Subject: RE: OTM-driftee Midwest region
Attachments: 2017 midwest FES dispatches.xlsx

Ty, we got 9 more OTM-driftee's for the Midwest region yesterday so up to 38 now. Including comments from HGS on this updated filtered spreadsheet as it is obvious some consider themselves good MON customers and are expecting a contact. For the last week, I no longer send emails for these out to the associated CAMs so currently no field reps know about them.

Subject: OTM-driftee Midwest region
Importance: High

Ty,

I filtered my spreadsheet for the OTM-driftee (29 to date) and attached it to give you a list of customers (known non MON are clearly marked) that I will need a purchase history to determine if they are "good MON customers" and thus need a dispatch. If it is possible for you to identify what brand they support (Asgrow, Channel or regional) while you are looking, we may want to loop in the branded agronomist in the area for assistance.

Our plan would be to dispatch out certain FESs that we have identified to handle these situations.

I await the results of your findings before we proceed.

thanks
