Hi Laurie and Kelly,

Clearly, the photos of seeds have struck a nerve. I'd be very reluctant to remove the photos entirely, but I think David Fischer does have valid concerns. I think the best course of action would be to try to get some of the seed samples Dave presented in the PowerPoint he distributed and photograph them in the same manner that we photographed the seed that Harold Watters collected from planters here in Ohio. While it is not quantitative, it would give an apples-to-apples comparison and would, hopefully, clarify things.

What do you think? Should I contact Dave directly?

Reed

Hi Reed,

Please find David Fischer's comments attached. These were the only additional comments we received. We appreciate you responding and sending them back to us for consideration. Also, please keep us updated on the resubmission of your final report. Let us know if you have any questions.

Hi Kelly,

Did you get any questions or comments? I know Dave Fisher had a few that he was going to submit.

Thanks,  
Reed
