Subject: RE: Construction Notice of Intent (NOI)

The only difference is the wet cake we currently have is treated seed corn and the wet cake fed to cattle is usually yellow corn. Other than that, they would be identical.

What is the difference between the wet cake fed to cattle (mentioned in the SWPPP) and the Wet Cake you talk about going to the Bio Char system?

The SWPPP does not mention this area... How long has the Bio char system been in use?

We don't have a formal name for it, but it is the area where we prep the wet cake for the biochar.

Hi Scott, Question: The area north of your office is that wet Cake storage? I have forgotten the name of that area.

Thank you

Mr. Pomajzl,

Thank you for the update. I have attached the NDEQ Stormwater Permit NOI Renewal Receipt and the AltEn SWPPP Industrial Plan as requested. Additionally, they are currently in the process of reestablishing the berm we discussed. Finally, we have already discussed the BMPs with the construction manager and we will send photos once we are able. Have a fun (and safe) Fourth of July!

Scott

Dear Mr. Tinglehoff,

I have found the NOI for the Construction permit, the SWPPP was not attached to the NOI, so I still need that information along with the Industrial side SWPPP. Please talk to the construction manager about the BMPs, once the BMPs are in place please provide photos of these as well.

Thank you
