RE EFFECT OF PP 796 IN BEAGLE DOGS.
I BELIEVE THE ANSWERS TO YOUR QUESTIONS ARE CONTAINED IN REPORTS. CTL/R/390(R) AND CTL/R/391. BOTH REPORTS CIRCULATED TO YOU. THEY WERE ISSUED IN FEBRUARY 77 AND NOVEMBER 76 RESPECTIVELY. MOST IMPORTANT TO NOTE THAT DOGS ARE LESS REPEAT LESS RESPONSIVE TO PP 796 THAN MAN ON THE BASIS OF LIMITED CLINICAL DATA. FROM REPORT CTL/R/391 YOU CAN SEE LD 50 OF EMETICISED PARAQUAT IS 3 TO 5 TIMES GREATER THAN NON EMETICISED. FROM EPIDEMIOLOGY DATE OF DR. HART DISPLAYED IN JUNE, THE POSITION IN MAN DOES NOT LOOK AS CONVINCING.
