Dear Simon,

As you will have seen from the recent note on the Closed Meetings in Brno, The query on paraquat was answered to the satisfaction of the panel. All specifications have been approved, and the publication of the specs. for formulations awaits the receipt by FAO and Alan Hanks of the peer review report for emetic and terpyridines.

I'll be happy to comment on the report if necessary, but I believe my input to paraquat is effectively concluded.

I hope that the same will shortly be true for chlorothalonil. I have contacted Schreuder to ask for an update.

Regards,

Roger
