Colleagues

These are the draft FAO specifications that we proposed. As you know only the TK one has been published as the others are awaiting finalisation of the terpyridine issues.

Best regards

Hi John,

As we discussed this was as far as we got with the formulation specifications (draft), the technical concentrate (TK) went on to publication as you know.

Regards

Simon

All,

Attached is the revised non-confidential proposer's data, the appraisal and revised specifications for the TK, SL and SG. Not all elements have been perfectly integrated or merged, but that does not appear to be too urgent at the moment. Let me know are questions, etc.

Alan
