ICI MELBOURNE

DR MIKE ROSE C/O DR R.E. DAVIES

IN THE LATEST GROUP OF MONKEYS TREATED WITH PARAQUAT ALONE
4 OUT OF 4 DIED. WITH EMETIC 3 OF 4 SURVIVED. IN
THE LD50 STUDY 500 MGS PARAQUAT/KG PLUS EMETIC KILLED BOTH
MONKEYS DESPITE THE FACT THAT VOMITING OCCURED. HRC ARE
NOW TRYING 250 MGS PARAQUAT/KG PLUS EMETIC. IF THIS IS
NOT SUCCESSFUL THEN I HAVE SUGGESTED 250 MGS PARAQUAT/KG
PLUS EMETIC GIVEN IN COMPLAN IN ORDER TO OPTIMISE THE
EFFECTIVENESS OF VOMITING. IF YOU DO NOT AGREE PLEASE
ADVISE.

NB. I UNDERSTAND THE LD50 IN MONKEYS TO BE APPROX.
70 MGS/KG AND WHEN GIVEN IN COMPLAN TO BE APPROX. 80 MGS/KG.

HOPE YOU ARE ENJOYING YOUR VISIT, VERY LITTLE TO EXCITE YOU
AT CTL.

BEST WISHES
