Dear Hans,

Many thanks for your letter of 18 and 22 May.

(See wallet)

I passed on to CTL copies of the analytical methods for diquat (AF-5-1) and paraquat (AF-8-1) in animal diets. I understand CTL have now confirmed your high recoveries and in the case of diquat have instructed Huntingdon Labs to use the method in respect of the 2 year rat study. I will be forwarding further details when available.

I was delighted to learn that EPA has at last taken positive steps towards exempting the emetic as an 'inert'. I look forward to hearing from you in due course once its registration has been established.

I also acknowledge receipt of the copy letter from Dr Stelzer to EPA submitting Report CTL/P/581, 'Paraquat : Occupational Exposure and Drift Hazard Evaluation During Aerial Application to Cotton in California'.

I enclose two copies of reports:-

- *1. CTL/R/584 'Paraquat : Development of a Non-isotopic (Enzyme Labelled) Immunoassay'.
- *2. RJ0168B ¹⁴C-Paraquat : Degradation on a Sandy Soil Surface in Sunlight'.

and a reprint from Outlook on Agriculture entitled 'Electrodynamic Crop Spraying' by R A Coffee. Lorin Stelzer expressed some interest in this technique and I would be grateful if you would pass this reprint to him.

I would also like to confirm my plans to visit the West Coast early in July. I am proposing to travel from Wilmington on Thursday 2 July accompanied by Geoff Willis. I would be most grateful Hans if you would book the Claremont Resort Hotel, Berkely for Geoff and myself for 7 nights (2 July through to 8 July inclusive), and

advise the hotel we may be arriving late on 2 July and to guarantee the rooms. Dick Cavalli has kindly invited us to 4 July Celebrations on Saturday, but I will give you a call on the Friday (3 July) to confirm arrangements for the visit to Richmond 6/7 July.

You will see from the copy letter to Norm Akesson that I am leaving 8 July free as a possible date to visit Davis.

Looking forward to seeing you.

Yours sincerely,

A Calderbank
Product Safety Manager
