**PRETRIAL ORDER NO. 41:
RE CONFIDENTIALITY OF 1983
MOUSE STUDY**

Re: Dkt. No. 1168

It is difficult to understand how Monsanto's mouse study from 35 years ago could justifiably remain confidential in this litigation. At the hearings on general causation, the plaintiffs will be permitted to elicit testimony about the study without restriction. If Monsanto truly believes the study should only be admitted under seal, it can use its time during the hearings to explain why that's the case.

IT IS SO ORDERED.
