

The following Japanese fatalities were counted as potential recoveries:
226/75, 227/75, 229/75, 230/75, 231/75, 236/75, 237/75.

Dr Howard, as you know, has better data than me as a result of his medical follow up and may wish to make drastic alterations to my UK estimate.

R E Griggs
