Dear Sir or Madam:

Last week I requested that the sequences with the accession numbers MN312240-MN321869 be released on 15th April.

However, both the authors and the editor of the journal decided that the manuscript involving those sequences need to be further revised. The acceptance and publication date of the paper will thus be delayed, which will be determined later.

So please ignore my request in my last mail (see below) and keep those sequences confidential as original planned. I will contact you later about the date on which the sequences can be released.

Sorry for different requesting again and again but thank you very much for understanding.

Best regards

Ben Hu

主题: Re: GenBank accession MN312240-MN312869

Dear Sir or Madam,

In the original submission to Genbank, I requested that the sequences with the accession number MN312240-MN312869 be kept confidential until Dec 31 2020, but following the requirement of the journal to which the research article involving these sequences was submitted, I kindly request that they are released on 15th April 2020, as the manuscript can only be accepted after the sequences are available in the public database.

Thank you very much!

Best regards

&gt; The GenBank accession numbers should appear in any publication that  
&gt; reports or discusses these data, as it gives the community a unique  
&gt; label with which they may retrieve your data from our on-line servers.  
&gt; You may prepare and submit your manuscript before your accessions are  
&gt; released in GenBank.

&gt;  
&gt; Submissions are not automatically deposited into GenBank after being  
&gt; accessioned. Each sequence record is individually examined and processed  
&gt; by the GenBank annotation staff to ensure that it is free of errors or problems.

&gt;  
&gt; You have requested that your data are to be held confidential until:

&gt;  
&gt; Since the flatfile record is a display format only and is not an editable  
&gt; format of the data, do not make changes directly to a flatfile. For  
&gt; complete information about different methods to update a sequence record,
