Walter,
Let us know what you get set up.
Thanks,
Gary

Minneapolis is the most probably location due to the relatively close proximity to Des Moines and Fargo and convenient flight connections.

I am open after the 22 of October. Where would the meeting be? If in Iowa I would request Storr there because of his relationship with Owen.

Subject: meeting with academics

Hi Gary,

As you may know, a few academics have conducted a single large plot trial where they are observing some irregularities with Engenia. Mike Owen has requested a meeting to discuss these observations with all parties (BASF as well as Dallas Peterson and Rich Zollinger, the other academics that have similar observations). The current dates under consideration are Oct 5, Oct 8 to 11, Oct 24 to 26, and Oct 30 to 31. The objective of the meeting is a fact finding mission and to share our science with them on a more detailed level.

Luke and I both believe it would be valuable to have additional tech service representation, but wanted your opinion on the most appropriate folk(s) (you or local rep, etc).

Regards,

Walter
