

IN THE CIRCUIT COURT  
TWENTIETH JUDICIAL CIRCUIT  
ST. CLAIR COUNTY, ILLINOIS

MARVIN WENDLER and LORENA  
WENDLER,

Plaintiffs,

v.

SYNGENTA CROP PROTECTION LLC,  
SYNGENTA AG, CHEVRON PHILLIPS  
CHEMICAL COMPANY LP, CHEVRON  
U.S.A. INC., BERGMANN-TAYLOR  
INC., and GROWMARK INC.,

Defendants.

No. 18-L- 0805

**COMPLAINT**

COME NOW Plaintiffs, MARVIN WENDLER and LORENA WENDLER, by and through their undersigned attorneys, and complaining of Defendants, SYNGENTA CROP PROTECTION LLC, SYNGENTA AG, CHEVRON PHILLIPS CHEMICAL COMPANY LP, CHEVRON U.S.A. INC., BERGMANN-TAYLOR INC., and GROWMARK INC., state:

**I. Allegations common to all counts**

**A. Nature of the case**

1. Plaintiff MARVIN WENDLER is an Illinois resident who suffers from Parkinson's disease ("PD") caused by exposure to paraquat at various places within the

State of Illinois.<sup>1</sup> Plaintiff LORENA WENDLER is an Illinois resident and the spouse of Plaintiff MARVIN WENDLER.

2. Defendants are companies and successors-in-interest to companies that manufactured, distributed, and sold paraquat for use in Illinois, acted in concert with others who manufactured, distributed, and sold paraquat for use in Illinois, sold and used paraquat in Illinois, or owned property in Illinois where paraquat was used.

3. Plaintiffs bring this action against Defendants to recover damages for personal injuries and losses of support, society, and consortium) resulting from Plaintiff MARVIN WENDLER's chronic low-dose exposure to paraquat over many years at various places in Illinois.

**B. Defendants and their corporate predecessors**

**1. Syngenta**

4. In 1926, four British chemical companies merged to create the British company that then was known as Imperial Chemical Industries Ltd. and ultimately was known as Imperial Chemical Industries PLC ("ICI").

5. In or about 1971, ICI created or acquired a wholly owned U.S. subsidiary organized under the laws of the State of Delaware, which at various times was known as Atlas Chemical Industries Inc., ICI North America Inc., ICI America Inc., and ICI

---

<sup>1</sup> Unless the context indicates otherwise, references in this complaint to "paraquat" include the chemical compound paraquat dichloride and formulated herbicide products containing paraquat dichloride as an active ingredient.

United States Inc., and ultimately was known as ICI Americas Inc. (collectively, "ICI Americas").

6. In or about 1992, ICI merged its pharmaceuticals, agrochemicals, and specialty chemicals businesses, including the agrochemicals business it had operated at one time through a wholly owned British subsidiary known as Plant Protection Ltd. and later as a division within ICI, into a wholly owned British subsidiary known as ICI Bioscience Ltd.

7. In 1993, ICI demerged its pharmaceuticals, agrochemicals, and specialty chemicals businesses, from which it created the Zeneca Group, with the British company Zeneca Group PLC as its ultimate parent company.

8. As a result of ICI's demerger and creation of the Zeneca Group, ICI Bioscience Ltd. was demerged from ICI and merged into, renamed, or continued its business under the same or similar ownership and management as Zeneca Ltd., a wholly owned British subsidiary of Zeneca Group PLC.

9. Before ICI's demerger and creation of the Zeneca Group, ICI had a Central Toxicology Laboratory that performed and hired others to perform health and safety studies that were submitted to the United States ("U.S.") Department of Agriculture ("USDA") and the U.S. Environmental Protection Agency ("EPA") to secure and maintain the registration of paraquat and other pesticides for use in the U.S.

10. As a result of ICI's demerger and creation of the Zeneca Group, ICI's Central Toxicology Laboratory became Zeneca Ltd.'s Central Toxicology Laboratory.

11. After ICI's demerger and creation of the Zeneca Group, Zeneca Ltd.'s Central Toxicology Laboratory continued to perform and hire others to perform health and safety studies that were submitted to EPA to secure and maintain the registration of paraquat and other pesticides for use in the U.S.

12. As a result of ICI's demerger and creation of the Zeneca Group, ICI Americas was demerged from ICI and merged into, renamed, or continued its business under the same or similar ownership and management as Zeneca, Inc. ("Zeneca"), a wholly owned subsidiary of Zeneca Group PLC organized under the laws of the State of Delaware.

13. In 1996, the Swiss pharmaceutical and chemical companies Ciba-Geigy Ltd. and Sandoz AG merged to create the Novartis Group, with the Swiss company Novartis AG as the ultimate parent company.

14. As a result of the merger that created the Novartis Group, Ciba-Geigy Corporation, a wholly owned subsidiary of Ciba-Geigy Ltd. organized under the laws of the State of New York, was merged into or continued its business under the same or similar ownership and management as Novartis Crop Protection, Inc. ("NCPI"), a wholly owned subsidiary of Novartis AG organized under the laws of the State of Delaware.

15. In 1999, the Swedish pharmaceutical company Astra AB merged with Zeneca Group PLC to create the British company AstraZeneca PLC, of which Zeneca Ltd. and Zeneca were wholly owned subsidiaries.

16. In 2000, Novartis AG and AstraZeneca PLC spun off and merged the Novartis Group's crop protection and seeds businesses and AstraZeneca's agrochemicals business to create the Syngenta Group, a global group of companies focused solely on agribusiness, with Defendant SYNGENTA AG ("SAG") as the ultimate parent company.

17. As a result of the Novartis/AstraZeneca spinoff and merger that created the Syngenta Group, Zeneca Ltd. was merged into, renamed, or continued its business under the same or similar ownership and management as Syngenta Ltd., a wholly owned British subsidiary of SAG.

18. As a result of the Novartis/AstraZeneca spinoff and merger that created the Syngenta Group, Zeneca Ltd.'s Central Toxicology Laboratory became Syngenta Ltd.'s Central Toxicology Laboratory.

19. Since the Novartis/AstraZeneca spinoff and merger that created the Syngenta Group, Syngenta Ltd.'s Central Toxicology Laboratory has continued to perform and hire others to perform health and safety studies for submission to the EPA to secure and maintain the registration of paraquat and other pesticides for use in the U.S.

20. As a result of the Novartis/AstraZeneca spinoff and merger that created the Syngenta Group, NCPI and Zeneca were merged into and renamed, or continued to do their business under the same or similar ownership and management, as Syngenta Crop Protection, Inc. ("SCPI"), a wholly owned subsidiary of SAG organized under the laws of the State of Delaware.

21. In 2010, SCPI was converted into Defendant SYNGENTA CROP PROTECTION LLC ("SCPLLC"), a wholly owned subsidiary of SAG organized and existing under the laws of the State of Delaware with its principal place of business in Greensboro, North Carolina.

22. SAG is a successor by merger or continuation of business to its corporate predecessor Novartis AG.

23. SAG is a successor by merger or continuation of business to its corporate predecessor AstraZeneca PLC

24. SAG is a successor by merger or continuation of business to its corporate predecessor Zeneca Group PLC.

25. SAG is a successor by merger or continuation of business to its corporate predecessor Imperial Chemical Industries PLC, previously known as Imperial Chemical Industries Ltd.

26. SAG is a successor by merger or continuation of business to its corporate predecessor ICI Bioscience Ltd.

27. SAG is a successor by merger or continuation of business to its corporate predecessor Plant Protection Ltd.

28. SCPLLC is a successor by merger or continuation of business to its corporate predecessor SCPI.

29. SCPLLC is a successor by merger or continuation of business to its corporate predecessor NCPI.

30. SCPLLC is a successor by merger or continuation of business to its corporate predecessor Ciba-Geigy Corporation.

31. SCPLLC is a successor by merger or continuation of business to its corporate predecessor Zeneca Inc.

32. SCPLLC is a successor by merger or continuation of business to its corporate predecessor ICI Americas Inc., previously known as Atlas Chemical Industries Inc., ICI North America Inc., ICI America Inc., and ICI United States Inc.

33. SCPLLC is registered to do business in the State of Illinois, with its registered office in Cook County, Illinois.

34. SCPLLC does substantial business in the State of Illinois, including St. Clair County, Illinois; among other things, it:

a. markets, advertises, distributes, sells, and delivers paraquat and other pesticides to distributors, dealers, applicators, and farmers in the State of Illinois, including St. Clair County, Illinois;

b. secures and maintains the registration of paraquat and other pesticides with the EPA and the Illinois Department of Agriculture to enable

itself and others to manufacture, distribute, sell, and use these products in the State of Illinois, including St. Clair County, Illinois; and

c. performs, hires others to perform, and funds or otherwise sponsors or otherwise funds the testing of pesticides in the State of Illinois, including St. Clair County, Illinois.

35. SAG is a foreign corporation organized and existing under the laws of Switzerland, with its principal place of business in Basel, Switzerland.

36. SAG is a holding company that owns stock or other ownership interests, either directly or indirectly, in other Syngenta Group companies, including SCPLLC.

37. SAG is a management holding company.

38. Syngenta Crop Protection AG ("SCPAG"), a Swiss corporation with its principal place of business in Basel, Switzerland, is one of SAG's direct, wholly-owned subsidiaries.

39. SCPAG employs the global operational managers of production, distribution and marketing for the Syngenta Group's Crop Protection ("CP") and Seeds Divisions.

40. The Syngenta Group's CP and Seeds Divisions are the business units through which SAG manages its CP and Seeds product lines.

41. The Syngenta Group's CP and Seeds Divisions are not and have never been corporations or other legal entities.

42. SCPAG directly and wholly owns Syngenta International AG ("SIAG").

43. SIAG is the “nerve center” through which SAG manages the entire Syngenta Group.

44. SIAG employs the “Heads” of the Syngenta Group’s CP and Seeds Divisions.

45. SIAG also employs the “Heads” and senior staff of various global functions of the Syngenta Group, including Human Resources, Corporate Affairs, Global Operations, Research and Development, Legal and Taxes, and Finance.

46. Virtually all of the Syngenta Group’s global “Heads” and their senior staff are housed in the same office space in Basel, Switzerland.

47. SAG is the indirect parent of SCPLLC through multiple layers of corporate ownership:

- a. SAG directly and wholly owns Syngenta Participations AG;
- b. Syngenta Participations AG directly and wholly owns Seeds JV C.V.;
- c. Seeds JV C.V. directly and wholly owns Syngenta Corporation;
- d. Syngenta Corporation directly and wholly owns Syngenta Seeds, LLC;
- e. Syngenta Seeds, LLC directly and wholly owns SCPLLC.

48. Before SCPI was converted to SCPLLC, it was incorporated in Delaware, had its principal place of business in North Carolina, and had its own board of directors.

49. SCPI's sales accounted for more than 17% of the sales for the entire Syngenta Group in 2009.

50. SAG has purposefully organized the Syngenta Group, including SCPLLC, in such a way as to attempt to evade the authority of courts in jurisdictions in which it does substantial business.

51. Although the formal legal structure of the Syngenta Group is designed to suggest otherwise, SAG in fact exercises an unusually high degree of control over its country-specific business units, including SCPLLC, through a "matrix management" system of functional reporting to global "Product Heads" in charge of the Syngenta Group's unincorporated Crop Protection and Seeds Divisions, and to global "Functional Heads" in charge of human resources, corporate affairs, global operations, research and development, legal and taxes, and finance.

52. The lines of authority and control within the Syngenta Group do not follow its formal legal structure, but instead follow this global "functional" management structure.

53. SAG controls the actions of its far-flung subsidiaries, including SCPLLC, through this global "functional" management structure.

54. SAG's board of directors has established a Syngenta Executive Committee ("SEC"), which is responsible for the active leadership and the operative management of the Syngenta Group, including SPLLC.

55. The SEC consists of the CEO and various global Heads, which currently are:

- a. The Chief Executive Officer;
- b. The Head of Legal and Taxes and Company Secretary;
- c. The Head of Research and Development;
- d. The President of Global Crop Protection and the Europe Africa and Middle East, Latin America, and Asia Pacific Regions;
- e. The Chief Financial Officer;
- f. The Head of Global Operations;
- g. The President of Global Seeds and the North America Region;
- h. The Head of Human Resources;
- i. The Head of Corporate Affairs; and
- j. The Head of Business Development.

56. SIAG employs all of the members of the Executive Committee.

57. Global Syngenta Group corporate policies require SAG subsidiaries, including SPLLC, to operate under the direction and control of the SEC and other unincorporated global management teams.

58. John Atkin, then the global CP Division Head, and Christoph Mäder, then the global Head of the Legal and Taxes function, served simultaneously on both the SEC and SCPI's five-member board of directors.

59. Jonathan Parr, the current President of Global Crop Protection, and Christoph Mäder, the current Head of Legal and Taxes and Company Secretary, currently serve on both the SEC and SCPLLC's board of directors.

60. SAG's board of directors meets five to six times a year.

61. In contrast, SCPI's board of directors rarely met, either in person or by telephone, and met only a handful of times over the last decade before SCPI became SCPLLC.

62. Most, if not all, of the SCPI board's formal actions, including selecting and removing SCPI officers, were taken by unanimous written consent pursuant to directions from the SEC or other Syngenta Group global or regional managers that were delivered via e-mail to SCPI board members.

63. Since SCPI became SCPLLC, decisions that are nominally made by the board or managers of SCPLLC in fact continue to be directed by the SEC or other Syngenta Group global or regional managers.

64. Similarly, Syngenta Seeds, Inc.'s board of directors appointed and removed SCPI board members at the direction of the SEC or other Syngenta Group global or regional managers.

65. Since SCPI became SCPLLC, the appointment and removal of the manager(s) of SCPLLC continues to be directed by the SEC or other Syngenta Group global or regional managers.

66. The management structure of the Syngenta Group's CP Division, of which SCPLLC is a part, is not defined by legal, corporate relationships, but by functional reporting relationships that disregard corporate boundaries.

67. Atop the CP Division is the CP Leadership Team (or another body with a different name but substantially the same composition and functions), which includes the President of Global Crop Protection, the CP region Heads (including SCPLLC President Vern Hawkins), and various global corporate function Heads.

68. The CP Leadership Team meets bi-monthly to develop strategy for new products, markets and operational efficiencies and to monitor performance of the Syngenta Group's worldwide CP business.

69. Under the CP Leadership Team are regional leadership teams, including the North America Regional Leadership Team (or another body with a different name but substantially the same composition and functions), which oversees the Syngenta Group's U.S. and Canadian CP business (and when previously known as the NAFTA Regional Leadership Team, also oversaw the Syngenta Group's Mexican CP business).

70. The North America Regional Leadership Team is chaired by SCPLLC's president, and includes employees of SCPLLC and the Syngenta Group's Canadian CP company (and when previously known as the NAFTA Regional Leadership Team, also included employees of the Syngenta Group's Mexican CP company).

71. The Syngenta Group's U.S. and Canadian CP companies, including SCPLLC, report to the North America Regional Leadership Team, which reports the CP Leadership Team, which reports to the SEC, which reports to SAG's board of directors.

72. Some members of the North America Regional Leadership Team, including some SCPLLC employees, report or have in the past reported not to their nominal superiors within the companies that employ them, but directly to the Syngenta Group's global Heads.

73. Syngenta Group global Heads that supervise SCPLLC employees participate and have in the past participated in the performance reviews of these employees and in setting their compensation.

74. The Syngenta Group's functional reporting lines have resulted in employees of companies, including SCPLLC, reporting to officers of remote parent companies, officers of affiliates with no corporate relationship other than through SAG, or officers of subsidiary companies.

75. SCPLLC performs its functions according to its role in the CP Division structure:

a. CP Division development projects are proposed at the global level, ranked and funded at the global level after input from functional entities such as the CP Leadership Team and the North America Regional Leadership Team, and given final approval by the SEC;

b. New CP products are developed by certain Syngenta Group companies or functional groups that manage and conduct research and development functions for the entire CP Division;

c. These products are then tested by other Syngenta Group companies, including SCPLLC, under the direction and supervision of the SEC, the CP Leadership Team, or other Syngenta Group global managers;

d. Syngenta Group companies, including SCPLLC, do not contract with or compensate each other for this testing;

e. Rather, the cost of such testing is included in the testing companies' operating budgets, which are established and approved by the Syngenta Group's global product development managers and the SEC;

f. If a product shows promise based on this testing and the potential markets for the product, either global or regional leaders (depending on whether the target market is global or regional), not individual Syngenta Group companies such as SCPLLC, decide whether to sell the product;

g. Decisions to sell the product must be approved by the SEC;

h. The products that are sold all bear the same Syngenta trademark and logo.

76. SCPLLC is subject to additional oversight and control by Syngenta Group global managers through a system of "reserved powers" established by SAG and applicable to all Syngenta Group companies.

77. These "reserved powers" require Syngenta Group companies to seek approval for certain decisions from higher levels within the Syngenta Group's functional reporting structure.

78. For example, although SAG permits Syngenta Group companies to handle small legal matters on their own, under the "reserved powers" system, SAG's Board of Directors must approve settlements of certain types of lawsuits against Syngenta Group

companies, including SCPLLC, if their value exceeds an amount specified in the “reserved powers.”

79. Similarly, the appointments of senior managers at SCPLLC must be approved by higher levels than SCPLLC’s own management, board of directors, or even its direct legal owner.

80. Although SCPLLC takes the formal action necessary to appoint its own senior managers, this formal action is in fact merely the rubber-stamping of decisions that have already been made by the Syngenta Group’s global management.

81. Although SAG subsidiaries, including SCPLLC, pay lip service to legal formalities that give the appearance of authority to act independently, in practice many of their acts are directed or pre-approved by the Syngenta Group’s global management.

82. SAG and the global management of the Syngenta Group restrict the authority of SCPLLC to act independently in areas including:

- a. Product development;
- b. Product testing (among other things, SAG and the global management of the Syngenta Group require SCPLLC to use Syngenta Ltd.’s Central Toxicology Laboratory to design, perform, or oversee product safety testing that SCPLLC submits to the EPA in support of the registrations of paraquat and other pesticides);
- c. Production;
- d. Marketing;
- e. Sales;
- f. Human resources;

- g. Communications and public affairs;
- h. Corporate structure and ownership
- i. Asset sales and acquisitions
- j. Key appointments to boards, committees and management positions;
- k. Compensation packages;
- l. Training for high-level positions; and
- m. Finance (including day-to-day cash management) and tax.

83. Under the Syngenta Group's functional management system, global managers initiate and the global Head of Human Resources oversees international assignments and compensation of managers employed by one Syngenta subsidiary to do temporary work for another Syngenta subsidiary in another country. This international assignment program aims, in part, to improve Syngenta Group-wide succession planning by developing corporate talent to make employees fit for higher positions within the global Syngenta Group of companies.

84. Under this international assignment program, at the instance of Syngenta Group global managers, SCPLLC officers and employees have been "seconded" to work at other SAG subsidiaries, and officers and employees of other Syngenta Group subsidiaries have been "seconded" to work at SCPLLC.

85. The Syngenta Group's functional management system includes a central global finance function—known as Syngenta Group Treasury—for the entire Syngenta Group.

86. The finances of all Syngenta Group companies are governed by a global treasury policy that subordinates the financial interests of SAG's subsidiaries, including SCPLLC, to the interests of the Syngenta Group as a whole.

87. Under the Syngenta Group's global treasury policy, Syngenta Group Treasury controls daily cash sweeps from subsidiaries such as SCPLLC, holds the cash on account, and lends it to other subsidiaries that need liquidity.

88. The Syngenta Group's global treasury policy does not allow SAG subsidiaries such as SCPLLC to seek or obtain financing from non-Syngenta entities without the approval of Syngenta Group Treasury.

89. Syngenta Group Treasury also decides whether SCPLLC will issue a dividend or distribution to its direct parent company, and how much that dividend will be.

90. SCPLLC's board or management approves dividends and distributions mandated by Syngenta Group Treasury without any meaningful deliberation.

91. In 2011, the U.S. District Court for the Southern District of Illinois held that SAG's unusually high degree of control over SCPLLC made SCPLLC the agent or

alter ego of SAG and therefore subjected SAG to jurisdiction in the State of Illinois. *See City of Greenville, Ill. v. Syngenta Crop Prot., Inc.*, 830 F. Supp. 2d 550 (S.D. Ill. 2011).

92. SAG continues to exercise the unusually high degree of control over SCPLLC that led the District Court to find in 2011 that SAG was subject to jurisdiction in the State of Illinois.

93. SAG, through its agent or alter ego, SCPLLC, does substantial business in the State of Illinois, including St. Clair County, Illinois, in the ways previously alleged as to SCPLLC.

## **2. Chevron**

94. Chevron Chemical Company ("Chevron Chemical") was a corporation organized in 1928 under the laws of the State of Delaware.

95. In 1997, Chevron Chemical was merged into Chevron Chemical Company LLC ("Chevron Chemical LLC"), a limited liability company organized under the laws of the State of Delaware.

96. In mid-2000, Chevron Chemical LLC was merged into or continued to operate under the same or similar ownership and management as Defendant CHEVRON PHILLIPS CHEMICAL COMPANY LP ("CP CHEMICAL"), a limited partnership organized and existing under the laws of the State of Delaware with its principal place of business in The Woodlands, Texas.

97. CP CHEMICAL is a successor by merger or continuation of business to its corporate predecessor Chevron Chemical LLC.

98. CP CHEMICAL is a successor by merger or continuation of business to its corporate predecessor Chevron Chemical.

99. CP CHEMICAL is registered to do business in the State of Illinois, with its registered office in Cook County, Illinois.

100. CP CHEMICAL does substantial business in the State of Illinois, including St. Clair County, Illinois; among other things, it is a joint-venture partner in a polystyrene manufacturing plant in Joliet, Illinois, and it markets, advertises, distributes, sells, and delivers chemical products, piping, and plastics to distributors, dealers, and end users in the State of Illinois, including St. Clair County, Illinois.

101. Defendant CHEVRON U.S.A. INC. ("CHEVRON USA") is a corporation organized and existing under the laws of the State of Pennsylvania, with its principal place of business in the State of California.

102. CHEVRON USA is registered to do business in Illinois, with the office of its registered agent in Springfield, Illinois.

103. In mid-2000, CHEVRON USA entered into an agreement in which it expressly assumed the liabilities of Chevron Chemical and Chevron Chemical LLC arising from Chevron Chemical's then-discontinued agrichemical business, which included the design, registration, manufacture, formulation, packaging, labeling,

distribution, marketing, and sale of paraquat products in the United States as alleged in this Complaint.

### **3. Bergmann-Taylor**

104. Defendant BERGMANN-TAYLOR, INC. ("BERGMANN-TAYLOR") was a corporation organized under the laws of the State of Illinois in 1962 as Bergmann-Taylor Seeds, Inc., with its registered office in the City of Trenton in Madison County, Illinois.

105. BERGMANN-TAYLOR was voluntarily dissolved on November 30, 2016.

106. BERGMANN-TAYLOR's principal place of business was in the Village of St. Jacob in Madison County, Illinois, approximately seven-tenths of a mile from the St. Jacob, Illinois home in which Plaintiffs resided from 1979 through 2006.

107. On information and belief, BERGMANN-TAYLOR did substantial business in St. Clair County, Illinois, including selling pesticides, seeds, and other products to the owners and operators of and applying pesticides on farms located in St. Clair County, Illinois.

### **4. Growmark**

108. In 1962, Illinois Farm Supply Company and Farm Bureau Service Company of Iowa merged to form FS Services Inc., a corporation organized under the laws of the State of Delaware with its principal place of business in Bloomington, Illinois.

109. FS Services Inc. was owned by and participated in the operation of local member cooperatives that did business in the State of Illinois under the FS Services Inc.-licensed name "FS" and other names.

110. In 1980, FS Services Inc. merged with Illinois Grain Corporation and was renamed or continued to operate under the same or similar ownership as Defendant GROWMARK INC. ("GROWMARK"), a Delaware corporation with its principal place of business in Bloomington, Illinois.

111. GROWMARK is a successor by change of name, merger, or continuation of business to its corporate predecessor FS Services Inc.

112. GROWMARK is owned by and participates in the operation of local member cooperatives that do business in the State of Illinois under the GROWMARK-licensed name "FS" and other names.

113. GROWMARK and one or more of its member cooperatives do substantial business in St. Clair County, Illinois, including marketing, advertising, distributing, selling, and delivering fuels, lubricants, plant nutrients, crop protection products, seed, structures, equipment, and providing grain marketing assistance, warehousing, logistics, training, and marketing support.

**C. Paraquat manufacture, distribution, and sale**

114. "The herbicidal properties of paraquat were discovered by ICI (a legacy company of Syngenta) in 1955."<sup>2</sup>

115. "The leading manufacturer of paraquat is Syngenta, which (as ICI) developed the active ingredient (AI) in the early 1960's."<sup>3</sup>

116. ICI produced the first commercial paraquat formulation and registered it in England in 1962.

117. Paraquat "was introduced to world markets in 1962 under the brand name GRAMOXONE®."<sup>4</sup>

118. Paraquat first became commercially available for use in the U.S. in 1964.

119. In or about 1964, ICI and Chevron Chemical entered into agreements regarding the licensing and distribution of paraquat ("the ICI-Chevron Chemical Agreements").

120. In or about 1971, ICI Americas became a party to the ICI-Chevron Chemical Agreements on the same terms as ICI.

121. The ICI-Chevron Chemical Agreements were renewed or otherwise remained in effect until about 1986.

122. In the ICI-Chevron Chemical Agreements, ICI and ICI Americas granted Chevron Chemical a license to their patents and technical information to permit Chevron Chemical to formulate or have formulated, use, and sell paraquat in the U.S. and to grant sub-licenses to others to do so.

123. In the ICI-Chevron Chemical Agreements, Chevron Chemical granted ICI and ICI Americas a license to its patents and technical information to permit ICI and ICI Americas to formulate or have formulated, use, and sell paraquat throughout the world and to grant sub-licenses to others to do so.

124. In the ICI-Chevron Chemical Agreements, ICI and ICI Americas and Chevron Chemical agreed to exchange patent and technical information regarding paraquat.

125. In the ICI-Chevron Chemical Agreements, ICI and ICI Americas granted Chevron Chemical exclusive rights to distribute and sell paraquat in the U.S.

126. In the ICI-Chevron Chemical Agreements, ICI and ICI Americas granted Chevron Chemical a license to distribute and sell paraquat in the U.S. under the ICI-trademarked brand name GRAMOXONE®.

127. ICI and ICI Americas and Chevron Chemical entered into the ICI-Chevron Chemical Agreements to divide the worldwide market for paraquat between them.

128. Under the ICI-Chevron Chemical Agreements, Chevron Chemical distributed and sold paraquat in the U.S. and ICI and ICI Americas distributed and sold paraquat outside the U.S.

129. Under the ICI-Chevron Chemical Agreements and related agreements, both ICI and ICI Americas and Chevron Chemical distributed and sold paraquat under the ICI-trademarked brand name GRAMOXONE®.

130. Under the ICI-Chevron Chemical Agreements, ICI and ICI Americas and Chevron Chemical exchanged patent and technical information regarding paraquat.

131. Under the ICI-Chevron Chemical Agreements, ICI and ICI Americas provided to Chevron Chemical health and safety and efficacy studies performed or procured by ICI's Central Toxicology Laboratory, which Chevron Chemical then submitted to the USDA and the EPA to secure and maintain the registration of paraquat for manufacture, formulation, distribution, and sale for use in the U.S.

132. Under the ICI-Chevron Chemical Agreements and related agreements, ICI and ICI Americas manufactured and sold to Chevron Chemical paraquat that Chevron Chemical then distributed and sold in the U.S., including in Illinois, where Chevron Chemical registered paraquat products with the Illinois Department of Agriculture and marketed, advertised, and promoted them to Illinois distributors, dealers, applicators, and farmers.

133. Under the ICI-Chevron Chemical Agreements and related agreements, Chevron Chemical distributed and sold paraquat in the U.S. under the ICI-trademarked brand name GRAMOXONE® and other names, including in Illinois, where Chevron Chemical registered such products with the Illinois Department of Agriculture to enable them to be lawfully distributed, sold, and used in Illinois, and marketed, advertised, and promoted them to Illinois distributors, dealers, applicators, and farmers.

134. SAG and its corporate predecessors and others with whom they acted in concert have manufactured, formulated, distributed, and sold paraquat for use in the U.S. from about 1964 through the present, and at all relevant times intended or expected their paraquat products to be distributed and sold in Illinois, where they registered such products with the Illinois Department of Agriculture to enable them to be lawfully distributed, sold, and used in Illinois, and marketed, advertised, and promoted them to Illinois distributors, dealers, applicators, and farmers.

135. SAG and its corporate predecessors and others with whom they acted in concert have submitted health and safety and efficacy studies to the USDA and the EPA to support the registration of paraquat for manufacture, formulation, distribution, and sale for use in the U.S. from about 1964 through the present.

136. SCPLLC and its corporate predecessors and others with whom they acted in concert have manufactured, formulated, distributed, and sold paraquat for use in the U.S. from about 1971 through the present, and at all relevant times intended or expected

their paraquat products to be distributed and sold in Illinois, where they registered such products with the Illinois Department of Agriculture to enable them to be lawfully distributed, sold, and used in Illinois, and marketed, advertised, and promoted them to Illinois distributors, dealers, applicators, and farmers.

137. SCPLLC and its corporate predecessors and others with whom they acted in concert have submitted health and safety and efficacy studies to the EPA to support the registration of paraquat for manufacture, formulation, distribution, and sale for use in the U.S. from about 1971 through the present.

138. Chevron Chemical manufactured, formulated, distributed, and sold paraquat for use in the U.S. from about 1964 through at least 1986, acting in concert with ICI and ICA Americas throughout this period, including in Illinois, where Chevron Chemical registered such products with the Illinois Department of Agriculture to enable them to be lawfully distributed, sold, and used in Illinois, and marketed, advertised, and promoted them to Illinois distributors, dealers, applicators, and farmers.

139. GROWMARK and its corporate predecessor FS Services Inc. and their member cooperatives have distributed and sold throughout the State of Illinois paraquat that was manufactured, formulated, distributed, and sold by SAG and its corporate predecessors from about 1964 through the present.

140. GROWMARK and its corporate predecessor FS Services Inc. and their member cooperatives distributed and sold throughout the State of Illinois paraquat that was manufactured, formulated, distributed, and sold by Chevron Chemical from about 1964 through at least 1986.

141. GROWMARK and its corporate predecessor FS Services Inc. and their member cooperatives have distributed and sold throughout the State of Illinois paraquat that was manufactured, formulated, distributed, and sold by SCPLLC and its corporate predecessors from about 1971 through the present.

142. On information and belief, between the 1960s and at least 1979, one or more GROWMARK or FS Services Inc. member cooperatives sold paraquat that the owners or operators of farms applied or had applied, using ground-based or aerial sprayers, on farms in the vicinity of the Highland, Illinois home in which Plaintiffs resided from approximately 1964 through 1979.

143. On information and belief, between the 1960s and at least 1979, one or more GROWMARK or FS Services Inc. member cooperatives applied paraquat on farms in the vicinity of the Highland, Illinois home in which Plaintiffs resided from approximately 1964 through 1979.

144. On information and belief, between 1979 and at least 2006, one or more GROWMARK or FS Services Inc. member cooperatives sold paraquat that the owners or operators of farms applied or had applied, using ground-based or aerial sprayers, on

farms in the vicinity of the St. Jacob, Illinois home in which Plaintiffs resided from 1979 through 2006.

145. On information and belief, between 1979 and at least 2006, one or more GROWMARK or FS Services Inc. member cooperatives applied paraquat on farms in the vicinity of the St. Jacob, Illinois home in which Plaintiffs resided from 1979 through 2006.

146. From the 1960s through at least 2006, BERGMANN-TAYLOR was engaged in the business of selling herbicides, including paraquat.

147. From the 1960s through at least 1979, BERGMANN-TAYLOR was engaged in the business of applying herbicides, including paraquat, on farms in and around Highland, Illinois.

148. From the 1960s through at least 1986, BERGMANN-TAYLOR sold and applied paraquat that was manufactured, formulated, distributed, and sold by Chevron Chemical.

149. From the 1960s through at least 2006, BERGMANN-TAYLOR sold and applied paraquat that was manufactured, formulated, distributed, and sold by SCPLLC, or by its corporate predecessors or others, including Chevron Chemical, with whom they were acting concert.

150. From the 1960s through at least 2006, BERGMANN-TAYLOR sold and applied paraquat that was manufactured, formulated, distributed, and sold by SAG, or

by its corporate predecessors or others, including Chevron Chemical, with whom they were acting concert.

151. From 1979 through at least 2006, BERGMANN-TAYLOR sold paraquat that the owners or operators of farms applied or had applied on farms in the vicinity of the Highland, Illinois home in which Plaintiffs resided from 1979 through 2006.

152. From 1979 through at least 2006, BERGMANN-TAYLOR applied paraquat on farms in the vicinity of the Highland, Illinois home in which Plaintiffs resided from 1979 through 2006.

153. From the 1960s through at least 2006, BERGMANN-TAYLOR was engaged in the business of applying herbicides, including paraquat, on farms in and around St. Jacob, Illinois.

154. From the 1960s through at least 2006, BERGMANN-TAYLOR sold paraquat that the owners or operators of farms applied or had applied on farms in the vicinity of the St. Jacob, Illinois home in which Plaintiffs resided from 1979 through 2006.

155. From the 1960s through at least 2006, BERGMANN-TAYLOR applied paraquat on farms in the vicinity of the St. Jacob, Illinois home in which Plaintiffs resided from 1979 through 2006.

**D. Paraquat use**

156. Since 1964, paraquat has been used in the U.S. to kill broadleaf weeds and grasses before the planting or emergence of more than 100 field, fruit, vegetable, and plantation crops, to control weeds in orchards, and to desiccate (dry) plants before harvest.

157. At all relevant times, where paraquat was used, it was commonly used multiple times per year on the same land, particularly when used to control weeds in orchards or on farms with multiple crops planted on the same land within a single growing season or year, and such use was as intended or directed or reasonably foreseeable.

158. At all relevant times, paraquat manufactured, distributed, sold, and sprayed or caused to be sprayed by Defendants, Defendants' corporate predecessors, and others with whom they acted in concert was typically sold to end-users in the form of liquid concentrates (and less commonly in the form of granular solids) designed to be diluted with water before or after loading it into the tank of a sprayer and applied by spraying it onto target weeds.

159. At all relevant times, concentrates containing paraquat manufactured, distributed, sold, and sprayed or caused to be sprayed by Defendants, Defendants' corporate predecessors, and others with whom they acted in concert typically were formulated with one or more "surfactants" to increase the ability of the herbicide to

stay in contact with the leaf, penetrate the leaf's waxy surface, and enter into plant cells, and the accompanying instructions typically told end-users to add a surfactant or crop oil (which as typically formulated contains a surfactant) before use.

160. At all relevant times, paraquat typically was applied with a knapsack sprayer, hand-held sprayer, aircraft (*i.e.*, crop duster), truck with attached pressurized tank, or tractor-drawn pressurized tank, and such use was as intended or directed or was reasonably foreseeable.

#### **E. Paraquat exposure**

161. At all relevant times, it was reasonably foreseeable that when paraquat was used in the manner intended or directed or in a reasonably foreseeable manner, users of paraquat and persons nearby would be exposed to paraquat while it was being mixed and loaded into the tanks of sprayers, including as a result of spills, splashes, and leaks.

162. At all relevant times, it was reasonably foreseeable that when paraquat was used in the manner intended or directed or in a reasonably foreseeable manner, persons who sprayed paraquat or were in or near areas where it was being or recently had been sprayed would be exposed to paraquat, including as a result of spray drift, the movement of herbicide spray droplets from the target area to an area where herbicide application was not intended, typically by wind, and as a result of contact with sprayed plants.

163. At all relevant times, it was reasonably foreseeable that when paraquat was used in the manner intended or directed or in a reasonably foreseeable manner, users of paraquat and persons nearby would be exposed to paraquat, including as a result of spills, splashes, and leaks, while equipment used to spray it was being emptied or cleaned or clogged spray nozzles, lines, or valves were being cleared.

164. At all relevant times, it was reasonably foreseeable that paraquat could enter the human body via absorption through or penetration of the skin, mucous membranes, and other epithelial tissues, including tissues of the mouth, nose and nasal passages, trachea, and conducting airways, particularly where cuts, abrasions, rashes, sores, or other tissue damage is present.

165. At all relevant times, it was reasonably foreseeable that paraquat could enter the human body via respiration into the lungs, including the deep parts of the lungs where respiration (gas exchange) occurs.

166. At all relevant times, it was reasonably foreseeable that paraquat could enter the human body via ingestion into the digestive tract of small droplets swallowed after entering the mouth, nose, or conducting airways.

167. At all relevant times, it was reasonably foreseeable that paraquat that entered the human body via ingestion into the digestive tract could enter the enteric nervous system (the part of the nervous system that governs the function of the gastrointestinal tract).

168. At all relevant times, it was reasonably foreseeable that paraquat that entered the human body, whether via absorption, respiration, or ingestion, could enter the bloodstream.

169. At all relevant times, it was reasonably foreseeable that paraquat that entered the bloodstream could enter the brain, whether through the blood-brain barrier or parts of the brain not protected by the blood-brain barrier.

170. At all relevant times, it was reasonably foreseeable that paraquat that entered the nose and nasal passages could enter the brain through the olfactory bulb (a part of the brain involved in the sense of smell), which is not protected by the blood-brain barrier.

#### **F. Parkinson's disease**

171. PD is progressive neurodegenerative disorder of the brain that affects primarily the motor system, the part of the central nervous system that controls movement.

172. Scientists who study PD generally agree that less than 10% of all PD cases are caused by inherited genetic mutations alone, and that more than 90% are caused by a combination of environmental factors, genetic susceptibility, and the aging process.

##### **1. Symptoms and treatment**

173. The characteristic symptoms of PD are its "primary" motor symptoms: resting tremor (shaking movement when the muscles are relaxed), bradykinesia

(slowness in voluntary movement and reflexes), rigidity (stiffness and resistance to passive movement), and postural instability (impaired balance).

174. PD's primary motor symptoms often result in "secondary" motor symptoms such as freezing of gait; shrinking handwriting; mask-like expression; slurred, monotonous, quiet voice; stooped posture; muscle spasms; impaired coordination; difficulty swallowing; and excess saliva and drooling caused by reduced swallowing movements.

175. Non-motor symptoms—such as loss of or altered sense of smell; constipation; low blood pressure on rising to stand; sleep disturbances; and depression—are present in most cases of PD, often for years before any of the primary motor symptoms appear.

176. There is currently no cure for PD; no treatment will slow, stop, or reverse its progression; and the treatments most-commonly prescribed for its motor symptoms tend to become progressively less effective, and to cause unwelcome side effects, the longer they are used.

## **2. Pathophysiology**

177. The selective degeneration and death of dopaminergic neurons (dopamine-producing nerve cells) in a part of the brain called the substantia nigra pars compacta ("SNpc") is one of the primary pathophysiological hallmarks of PD.

178. Dopamine is a neurotransmitter (a chemical messenger that transmits signals from one neuron to another neuron, muscle cell, or gland cell) that is critical to the brain's control of motor function (among other things).

179. The death of dopaminergic neurons in the SNpc decreases the production of dopamine.

180. Once dopaminergic neurons die, they are not replaced; when enough dopaminergic neurons have died, dopamine production falls below the level the brain requires for proper control of motor function, resulting in the motor symptoms of PD.

181. The presence of Lewy bodies (insoluble aggregates of a protein called alpha-synuclein) in many of the remaining dopaminergic neurons in the SNpc is another of the primary pathophysiological hallmarks of PD.

182. Dopaminergic neurons are particularly susceptible to oxidative stress, a disturbance in the normal balance between oxidants present in cells and cells' antioxidant defenses.

183. Scientists who study PD generally agree that oxidative stress is a major factor in—if not the precipitating cause of—the degeneration and death of dopaminergic neurons in the SNpc and the accumulation of Lewy bodies in the remaining dopaminergic neurons that are the primary pathophysiological hallmarks of PD.

**G. Paraquat's toxicity**

184. Paraquat is highly toxic to both plants and animals.

185. Paraquat injures and kills plants by creating oxidative stress that causes or contributes to cause the degeneration and death of plant cells.

186. Paraquat injures and kills humans and other animals by creating oxidative stress that causes or contributes to cause the degeneration and death of animal cells.

187. Paraquat creates oxidative stress in the cells of plants and animals because of "redox properties" that are inherent in its chemical composition and structure: it is a strong oxidant, and it readily undergoes "redox cycling" in the presence of molecular oxygen, which is plentiful in living cells.

188. The redox cycling of paraquat in living cells interferes with cellular functions that are necessary to sustain life—with photosynthesis in plant cells, and with cellular respiration in animal cells.

189. The redox cycling of paraquat in living cells creates a "reactive oxygen species" known as superoxide radical, an extremely reactive molecule that can initiate a cascading series of chemical reactions that creates other reactive oxygen species that damage lipids, proteins, and nucleic acids, molecules that are essential components of the structures and functions of living cells.

190. Because the redox cycling of paraquat can repeat indefinitely in the conditions typically present in living cells, a single molecule of paraquat can trigger the production of countless molecules of destructive superoxide radical.

191. Paraquat's redox properties have been known to science since at least the 1930s.

192. That paraquat is toxic to the cells of plants and animals because it creates oxidative stress through redox cycling has been known to science since at least the 1960s.

193. The surfactants with which the concentrates containing paraquat manufactured, distributed, and sold by Defendants, Defendants' corporate predecessors, and others with whom they acted in concert typically were formulated were likely to increase paraquat's toxicity to humans by increasing its ability to stay in contact with or penetrate the skin, mucous membranes, and other epithelial tissues, including tissues of the mouth, nose and nasal passages, trachea, and conducting airways, the lungs, and the gastrointestinal tract.

#### **H. Paraquat and Parkinson's disease**

194. The same redox properties that make paraquat toxic to plant cells and other types of animal cells make it toxic to dopaminergic neurons—that is, paraquat is a strong oxidant that interferes with the function of, damages, and ultimately kills dopaminergic neurons by creating oxidative stress through redox cycling.

195. Although PD is not known to occur naturally in any species other than humans, PD research is often performed using “animal models,” in which scientists artificially produce in laboratory animals conditions that show features of PD.

196. Paraquat is one of only a handful of toxins that scientists use to produce animal models of PD.

197. In animal models of PD, hundreds of studies involving various routes of exposure have found that paraquat creates oxidative stress that results in the degeneration and death of dopaminergic neurons in the SNpc, other pathophysiology consistent with that seen in human PD, and motor deficits and behavioral changes consistent with those commonly seen in human PD.

198. Hundreds of *in vitro* studies (experiments in a test tube, culture dish, or other controlled experimental environment) have found that paraquat creates oxidative stress that results in the degeneration and death of dopaminergic neurons (and many other types of animal cells).

199. Many epidemiological studies (studies of the patterns and causes of disease in defined populations) have found an association between paraquat exposure and PD, including multiple studies finding a two- to five-fold or greater increase in the risk of PD in populations with occupational exposure to paraquat compared to populations without such exposure.

**I. Paraquat regulation**

200. The Federal Insecticide, Fungicide, and Rodenticide Act (“FIFRA”), 7 U.S.C. § 136 *et seq.*, which regulates the distribution, sale, and use of pesticides within the U.S., requires that pesticides be registered with the EPA prior to their distribution, sale, or use, except as described by FIFRA. 7 U.S.C. 136a(a).

201. The Illinois Pesticide Act (“IPA”), 415 ILCS 60/1 *et seq.*, which regulates the labeling, distribution, use, and application of pesticides within the State of Illinois, requires that pesticides be registered with the Illinois Department of Agriculture before they are distributed, sold, offered for sale, or transported within the State of Illinois. 415 ILCS 60/6.

202. As part of the pesticide registration process, the EPA requires, among other things, a variety of tests to evaluate the potential for exposure to pesticides, toxicity to people and other potential non-target organisms, and other adverse effects on the environment.

203. As a general rule, FIFRA requires registrants to perform health and safety testing of pesticides.

204. FIFRA does not require the EPA to perform health and safety testing of pesticides itself, and the EPA generally does not perform such testing.

205. The EPA registers (or re-registers) a pesticide if it believes, based largely on studies and data submitted by the registrant, that:

a. its composition is such as to warrant the proposed claims for it, 7 U.S.C. § 136a(c)(5)(A);

b. its labeling and other material required to be submitted comply with the requirements of FIFRA, 7 U.S.C. § 136a(c)(5)(B);

c. it will perform its intended function without unreasonable adverse effects on the environment, 7 U.S.C. § 136a(c)(5)(C); and

d. when used in accordance with widespread and commonly recognized practice it will not generally cause unreasonable adverse effects on the environment, 7 U.S.C. § 136a(c)(5)(D).

206. FIFRA defines “unreasonable adverse effects on the environment” as “any unreasonable risk to man or the environment, taking into account the economic, social, and environmental costs and benefits of the use of any pesticide.” 7 U.S.C. § 136(bb).

207. Under FIFRA, “As long as no cancellation proceedings are in effect registration of a pesticide shall be prima facie evidence that the pesticide, its labeling and packaging comply with the registration provisions of [FIFRA].” 7 U.S.C. § 136a(f)(2).

208. However, FIFRA further provides that “In no event shall registration of an article be construed as a defense for the commission of any offense under [FIFRA].” 7 U.S.C. § 136a(f)(2).

209. The distribution or sale of a pesticide that is misbranded is an offense under FIFRA, which provides in relevant part that “...it shall be unlawful for any person in any State to distribute or sell to any person... any pesticide which is... misbranded.” 7 U.S.C. § 136j(a)(1)(E).

210. A pesticide is misbranded under FIFRA if, among other things:

a. its labeling bears any statement, design, or graphic representation relative thereto or to its ingredients which is false or misleading in any particular, 7 U.S.C. § 136(q)(1)(A);

b. the labeling accompanying it does not contain directions for use which are necessary for effecting the purpose for which the product is intended and if complied with, together with any requirements imposed under section 136a(d) of this title, are adequate to protect health and the environment, 7 U.S.C. § 136(q)(1)(F); or

c. the label does not contain a warning or caution statement which may be necessary and if complied with, together with any requirements imposed under section 136a(d) of this title, is adequate to protect health and the environment," 7 U.S.C. § 136(q)(1)(G).

211. Plaintiffs do not seek in this action to impose on Defendants any labeling or packaging requirement in addition to or different from those required under FIFRA; accordingly, any allegation in this complaint that a Defendant breached a duty to provide adequate directions for the use of paraquat or warnings about paraquat, breached a duty to provide adequate packaging for paraquat, or concealed, suppressed, or omitted to disclose any material fact about paraquat or engaged in any unfair or deceptive practice regarding paraquat, that allegation is intended and should be construed to be consistent with that alleged breach, concealment, suppression, or omission, or unfair or deceptive practice, having rendered the paraquat "misbranded" under FIFRA; however, Plaintiffs bring claims and seek relief in this action only under state law, and do not bring any claims or seek any relief in this action under FIFRA.

## **II. Allegations common to specific causes of action<sup>5</sup>**

### **A. Strict product liability – design defect**

212. At all times relevant to this claim, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert were engaged in the business of designing, manufacturing, distributing, and selling pesticides, and designed, manufactured, distributed, and sold paraquat intending or expecting that it would be sold and used in Illinois.

213. Plaintiff was exposed to paraquat sold and used in Illinois that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold intending or expecting that it would be sold and used in Illinois.

214. The paraquat that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed was in a defective condition that made it unreasonably dangerous, in that when used in the intended and directed manner or a reasonably foreseeable manner:

---

<sup>5</sup> Whenever any allegation in this complaint uses the term "Defendant" without specifying a particular Defendant, the term "Defendant" in that allegation refers to each Defendant to which the Count that incorporates that allegation is directed; whenever any allegation in this complaint uses the term "Plaintiff" without specifying a particular Plaintiff, the term "Plaintiff" in that allegation refers: (1) in a Count seeking damages for personal injuries that incorporates that allegation, to the Plaintiff seeking relief in that Count; or (2) in a Count seeking damages for loss of society or consortium that incorporates that allegation, to the spouse of the Plaintiff seeking relief in that Count.

a. it was designed, manufactured, formulated, and packaged such that it was likely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed; and

b. when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, it was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

215. This defective condition existed in the paraquat that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed when it left the control of Defendant, Defendant's corporate predecessors, and others with whom they acted in concert and was placed into the stream of commerce.

216. As a result of this defective condition, the paraquat that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed either failed to perform in the manner reasonably to be expected in light of its nature and intended function, or the magnitude of the dangers outweighed its utility.

217. The paraquat that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold

and to which Plaintiff was exposed was used in the intended and directed manner or a reasonably foreseeable manner.

**B. Strict product liability – failure to warn**

218. At all times relevant to this claim, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert were engaged in the business of designing, manufacturing, distributing, and selling pesticides, and designed, manufactured, distributed, and sold paraquat intending or expecting that it would be sold and used in Illinois.

219. Plaintiff was exposed to paraquat sold and used in Illinois that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold intending or expecting that it would be sold and used in Illinois.

220. When Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold the paraquat to which Plaintiff was exposed, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert knew or in the exercise of ordinary care should have known that when used in the intended and directed manner or a reasonably foreseeable manner:

- a. it was designed, manufactured, formulated, and packaged such that it was likely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or

orchards where it had been sprayed or areas near where it had been sprayed;  
and

b. when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, it was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

221. The paraquat that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed was in a defective condition that made it unreasonably dangerous when it was used in the intended and directed manner or a reasonably foreseeable manner, in that:

a. it was not accompanied by directions for use that would have made it unlikely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed;

b. it was not accompanied by a warning that when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, it was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and that repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

222. This defective condition existed in the paraquat that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed

when it left the control of Defendant, Defendant's corporate predecessors, and others with whom they acted in concert and was placed into the stream of commerce.

223. As a result of this defective condition, the paraquat that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed either failed to perform in the manner reasonably to be expected in light of its nature and intended function, or the magnitude of the dangers outweighed its utility.

224. The paraquat that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed was used in the intended and directed manner or a reasonably foreseeable manner.

**C. Negligence – manufacturer/distributor defendants**

225. At all times relevant to this claim, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert were engaged in the business of designing, manufacturing, distributing, and selling pesticides, and designed, manufactured, distributed, and sold paraquat intending or expecting that it would be sold and used in Illinois.

226. Plaintiff was exposed to paraquat sold and used in Illinois that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert

designed, manufactured, distributed, and sold intending or expecting that it would be sold and used in Illinois.

227. The paraquat that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed was used in the intended and directed manner or a reasonably foreseeable manner.

228. At all times relevant to this claim, in designing, manufacturing, packaging, labeling, distributing, and selling paraquat, and in acting in concert with others who did so, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert owed a duty to exercise ordinary care for the health and safety of the persons whom it was reasonably foreseeable could be exposed to it, including Plaintiff.

229. When Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, packaged, labeled, distributed, and sold the paraquat to which Plaintiff was exposed, it was reasonably foreseeable, and Defendant, Defendant's corporate predecessors, and others with whom they acted in concert knew or in the exercise of ordinary case should have known, that when paraquat was used in the intended and directed manner or a reasonably foreseeable manner:

- a. it was designed, manufactured, formulated, and packaged such that it was likely to be inhaled, ingested, and absorbed into the bodies of persons

who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed; and

b. when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, it was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

230. In breach of the aforementioned duty to Plaintiff, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert negligently:

a. failed to design, manufacture, formulate, and package paraquat to make it unlikely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed;

b. designed, manufactured, and formulated paraquat such that when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, it was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure;

c. failed to perform adequate testing to determine the extent to which exposure to paraquat was likely to occur through inhalation, ingestion, and absorption into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed;

d. failed to perform adequate testing to determine the extent to which paraquat spray drift was likely to occur, including its propensity to drift, the distance it was likely to drift, and the extent to which paraquat spray droplets were likely to enter the bodies of persons spraying it or other persons nearby during or after spraying;

e. failed to perform adequate testing to determine the extent to which paraquat, when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure;

f. failed to perform adequate testing to determine the extent to which paraquat, when formulated or mixed with surfactants or other pesticides or used along with other pesticides, and inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure;

g. failed to direct that paraquat be used in a manner that would have made it unlikely to have been inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed; and

h. failed to warn that when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, paraquat was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

#### **D. Public nuisance**

231. At all times relevant to this claim, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert were engaged in the business of designing, manufacturing, distributing, and selling pesticides, and designed,

manufactured, distributed, and sold paraquat intending or expecting that it would be sold and used in Illinois.

232. Plaintiff was exposed to paraquat sold and used in Illinois that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold intending or expecting that it would be sold and used in Illinois.

233. The paraquat that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed was used in the intended and directed manner or a reasonably foreseeable manner.

234. Article XI of the Illinois Constitution of 1970, Environment, Section 1, Public Policy - Legislative Responsibility, provides that:

The public policy of the State and the duty of each person is to provide and maintain a healthful environment for the benefit of this and future generations. The General Assembly shall provide by law for the implementation and enforcement of this public policy."

235. Article XI of the Illinois Constitution of 1970, Environment, Section 2, Rights of Individuals, provides that:

Each person has the right to a healthful environment. Each person may enforce this right against any party, governmental or private, through appropriate legal proceedings subject to reasonable limitation and regulation as the General Assembly may provide by law.

236. At all times relevant to this claim, Plaintiff had the right to a healthful environment while living and working in the State of Illinois.

237. At all times relevant to this claim, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert owed a duty to the public, including Plaintiff and other persons whom they could reasonably foresee were likely to be in or near places where paraquat was being or recently had been used within the State of Illinois, to provide and maintain a healthful environment in connection with their design, manufacture, distribution, and sale of pesticides, including paraquat, in or for use within the State of Illinois.

238. When Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold the paraquat to which Plaintiff was exposed, it was reasonably foreseeable to Defendant, Defendant's corporate predecessors, and others with whom they acted in concert that Plaintiff and other members of the public were likely to be in or near places where paraquat was being or recently had been used.

239. When Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold the paraquat to which Plaintiff was exposed, it was reasonably foreseeable, and Defendant, Defendant's corporate predecessors, and others with whom they acted in concert knew

or in the exercise of ordinary case should have known, that when paraquat was used the intended and directed manner or a reasonably foreseeable manner:

a. it was designed, manufactured, formulated, and packaged such that it was likely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed; and

b. when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, it was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

240. In breach of the aforementioned duty to members of the public, including Plaintiff, in manufacturing, distributing, and selling paraquat for use in the State of Illinois, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert negligently:

a. failed to design, manufacture, formulate, and package paraquat to make it unlikely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed;

b. designed, manufactured, and formulated paraquat such that when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, it was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure;

c. failed to perform adequate testing to determine the extent to which exposure to paraquat was likely to occur through inhalation, ingestion, and absorption into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed;

d. failed to perform adequate testing to determine the extent to which paraquat spray drift was likely to occur, including its propensity to drift, the distance it was likely to drift, and the extent to which paraquat spray droplets were likely to enter the bodies of persons spraying it or other persons nearby during or after spraying;

e. failed to perform adequate testing to determine the extent to which paraquat, when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure;

f. failed to perform adequate testing to determine the extent to which paraquat, when formulated or mixed with surfactants or other pesticides or used along with other pesticides, and inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure;

g. failed to direct that paraquat be used in a manner that would have made it unlikely to have been inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed; and

h. failed to warn that when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, paraquat was likely to cause or contribute to cause latent

neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

**E. Consumer Fraud and Deceptive Business Practices Act**

241. At all times relevant to this claim, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert were engaged in the business of designing, manufacturing, distributing, and selling pesticides, and designed, manufactured, distributed, and sold paraquat intending or expecting that it would be sold and used in Illinois.

242. Plaintiff was exposed to paraquat sold and used in Illinois that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold intending or expecting that it would be sold and used in Illinois and that Plaintiff, a member of Plaintiff's family, or Plaintiff's employer purchased for the purpose of controlling weeds and not for resale.

243. This Count is brought pursuant to the Illinois Consumer Fraud and Deceptive Business Practices Act, 815 ILCS 505/1, *et seq.*

244. At all times relevant to this claim, Plaintiff, and Defendant, Defendant's corporate predecessors, and others with whom they acted in concert were persons within the meaning of 815 ILCS 505/1(c).

245. At all times relevant to this claim, Plaintiff was a consumer within the meaning of 815 ILCS 505/1(e).

246. At all times relevant to this claim, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert were engaged in the conduct of trade and commerce within the meaning of 815 ILCS 505/1(f).

247. The Illinois Consumer Fraud and Deceptive Business Practices Act, 815 ILCS 505/1 et seq., provides in pertinent part:

Unfair methods of competition and unfair or deceptive acts or practices, including but not limited to the use or employment of any deception, fraud, false pretense, false promise, misrepresentation or the concealment, suppression, or omission of any material fact, with intent that others rely upon the concealment, suppression or omission of such material fact, or the use or employment of any practices described in Section 2 of the 'Uniform Deceptive Trade Practices Act', approved August 6, 1965, in conduct of any trade or commerce are hereby declared unlawful, whether any person has in fact been mislead, deceived, or damaged thereby.

248. At all times relevant to this claim, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert had actual or constructive knowledge that when used in the intended and directed manner or a reasonably foreseeable manner:

a. paraquat was designed, manufactured, formulated, and packaged such that it was likely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed; and

b. when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, paraquat was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to

cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

249. At all times relevant to this claim, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert had actual or constructive knowledge that:

a. adequate testing had not been performed to determine the extent to which exposure to paraquat was likely to occur through inhalation, ingestion, and absorption into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed;

b. adequate testing had not been performed to determine the extent to which paraquat spray drift was likely to occur, including its propensity to drift, the distance it was likely to drift, and the extent to which paraquat spray droplets were likely to enter the bodies of persons spraying it or other persons nearby during or after spraying;

c. adequate testing had not been performed to determine the extent to which paraquat, when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure;

d. adequate testing had not been performed to determine the extent to which paraquat, when formulated or mixed with surfactants or other pesticides or used along with other pesticides, and inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

250. From the first date on which Defendant, Defendant's corporate predecessors, and others with whom they acted in concert placed paraquat that they designed, manufactured, distributed and sold into the stream of commerce for use in the State of Illinois through the last date on which Plaintiff was exposed to paraquat that they designed, manufactured, distributed, and sold for use in the State of Illinois, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert engaged in unfair or deceptive acts or practices, including but not limited to deception, fraud, false pretense, false promise, misrepresentation or the concealment, suppression, or omission of material facts, regarding their design, manufacture, distribution, and sale of paraquat for use in the State of Illinois, in that they:

a. concealed, suppressed, or omitted to disclose that paraquat was designed, manufactured, formulated, and packaged such that it was likely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed;

b. concealed, suppressed, or omitted to disclose that when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, paraquat was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

c. concealed, suppressed, or omitted to disclose that adequate testing had not been performed to determine the extent to which exposure to paraquat was likely to occur through inhalation, ingestion, and absorption into the bodies of persons who used it, who were nearby while it was being used, or who

entered fields or orchards where it had been sprayed or areas near where it had been sprayed;

d. concealed, suppressed, or omitted to disclose that adequate testing had not been performed to determine the extent to which paraquat spray drift was likely to occur, including its propensity to drift, the distance it was likely to drift, and the extent to which paraquat spray droplets were likely to enter the bodies of persons spraying it or other persons nearby during or after spraying;

e. concealed, suppressed, or omitted to disclose that adequate testing had not been performed to determine the extent to which paraquat, when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure;

f. concealed, suppressed, or omitted to disclose that adequate testing had not been performed to determine the extent to which paraquat, when formulated or mixed with surfactants or other pesticides or used along with other pesticides, and inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

251. These acts and practices of Defendant, Defendant's corporate predecessors, and others with whom they acted in concert in manufacturing, distributing and selling paraquat for use in the State of Illinois were "unfair" because they offended public policy, were immoral, unethical, oppressive, and unscrupulous, and caused substantial injury to consumers.

252. These acts and practices of Defendant, Defendant's corporate predecessors, and others with whom they acted in concert in manufacturing, distributing and selling paraquat for use in the State of Illinois offended the clearly stated public policy of the State of Illinois, as expressed in Article XI of the Illinois Constitution of 1970, Environment, Section 1, Public Policy - Legislative Responsibility, that:

The public policy of the State and the duty of each person is to provide and maintain a healthful environment for the benefit of this and future generations. The General Assembly shall provide by law for the implementation and enforcement of this public policy."

253. These acts and practices of Defendant, Defendant's corporate predecessors, and others with whom they acted in concert in manufacturing, distributing and selling paraquat for use in the State of Illinois offended the clearly stated public policy of the State of Illinois, as expressed in Article XI of the Illinois Constitution of 1970, Environment, Section 2, Rights of Individuals, that:

Each person has the right to a healthful environment. Each person may enforce this right against any party, governmental or private, through appropriate legal proceedings subject to reasonable limitation and regulation as the General Assembly may provide by law.

254. These acts and practices of Defendant, Defendant's corporate predecessors, and others with whom they acted in concert in manufacturing, distributing and selling paraquat for use in the State of Illinois were immoral and unethical, as they served only to benefit Defendant, Defendant's corporate

predecessors, and others with whom they acted in concert at the expense of the health of purchasers and users of paraquat and the public.

255. These acts and practices of Defendant, Defendant's corporate predecessors, and others with whom they acted in concert in manufacturing, distributing and selling paraquat for use in the State of Illinois were likely to cause substantial injury to purchasers and users of paraquat and the public by exposing them to unnecessary risks to their health.

256. These acts and practices of Defendant, Defendant's corporate predecessors, and others with whom they acted in concert in manufacturing, distributing and selling paraquat for use in the State of Illinois were likely to cause, and did cause, substantial injury to purchasers and users of paraquat and the public in that but for these acts and practices paraquat would not have been purchased for use in Illinois and persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed would not have been injured by it.

257. The injuries caused by these acts and practices of Defendant, Defendant's corporate predecessors, and others with whom they acted in concert in manufacturing, distributing and selling paraquat for use in the State of Illinois, namely purchasers' monetary losses and the injuries and damages (including monetary losses) to persons who used it, who were nearby while it was being used, or who entered fields or

orchards where it had been sprayed or areas near where it had been sprayed, including Plaintiff, are not outweighed by any countervailing benefit to consumers or competition.

258. The injuries caused by these acts and practices of Defendant, Defendant's corporate predecessors, and others with whom they acted in concert in manufacturing, distributing and selling paraquat for use in the State of Illinois, namely purchasers' monetary losses and the injuries and damages (including monetary losses) to persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, including Plaintiff, were not reasonably avoidable; because Defendant, Defendant's corporate predecessors, and others with whom they acted in concert in manufacturing, distributing and selling paraquat for use in the State of Illinois were the sole sources of material information and they failed to disclose this information, and consumers therefore could not have had reason to anticipate the impending harm and thus avoid their injuries.

259. Defendant, Defendant's corporate predecessors, and others with whom they acted in concert intended that purchasers of the paraquat that they manufactured, distributed, and sold and to which Plaintiff was exposed purchase it in reliance on these unfair and deceptive acts and practices.

260. The facts that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert concealed, suppressed, or omitted to disclose were material to the decisions to purchase the paraquat that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert manufactured, distributed, and sold and to which Plaintiff was exposed, in that it would not have been purchased had these facts been disclosed.

261. These unfair and deceptive acts and practices of Defendant, Defendant's corporate predecessors, and others with whom they acted in concert occurred in connection with their conduct of trade and commerce in the State of Illinois.

262. These unfair and deceptive acts and practices of Defendant, Defendant's corporate predecessors, and others with whom they acted in concert violated the Illinois Consumer Fraud and Deceptive Business Practices Act, 815 ILCS §505/2, and the Uniform Deceptive Trade Practices Act, 815 ILCS §510/2.

**F. Breach of implied warranty of merchantability**

263. At all times relevant to this claim, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert were engaged in the business of designing, manufacturing, distributing, and selling paraquat and other restricted-use pesticides and themselves out as having knowledge or skill regarding paraquat and other restricted-use pesticides.

264. At all times relevant to this claim, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold paraquat intending or expecting that it would be sold and used in Illinois.

265. Plaintiff was exposed to paraquat sold and used in Illinois that Defendant, Defendant's corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold intending or expecting that it would be sold and used in Illinois.

266. At the time of each sale of paraquat to which Plaintiff was exposed, Defendant, Defendant's corporate predecessors, and others with whom they acted in concert impliedly warranted that it was of merchantable quality, including that it was fit for the ordinary purposes for which such goods were used, pursuant to section 2-314 of the Uniform Commercial Code, 810 ILCS 5/2-314.

267. Defendant, Defendant's corporate predecessors, and others with whom they acted in concert breached this warranty regarding each sale of paraquat to which Plaintiff was exposed, in that it was not of merchantable quality because it was not fit for the ordinary purposes for which such goods were used, and in particular:

a. it was designed, manufactured, formulated, and packaged such that it was likely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed; and

b. when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, it was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

**G. Negligence – dealer/applicator defendant**

268. At all times relevant to this claim, in selling and applying paraquat, Defendant owed a duty to exercise ordinary care for the health and safety of the persons, including Plaintiff, whom it was reasonably foreseeable could be exposed to it while using it or residing in the vicinity of farms to which it was applied.

269. When Defendant sold and applied the paraquat to which Plaintiff was exposed, it was reasonably foreseeable, and Defendant knew or in the exercise of ordinary case should have known, that when paraquat was used in the intended and directed manner or a reasonably foreseeable manner:

a. it was designed, manufactured, formulated, and packaged such that it was likely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed; and

b. when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, it was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

270. In breach of its duty to Plaintiff, Defendant negligently:

a. failed to perform adequate testing to determine the extent to which exposure to paraquat was likely to occur through inhalation, ingestion, and absorption into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed;

b. failed to perform adequate testing to determine the extent to which paraquat spray drift was likely to occur, including its propensity to drift, the distance it was likely to drift, and the extent to which paraquat spray droplets were likely to enter the bodies of persons spraying it or other persons nearby during or after spraying;

c. failed to perform adequate testing to determine the extent to which paraquat, when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure;

d. failed to perform adequate testing to determine the extent to which paraquat, when formulated or mixed with surfactants or other pesticides or used along with other pesticides, and inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure;

e. failed to direct that paraquat be used in a manner that would have made it unlikely to have been inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed; and

f. failed to warn that when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, paraquat was likely to cause or contribute to cause latent

neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure;

g. Failed to take precautions while spraying paraquat to prevent persons residing nearby from being exposed to it; and

h. Failed to warn persons residing near fields where it was spraying paraquat that it was spraying paraquat and that exposure to it could be hazardous to their health.

### **III. Individual Plaintiffs' allegations and claims**

#### **A. Plaintiff MARVIN WENDLER**

271. Plaintiff MARVIN WENDLER was born in 1938 and resides in Monroe County, Illinois.

272. From approximately 1964 through 1979, Plaintiffs resided in rural Highland, Illinois, in a home surrounded by farm fields.

273. Between approximately 1964 and 1979, Plaintiff MARVIN WENDLER was repeatedly exposed to and inhaled, ingested, or absorbed paraquat in the course of using it to control weeds on his own farm.

274. Between approximately 1964 and 1979, Plaintiff MARVIN WENDLER was repeatedly exposed to and inhaled, ingested, or absorbed paraquat that was sprayed on farm fields in the vicinity of his Highland, Illinois home by Defendant Bergmann-Taylor, the owners or operators of farms in that vicinity, and on information and belief, one or more GROWMARK or FS member cooperatives.

275. From approximately 1979 through 2006, Plaintiffs resided in rural St. Jacob, Illinois, in a home surrounded by farm fields.

276. Between approximately 1964 and 1979, Plaintiff MARVIN WENDLER was repeatedly exposed to and inhaled, ingested, or absorbed paraquat that was sprayed on farm fields in the vicinity of his St. Jacob, Illinois home by Defendant Bergmann-Taylor, the owners or operators of farms in that vicinity, and on information and belief, one or more GROWMARK or FS member cooperatives.

277. From 1973 through 2000, Plaintiff MARVIN WENDLER was employed as a railroad engineer by Manufacturers Railway Company.

278. On information and belief, between 1973 and 2000, Plaintiff MARVIN WENDLER was repeatedly exposed to paraquat that was sprayed to control weeds in the Manufacturers Railway Company yard in St. Louis, Missouri.

279. Between 1973 and 2000, in the course of his employment as a railroad engineer by Manufacturers Railway Company, Plaintiff MARVIN WENDLER was frequently on the premises of the railroad yard of The Alton & Southern Railway Company in the City of East St. Louis in St. Clair County, Illinois.

280. On information and belief, between 1973 and 2000, Plaintiff MARVIN WENDLER was repeatedly exposed to and inhaled, ingested, or absorbed paraquat that was sprayed to control weeds in The Alton & Southern Railway Company railroad yard

in the City of East St. Louis in St. Clair County, Illinois the Manufacturers Railway Company yard in St. Louis, Missouri

281. Plaintiff MARVIN WENDLER was diagnosed with PD in or about 2006.

282. No doctor or any other person told Plaintiff MARVIN WENDLER before December 19, 2016 that his Parkinson's disease was or could have been caused by exposure to paraquat.

283. Before December 19, 2016, Plaintiff MARVIN WENDLER had never read or heard of any articles in newspapers, scientific journals, or other publications that associated Parkinson's disease with paraquat.

284. Before December 19, 2016, Plaintiff MARVIN WENDLER had never read or heard of any lawsuit alleging that paraquat causes Parkinson's disease.

285. Plaintiff MARVIN WENDLER was not aware that Parkinson's disease could be caused by exposure to paraquat until my attorneys told me this on December 19, 2016.

286. At no time when using paraquat himself was Plaintiff MARVIN WENDLER aware that exposure to paraquat could cause any latent injury, including any neurological injury or Parkinson's disease, or that any precautions were necessary to prevent any latent injury that could be caused by exposure to paraquat.

287. The paraquat to which Plaintiff MARVIN WENDLER was exposed was sold and used in Illinois, and was manufactured, distributed, and on information and

belief was sold by one or more of the Defendants and their corporate predecessors and others with whom they acted in concert intending or expecting that it would be sold and used in Illinois.

288. On information and belief, Plaintiff MARVIN WENDLER was exposed to paraquat manufactured, distributed, and sold at different times as to each Defendant, its corporate predecessors, and others with whom they acted in concert, and not necessarily throughout the entire period of his exposure as to any particular Defendant, its corporate predecessors, and others with whom they acted in concert.

289. On information and belief, Plaintiff MARVIN WENDLER was exposed to paraquat that was sold and used in Illinois, and was manufactured, distributed, and sold by SCPLLC, its corporate predecessors, and others with whom they acted in concert, including Chevron Chemical, intending or expecting that it would be sold and used in Illinois.

290. On information and belief, Plaintiff MARVIN WENDLER was exposed to paraquat that was sold and used in Illinois, and was manufactured, distributed, and sold by SAG, its corporate predecessors, and others with whom they acted in concert, including Chevron Chemical, intending or expecting that it would be sold and used in Illinois.

291. On information and belief, Plaintiff MARVIN WENDLER was exposed to paraquat that was sold and used in Illinois, and was manufactured, distributed, and

sold by Chevron Chemical, acting in concert with ICI and ICI Americas, intending or expecting that it would be sold and used in Illinois.

292. On information and belief, Plaintiff MARVIN WENDLER was exposed to paraquat that was sold and used in Illinois, and was distributed and sold by GROWMARK and its corporate predecessor to one or more GROWMARK member cooperatives.

**COUNT 1  
PLAINTIFF MARVIN WENDLER  
DEFENDANTS SCPLLC AND SAG  
STRICT PRODUCT LIABILITY – DESIGN DEFECT  
PERSONAL INJURIES**

293. Plaintiff MARVIN WENDLER incorporates in this Count by reference paragraphs 1–211, 212–217, and 271–292 of this Complaint.

294. As a direct and proximate result of the defective and unreasonably dangerous condition of the paraquat manufactured, distributed, and sold by SCPLLC, SAG, their corporate predecessors, and others with whom they acted in concert, Plaintiff MARVIN WENDLER developed PD; has suffered severe and permanent physical pain, mental anguish, and disability, and will continue to do so for the remainder of his life; has suffered the loss of a normal life and will continue to do so for the remainder of his life; has lost income that he otherwise would have earned and will continue to do so for the remainder of his life; and has incurred reasonable expenses for necessary medical treatment and will continue to do so for the remainder of his life.

WHEREFORE, Plaintiff MARVIN WENDLER prays that this Court enter judgment in his favor and against Defendants SYNGENTA CROP PROTECTION LLC and SYNGENTA AG, jointly and severally, in an amount in excess of \$50,000.00 plus costs of suit, and for such further relief as is just and appropriate in the circumstances.

**COUNT 2**  
**PLAINTIFF MARVIN WENDLER**  
**DEFENDANTS SCPLLC AND SAG**  
**STRICT PRODUCT LIABILITY – FAILURE TO WARN**  
**PERSONAL INJURIES**

295. Plaintiff MARVIN WENDLER incorporates in this Count by reference paragraphs 1–211, 218–224, and 271–292 of this Complaint.

296. As a direct and proximate result of the lack of adequate directions for the use of and warnings about the dangers of the paraquat manufactured, distributed and sold by SCPLLC, SAG, their corporate predecessors, and others with whom they acted in concert, Plaintiff MARVIN WENDLER developed PD; has suffered severe and permanent physical pain, mental anguish, and disability, and will continue to do so for the remainder of his life; has suffered the loss of a normal life and will continue to do so for the remainder of his life; has lost income that he otherwise would have earned and will continue to do so for the remainder of his life; and has incurred reasonable expenses for necessary medical treatment and will continue to do so for the remainder of his life.

WHEREFORE, Plaintiff MARVIN WENDLER prays that this Court enter judgment in his favor and against Defendants SYNGENTA CROP PROTECTION LLC and SYNGENTA AG, jointly and severally, in an amount in excess of \$50,000.00 plus costs of suit, and for such further relief as is just and appropriate in the circumstances.

**CONSUMER FRAUD AND DECEPTIVE BUSINESS PRACTICES ACT**  
**LOSS OF SERVICES AND CONSORTIUM**

352. Plaintiff LORENA WENDLER incorporates in this Count by reference all of Count 11 and paragraph 331 of this Complaint.

353. As a direct and proximate result of the violations of the Consumer Fraud and Deceptive Business Practices Act by Chevron Chemical and others with whom it acted in concert, Plaintiff LORENA WENDLER has been deprived and is reasonably certain to be deprived in the future of the services, society, and companionship of and sexual relationship with her husband.

WHEREFORE, Plaintiff LORENA WENDLER prays that this Court enter judgment in her favor and against Defendants CHEVRON PHILLIPS CHEMICAL COMPANY LP and CHEVRON U.S.A. INC., jointly and severally, in an amount in excess of \$50,000.00 plus costs of suit, and for such further relief as is just and appropriate in the circumstances.

**COUNT 31**  
**PLAINTIFF LORENA WENDLER**  
**DEFENDANTS CHEVRON PHILLIPS CHEMICAL COMPANY LP**  
**AND CHEVRON U.S.A. INC.**  
**BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY**  
**LOSS OF SERVICES AND CONSORTIUM**

354. Plaintiff LORENA WENDLER incorporates in this Count by reference all of Count 12 and paragraph 331 of this Complaint.

355. As a direct and proximate result of the breaches of the implied warranty of merchantability by Chevron Chemical and others with whom it acted in concert, Plaintiff LORENA WENDLER has been deprived and is reasonably certain to be deprived in the future of the services, society, and companionship of and sexual relationship with her husband.

WHEREFORE, Plaintiff LORENA WENDLER prays that this Court enter judgment in her favor and against Defendants CHEVRON PHILLIPS CHEMICAL COMPANY LP and CHEVRON U.S.A. INC., jointly and severally, in an amount in excess of \$50,000.00 plus costs of suit, and for such further relief as is just and appropriate in the circumstances.

**COUNT 32**  
**PLAINTIFF LORENA WENDLER**  
**DEFENDANT GROWMARK INC.**  
**STRICT PRODUCT LIABILITY – DESIGN DEFECT**  
**LOSS OF SERVICES AND CONSORTIUM**

356. Plaintiff LORENA WENDLER incorporates in this Count by reference all of Count 13 and paragraph 331 of this Complaint.

357. As a direct and proximate result of the defective and unreasonably dangerous condition of the paraquat distributed and sold by GROWMARK and its corporate predecessor, Plaintiff LORENA WENDLER has been deprived and is reasonably certain to be deprived in the future of the services, society, and companionship of and sexual relationship with her husband.

WHEREFORE, Plaintiff LORENA WENDLER prays that this Court enter judgment in her favor and against Defendant GROWMARK INC., jointly and severally, in an amount in excess of \$50,000.00 plus costs of suit, and for such further relief as is just and appropriate in the circumstances.

**COUNT 33**  
**PLAINTIFF LORENA WENDLER**  
**DEFENDANT GROWMARK INC.**  
**STRICT PRODUCT LIABILITY – FAILURE TO WARN**  
**LOSS OF SERVICES AND CONSORTIUM**

358. Plaintiff LORENA WENDLER incorporates in this Count by reference all of Count 14 and paragraph 331 of this Complaint.

359. As a direct and proximate result of the lack of adequate directions for the use of and warnings about the dangers of the paraquat distributed and sold by GROWMARK and its corporate predecessor, Plaintiff LORENA WENDLER has been deprived and is reasonably certain to be deprived in the future of the services, society, and companionship of and sexual relationship with her husband.

WHEREFORE, Plaintiff LORENA WENDLER prays that this Court enter judgment in her favor and against Defendant GROWMARK INC., jointly and severally, in an amount in excess of \$50,000.00 plus costs of suit, and for such further relief as is just and appropriate in the circumstances.

**COUNT 34**  
**PLAINTIFF LORENA WENDLER**  
**DEFENDANT GROWMARK INC.**  
**NEGLIGENCE**  
**LOSS OF SERVICES AND CONSORTIUM**

360. Plaintiff LORENA WENDLER incorporates in this Count by reference all of Count 15 and paragraph 331 of this Complaint.

361. As a direct and proximate result of the negligence of GROWMARK and its corporate predecessor, Plaintiff LORENA WENDLER has been deprived and is reasonably certain to be deprived in the future of the services, society, and companionship of and sexual relationship with her husband.

WHEREFORE, Plaintiff LORENA WENDLER prays that this Court enter judgment in her favor and against Defendant GROWMARK INC., jointly and severally,

in an amount in excess of \$50,000.00 plus costs of suit, and for such further relief as is just and appropriate in the circumstances.

**COUNT 35**
