Dear Frede

Thank you for the copies of the Norwegian newspaper articles. I assume that Johannes Barstad is fully aware that we are not claiming that the emetic will 'prevent' mortal poisonings! Do you think this is a misquote of what he said or do you believe he put our ICI case much more forcibly than we would to defend his position? Such a statement could rebound heavily on us.

There is no mention of the stench, except in your covering letter. Did Barstad believe this was not important when you discussed it with him?

We must all be relieved to see 'Gramoxone' will not be banned though there is pressure to prevent widening the product users. I would still like to see us attempt to widen our registration to include potatoes but what do you think now?

Yours sincerely

A G Potter
