Dear Peter
Thank you for the update.
It was a pleasure meeting you in May at the Pandemic and Biosecurity Forum in Washington, organized by the Texas A&M University, George H.W. Bush School of Government & Public Service and the Scowcroft Institute of International Affairs.
The proceedings of the Forum was recorded - see sites below

Importance: High

I checked in with the lawyers re. the letter just to be safe, and they had an important suggestion for the letter that I think you should change out.

I also removed the mention of the Executive Director earlier in the doc.

I realize this isn’t the exact language you wanted, but it’s safer for us at this sensitive point where we still have USAID funding being use for GVP related activities..

Cheers,

Peter

Subject: [Welcome] Global Virome Project Board of Directors 

Dear, 

We are pleased to welcome you as a member of the Board of Directors for the Global Virome Project. Please see your letter attached for full details, and please do not hesitate to contact us if you have any questions. We very much look forward to working with you. 

Sincerely,  
Global Virome Project Team
March 29, 2019

The World Academy of Sciences & Nigerian Academy of Sciences, Academy House, 8A Ransome Kuti Road, University of Lagos, Lagos, Nigeria.

Dear [Name],

I am very pleased to welcome you as a member of the Board of Directors for the Global Virome Project (GVP). The transition of the GVP into a legal and operational reality is both exciting and daunting. The Board of Directors will be critical to ensuring the GVP’s long term success. This transition has been a long time in the making. Over the past two years, a network of international partners has been actively guiding the evolution of the GVP from a “scientific” proposal towards an operational reality. This “Steering Committee” has provided a strong 10 year vision that frames the GVP’s way forward in three phases – an initial “incubation period”, a longer term “steady state”, and the “post GVP” period.

The Incubation Period is the critical first phase that is intended to “validate the operational and scientific scalability” of the GVP; mobilize initial funding; and, build out the GVP organization. The incorporation of the GVP and the establishment of the Board of Directors are vital first steps towards building out the GVP’s organizational structure. In parallel, the first steps have been taken to launch the “validation” phase in Thailand and China. Both countries are in the process of establishing their respective national Virome projects (the Thai Virome Project and the China Virome Project). Further, a series of scientific and operational working groups, overseen by the Steering Committee and composed of international scientific and legal experts, have provided a sound technical, scientific, and operational framework for the GVP’s field activities. Together the Steering Committee and the Working Groups have well positioned the GVP for this next, exciting step.

With the legal launch of the GVP, the Board of Directors will be responsible for setting the GVP’s overarching direction, championing stakeholder engagement, and providing financial oversight. In the coming months, the Board of Directors will be specifically responsible for approving membership to a Scientific Advisory Group and for providing oversight of the
operational work of the GVP’s secretariat or “Hub”. I will provide you with a more detailed introduction to the current organizational and strategic plan for the GVP in a separate communication.

As some of you may be aware, I will be retiring from my current position at USAID later this summer. I intend to use my time, as a voluntary member of the Board of Directors, to help accelerate the transition of the GVP into a fully-functioning organization. I strongly believe the GVP has the potential to transform how the global community understands, prepares for, and responds to future viral threats – and in the end will make the world a far safer place. I look forward to working with you to make this vision a reality.

In the coming weeks each of you will receive an email and packet drafted by the law offices of Tarter Krinsky & Drogin LLP including resolutions and bylaws for the new 501 (c) 3. You will be asked to sign and return the resolutions to formally accept your appointment to the Board.

At your convenience I can arrange a phone conversation to provide you additional information and answer any questions you might have.

All the best,

GVP Core Team

Dear Peter, 

I think that you arranged a very successful meeting for GVP, all participants think the GVP is important. And I learned a lot from the workshop.

I believe that our Chinese side can make our great contributions for the development of GVP database system and data portal by the supports from China CDC and CAS.

By the way, in the workshop I saw a PPT for the organizational partners, I put it in the attachment. May I have WDCM also in the list? I put WDCM logo in the attachment. WDCM will be happy to make our contributions to GVP for data standard, database development, data portal and training courses.

Thank you for your invitation for this workshop, and hope to see you all soon in somewhere next time, maybe in Beijing.

Best regards,

Subject: Re: URGENT Question

OK but dont mind if less authorships

在 2017年4月5日，上午4:36，[Redacted]@usaid.gov> 写道：

All, we have been contacted by the Financial Times to write an OP-Ed for GVP. Thats the good news. The bad is they want it by tomorrow (April 5) by COB London time and I are doing a quick write up - but if possible we would like to include you all as authors. We dont know whether they will accept more than two names, but if so it would be great to have you as part of the fun. If you give an ok it will be sight unseen for you; we will need to submit before you can review. We dont expect to say anything beyond our normal pitch: threats are increasing, we are not prepared, we need to be more proactive, the virome is ours to discover and and new world order is in play :)

And again, they might limit authorship so dont be disappointed.

Let us know when you can. thanks

在 2018年1月24日，上午5:34，@usaid.gov> wrote:

Dear first, let me thank each of you for agreeing to participate in the "kick off" plenary for PMAC 2018 - Plenary Session 0 - "Vision 2100: Re-Imagining the End Game for the End of the Pandemic Era". Given your collective backgrounds AND personalities this session should prove to be quite an event. Our session is scheduled for Thursday, February 1, 11:00 - 12:30, following the Opening Session with Her Royal Highness. The Plenary will open with a 20 minute "scene setting" Keynote by who will provide an "exploration of trends and dynamics that make the 21st century" a period of extraordinary risk from zoonotic diseases and antimicrobial resistance. Following presentation I will ask each of you to provide a crisp (up to) 5 minute statement that can be partly a reflection on the points highlighted by and your own perspectives on the "challenges and opportunities" we face. (No power points required - but if you wish to use a slide or two let me know and we can make the necessary arrangements). Your comments should be intended to challenge the audience to think "out of the box" about the problems and the solutions - and set the stage for the rest of the conference for "innovative and creative" thinking.

A core theme across the conference is "multi-sectoralism" - how both the problems and the solutions span multiple sectors - and how we as a global community need to "break down" the silos that have isolated our human and animal health sectors, our environmental sectors etc. as well as our private and public sectors. After your opening comments I will ask several questions (ones that I will base on presentation - so as soon as you have a copy to share that would be great). I will discuss these question with you in advance and modify them based on your input. After, I will open it up to the audience to submit written questions which I will read.

Note, that the recipient of this years PMAC Award is "The Human Genome Project. This is an especially timely award as it highlights how the power of big data can transform medical research
and global health. It would be important and appropriate to consider how big data in other aspects of science and public health can be similarly transformative as we face the future.

The session is intended to be informative but also lively, so draw on your familiarity with each other to create an intimate exchange.

For your background reading I am attaching a brief 2 page overview of the Plenary. If you have any questions, please do not hesitate to get in touch.

It would be good to meet prior to our session to finalize our planning. Can everyone share their planned arrival and we can then try to coordinate a meeting?

Looking forward to seeing you all in Bangkok.

All my best

Dear Colleagues,

As I mentioned in my email to the larger group, we would like to arrange for a monthly call among the thematic area co-leads (as well as the additional core group members) in advance of the May 1st deadline. While we hope that the working groups will be in communication, as needed, we hope that these calls will enable us to identify any roadblocks and keep one another updated moving forward.

We would like to propose an early March time for the first call. We realize that with time differences, it may be hard to get everyone, but we hope to have at least 1 rep from each thematic area.

Please let me know if you have a scheduler or assistant who should be included in the emails and we will likely send out a doodle poll soon to identify a day/time.

Sincerely,

Dear Colleagues,

Just a quick reminder of the action requested below. Please let me know by COB Friday if you would like to participate in the GVP Selection Committee and/or if you have any suggested nominees to participate. If you aren't interested, no need to respond!

Best,

U.S. Agency for International Development (USAID) Contractor
Bureau for Global Health, Office of Infectious Disease, Emerging Threats Division

On Fri, Sep 28, 2018 at 10:35 AM <usaid.gov> wrote:

Dear GVP Steering Committee Members,

We hope that you are all doing well!

We wanted to follow up on the next steps for GVP governance discussed during the last GVP Steering Committee meeting in DC. One of the proposed next steps was to identify a Selection Committee who will be tasked with selecting the Board of Directors (BoD) for the GVP.

The decision was that the current Steering Committee members would be asked A) if they would like to participate in the Selection Committee, and B) if there are others whom they would recommend to participate. The goal is to ensure that we have a diverse set of perspectives in order to ensure a high quality BoD.

Action Requested (Please respond by close of business on Friday, October 5th):
- Please respond to this email (ideally, please do not "reply all") with your interest in participating in the GVP Selection Committee. If you do not respond, we will assume you are not interested in participating.
- If you have others who you would recommend for the Selection Committee, please respond with those names and any contact information you have (email, institution, etc.). If you have already confirmed the individual's interest, please include that in your message.

Once we have received all the nominations and compiled them, we'll reach back out regarding next steps.

Have a wonderful weekend,

U.S. Agency for International Development (USAID) Contractor
