Eric

Just wanted you to know that the letter will go to EPA Administrator Jackson today over Nina Federoff's signature. Nina really picked up the ball and moved it down the field.

She has collected over 60 NAS signatures including Jim Watson and Günter Blobel. She wrote an editorial that she is trying to have placed in the NYT. And Nina, Bob Haselkorn and I have written an editorial for the FASEB journal.

I attach the final letter and signatory list (embargoed and for internal use only).

I for one am really pleased to see scientists speaking out this time before the train wreck happens
