**Subject:** work plan update

Team,

As a follow up to our DWG/CWG meeting (also attended by MON and BASF RWG members), we need to tabulate brief minutes—topics discussed and decisions/action items assigned.

I have attached a short list from the CWG conversation please send me the others so we can compile and circulate to the BASF team for review and then legal approval. Remember that less is more. Also, please respond by week's end—thanks.

- Teams discussed work plans that were approved last Friday. Based on AMT input we highlighted a few points that represent important milestones and interdependencies between the teams. A few other annotations are also made in the attached. MON/BASF team leads will review and finalize. Sheila Schuette will pull out highlighted dates for a key milestones and interdependencies document.
- CWG—BASF team offered input on system messages. Monsanto will consider as part of a message update and provide BASF with final updated Monsanto version. To be completed by July 18<sup>th</sup>.
- CWG—BASF inquired about use rights for Monsanto photos of dicamba weed control plot and untreated check for use in August BASF investor relations presentation and on other occasions. Andrew Burchett

confirmed MON IR engagement and support for August presentation and will check on photo availability.

- CWG—discussed how best to enhance communications and collaboration. Ron Repage to schedule regular calls at two-week intervals.
- CWG—Discussed long-term planning needs for Commodity Classic press conference reservations. Determined best course is for both companies to reserve time for rollout announcements to allow flexibility in planning.
