Yes, Scott is right and now the free lunches at Cotton Team Meetings are gone.

Ty,

You are right... Actually soybean pays my salary and I get a weekly lunch from the cotton team... That I all get to work with a group of renegades that launch a technology without a label and thinks one sticker is going to keep us out of jail... If that was the case, Rhylander would be covered in stickers

Think it is like one of those baseball deals where we agreed to eat most of the contract just to get another team to take him

I don't know who BOLLMAN buffaloed Bryan because he isn't worth that much. No wonder he was so quick to leave us with that big salary waiting....

Thanks guys. I am going to give Mahaffey a call to give him a heads up. I think for the cost, these save us a bunch.

Great, because it is also slim pickin's on the Cotton Team now that we are having to pay some of Bollman's salary!

I will plan on ordering 10 and send top Jay Mahaffey at Scott if that is agreeable with everyone?

Bryan

I think we could handle this. If we want to order 10 let's go ahead and do it.

Just let me know when you're ready for a cost center to charge to.

Money??????? Jordan???????

10 should cover us. With 100 strips per kit, there is not much need to overstock. And only a few TAs would need to be the keeper for any given geography if the need arises.

Ty,

How many do you think we should have and do you have the money to pay for the kits?

We could probably use some. Agree with having them on hand at Scott for distribution on an as needed basis.

Subject: FW: Envirologix Test Kits

Jordan/Ty,

I was just thinking ahead to potential issues that we will have with Xtend and growers confusing fields, spraying wrong fields, etc and thought about having some of the gene kits ready to go. For BGII and RRF, Leland used to keep them around and they would send when we issues or problems occurred. I have not talked to Jay Mahaffey yet, but I bet he could be our go to man if we need them sent. I see in Bryan's note that it may take some time to even get the initial order in. Just waited to pass along to you guys to think about.

Scott,

I talked with Lee Daughtry with Envirologix and he is checking to see if they have any field test kits (w/ buffer, tubes, strips, pestle) made up and the cost. It sounds like they usually make to order and it could take 2-3 weeks to create, so we probably

want to order some and have on hand as you say
with someone like Jay at Scott.

Do you have a ballpark figure on how many we
could need. I think they come in 100 strip kits.
Maybe 25-30 kits?

Bryan
