AGREE THAT STUDIES WILL HAVE TO BE CARRIED OUT WITH U.S. PARAQUAT FORMULATION WITH AND WITHOUT STENCH AND THESE ARE IN HAND. CAN YOU EXPLAIN REQUIREMENT FOR DATA IN SECOND NON VOMITING SPECIES. I SUGGEST WE AWAIT REVIEW OF AVAILABLE TOXICITY DATA BY CHEVRON AND CTL BEFORE INITIATING NEW STUDIES AND I AWAIT YOUR VIEW OF PROBABLE EPA REQUIREMENTS. AT PRESENT TIME IT IS INTENDED THAT WORK WITH EMETIC WILL BE CARRIED OUT BY CTL.

RE SHIROMA CASE, IT APPEARS FROM PLASMA DATA THE GUT LAVAGE NOT CARRIED OUT EFFECTIVELY (DAY 1 0.2 PPM DAY 2 0.2 PPM DAY 3 0.14 PPM). SURPRISED THAT DEATH OCCURRED IF ONLY 10 ML INJECTED AND TREATMENT STARTED WITHIN 1-2 HOURS.
