Hi [REDACTED]

Thanks for the kind words. The Science20 site looks far more technical than what I do in my blogs, but I see there are some that are not mainstream science blogs. Feel free to pass my contact info and blog page along to [REDACTED]. In this age of science under scrutiny and attack, the more voices the better so if the Science20 site would share my blog, that would be great.

Cheers,
Stuart

Stuart, this blog is great!

If it's alright with you, and I'm going to put you in touch with [REDACTED], the owner of Science 2.0, a blogging site for scientists. (I do community management for that site.) He would very likely enjoy your work and would want to cross-post content on his page. Would that be something you'd be interested in?

Here's the site:
<http://www.science20.com/>

Let me know, and I can put you guys in touch.

Best,
[REDACTED]

Hello Dr. Smyth,

By way of introduction, I am chair of the CropLife Canada Sustainability committee and also head up the BASF business in Canada. Earlier today, your name came up regarding a small project we are working on within CropLife Canada that I would like to explore with you. I will be in Saskatoon on other business on March 2nd and March 3rd. Would you be available either day for at 4pm on either date for a one hour meeting?

Thank you,

[REDACTED]

Hi [REDACTED]

Thanks for this and for identifying the potential for bias in the abstract. Very important that we methodologically approach this from as neutral a perspective as is possible.

[REDACTED] if you have a chance to skim this over that would be great. As we are just launching this project, we can easily add any additional search words or terms.

Cheers,
Stuart

Subject: Re: Meta-analysis on changing bee populations

Stuart,

Thank you for seeking input on this initiative. I have copied others, particularly [REDACTED] for comment as well. [REDACTED] completed her MSc in bee health at Guelph and has joined us as our bee health technical resource. I would ask her to provide feedback as well.

I think your key word search covers the major topics well. I am working on my iPhone and cannot read the abstract while responding, but do not recall habitat loss in the search. This should be considered.

One concern I have is the supposition in the abstract that bee populations are declining. In fact, honey bee populations are increasing and information on native pollinator populations is lacking making it difficult to definitively quantify their populations.

Hope this helps.

Sent from my iPhone

On May 9, 2016, at 1:08 PM, Smyth, Stuart <stuart.smyth@usask.ca> wrote:

Hi [REDACTED]

I've hired one of my MSc students to stick around a bit longer and undertake a meta-analysis of the literature on changes in bee populations. I've attached the abstract and the list of key words. If you have an opportunity to review this and provide any feedback on key search words that we've overlooked, that would be greatly appreciated.

Cheers,
Stuart

Subject: Re: Meta-analysis on changing bee populations
Date: Tuesday, May 10, 2016 5:29:39 AM

Stuart,

Thank you for seeking input on this initiative. I have copied others, particularly [REDACTED] for comment as well. [REDACTED] completed her MSc in bee health at Guelph and has joined us as our bee health technical resource. I would ask her to provide feedback as well.

I think your key word search covers the major topics well. I am working on my iPhone and cannot read the abstract while responding, but do not recall habitat loss in the search. This should be considered.

One concern I have is the supposition in the abstract that bee populations are declining. In fact, honey bee populations are increasing and information on native pollinator populations is lacking making it difficult to definitively quantify their populations.

Hope this helps.

Sent from my iPhone

On May 9, 2016, at 1:08 PM, Smyth, Stuart <stuart.smyth@usask.ca> wrote:

Hi [REDACTED]

I've hired one of my MSc students to stick around a bit longer and undertake a meta-analysis of the literature on changes in bee populations. I've attached the abstract and the list of key words. If you have an opportunity to review this and provide any feedback on key search words that we've overlooked, that would be greatly appreciated.

Cheers,
Stuart

Gentlemen:

Please find attached a copy of the agenda for your visit in early May along with the announcement for your joint seminar. While there may be minor changes to it, we will be following this schedule pretty much as it is laid out. We will ensure that you have access to campus (badges). [REDACTED] will drive you to our Creve Coeur site on Monday morning. I will be there to greet you at security and get you to your first meeting.

A couple of things:

- 1) Please let me know what your arrival and departure times are and where you will be staying (Chase Park?)
- 2) If possible, provide me with copies of your presentations by early Monday morning at the latest. I can then load them onto my laptop and get things prepared for you in the Auditorium in advance of the seminar (10:30 a.m.).

We are looking forward to your visit and to having some great discussions!

Best,
cami

Hi [REDACTED]

Thanks for the email and your interest in our survey project. Given that we are early in the project, we have not gathered sufficient data to be able to undertake assessment or analysis upon. We expect to have this data gathered by this summer, following survey 5.

I've attached a summary of the project from last summer that gives an overview. We presently have 2 papers under review and we hope to have a favourable review of these 2 papers and we should be able to share these by the summer.

I have attached one article that was some of the preliminary work on this project, published last fall in the Canadian Journal of Agricultural Economics.

Please feel free to keep in touch so that we are able to share results with you as they become available.

Cheers,
Stuart

Dear Sirs

My name is [REDACTED] and I've been participating in your survey since you launch it. I am also participating in several committees where we discuss the regulations of NBT (Seed association of the Americas, international seed federation, CropLife, Asociación Argentina de Semilleros, etc)

I wonder if it's possible to access to partial reports of the conclusion of the previous editions of the survey or if you are preparing reports comparing the results from one edition .

If you could indicate me how to access to them, I would be very interested in including this in our conversation in the committee. I think this could be a valuable source of information to orient our efforts to have a consistent and rational regulations for NBT.

Thanks you in advance.

Subject: NBT survey update

Hi [REDACTED]

I know that last week on the update call, I mentioned that I'd have some results of the NBT surveys by summer. I just met with the woman leading the research on this project with me and she thinks we can have results by late May. The survey on scientific certainly has results and we just launched one on regulatory certainty. We will launch one on commercialization certainty in mid-April and by the end of May, we'll have some results from this one, allowing me to report on the results of all 3 surveys and compare and contrast the results.

Just wanted to give you an update on this.

Cheers,
Stuart

Stuart,

Thank you for the note and invitation. I also have a message from [REDACTED] to which I will also respond. I hope to use his note as added "leverage" to get some of my global colleagues over to see what is going on in Saskatoon.

I am not sure when I will next be in Saskatoon, but will be certain to build in the time to sit down and discuss some of these ideas further. Meanwhile, keep up the battle with the mosquitoes!

Freundliche Grüße / Best regards,

Hi Cami,

This looks good. We've been in touch with [REDACTED]. He is hoping we might travel to Columbia for his Orthodox Easter celebration on Sunday, but he isn't sure he will be able to pull this off as he returns from an international trip on the Thursday prior to the weekend. Me is planning to be in SL on the Monday.

No hotel reservations made yet, but will plan to make them as indicated below.

Given the Blues past playoff performance, they will likely be out of the playoffs by then, so no need to try to go to a playoff game!!

Cheers,
Stuart

Subject: RE: please include me on the list for survey's regarding Crop Life and regulatory uncertainties around new breeding techniques
Date: Tuesday, February 07, 2017 9:08:00 AM

Hi [REDACTED]

Thank you for your interest in participating in our survey series on NBTs. The easiest way to participate is to go to the project's website and sign up. This way, your name will automatically get added to the participant database.

<http://research-groups.usask.ca/nbt-regulation/>

If you complete the demographic survey, that would be great. We just sent out the newest survey last week on regulatory uncertainties regarding NBTs. The previous one on scientific uncertainties is still open and if you wish, you could complete that one as well.

Cheers,
Stuart

Date: Tuesday, April 25, 2017 8:30:00 AM

Hi Sarah,

In taking a closer look at this, I spotted a couple of corrections.

- [REDACTED] has set the registration cost up to be 100 euro for other participants and this version shows \$100
- Now that the final event will be at Giannini Hall, we could make this change

It looks great, thanks for investing the time to jazz it up!

Cheers,
Stuart

Subject: RE: potential speaking opportunity
Date: Tuesday, August 23, 2016 12:55:00 PM

Hi Cami,

Thanks for thinking of me, [REDACTED] too! I think this would be a very interesting talk to give and with some of the research by Brookes and Barfoot and Wally Tyner, it would be possible to anchor this really solidly.

Cheers,
Stuart

From: RYAN, CAMILLE D [AG/1000] [mailto:camille.d.ryan@monsanto.com]
Sent: Tuesday, August 23, 2016 12:34 PM
To: Smyth, Stuart <stuart.smyth@usask.ca>
Cc: [REDACTED] [AG/1000] <[REDACTED]@monsanto.com>
Subject: potential speaking opportunity

Stuart:

Just a 'heads up'... My colleague, [REDACTED] (cc'd), had an organizer from [REDACTED] subsidiary of [REDACTED] reach out to her asking her if she knew of someone that would be interested in speaking at a conference about the actual implications of withdrawing the technologies. What implications would removing or using less GMO technologies have on sustainability, yields, cost, the global food supply chain, etc? There is a good crowd of producers and major buyers from food service and food buyer side: Food service/sellers (Walmart, Aldi), food processors (e.g Tyson, Butterball), commodity investors/bankers (BMO, Blue mountain capital), purchasers for restaurants (Chick-fil-A, IHOP)

They would like to have someone speak on:

The Implications of Removing Technologies from Food & Agricultural Production:

The media, activists, and marketing strategies have increased consumer's interest and perception about production practices used in food and agriculture. There are a wide range of views on the use of these technologies. The use or removal of technology in these processes have direct economic implications, supply chain challenges and sustainability consequences. We will review some of the direct impacts and effects on production costs, supply and markets.

I hope that you don't mind, but we passed along your name / contact info as a potential candidate to speak at the conference. I think that you are in a good position to address some of the broader issues around modern ag in a really compelling way.

Best,

Cami

Subject: Presentation slide

Hi [REDACTED]

I really enjoyed [REDACTED] talk yesterday morning. He included one slide that illustrated the consolidation of the agbiotech sector that was incredibly interesting. I'm wondering if it might be possible to get this slide to use in my teaching to show the students how the industry has changed over the past 20-30 years. I realize it might not be possible to receive this, but if possible, it would be very useful.

Cheers,
Stuart

Hi Sarah,

No worries, summer and holidays is a busy time. The grant submission went in on Aug. 1 and we should know within a few weeks if we were successful. At this point, there isn't a need to do anything. If we are lucky enough to get the grant, then we will proceed with the workshop next spring and get back in touch with you on your ability to participate.

Enjoy the rest of the summer!

Cheers,
Stuart

Subject: question...

Stuart:

Are you aware of any Arizona State-specific socio-economic-environmental impact studies on GM crops? Activists have been successful in raising the impact of GM, glyphosate, coexistence & several other concerns locally in AZ and there is need for this kind of research as a reference. Do you know any economists working locally there that is familiar with this jurisdiction? Have you reviewed this?

If not, do you know of someone, preferably in AZ, who could crunch some numbers in a quick turnaround (couple of weeks / early-Jan)?

There was nothing in the handbook about it, so if something existed that would have been a good place to identify it. Try [REDACTED], he is more knowledgeable about GM cotton than anyone else.

Cheers,
Stuart

Hi All,

Hope the spring weather finds all of you well.

I was invited to write a piece for a special issue of Policy Options on agriculture and have just had the piece published. This one is a short summary on the importance of efficient regulatory systems for crop innovations. It is available at: <http://policyoptions.irpp.org/magazines/may-2017/is-canadas-agricultural-regulatory-system-competitive/>

I've attached two other articles that have been published in the past couple of months. Great reading for your deck with a cold beer or nice glass of wine this weekend!! Ha ha!

Cheers,
Stuart

Subject: RE: Recent publications

Hi [REDACTED]

Many thanks for this, especially your table and the recent CAST paper.

I gathered this list by going through all of the CFIA decision documents from 2010 onward. The list that is in the paper is based on my interpretation of the information available in these documents. I whole-heartedly agree that someone with more science knowledge than I have could easily classify them differently than I have done.

I included Arctic apples as they down-regulated the genes for oxidation. Based on this, I included it as gene editing. I'd like to talk with you further about this. Monday is the deadline for submitting conference papers to a major biotech conference I'm involved with, so would you be available later in the week?

Cheers,
Stuart

Subject: Reception logistics

Hi All,

I spoke with [REDACTED] this afternoon about some of the things we'd need to have in hand to suggest to [REDACTED] that the welcome reception be combined with the pre-conference social. She indicated that we would need to find a venue that is close to the Berkeley Club that would have the ability for us to have a bit of a formal program (for lack of a better description) and then the reception. Once we identify the venue, we would need to ask them for a quote. Once we have the quote we could approach [REDACTED]. If we are able to fully fund the welcome reception, then this would certainly increase the appeal of the idea.

[REDACTED] is supportive of the idea, but she raised an important point, in that the quote for the Berkeley Club may depend on the event being held there. We won't know this until we approach [REDACTED] with the idea.

Do any of you have ideas on how to find a venue that might be suitable?

Cheers,
Stuart

Stuart and [REDACTED]

This was so much closer to what we need for our site.

I've made some modifications (mainly at the top).

We need more of a journalistic top. So that's what I've added.

I also made a few minor trims and rewordings here and there.

I hope you and [REDACTED] can look it over again. I'd love to run it in the next week or so – but won't do anything until I hear back from you.

Subject: Revised draft

Hi [REDACTED]

Thanks for your patience. As the term approaches the end next week, time becomes increasingly scarce.

[REDACTED] and I have both worked on this version. [REDACTED] has reorganized it along the lines of your suggestions and we've both worked as revising the content downward. The attached version is about 1000 words shorter than previous.

If there are further edits required, I can fit them into my schedule quite quickly now.

Chers,
Stuart

Subject: RE: Ryan Smyth - Canadian GM Flax Chapter 2016 CDR July changes accepted-2.docx
Date: Tuesday, July 26, 2016 11:00:00 AM

Hi Cami,

Going to start working on this now, just back into the office today. Will turn this around today.

The stewardship program has not ended and I will pull a blurb from another article that addresses this.

Cheers,
Stuart

From: RYAN, CAMILLE D [AG/1000] [mailto:camille.d.ryan@monsanto.com]
Sent: Thursday, July 21, 2016 3:08 PM
To: Smyth, Stuart <stuart.smyth@usask.ca>
Subject: Ryan Smyth - Canadian GM Flax Chapter 2016 CDR July changes accepted-2.docx

Stuart:

I'm passing this along to you. I made some changes and restructured bits. It probably needs more updating. I was trying to find info on the stewardship program and if and when it actually "ENDED". I couldn't find anything. I also wondered if we should include references to Viju, Kerr pubs. I was going to work on that tomorrow but – as it turns out – I am taking the day off. [REDACTED] came in for a surprise visit last night and I would like to spend time with her before she leaves on Sunday.

Take a look and fire this back to me when you get a chance.

Hi All,

I just wanted to take a moment and thank all of you and your organizations for your support of my research chair. The main form of communication for my chair has been the establishment of the blog SAIFood. I learned today that SAIFood has been voted as one of the top 50 ag blogs in North America, coming in at 37th position. You can check out the entire list at:
http://blog.feedspot.com/agriculture_blogs/

Without your support for this research, none of this would have been possible, so a huge thank you from me to all of you for your confidence.

Of course, none of the success of SAIFood would have been possible without [REDACTED] help. She has been the creative genius behind SAIFood, making sure it get out on time and looks amazing every week. A big thanks from me also goes to [REDACTED]

Thanks again and I look forward to bringing more research to the publics attention.

Cheers,
Stuart

Subject: RE: Scheduling the AGM?

Hi [REDACTED]

The pre-conference agenda does not match up with what we have organized and it outlined in the flyer Sarah created. There are 3 sessions in the pre-conference:

- <!--[if !supportLists]-->1. <!--[endif]-->8:00 – 10:30 New Players, New Tools: Insights in Science Communication - Science into Story with Nathanael Johnson and Alison van Eeneenaam at the Berkeley City Club
- <!--[if !supportLists]-->2. <!--[endif]-->13:30 – 5:30 New Players, New Tools: Insights in Science Communication – Workshop! which will be led by Story Collidor at the Berkeley City Club
- <!--[if !supportLists]-->3. <!--[endif]-->6:00 – 7:30 New Players, New Tools: Insights in Science Communication – Science & Hollywood at the Giannini Building

The 3rd session is going to be held at the Giannini Building so that this session can merge into the Welcome Reception for the conference. There will be representatives from the National Academy of Science committee on GM crops there as well as producers, writer and researchers of TV shows and movies that are very interested in interacting with the academics in attendance.
