24th e-mail, about halfway down, correct? 12 12 starting with -- can you read into the record starting A. Correct. 13 13 with "under the Court-ordered deposition protocol"? Q. Can you explain how being a toxicologist 14 14 A. "Under the Court-ordered deposition protocol, relates to you being an epidemiologist, if at all? 15 15 all of the plaintiffs' experts who will offer testimony A. Well, I think I stated earlier that in doing 16 16 in a specific subject area must be deposed before your -- the work that I did, and continue to do, in 17 Monsanto's experts in the same area. When we raised 17 cancer hazard identification, the requirement is that 18 18 this issue in connections with the original discovery you become an expert in a wide variety of different 19 19 deadlines, plaintiffs sent a letter indicating that the areas; one of which is toxicology, one of which is 20 20 experts' specialties were far narrower than the topics epidemiology, one of which is genotoxicity and mechanism 21 21 disclosed in their reports, but plaintiffs later of action. One is in exposure. And based on the 40 22 22 declined our request to withdraw those selections of years that I have been doing this work, I have gotten 23 23 the -- those sections of the reports that did not match what you considered on-the-job training in all of these 24 24 counsel's letter." areas. My -- my degree is in chemistry, but I have 25 Q. That's good. So --25 been -- but I have done toxicology since -- since I

I have worked closely with the epidemiologists helping them in their studies. I have been asked to review epidemiology studies and papers as part of my work with IARC and give my opinion as to what the epidemiology data is saying, and if it meets their criteria for evaluating epidemiology data as far as being a sufficient evidence or limited evidence in -in -- for causation of cancer.

For the Report on Carcinogens, I also have worked with epidemiologists who help us evaluate the nominations for the Report on Carcinogens. As part of my responsibility, I wrote criteria for evaluating epidemiology data for the Report on Carcinogens. And those criteria are still used today in evaluating the data, the epidemiology data for the Report on Carcinogens.

So while I profess to be a toxicologist, you can't say, well, I am a toxicologist and an epidemiologist and a mechanistic expert and a genotoxicologist and what have you. I take on the moniker of toxicologist.

But you have to understand that in doing hazard

1 his area of expertise.

> Q. When you worked at NIH, did you -- were you ever -- did -- did.

Page 116

Page 117

When you worked at the NIH, did the NIH ever fund any research?

- A. Any of my research?
 - Q. Any research, period.
 - A. Oh. Yes. Any research period, yes.
- 9 Q. Was it your understanding while you worked 10 there that in doing so the NIH was guarantying or 11 warranting the accuracy of that? 12

MR. HOLLINGSWORTH: Same objection.

- A. They were not guarantying or warranting any of the data. They would insist that the investigators follow such things as good laboratory practices or good quality control practices and that type of thing to ensure the accuracy, accuracy of the data. But they couldn't guarantee or warrant, warrant any of that.
- Q. Okay. And you discussed earlier with Mr. Hollingsworth the JNCI, correct?
 - A. Correct.
- 22 Q. And the JNCI stands for what?
 - A. Journal of the National Cancer Institute.
 - Q. Okay. And the Journal of the National Cancer Institute is scheduled to publish the 2018 AHS study in

Page 115

- 1 identification, you have to become an expert in all of
- 2 these areas in order to evaluate the data and give an
- 3 opinion. And so while I don't have the degree in
- 4 epidemiology, I have the experience and training to
 - consider myself an expert in epidemiology to evaluate this data.
- 7 Q. All right. So would it be fair to say you were
 - an epidemiologist by training, by on-the-job training?
 - A. By training, yeah.
 - Q. Okay.
 - A. As I said, on-the-job training is -- is as good, if not better, than -- than getting a college degree.
 - Q. All right. And you testified earlier that you worked at the NIH, right?
 - A. Correct.
- 17 Q. All right. And you testified earlier, I 18 believe, that the NIH funded, at least in part, the
- 19 research behind the 200 -- 2018 AHS study?
 - A. Correct.
 - Q. In doing so, was the NIH guarantying or warranting that the research was accurate or the veracity of the research?
 - A. No.

MR. HOLLINGSWORTH: Objection. That's beyond

this calendar year; is that your understanding?

- A. That's my understanding.
- 3 Q. In so publishing, is the JNCI guarantying or
- 4 warranting the accuracy or veracity of the article?
 - A. No.
 - MR. HOLLINGSWORTH: Same objection. He is not an expert in that.
 - MS. WAGSTAFF: I will pass the witness back to you for your remaining 17 minutes.

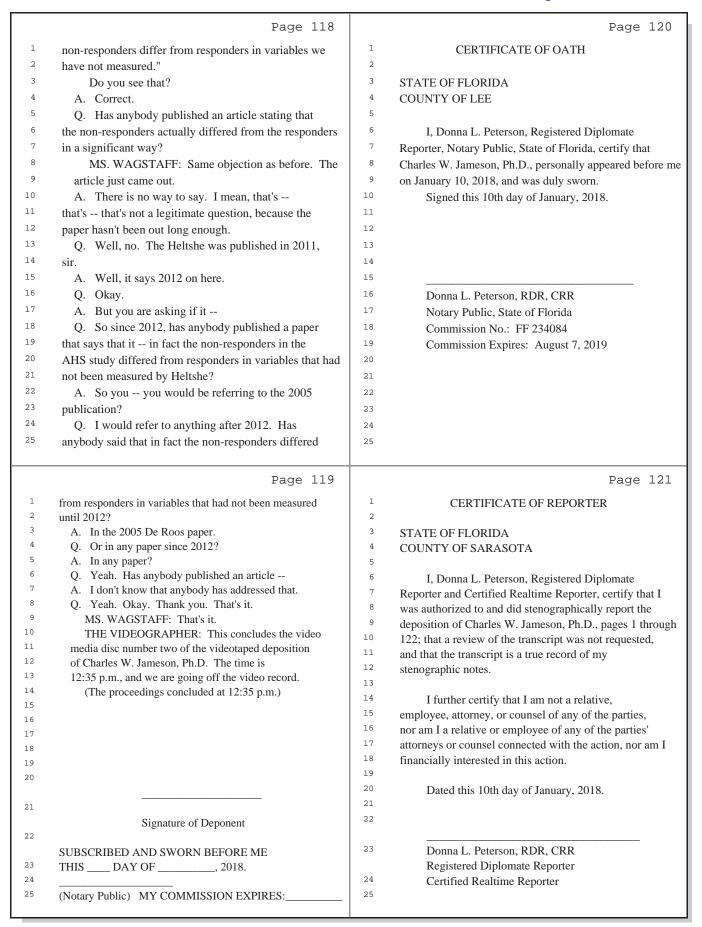

REDIRECT EXAMINATION

BY MR. HOLLINGSWORTH:

12 Q. Okay. In the article by Heltshe, if you will 13 turn to the sentence that you quoted for the record 14 which is at page 414. And this is exhibit --

What is the exhibit on this, sir?

- 16 Exhibit number?
 - A. Exhibit 27-3.
 - Q. Okay. And this is the paper by Heltshe?
 - A. Uh-huh.
- 20 Q. It's entitled, "Using multiple imputation to 21 assign pesticide use for non-responders in the follow-up 22 questionnaire in the Agricultural Health Study," right?
- 23 A. Correct.
 - Q. Okay. When -- the last phrase of the sentence you quoted says, "Thus, it is possible that
