13. SUBJECT: CTR prepared the attached letter in response to Member of Congress on the concern of a 2017 grant awarded by the DoD to EcoHealth Alliance Inc.	14. EIS NUMBER: CS_110923_050420
	15. INTERNAL SUSPENSE: 05/14/2020
	16. EXTERNAL SUSPENSE: 05/12/2020

17. SUMMARY:

(U) BOTTOM LINE UP FRONT (BLUF):
 U.S. Congressman Guy Reschenthaler raised concerns, in formal correspondence, regarding the history of EcoHealth Alliance Inc. (EHA) with regard to collaboration with the Wuhan Institute of Virology (WIV), which reports allege may be linked to the epicenter of the COVID-19 outbreak. EHA has been a recipient of grants provided by CT-BT. CT-BT reviewed the letter and provided the enclosed response confirming that no DTRA funds were used to support WIV or any other Chinese research facility.

(U) RECOMMENDATION: (1-2 sentences) Provide a clear, concise statement regarding staff package purpose and action required. (Signature, For Information Purpose Only, etc.)
 Respectfully request signature on enclosed Action Memo after reviewing associated documents, to include CT-BT's responses to the Congressman's three (3) questions.

(U) EXECUTIVE SUMMARY: (1-5 bullets or short paragraphs) Provide a concise summary of the issue. It should include key elements of background information, supporting information/analysis, and main conclusion(s).

- In the letter from U.S. Congress member Guy Reschenthaler, he raised concerns regarding the history of EcoHealth Alliance Inc. with regard to collaboration with the Wuhan Institute of Virology, which reports allege may be linked to the epicenter of the COVID-19 outbreak (TAB A).
- In 2017, DoD awarded a \$6.5 million grant to EcoHealth Alliance. The description of this grant is listed as "understanding the risk of bat-borne zoonotic disease emergence in Western Asia."
- DTRA's response outlines the utilization of grant funds and confirms that no portion of the funds granted by the Cooperative Threat Reduction (CTR) Directorate's Biological Threat Reduction Program (BTRP) to EcoHealth Alliance supported work at the Wuhan Institute of Virology or any other activity in the People's Republic of China.

(U) CRITICAL COMMENTS / NON-CONCURS: Provide a concise summary of any reported GO/FO/SES critical comments and rationale for rejection. Also include GO/FO/SES non-concurs or viewpoints that differ from the recommendation or main conclusion(s). "N/A" if not required.

Left Side TABS: (Labeled A,B,C or 1,2,3 etc.) TAB A - Draft response letter to Congressman Reschenthaler TAB B - Letter from Congressman Reschenthaler TAB C - Action Memo for U.S. Lord (A&S)	Right Side Original Document Enclosures or Attachments

Date: Monday, August 29, 2022 10:24:58 AM
Attachments: SHSGAC Letter re EHA (18 Nov 2021).pdf
Importance: High

Sir,

The only document listed for this congressional is attached... In addition, I have added the instructions from the Tasker and (b)(6) below.

BLUF

Congress is seeking all documents or communications sent by DTRA in response to any research proposal or grant application submitted by or on behalf of EcoHealth and/or the Wuhan Institute of Virology (WIV).

BACKGROUND

The Senate Homeland Security and Governmental Affairs Committee's Permanent Subcommittee on Investigations has requested a follow-up to their 18 Nov 2021 letter concerning EcoHealth Alliance. In their original letter they requested "All documents or communications sent by the agency in response to any research proposal or grant application submitted by or on behalf of EcoHealth and/or the Wuhan Institute of Virology (WIV)." CT advised that redacted versions of said documents can be produced within 30-45 days and the subcommittee was informed of this timeline.

This does appear to need OSD LA/GC coordination, via DTRA LA/GC, prior to DIR. Really not sure what's driving their order of operations beyond DIR wanting to make sure our response is tied up in a neat package.

CT --

DTRA is responsible for gaining OSD LA and OSD GC coordination prior sending to the Director.

If possible, please get coordination with DTRA LA and GC on your response prior to May 14th. This will give us more time to get external coordination.

Let me know if you have any questions.

Thank you,

Subject: New TMT Task - NDAA Appeal-Prohibit Funding of EcoHealth Alliance - <https://dtra.tmt.army.mil/main.aspx#723376325>

Sir,

Recommend tasking to BT for response.

SUSPENSE: 1 OCT 2021

SUBJECT: NDAA Appeal-Prohibit Funding of EcoHealth Alliance

ACTION: The House floor passed the FY22 NDAA which included an amendment that would prohibit funding "for any purpose EcoHealth Alliance, Inc." DTRA is drafting an appeal of this language and we ask that you provide input on the enclosed appeal document in the section marked "DoD Position/Impact."

V/r,

CONGRESSIONAL RFI FROM HASC
DoD Contracts with EcoHealth Alliance

Received: 8/12/2021

Question: Please provide answers to the below questions concerning DoD's relationship with EcoHealth Alliance.

1. Were any of the DoD-funded research projects involving EcoHealth Alliance performed in China or in support of research performed in China? If so, which projects, what was the work performed, and what were the risk assessments DoD used to evaluate funding projects in China?

None of the DoD CTR Program-funded research projects involving EcoHealth Alliance were performed in China, nor were they in support of research performed in China.

2. Has DoD issued any awards to Peter Daszak and/or EcoHealth Alliance that are not yet available in USA Spending.gov? If so, please include.

No, all of the DoD CTR Program's awards to EcoHealth Alliance are in USA Spending.gov.

3. Did DoD sponsored any classified research involving EcoHealth Alliance and/or Peter Daszak

No, the DoD CTR Program does not sponsor classified research.

4. Please provide copies of the agreements, initial research reports and all progress/final reports.

The DoD CTR Program has awarded grants to EcoHealth Alliance, which are included in the attached spreadsheet. The CTR program has not used contracts to fund EcoHealth Alliance. Additionally, DTRA-RD documentation on associated grants to EcoHealth Alliance are included in the spreadsheet.

**OFFERED BY MR. RESCHENTHALER OF
PENNSYLVANIA**

Add at the end of title LX the following new section:

1 **SEC. 60__.** **PROHIBITION ON FEDERAL FUNDING TO**
2 **ECOHEALTH ALLIANCE, INC.**

3 No funds authorized under this Act may be made
4 available for any purpose to EcoHealth Alliance, Inc.

PURPOSE	GRANT PERFORMANCE LOCATION	COST	METRICS	GRANT NUMBER	GRANT OVERSIGHT ORGANIZATION	Any funds provided to Wuhan Institute of Virology (Y/N)
Strengthen South African capacity to collect essential data for Rift Valley fever virus (RVFV) epidemiology and ecology, strengthen South Africa's leadership role within the African continent for the study of RVFV and other vector-borne diseases, and provide the critical data needed to better predict the spread of the virus should it ever be introduced into the United States	South Africa	\$4,936,359.00	This DoD CTR Program award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-14-1-0029: Understanding Rift Valley Fever in Republic of South Africa	DoD CTR Program	N
Enhance capacity at key government labs in human and animal health sectors for serological surveillance in animals and human populations to characterize the distribution and detect spillover of hendra- and flaviviruses within indigenous populations and on farms in Peninsular Malaysia.	Malaysia	\$4,115,666.00	This DoD CTR Program award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-17-1-0037: Serological Biosurveillance for Spillover of DoD CTR Program Hendraviruses and Flaviviruses in Malaysia	DoD CTR Program	N
Characterize the diversity of coronaviruses and monitor other bat-borne zoonotic virus emergence risks in Western Asia in order to reduce the threat of infectious diseases	Georgia, Jordan, Pakistan, Armenia, Azerbaijan, Turkey, Oman	\$4,268,851.28	This DoD CTR Program award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-17-1-0064: Understanding the Risk of Bat-Borne Zoonotic Disease Emergence in Western Asia	DoD CTR Program	N
Provide training to Malaysian partner scientists to enhance local serologic diagnostic testing capabilities, biosafety practices, and biosecurity practices to detect the causes of acute febrile illness and other zoonotic diseases with a focus on Bornean Malaysia	Malaysia	\$277,788.00	This DoD CTR Program award to EcoHealth Alliance is Scientific and Technical Engagement Partnership Technical Directive and as such the metrics component is not applicable.	HDTRA1-17-C-0019 TD-04-015: Malaysian Partners Luminek Training and Research Preparedness	DoD CTR Program	N
Provide biosafety training to Malaysian partner scientists on field sampling of small mammals and ectoparasites to support the development of sustained local biosurveillance of vector-borne select agent pathogens and other priority diseases.	Malaysia	\$195,152.71	This DoD CTR Program award to EcoHealth Alliance is Scientific and Technical Engagement Partnership Technical Directive and as such the metrics component is not applicable.	HDTRA1-17-C-0019 TD-04-018: Biosafety in Field Specimen Sampling Training - Malaysia	DoD CTR Program	N
Strengthen Rift Valley Fever Virus (RVFV) detection and diagnostic capabilities, promoting South Africa as a leader in RVFV diagnostics, and enhance Biological Threat Reduction Program's relationship with the Department of Agriculture, Forestry and Fisheries	South Africa	\$4,988,987	This DoD CTR Program award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-19-1-0033: Reducing the Threat of Rift Valley Fever through Ecology, Epidemiology and Socio-Economics	DoD CTR Program	N
Build Liberian capacity for threat reduction through an integrated human-animal surveillance approach to high consequence zoonotic pathogens associated with human acute febrile illness.	Liberia	\$4,912,818.06	This DoD CTR Program award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-20-1-0016: Reducing the threat from high-risk pathogens causing febrile illness in Liberia	DoD CTR Program	N
Reduce the threat of Crimean Congo Hemorrhagic Fever (CCHF) by providing critical epidemiological data to monitor the emergence of outbreaks and will improve Tanzania's capacity to detect, diagnose and manage the risk of CCHF	Tanzania	\$4,995,106.37	This DoD CTR Program award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-20-1-0016: Crimean-Congo Hemorrhagic Fever Reducing an Emerging Health Threat in Tanzania	DoD CTR Program	N
Strengthen South Africa's, and the region's, capacity to develop and implement surveillance strategies with appropriate biosafety and biosecurity principles, detect pathogens (both molecular and serological) in bats before outbreaks occur, recognize and diagnose outbreaks if they do occur and develop appropriate reporting strategies for the region	South Africa, Mozambique, Zimbabwe	\$1,616,289.68	This DoD CTR Program award to University Pretoria via EcoHealth Alliance as a subaward and as such the metrics component is not applicable.	HDTRA1-20-1-0025: The Southern African Bat Research Network Coordinated Biosurveillance for Viral Zoonoses in Bat-Livestock-Human Interfaces in Southern Africa	DoD CTR Program	N
Build scientific expertise and appropriate capacity to safely and accurately detect, respond and report viral zoonotic agents, enhance India's ability to detect viral threats such as Ebola, Nipah and related viruses, and reduce the threat caused by deliberate release of select agents.	India	\$4,960,857.17	This DoD CTR Program award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-20-1-0026: Biosurveillance for Spillover of Hendraviruses and Flaviviruses in Rural Communities in India	DoD CTR Program	N
Enhance Jordan & Iraq's capacity for threat reduction of Avian Influenza and Middle East Respiratory Syndrome Coronavirus that pose serious potential human health economic, and food production as well as security consequences to U.S. warfighters	Jordan, Iraq, Lebanon	\$4,899,136.44	This DoD CTR Program award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-20-1-0029: Reducing the Threat of Middle East Respiratory Syndrome Coronavirus and Avian Influenza in Jordan & Strengthening Regional Disease Surveillance Capacity	DoD CTR Program	N
Developed a tool called "Global Rapid Identification Tool System (GRITS)" for undiagnosed outbreaks of emerging infectious diseases (EIDs). GRITS facilitated rapid, high-probability diagnosis of outbreaks to pinpoint disease threats more rapidly than current public health systems and diagnostics. This combined digital disease surveillance, network analysis, zoonotic disease, and epidemiology	New York, NY	\$2,387,554.88	This DoD award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-13-C-0029	OTRA RD	N
Enhanced a tool called the "Global Rapid Identification Tool System (GRITS)" for diagnosing infectious disease bio events that was developed under a previous DTRA H3-CBI project (HDTRA1-13-0029). The tool was intended to support handling large data in near-real-time on data feeds for diseases or disease characteristics for decision support to warfighter leadership	New York, NY	\$4,479,678.00	This DoD award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-15-C-0041	OTRA RD	N
Function to determine the efficacy of ML techniques in predicting epidemic impacts in early-stage, data-sparse conditions, particularly focused on novel biothreats both intentional, and natural. The project will answer fundamental machine learning and data questions to enable rapid decision making based on ML models of epidemic impacts	New York, NY	\$570,786.75	This DoD award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-21-1-0023	OTRA RD	N
		\$47,605,031.43				

the U.S. has criticized the country's lack of cooperation on tracing its source. For its part, China defends its work with the WHO. It's engaged with the body on origin-tracing in a "transparent" manner and WHO experts have been allowed to visit the country, Wang Wenbin, a foreign ministry spokesman, told reporters this month.

Field, who's also a science and policy adviser for EcoHealth Alliance, a New York-based nonprofit that works to prevent viral outbreaks around the world, said it's possible Chinese scientists are well advanced in their investigations, but fears any findings into how the virus originated — whether from China or elsewhere — will be clouded in "conspiracy cover-up talk."

"How do we make those broadly accepted to what now seems to be quite a cynical and politicized audience?"

It will likely require a level of openness China is showing no signs of embracing.

On a recent visit to the Wuhan Institute of Virology, security staff tried to stop a Bloomberg journalist from taking photographs and video from a public road outside. One guard stood in the way of the car until police arrived. Multiple requests to visit the infectious diseases lab were denied.

Outside the city's Battle Against Covid-19 exhibition, there are no restrictions on filming. Visitors take photos of each other popping their heads out of wooden silhouettes with holes in place of faces, the kind you see of cartoon characters at theme parks, though here it's doctors in protective suits and gloves.

Yang Feng, a 51-year-old retiree, said she found the exhibit cathartic, a reminder of everything her home town had been through, from the almost three-month lockdown to the 3,869 people who died. "I wanted to recap the history," she said. "Now, you can't tell Wuhan is a city that's been through the virus."

But Yang shakes her head when asked where she thinks Covid-19 originated.

"I don't know," she said. "I really don't know."

FYI - USD R&E had a question about a specific grant with EHA administered by the USUHS, and potential DTRA support. In sum, the answer is no for CTR. See below for my answer. Not sure about DTRA / RD, but imagine it is the same answer as DTRA / RD does not fund this type of work overseas nor are they in the BPC business.

CT and RD Teammates,

Requesting a quick check from both, knowing we've been through this drill a few times already. We've passed the tasker off to R&E for their final answer to this congressional inquiry, but they had one specific follow-up question below.

Did either of your directorates enter into an arrangement with USUHS to perform work with EcoHealth Alliance using the referenced grant?

Hi

(b)(6)

I also support Dr. Nair in the BRO and will be coordinating actions on the final stages of sending a response back to Congress. (b)(6) has fully briefed me on the progress to date and forwarded me your contact info.

Thank you for offering assistance. I was hoping you could help figure out whether DTRA funds were used to support a grant to ECOHealth through the Uniformed Services University of the Health Sciences (USUHS). In addition to the DTRA contracts and grants with ECOHealth Alliance, USAspending shows a grant through the USUHS which looks like it went to fund global health efforts

with Africom. https://www.usaspending.gov/award/ASST_NON_HU00012010031_97HW

Do you know if those funds came from DTRA with USUHS as the performer or if they were USUHS funds?

Thank you in advance,

Good afternoon everyone,

If you have not already, can you upload the attached to the subject OPR and add HDGS CWMD Policy to OSD002210-21 manage assignment listing.

Instructions if you need them.

Click on USA (OPR) in the tasker status area
On the tool bar where you see "Save and close" you should see "Manage Assignments " near the end.
Select Manage Assignments
In the search area type USP
USP tasker manager should filter it down to HDGS CWMD Policy

Dr. Pope,

As a supplement to the business meeting slides I sent a few minutes ago, I've attached a WAT Snapshot Comparison that compares the UICs that were planned on being awarded in November as of 14 November with those same UICs as of today. After the business meeting slides were produced, some of the programs, BTRP and PPP in particular, made updates to their WAT spend plan. Since those changes are not captured in the business meeting slides, this WAT Snapshot Comparison provides updated data as of this morning as to the status of the UICs with planned obligation dates in November.

Subject: INFO: I AM BIO Ep. 12 Partial Transcript
Date: Thursday, April 23, 2020 1:55:03 PM

Dr. Pope,

Sir, please find below a rough transcript of the few minutes Dr. William Karesh briefly raised the work of BTRP in relation to zoonotic diseases.

I AM BIO Podcast <<https://www.bio.org/podcast>> ; hosted by Congressman Jim Greenwood

Episode 12: COVID-19's True Origins (with guest Dr. William Karesh of EcoHealth Alliance)

Section mentioning BTRP starts at 32:02; ends at 33:20.

Greenwood: If you ruled the world, Dr. Karesh, what would be the list of things that you would do to reduce the threat of zoonotic diseases in the future?

Karesh: Well, there are quite a few. And I certainly think there have been some programs in the past that are at the US Federal Government level that could certainly be enhanced... The Defense Department has a program under the Defense Threat Reduction Agency called the Biological Threat Reduction Program. They do remarkable work – like engaging with researchers around the world... on these emerging diseases – both animal and human diseases. They require... a scientist from the United States partnering with a foreign scientist. You build a trusted relationship, and you know what's going on in their laboratories, and you communicate. That started back with nuclear threat reduction, with the collapse of the Soviet Union. They started investing in that and expanding – that program could be a lot bigger. ...

Please let me know if you need anything else. Thank you.

Very Respectfully,

(b)(6)

If the contractor believes there is an impact, the contractor must disregard that portion of the communication and contact the contracting officer for direction

Pilot Growth's partner, among others, is Metabiota, which, according to the Russian Ministry of Defense, is among the project implementers in Ukraine, which were tasked with creating elements of selective **biological weapons** and which used Ukraine as a **biotesting ground**, a place for testing new drugs. Metabiota CEO **Nita Madhev** appeared in the case file, which the Russian Ministry of Defense showed as part of profile briefings.

On the Pilot Growth website, Madhav commented: "Partnering with Pilot Growth was a great decision for our company; they have been loyal allies and brought a wealth of experience and knowledge to our relationship. We are very lucky to have them on our team."

Such statements indicate a fairly close relationship.

There is one important nuance. Nita Madhav is a former Special Pathogens Officer at the US Centers for Disease Control (CDC). She also worked for Air Worldwide (until 2015). The latter is engaged in modeling large-scale disasters, predicting the consequences of outbreaks of epidemic diseases.

And the Board of Directors of Metabiota is headed by Nathan Wolf (Nathan Wolfe, in open sources is also listed as the founder) - a member of the Council for Defense Scientific Research of the US Department of Defense (DARPA). This department, among other things, is developing the latest weapons for the **Pentagon**. For example, in 2005 Wolf received the National Institutes of Health Director's Award for pioneering research on virus transmission. Wolf is known to have studied monkey viruses. According to some sources, Wolf is also on a board of EcoHealth, another defendant in the biolab case, in which Peter Daszak, whose name is closely associated with the covid pandemic, is a key figure. EcoHealth Alliance is partnering with the Wuhan Institute of Virology. Namely, Wuhan was called the starting point of infection with COVID-19.

Do not forget that Metabiota is associated with Hunter Biden.

But back to Pilot Growth.

The website of this company previously published a forecast made by the same Metabiota: "The probability that in the next 25 years another pandemic or epidemic will occur in the world, from which at least as many people will die as from COVID-19, is from 47% to 57%".

It also clarified that the likelihood of another pandemic of the same or larger scale as COVID-19 is much higher than many experts expect: 2.5-3.3% this year, 22-28% in the next 10 years and 47-57% in the next 25 years.

Metabiota is noted to model the frequency and scale of future pandemics, potential financial losses, and the likely impact of interventions.

There are quite a few releases on the Pilot Growth website that relate specifically to the work of Metabiota.

Notable Pilot Growth Team and Biden Connections

Dr. Pope,

U.S. National Academies of Sciences, Engineering, and Medicine provided the attached report in advance of your meeting with them on this Thursday.

V/R,

(b)(6)

Booz | Allen | Hamilton

CTR A&AS Support Contractor

Executive Assistant in support of the Director

Direct Line (b)(6)
CTR Mainl

NIPR (b)(6)
SIPR:

- CDC provides experts who spend months at a time working in country B, helping to improve laboratory practices and upgrade a legacy laboratory to deal with more difficult pathogens.
- Country C has an Institute Pasteur laboratory that participates in the same regional network of researchers on zoonotic diseases with conferences and joint research organized by the EcoHealth Alliance.
- The State Department's Biological Engagement Program sponsors a nonprofit organization to conduct biosecurity training and upgrades at laboratories in country C.
- Most of these organizations provide information to the World Health Organization (WHO) and participate in regional WHO conferences. As part of its commitment under the Global Health Security Agenda to implement the WHO International Health Regulations (2005), country B is conducting a Joint External Evaluation, while country A is considering doing the same.

In this hypothetical situation there is little or no obvious and unnecessary redundancy, which is good. Likewise, all of these efforts are valuable in and of themselves. Rather than being conceived as a series of separate efforts, though, they could be linked with a coordinated and cooperative strategy to strengthen global health security. Furthermore, the hypothetical situation noted here reflects routine circumstances. Should an outbreak occur in one of these countries, public health and security needs may rapidly change and would increase urgency, and all of the preexisting and additional resources would be needed for an effective response. Pre-established laboratories, pre-deployed protective equipment and pre-existing expertise in handling dangerous pathogens, pre-established supply chains, and pre-existing networks of people and their collaborative relationships would be invaluable in rapidly and effectively responding to an emerging infection or epidemic.

Each of these organizations involved in the hypothetical scenario brings unique capabilities, from the expertise in CDC personnel, to the flexible funding of BTRP and logistical capabilities of DOD, the diplomatic relations conducted by State, the strengthened healthcare infrastructure developed and the Disaster Assistance Response Team deployed by USAID, and the decades of collaboration in the Institut Pasteur resulting in enhanced indigenous capability and operation in the country and the region.

As the above hypothetical scenario indicates, DOD's programs are unique in that they provide a national security focus, while other U.S. government departments and agencies involved in international health

Subject: NCB(TRAC)-Directed Review of DTRA CTR Grants to EcoHealth Alliance
Date: Thursday, January 13, 2022 3:23:12 PM
Attachments: [EcoHealth Alliance Review--signed.pdf](#)

Kingston,

Providing for your situational awareness, in case your staff has not briefed you on this.

CTR over the years has provided grants to the NGO EcoHealth Alliance to assist in biosurveillance studies. Over the past couple of years, the media and Congress have raised questions about EcoHealth Alliance's work with China, with the Wuhan Institute of Virology, and whether EcoHealth Alliance has conducted gain-of-function research.

DoD has answered several Congressional queries in which we have shown that no CTR funds to EcoHealth Alliance have gone to China or to any gain-of-function research.

I assess that Craig's request for this review is to fulfill TRAC's chartered mandate to provide acquisition oversight for the CTR program and to provide additional data for any follow-on Congressional queries to demonstrate that DTRA sufficiently oversees work conducted by EcoHealth Alliance for CTR.

I asked the DTRA Inspector General to take the lead for this review within DTRA so my team is not grading its own work. He just provided a status update that indicates their review is proceeding well.

V/r,
Rob

(b)(6)

7500 LEAH AVENUE, MILITARY ANL
BIOLOGICAL DEFENSE PROGRAMS

OFFICE OF THE ASSISTANT SECRETARY OF DEFENSE
3050 OFFENSE PENTAGON
WASHINGTON, DC 20301-3050

MEMORANDUM FOR DIRECTOR, COOPERATIVE THREAT REDUCTION, DEFENSE
THREAT REDUCTION AGENCY

SUBJECT: EcoHealth Alliance Grant Reviews

This document directs the Defense Threat Reduction Agency (DTRA), through the Cooperative Threat Reduction (CTR) Program's Biological Threat Reduction Program (BTRP), to initiate and support a full-scale review of three grants awarded to EcoHealth Alliance (EHA). DTRA may choose which active grants to review, with a strong emphasis on selecting those nearing the end of their periods of performance. DTRA may choose between employing a third-party to conduct the review or conducting the review internally. Please keep my office informed throughout the process, including which grants are selected for review and the review format.

Based on my January 2021 review of all active scientific research grants sponsored by BTRP, EHA dominated the BTRP research portfolio as the prime awardee on seven grants totaling nearly \$34M in research funding. This total encompasses nearly a third of all funding for scientific research awarded through BTRP. The second-highest funded awardee is the University of Florida, with two grants totaling less than \$6M. EHA's active grants are awarded at near-maximum funding levels (at a combined 97% of allowable funding) and recent proposal submissions continue to request a similar level.

Since EHA is a recipient of a large portion of BTRP's grant funds, we must ensure that EHA is expending those funds capably and responsibly, in line with grant requirements, federal regulations, and BTRP's threat reduction mission. Through this review, we aim to ensure that all grant funds are used for the documented purpose for which they were awarded.

Further, conducting a review of EHA grants at this time demonstrates DoD's focus on ensuring accountability from grantees. This is especially important given the increased congressional attention on EHA and its use of federal funding. We should ensure that EHA is conducting research, reporting findings, and managing sub-awards consistent with grant agreements.

Our objectives in requesting this review of three grants are therefore:

1. To review all grant financial records for consistency with specific grant purposes and for compliance with legal requirements;
2. To review all experimental records for proper and ethical data handling, reporting, and dissemination requirements; and
3. To assess whether EHA's internal grant management processes continue to comply with DoD and USG guidelines that would allow for EHA to remain a potential candidate to compete for CTR funding.

I ask that DTRA deliver a comprehensive report on the results of the review to my office by the end of FY22. Please make my office aware if additional time is required to complete this

review. I look forward to supporting your efforts in this regard, and please let me know what my office can do to assist.

Subject: FW: [Non-DoD Source] Fwd: Comments by DTRA Acting Director Williams today

Good day all,

We received the below inquiry from the Washington Post regarding Dr. Williams's testimony yesterday. If I recall correctly, these questions have already been addressed in another effort...please see below excerpt:

"I need to know about DTRA funding of the NGO EcoHealth Alliance that may have gone to the Wuhan Institute of Virology."

A funding chart on the EcoHealth Alliance website shows just under \$40 million spent by DTRA and DoD and that some of the work included "UNDERSTANDING THE RISK OF BAT-BORNE ZOO NOTIC DISEASE EMERGENCE IN WESTERN ASIA" and "UNDERSTANDING THE RISK OF BAT CORONAVIRUS EMERGENCE."

Dr. Williams at the House hearing today said: "We have done a thorough look at all of our programmatic activities to ensure that at least at the Defense Threat Reduction Agency's funding to this NGO was not provided to the best of our knowledge into the Wuhan Institute of Virology."

Q: What about the funding that was done for the bat-borne zoonotic disease emergence and bat coronavirus emergence? Was that work done at the Wuhan Institute of Virology, where it is known that they conducted extensive bat coronavirus research?

Q: Is it DTRA's conclusion that none of its grant money to EcoHealth Alliance was used at the Wuhan Institute of Virology?

Will standby for further guidance...

Very respectfully,

(b)(6)

(b)(6)

Thanks for the note. The signed letters from USDI would be helpful if you can find them, in the event the message changed significantly between DTRA's drafts and the final versions.

We're looking into the broader suite of CTR's collaboration with EcoHealth Alliance to look for other areas of potential criticism or impacts if Congress or OSD were to direct us to stop partnering with them.

We have not yet looped in Policy, but I asked (b)(6) to bring (b)(6) up to speed in your call later today.

Subject: RE: [Non-DoD Source] Fwd: Comments by DTRA Acting Director Williams today

Sir-Craig is TDY but the responses below make sense. I do not have the signed version of Ms. Lord's response to the previous RFI but I can try and track down. Is Policy tracking this PA request?

Not directly related and perhaps you are tracking--Lico Health Alliance was the prime awardee of nearly 1/3 of all of BTRP's scientific research funding. Without additional context this is a bit alarming. I will circle with (b)(6) and team to discuss further.

Hope you are well!

Good to hear from you Bob and nice to meet you

(b)(6)

We'll be ready to answer any further inquiries, of course.

I agree with you, Bob – the long view of this pandemic is that we clearly need to have networks in place that hear about biothreats early, so we can respond rapidly to disrupt them. We're committed to that, and will continue with our mission.

I hope you all are managing to do well in this lockdown – it's hard work here in NYC, but the cases are beginning to drop and we can see light at the end of the tunnel.

Cheers,

Peter

Peter,

Thank you for reaching out to us. I think we have the info we need to answer the Congressman's concerns. I've cc'd our BTRP Chief (b)(6) should her team need to reach to you for any information.

I hope you are doing well during the lockdown. I think all of us in the bio threat reduction space will be very busy as our policymakers turn to the question of how to prevent this in the future.

Best regards,

Rob

Good afternoon,

FYSA- yesterday afternoon CTR Policy asked for off-the- shelf materials about BTRP that we could provide as background for Andy Weber's testimony on the Hill tomorrow with a same-day suspense. We suggested the narrative section of last year's completed Annual Report to Congress and our vignettes that we prepared for this year's submission. Policy coordinate the PAO clearance through OSD and we cleared the new vignettes yesterday; these are all clear for unlimited distribution.

These attached vignettes summarize recent program successes in South Africa (containing a Rift Valley Fever outbreak), Guinea (sustainability and Ebola - COVID surveillance), and Ukraine (MIL-MIL partnership).

Note: the South Africa vignette was accomplished in partnership with EcoHealth Alliance.

Subject: RE: BTRP RFI

Good afternoon (b)(6)

We pushed the three -one-page vignettes through our PAO and OPSEC review today. These are all candidates for this year's Annual Report to Congress and are cleared for unlimited distribution.

1. South Africa - a biosurveillance study conducted through EcoHealth Alliance that enabled South Africa to contain an imminent outbreak of Rift Valley Fever. EcoHealth Alliance is not named in this document because of the current scrutiny on the Hill, but can be added back in to the paper if desired. Their name does appear in the vignette under consideration for the Annual Report.

2. Guinea - part of an on-going and growing success story that began with Ebola response support into an effective and self-sustaining asset that continues to demonstrably mitigate emergent biological threats, including Ebola and COVID.

3. Ukraine - equiptage and active engagement of BTRP in MIL-MIL exercises with U.S. and Ukrainian uniformed personnel that directly contribute to Force Health Protection for Ukraine uniformed personnel in the Donbas region.

Subject: Congressional RFI Documents re: EHA Grants

Sir,

I just wanted to send you an update on the Congressional RFI on EHA. We discussed last week that we hit a minor hurdle with file formats and needed to manually convert several hundred documents to PDF files before they could be consolidated in DTRA's response. That has finally completed and LA has the documents for review. In addition to those, we have prepared 4 summary documents to go on top of the package, all attached here:

1. Cover letter from DIR Hersman to the Permanent Subcommittee on Investigations (c/o Jon Ossoff). This cover letter provides context for the package and requests discretion/limitations on distribution of provided documents.
2. Overview of structure and contents of package.
3. Summary table of awarded grants to EHA.
4. Summary table of declined grant applications from EHA.

The full package, including a folder of reference materials that will not be included in the final delivery can be found here:

J:\Shared\CT\BT\TMT Tasks\Open Tasks\EcoHealth Alliance Congressional RFI October 2022

I expect it will take GC and LA some time to review and concur with this massive package of documents, but they are prioritizing completing delivery before the end of the calendar year.

I'm available at your convenience for any questions/comments or if you'd like to see any changes/additions/omissions from these cover documents - or if there is anything else I can do to help.

Team,

Below is a very interesting article making the case that the COVID pandemic was caused by an accidental lab release (VERY long read). Additionally, the article makes at least two comments identifying DTRA funding that supported research at the Wuhan BSL-4 lab related to bats and bat carried diseases.

<https://nymag.com/intelligencer/article/coronavirus-lab-escape-theory.html>

I had my team go back through the records to see if it was RD-CB, but found no info related to that work. We did find references to CBEP work with EcoHealth Alliance on the DTRA server that might be what they are talking about:

https://dtralportal.umet.dtra.mil/sites/Search_Center/Pages/results.aspx?k=EcoHealth%20Alliance#k=EcoHealth%20Alliance

I wanted to provide this to you in case there are follow-up questions at some point. I know back in Apr/May timeframe we had to identify any DTRA finding that might have gone to Wuhan, so this may not be news to anyone.

Attachments: Execution Brief Update 16 Mar 2020.pptx
16 Mar 2020 obligations commits.xlsx
Importance: High

Sir -

Attached for your review is the updated snake chart reflecting current obligation status, as well as the Outside Contributions briefing slide. There are two: The first reflects ALL Outside Contributions received regardless if there is an unobligated/unexpended balance and is consistent with Agency Reporting; the second, is what we show in the Business meeting which reflect only those lines that still have unobligated and/or unexpended balances. I wasn't sure which you'd prefer to send forward. It would be my recommendation that we use slide 2 that covers all Outside Contributions received (as this aligns with the financial system reports).

Attached also is a current Excel file that shows the status of some very significant commitments and obligations over the past couple of weeks. We've recorded an additional \$34.24M in obligations, and there are an additional \$44.77M worth of commitments. Of this amount, we were awaiting the STEP package, awarded on 10 March, to post to DAI. I received confirmation from Accounting today that the obligation has been recorded in DAI. This is not reflected in the attached snake chart and will not show up in a DAI report until we run tomorrow's reports. I am awaiting confirmation on CTB-20-168 in the amount of \$630K.

Please let me know if there is anything additional you need, or if you have questions.

Billy,

Thanks for sending this directly to our CTR/BTRP team. As you well know, we are keenly interested in the role of the defense and security sector in global health security and how those entities partner with human, animal, and agricultural health organizations to improve global health security. I look forward to digging into your report.

I also want to e-introduce you to (b)(6) (cc'd), who now leads BTRP. (b)(6) is a DTRA alumna who departed a few years ago for an opportunity with USDA's Foreign Agriculture Service. We were lucky to get her back on our team last August to take the reins of BTRP.

Best regards,
Rob

Robert S. Pope, Ph.D., SES
Director
Cooperative Threat Reduction

Dear DTRA Colleagues,

Some of you may have received this earlier today via another email list, but we wanted to make sure you had a copy of our report released today on Opportunities for Defense, Military and Security Sector Engagement in Global Health Security.

The supporting inspiration for this report came from your own (b)(6) in a follow-up to our report on resilience to biothreats.

Both the full report and a short summary version are attached here.

Please feel free to share with colleagues.

All the Best,

Billy

Subject: RE: Dir call / SES agenda

Sir,

Dr. Williams approved the input to the letter from Rep Reschenthaler's 12 letter on EcoHealth Alliance yesterday. The draft is attached here. The Basic Research Office under USD(R&E) is the OPR for coordinating responses across OSD in CATMS. CS submitted this draft in CATMS this morning. For your awareness, I'm attaching TAB C (of our internal EIS package). We are keeping this as internal background in case asked by R&E for amplifying information.

The second item is Ms. Walsh's QFR on EcoHealth Alliance (b)(6) (OSD/LA Policy Lead) received these from HASC-ISO and sent them to the appropriate offices, including (b)(6) in Ms. Walsh's office. We received feedback from DTRA Directorates on Monday. Dr. Williams had four QFRs and we included the one for Ms. Walsh. We are paring them down as in some cases there are multiple paragraphs in a response. Our intent is to have the responses routed for Dr. Williams review on Tuesday and will share with OSD/LA to consolidate for final coordination amongst all witnesses.

What's the plan to coordinate with OSD on DTRA's draft response to the recent Rep Reschenthaler 12 letter on EcoHealth Alliance?

FYI, (b)(6) Policy Rep in OSD/LA) is going to consolidate all of the

'draft' QFR responses from all nominees and circulate those to the group for comment. They are not due back to HASC until 6/25.

FYI, for the previous Congressional Letter, the Departments last response was signed by USD R&E.

Sir, see below regarding topics DASD J wants to raise during the call tomorrow. Do you have any you want me to raise ahead of this discussion?

(b)(6), do you have a copy of the final DTRA response to the Congressional inquiry on EHA/WIV? The consolidated CT/RD product? I did not forward this to Policy or NCB, since it was a whole of DTRA answer, but assumed you all coordinated it with OSD LA, A&S, and perhaps others?

Thanks, I am good with still having a call at 1330. Appreciate the agenda items, will try and get the same from Dr. Pope.

The second Wuhan inquiry was not from the press, it was from Matt Gertz and other Congressmen. Note: DTRA/RD also used EHA as a performer and so the DTRA response included both CT and RD. It should have been coordinated with your offices from DTRA/LA and OSD/LA. If not, then let me know and I will forward you our input. And there was another one that came from Williams/Walsh testimony. Believe you saw our input to this. We can discuss more at 1330.

Thank you again for coordinating the draft response with CWMD Policy. DASD Richard Johnson clears, as edited in the attached and copied below for ease of reference. Rationale: this responds to the exact question posed.

(b)(5)

Separately, CWMD Policy would like OSD PA to clarify the coordination process for media inquiries related to the DoD CTR Program and any of the underlying programs. I've ec'ed OSD Leg Af to likewise clarify the coordination process for Congressional inquiries related to the DoD CTR Program and any of the underlying programs. In each instance, CWMD Policy needs to be included in the clearance process.

Many thanks.

Subject: RE: HOT -- Washington Times Question Re: DTRA, EcoHealth Alliance, and the Wuhan Institute

Hello (b)(6)

Please find attached the actual query that we received on Tuesday evening from Bill Gertz (b)(6) on my team acknowledged to Mr. Gertz that we received his query, however, we have not provided any information to him. Because similar media queries have come up in the past, we asked Dr. Rob Pope, DTRA's CTR director, to prep responses to align with our previous statements in open source on the topic (b)(5)

(b)(5)

I am also attaching the following: the email from Mr. Gertz, the media query sheet (an internal PAO document here at DTRA) and the responses that were prepared in case we engaged.

Yesterday morning (b)(5)
(b)(5)

I hope this paints a clearer picture of the query activity. I welcome any additional questions and concerns.

V/r,

(b)(6)

Thank you (b)(6) DASD CWMD asks that DTRA formally send the proposed DTRA responses to CWMD Policy for coordination.

Will you relay that message to DTRA leadership?

Many thanks.

Subject: RE: HOT -- Washington Post Question Re: DTRA, EcoHealth Alliance, and the Wuhan Institute

Hello.

Additional questions from DASD CWMD:

- Why is DTRA providing a response to the Washington Times Online article? (it seems to us that the responses Dr Williams and Dr Vann provided at the May 4 hearing answered the question from Congressional representatives)
- Is it because DTRA has received additional media inquiries?
- Is it because DTRA wants to be prepared for expected inquiries?
- Is there a Washington Post inquiry? Or did someone mix up the Washington Times and the Washington Post?

CWMD Policy needs to understand what the response is intending to do, and we also need to review whatever DTRA puts together.

Thank you, (b)(6)

Subject: RE: HOT -- Washington Post Question Re: DTRA, EcoHealth Alliance, and the Wuhan Institute

FYSA -- Today's article from Bill Gertz (included in today's Defense Morning Clips):

‘Best of our knowledge’: Pentagon officials deny Wuhan Institute of Virology given defense funds
Washington Times Online, May 4 (1751) · Bill Gertz

Pentagon officials offered a qualified denial Tuesday when questioned on whether any of the nearly \$40 million in defense money given to a non-government organization may have been used for research at the Chinese military-linked Wuhan Institute of Virology, a suspected potential origin point for the COVID-19 pandemic.

Rys Williams, acting director of the Defense Threat Reduction Agency, and Brandi Vann, acting assistant defense secretary for nuclear, chemical and biological defense programs, told a House Armed Services subcommittee hearing that all the funds they reviewed from DTRA and other government sources did not go to the Chinese institute following reviews of grants to EcoHealth Alliance, a New York-based NGO that worked closely with the WIV.

“We have done a thorough look at all of our programmatic activities to ensure that at least the Defense Threat Reduction Agency’s funding to this NGO was not provided, to the best of our knowledge, into the Wuhan Institute of Virology,” Mr. Williams told the House panel that focuses on special operations.

Mr. Williams said DTRA reviews all activities related to NGOs “to make sure that the risk for government funding is minimized and in keeping with the traditions and the boundaries of the federal acquisition process but equally in policy as well.”

Ms. Vann, the acting assistant defense secretary, added that other defense agencies involved in nuclear, chemical and biological (NCB) programs reviewed funding of EcoHealth Alliance research and found no links to the Chinese lab.

“We also across the NCB did a thorough review to identify any potential access or investment into the Wuhan laboratory, and we have not identified any,” she said in response to questioning from Mississippi Rep. Trent Kelly, the ranking Republican member of the subcommittee. “It is something that we continue to watch to ensure that our investments are not going to places where they should not be,” she noted.

Mr. Kelly asked the two defense officials “what kind of risk assessment or risk analysis we’ve conducted and how the Wuhan Institute of Virology became the partner of choice for U.S. government agencies, given its ties to the PLA,” he said, using the acronym for People’s Liberation Army, the Chinese military.

A State Department fact sheet made public in January for the first time disclosed that the WIV was engaged in covert biological weapons research with the PLA. Chinese officials at the WIV have denied the institute works with the PLA.

According to the fact sheet, the WIV is engaged in “secret military activity.”

“Secrecy and non-disclosure are standard practice for Beijing,” the fact sheet said. “For many years the United States has publicly raised concerns about China’s past biological weapons work, which Beijing has neither documented nor demonstrably eliminated, despite its clear obligations under the Biological Weapons Convention.”

The collaboration at the institute includes both publication and secret military projects including classified research and laboratory animal experiments. The work between WIV and PLA has been underway since 2017.

Director of National Intelligence Avril Haines told Congress last month that U.S. intelligence agencies believe the pandemic began either through a leak from a Chinese laboratory or from an animal host. Many scientists and mainstream news outlets for months dismissed all suggestions the virus could have come from a lab as a conspiracy theory.

A list of grants and contracts for EcoHealth Alliance posted on the website of Independent Science News shows DTRA and the Pentagon provided the group with \$38.9 million since 2014. DTRA’s funding included \$6.49 million between 2017 and 2020 for what the agency called “understanding the risk of bat-borne zoonotic disease emergence in Western Asia.”

According to DTRA, the grant was used for research aimed at “combating or countering weapons of mass destruction” and was to be carried out between 2017 and 2022. It is not clear if the work is ongoing.

The National Institute of Allergy and Infectious Diseases (NIAID) provided EcoHealth Alliance with \$3.7 million in funding from 2014 to 2019, and the National Institutes of Health gave the group \$2.5 million between 2009 and 2012. The NIAID funds went to a program called “understanding the risk of bat coronavirus emergence.”

A spokesman for EcoHealth Alliance did not return an email and phone call seeking comment.

EcoHealth Alliance President Peter Daszak has worked closely with WIV virologist Shi Zhengli, known as the “Bat Woman of Wuhan” for her work on bat viruses and has been a vocal critic of the Wuhan lab transmission theory. He was also part of the World Health Organization team that investigated the virus origin earlier this year that called the lab theory “extremely unlikely” and not worth pursuing. Critics say the WHO report was influenced by the Chinese government that sought to play down the lab leak theory.

China, according to the Trump and Biden administrations, has engaged in disinformation in a bid to deflect criticism from its handling of the outbreak’s earliest days. The Chinese government refused to provide virus samples to international virus hunters and initially hid the infectiousness of the virus from the world.

More than 3 million people have died since the pandemic broke out in Wuhan in December 2019.

Rob

Subject: FW: [Non-DoD Source] Fwd: Comments by DTRA Acting Director Williams today

Good day all,

We received the below inquiry from the Washington Post regarding Dr. Williams's testimony yesterday. If I recall correctly, these questions have already been addressed in another effort...please see below excerpt:

"I need to know about DTRA funding of the NGO EcoHealth Alliance that may have gone to the Wuhan Institute of Virology."

A funding chart on the EcoHealth Alliance website shows just under \$40 million spent by DTRA and DoD and that some of the work included "UNDERSTANDING THE RISK OF BAT-BORNE ZOO NOTIC DISEASE EMERGENCE IN WESTERN ASIA" and "UNDERSTANDING THE RISK OF BAT CORONAVIRUS EMERGENCE."

Dr. Williams at the House hearing today said: "We have done a thorough look at all of our programmatic activities to ensure that at least at the Defense Threat Reduction Agency's funding to this NGO was not provided to the best of our knowledge into the Wuhan Institute of Virology."

Q: What about the funding that was done for the bat-borne zoonotic disease emergence and bat coronavirus emergence? Was that work done at the Wuhan Institute of Virology, where it is known that they conducted extensive bat coronavirus research?

Q: Is it DTRA's conclusion that none of its grant money to EcoHealth Alliance was used at the Wuhan Institute of Virology?

Will standby for further guidance...

Very respectfully,

(b)(6)

Thanks (b)(6)

We review all proposed subawards from a technical, policy, and personnel reliability perspective in coordination with internal and external technical subject matter experts, OSD Policy & TRAC, and DTRA CI.

Hope this helps!

Cheers,

(b)(6)

Importance: High

Nick,

We need to go back to the drawing board on this letter. There appears to be differing thoughts between directorates as to the facts. Can we setup a call for tomorrow between subject matter experts? Will invite RD, CT, & AL. Can you please nominate appropriate CT staff member with insight? Key points of discussion:

(1) Is the top-line figure of \$6.5 million to EcoHealth accurate?

(b)(5)

Thanks.

Confirmation from (b)(6) today...

" Just to re-confirm. I spoke with all the principles and had our finance guy go through all the DTRA expense reports and billing.

I can confirm that EHA has not had any expenses pertaining to China or any Chinese nationals on any of its DTRA grants.

As noted, a few joint authorship on either regional papers or topic areas, but no funding from DTRA used for Chinese scientists."

Cheers,

(b)(6)

> Project Abstract:

> We are conducting a multi-disciplinary research project to identify key factors correlated with the risk of bat viral zoonoses from sites across Western Asia. Bats are natural reservoir hosts to several emerging viruses with pandemic potential, including Ebola, Marburg, Nipah, and SARS and MERS-coronaviruses, but current research on the distribution of bats, diversity of their viruses, and potential for zoonotic disease emergence in Western Asia is severely limited. To fill this gap and contribute to biological threat reduction, we have established a hypothesis-driven One Health research project focused on characterizing bat coronavirus diversity and the risk of bat-borne zoonotic disease emergence. This project includes extensive nonlethal field sampling of bats, screening and characterization of viruses from bat specimens with select partner laboratories currently operating within the region, and modeling emerging disease risk by combining viral data with host, geographic, and ecological data. Data for risk modeling is being collated across a larger region than our field sampling allows through the creation of a collaborative Western Asia Bat Research Network (WAB-Net) – including key researchers and public health representatives from 12 countries. Research activities are being strengthened via laboratory exchanges and annual data sharing and capacity building workshops. This integrated approach presents a coordinated strategy to advance scientific knowledge around transboundary zoonotic disease emergence risk in Western Asia to inform early detection, diagnosis, response and threat reduction to support DTRA BTRP’s goals.

Subject: FW: HOT -- Washington Post Question Re: DTRA, EcoHealth Alliance, and the Wuhan Institute

(b)(6)

I want to keep your office in the loop on the Wuhan-related questions, because they may also affect A/ASD Vann coming out of yesterday's hearing.

DTRA received a query from Bill Gertz at the Washington Times yesterday. Unfortunately, CT didn't receive the query until this morning and Gertz already published his story. We'll provide a response to PA so they can close the loop with Gertz (I'll send to you SEPCOR).

We also have the tasker to help contribute to the response to the most recent Congressional query on this topic. The team is working the response now and I'll share our draft when they get it to me.

Also, for background, I've attached the previous (2020) Congressional queries and draft responses on the topic. If your office has the signed responses for ASD Lord, we would welcome those to ensure we stay consistent in our messaging to the Hill.

Subject: FW: [Non-DoD Source] Fwd: Comments by DTRA Acting Director Williams today

Good day all,

We received the below inquiry from the Washington Post regarding Dr. William's testimony yesterday. If I recall correctly, these questions have already been addressed in another effort...please see below excerpt:

"I need to know about DTRA funding of the NGO EcoHealth Alliance that may have gone to the Wuhan Institute of Virology."

A funding chart on the EcoHealth Alliance website shows just under \$40 million spent by DTRA and DoD and that some of the work included "UNDERSTANDING THE RISK OF BAT-BORNE ZOOONOTIC DISEASE EMERGENCE IN WESTERN ASIA" and "UNDERSTANDING THE RISK OF BAT CORONAVIRUS EMERGENCE."

Dr. Williams at the House hearing today said: "We have done a thorough look at all of our programmatic activities to ensure that at least at the Defense Threat Reduction Agency's funding to this NGO was not provided to the best of our knowledge into the Wuhan Institute of Virology."

Q: What about the funding that was done for the bat-borne zoonotic disease emergence and bat coronavirus emergence? Was that work done at the Wuhan Institute of Virology, where it is known that they conducted extensive bat coronavirus research?

Q: Is it DTRA's conclusion that none of its grant money to EcoHealth Alliance was used at the Wuhan Institute of Virology?

Will standby for further guidance...

Very respectfully,

(b)(6)

I need to know about DTRA funding of the NGO EcoHealth Alliance that may have gone to the Wuhan Institute of Virology.

A funding chart on the EcoHealth Alliance website shows just under \$40 million spent by DTRA and DoD and that some of the work included "UNDERSTANDING THE RISK OF BAT-BORNE ZOO NOTIC DISEASE EMERGENCE IN WESTERN ASIA" and "UNDERSTANDING THE RISK OF BAT CORONAVIRUS EMERGENCE."

Dr. Williams at the House hearing today said: "We have done a thorough look at all of our programmatic activities to ensure that at least at the Defense Threat Reduction Agency's funding to this NGO was not provided to the best of our knowledge into the Wuhan Institute of Virology."

Q: What about the funding that was done for the bat-borne zoonotic disease emergence and bat coronavirus emergence? Was that work done at the Wuhan Institute of Virology, where it is known that they conducted extensive bat coronavirus research?

Q: Is it DTRA's conclusion that none of its grant money to EcoHealth Alliance was used at the Wuhan Institute of Virology?

Today at a House Armed Services subcommittee hearing Mr. Williams discussed DTRA's efforts to screen its investments in EcoHealth Alliance and its work with the Wuhan Institute of Virology.

I'm writing a story on this and would like some additional details on when this review was done and other details about the review. Need any information today.

RESEARCH
AND ENGINEERING

THE UNDER SECRETARY OF DEFENSE
3030 DEFENSE PENTAGON
WASHINGTON, DC 20301-3030

July 6, 2020

The Honorable Guy Reschenthaler
U.S. House of Representatives
Washington, DC 20515

Dear Representative Reschenthaler:

Thank you for your letter dated April 30, 2020, regarding a 2017 grant awarded by the Department of Defense (DoD) to EcoHealth Alliance, Inc. I am responding on behalf of the Secretary of Defense.

The 2017 grant awarded \$6.5 million to EcoHealth Alliance for scientific research into combating weapons of mass destruction. In your letter, you stated that EcoHealth Alliance has a history of collaborating with the Wuhan Institute of Virology in the People's Republic of China. No portion of any funds granted by the Defense Threat Reduction Agency's Biological Threat Reduction Program (BTRP) to EcoHealth Alliance supported work at the Wuhan Institute of Virology or any other activity in China.

For grants awarded in support of the BTRP, the program engages with applicants early in the project development process to ensure that they understand there can be no transfer of funds to parties other than those authorized as sub-recipients by the Department. The Department's program managers carefully review grant proposals to ensure that no prohibited activities (technical or financial) are included as part of any funded projects. Finally, the Department performs regular oversight of all grant awards through required reporting to ensure that research is conducted as authorized.

Thank you for your dedication to the Armed Forces and unwavering support of our Service members across the globe. The Department will continue to dedicate its efforts to ensure the best force protection against the most dangerous threats facing our Nation and our Warfighters.

My point of contact is Commander Jon Fay in the Office of the Assistant Secretary of Defense for Legislative Affairs at 703-693-4027 or jonathan.m.fay.mil@mail.mil.

Sincerely,

Michael D. Griffin

OFFICE OF THE
CLERK OF THE HOUSE
OF REPRESENTATIVES

OFFICE

OFFICE OF THE
CLERK OF THE SENATE

Congress of the United States
House of Representatives
35 Cannon House Office Building
Washington, DC 20515-4000
(202) 225-4000

April 30, 2020

The Honorable Mark T. Esper
Secretary of Defense
Department of Defense
1000 Defense Pentagon
Washington, D.C. 20301

Dear Secretary Esper:

Thank you for your strong leadership during the COVID-19 pandemic and for your efforts to repatriate Americans abroad, counter adversaries like Venezuela and Iran, and keep our servicemembers safe during this unprecedented crisis. I write to bring your attention to a 2017 grant awarded by the Department of Defense (DOD) to EcoHealth Alliance Inc., an organization that has a history of collaborating with the Wuhan Institute of Virology, which reports suggest may be linked to the epicenter of the COVID-19 outbreak.

In 2017, DOD awarded a \$6.5 million grant to EcoHealth Alliance under Assistance Listing 12.351 – Scientific Research – Combating Weapons of Mass Destruction. The description of this grant is listed as “understanding the risk of bat-borne zoonotic disease emergence in Western Asia.” On March 23, 2020, EcoHealth Alliance received their final payment in the amount of \$1,509,531 for the continuation of their research, which is projected to be completed in October 2022.

As you are likely aware, on April 24, the National Institutes of Health (NIH) cut all grant funding for EcoHealth Alliance after reports circulated that the organization sent US taxpayer dollars to the Wuhan Institute of Virology. It is my understanding that the NIH grant was for research on coronaviruses spread from bats to humans. Given the similarities between EcoHealth Alliance’s NIH research and the description of the 2017 DOD grant, I respectfully request answers to the following questions:

1. Has any portion of DOD funding granted to EcoHealth Alliance or any other DOD grant recipient been given to or used in collaboration with the Wuhan Institute of Virology or any research laboratory in the People’s Republic of China (PRC)?
2. If no, what, if any, steps is DOD taking to determine whether department grant funding was utilized by the Wuhan Institute of Virology or another research laboratory in the PRC?
3. If yes, what is the DOD doing to ensure American dollars can no longer be utilized by the Wuhan Institute of Virology or another research laboratory in the PRC?

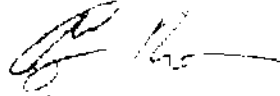

US 964477 20200430 1509531

Given the Chinese Communist Party's cover up of the global threat posed by COVID-19, it is critical we ensure taxpayer dollars are not being used to support their activities. I appreciate your commitment to our national security, our servicemembers, and their families.

Thank you for your consideration of my request.

Very Respectfully,

A handwritten signature in black ink, appearing to read "Guy Reschenthaler", with a long horizontal flourish extending to the right.

Guy Reschenthaler
Member of Congress

Subject: FW: [Non-DoD Source] Fwd: Comments by DTRA Acting Director Williams today

Good day all,

We received the below inquiry from the Washington Post regarding Dr. William's testimony yesterday. If I recall correctly, these questions have already been addressed in another effort...please see below excerpt:

"I need to know about DTRA funding of the NGO EcoHealth Alliance that may have gone to the Wuhan Institute of Virology."

A funding chart on the EcoHealth Alliance website shows just under \$40 million spent by DTRA and DoD and that some of the work included "UNDERSTANDING THE RISK OF BAT-BORNE ZOOONOTIC DISEASE EMERGENCE IN WESTERN ASIA" and "UNDERSTANDING THE RISK OF BAT CORONAVIRUS EMERGENCE."

Dr. Williams at the House hearing today said: "We have done a thorough look at all of our programmatic activities to ensure that at least at the Defense Threat Reduction Agency's funding to this NGO was not provided to the best of our knowledge into the Wuhan Institute of Virology."

Q: What about the funding that was done for the bat-borne zoonotic disease emergence and bat coronavirus emergence? Was that work done at the Wuhan Institute of Virology, where it is known that they conducted extensive bat coronavirus research?

Q: Is it DTRA's conclusion that none of its grant money to EcoHealth Alliance was used at the Wuhan Institute of Virology?

Will standby for further guidance...

Very respectfully,

(b)(6)

Team, forwarding this article (Attached) and my response to (b)(6) at OSD-P.

BL - we are familiar with her (Bulgarian journalist) work. If there is anything else you guys dig up (believe (b)(6) looked into this before), please let us know. Main concern here are copies of DTRA CTR funding references, coupled with apparent copies of scope of work. But again, we reported this before and I don't see anything new here other than more details. The last page of the article appears to have attachments of DTRA documents, but I can't open them. Please look into this and let us know if there is anything we need to do.

Happy to discuss more if needed.

(b)(6) thanks for forwarding. I have not read this particular article until now. But it appears to be a recycled and updated piece from about 2 years ago, with more details than before. I gave it to the right people here in DTRA to look into this from a CI perspective, as it lists copies and references DTRA documents. With that said, none of this is surprising. I believe the tone and tenor are familiar and consistent with a style of a certain foreign reporter (Dilyana Gaytandzhieva (from Bulgaria), whose name is attributed to one of the photos) and who is well known in that part of the world and publishes a lot on this topic. If you google her name, you will see what I am talking about. The GEC at State is familiar with her "work," and there is more about her we can't discuss here (b)(5)
(b)(5) We can talk more later on SVTC if needed. BL - no surprises. It's a constant drumbeat.

All,

Apologies for not getting a clips earlier this week. Was delayed due to a family tragedy. But lots to digest. First, around a week ago, a storyline appeared that DoD/DTRA was going to facilitate a smallpox attack in Ukraine in March. The narrative made the rounds in the online publications but did not seem to spread into the more "legitimate" Russian press or even social media. However, I did find it on over 15 sites.

Additionally, a very snazzy video was released in Bulgaria promoting the conspiracy theory that the US will conduct human experimentation on Bulgarian soldiers. It provides a considerable amount of background material on earlier US military human experimentation as further support for the arguments. Link below:

Caution-https://www.youtube.com/watch?v=Krl_YIESHIE <

Caution-<https://www.polygraph.info/a/fact-check-xi-putin/31693558.html> >

Additionally, from Feb 14, thru today, a tweet has been showing up on Twitter from Chinese and prob Russian sources (likely sock puppets IMO) that DoD lied to Congress about funding to ECO-Health Alliance.

OK-take care,

(b)(6)

(b)(6) see attached as an example of OSO PA wants to see it, and summarize below ~ 51 pages of rubrod over the weekend, plus more links below. And (b)(6) but to write it down in the most salient articles. There was a penmanship problem in rubrod over the weekend.

(b)(6) note page 17 which appears to have a copy of a DTRA - GCRP document dated July 2021. In addition to the maps, WPK have been circulating for a few years in both BUS and PRC platforms.

Subject: SIPCI TAL Clips (27 Feb)-Labs are Caution Bell for an Invasion AND MORE

All

A number of folks did not receive since I had on their RAND document attached. So resending.

Another special version of the clips. The narrative claiming that the Russian invasion was started to prevent two or more labs has moved from the nationalist fringe, to more mainstream Russian platforms, and is now showing up on leftist Western sources. Additionally, the non-partisan (the documents being removed from Facebook website related to the "new Labs"). So here below, taking that narrative to the next level removes the propaganda from VK, Telegram, and Twitter. DG as would be expected, pushed the Ukraine Lab conspiracy. However, she fit the "big time". She must have played out Kremlin orders since she was published in Russian.

There are also two WHO's auto-discarding CFR Director Pope's interview for the Bulletin of Atomic Scientists, choosing to focus on the "threat posed to the population" of the release of disgerous pathogens, rather than the broader story.

Also, big thanks to SNOPE's for doing a rather nice job fact-checking and sourcing some of the Russian disinfo.

Also attached for your reference is a really good RAND product discussing Russian disinfo techniques. It caused me to think, can we do what they are doing? ...

Stay safe.

And-Pray for the safety of our friends and colleagues in Ukraine.

Content: <https://www.fbi.gov/newsroom/newsroom/2022/02/28/20220228-10>

influenza (avian flu) that is not transmitted between humans. However, NIH projects aim to make avian influenza viruses capable of transmitting between mammals and to assess their pandemic potential as a possible threat to humans. Gain of function (GoF) studies improve a pathogen's ability to cause disease by increasing its virulence and transmissibility. These dangerous experiments have not ended even though COVID-19 has been suspected to be the result of such NIH-funded GoF research at the Wuhan Institute of Virology. Instead of ending all GoF research since the beginning of the pandemic, the NIH and its sub-agency – the National Institute of Allergy and Infectious Diseases (NIAID), continued their financial support for the following GoF studies: Transmissibility of avian influenza viruses in mammals (NIAID support ended in August 2021); Centres of Excellence for Influenza Research and Surveillance (CEIRS) (NIAID support ended in March 2021). The third: Mimicking the evolution to define the mechanisms of aerial transmission of H7N9 viruses, began on September 2, 2021 and continues. H5N1, a highly pathogenic avian influenza virus, is not transmitted between mammals. Researchers aim to make the virus capable of being transmitted in order to assess its pandemic potential. According to the project description, "no sustained human-to-human transmission has yet been reported. Several attempts in the past to select transmissible H5 viruses (which are not usually transmitted between mammals) have not been successful." That's why the researchers "plan to smuggle non-transmissible viruses from different gene pools into ferrets (an established model of influenza virus transmission) to select transmissible mutants." Selected mutations will be characterized for their biological effects and the potential for transmission of H5N1 in mammals. According to the description provided for project 1R21AI144135-01: "Viruses of the Asian H7N9 lineage of avian influenza (VIA)... have not spread to humans; however, there is a strong potential for these viruses to evolve to be transmitted by air and cause a pandemic... Viruses carrying H7N9 HA and NA on the skeleton of the A/PR8 vaccine will be generated. Mutations will be introduced into the HA and NA gene segments... we will evaluate the replication kinetics of recombinant H7N9-A/PR8 viruses for their growth in primary epithelial cells of the human respiratory tract. Primary human cells will include nasal, tracheal, bronchial and small airway epithelial cells. The researchers want to make the virus capable of being transmitted by air in order to assess the pandemic potential of H7N9 viruses. These latest NIH-funded experiments are only a small part of many controversial laboratory studies approved by the agency. One of them was the risky research on the bat coronavirus in China, which is under investigation in the United States for a possible link to the COVID-19 pandemic. Despite repeated denials by NIAID Director Dr. Anthony Fauci, including before Congress, the NIH finally acknowledged last year that the United States had funded the GoF's research into bat coronaviruses in Wuhan, from where the pandemic began and spread around the world. The \$3.7 million grant went to the U.S. nonprofit EcoHealth Alliance. In a letter to the U.S. House of Representatives, the NIH states that EcoHealth Alliance violated the terms and conditions of the NIH AI110964 grant and did not report all of its activities in China. According to the NIH letter, a "limited experiment" was conducted to test whether "advanced proteins from naturally occurring bat coronaviruses circulating in China were able to bind to the human ACE2 receptor in a mouse model." It's much more important than Dr. Fauci – it involves the entire U.S. government: U.S. Congressman Following the release of a House Intelligence Committee report stating that "significant circumstantial evidence" supports the hypothesis of a laboratory leak, Rep. Mike Gallagher urged members of Congress and members of the media to take a closer look at the additional U.S. funding flows that sent money from taxpayers to EcoHealth Alliance. According to the congressman, "If you start doing basic research, it quickly becomes clear that it's much more important than Dr. Fauci — it involves the entire U.S. government." EcoHealth Alliance has received a total of \$112.1 million in funding from the U.S. government since 2003, according to information obtained from the U.S. Federal Contract Registry. Among its main sponsors are the NIH via NIAID and the Pentagon via the Defense Threat Reduction Agency (DTRA). The objectives of the projects are the discovery and assessment of viruses with pandemic potential mainly in Africa and Asia. Coronavirus research in a controversial Pentagon biolab in Georgia EcoHealth Alliance has implemented a number of military biological research programs for the Pentagon. In 2017, the U.S. Defense Threat Reduction Agency (DTRA) commissioned EcoHealth Alliance with a \$6.5 million project to collect and isolate coronaviruses from 5,000 bats in West Asia. The duration of the program is 5 years (2017-2022) with the Lugar Center, the Pentagon's biolaboratory in the Republic of Georgia, being the local laboratory for this genetic research. The objectives of the project are: 1. Capture and sample 5,000 bats non-lethally; 2. Collect 20,000 samples (i.e. oral and rectal swabs and/or feces and blood) and screen for CoV using consensual PCR in regional laboratories in Georgia and Jordan. According to the project presentation, Eco Health Alliance has already sampled 270 bats of 9 species in three West Asian countries: 90 individual bats in Turkey (August 2018), Georgia (September 2018) and Jordan (October 2018). The Lugar Center, which is the partner laboratory for this research, is a \$180 million Pentagon biolaboratory located in Tbilisi, the capital of Georgia. It was operated by a special unit of the US Army - USAMRU-G, whose personnel were given diplomatic immunity to search for viruses without being diplomatic. The Lugar Center has become famous in recent years for its controversial activities, laboratory incidents and scandals surrounding U.S. drug giant Gilead's hepatitis C program in Georgia, which resulted in the deaths of at least 248 patients. The cause of death in the majority of cases was listed as unknown, according to internal documents. There is no public information about the results of the research done by the EcoHealth Alliance at the Pentagon's Lugar Center, nor about the viruses that have been discovered and the genome experiments that have been carried out. \$5,000 for a black market bat The South Ossetia State Security Committee has raised public awareness of the EcoHealth Alliance bat research project in neighboring Georgia after a Georgian national Khvicha Mgebrishvili was arrested on July 3, 2020 near the village of Adzisar in the Tskhinvali region of South Ossetia for violating the state border. During interrogation by the KGB South Ossetian border agents,

influenza (avian flu) that is not transmitted between humans. Subject: [Non-DoD Source] 24-27 Jan Clips

All,

Attached is the latest compilation of clips. Of note, our Bulgarian friend DG's "reporting" is being amplified across all Russian media platforms-highlighting alleged human experimentation-and other attention grabbing charges across a wide-array of facilities with historical ties to CTR and the broader U.S. military. Also, at the front of the package is a release picked up in Chinese social media from the US Embassy in Beijing contradicting Russian disinfo about Ukraine-it would be great to see something similar on the lab narratives---

Last, not surprisingly, there is increased attention on Ukraine. There is a comment in one of the Russian articles about the laboratories being opened under Kuchma, and closed during the reign of Russia's client...interesting...

Stay safe,

(b)(6)

US COVID-19 just the forerunner of america's ideal biological weapon, or is it already one?

Source: Arguments.ru (news.argumenti.ru)

Release Date:

1/27/2022 Title: IS COVID-19 just the forerunner of the perfect American biological weapon, or is it already one?

IS COVID-19 just the forerunner of america's ideal biological weapon, or is it already one?

Alexander Sharkovsky, Special Correspondent

Photo: Social Media

Dr. Peter Dashak, involved in the creation of the SARS-CoV-2 virus, is accused of being a CIA agent. This is reported by NaturalNews.com. The Organization EcoHealth Alliance in which Dr. Dashak is president is nothing more than a "cover" for the work of the branch of the Central Intelligence Agency of the United States. The fact that Covid19 does not affect everyone equally indicates its special targeting of certain markers in human DNA. For modern genetic engineering, it is quite possible to embody this effect. Of course, this virus is in itself a biological weapon, perhaps intermediate, insufficiently perfect. It will be followed by the creation of an ideal bioweapon that strikes inexorably and point-by-point.

Dr. Andrew Huff, vice president of the EcoHealth Alliance (EHA), claims that the president of the firm, Dr. Peter Dashak, who organized funding for the SARS-CoV-2 study at China's Wuhan Institute of Virology, admitted that he works for the Central Intelligence Agency (CIA) and that the company is a "cover" for the CIA. According to a report detailed on Substack by independent journalist Kanekoa, Huff received a doctorate in environmental health with a specialization in emerging diseases before he became deputy vice president and then president of the EcoHealth Alliance. While working at the firm, he says he was tasked with finding "new methods of bio-observation," data analysis and imaging to identify new diseases. In fact, this organization could be engaged in the development of bioweapons.

WORK OF THE CIA

The EcoHealth Alliance, which Dashak leads, receives funding from a number of U.S. government agencies, including the National Institutes of Health and the National Institute of Allergy and Infectious Diseases, the latter headed by Joe Biden's chief medical adviser, Dr. Anthony Fauci. The EcoHealth Alliance, Kanekoa notes, collaborated with Dr. Ralph Barik of the University of North Carolina, as well as Dr. Shi Zhengli of the Wuhan Institute of Virology, to conduct studies on the functions of bat-borne viruses found in China before the COVID-19 pandemic began. Dashak led the screening of "thousands of bat samples for novel coronaviruses," which also included "screening of people who work with live animals." He himself said that, in his opinion, the EcoHealth Alliance is actually a "shell organization of the CIA", which was used to collect intelligence by the US government. However, according to Kanekoa, the EcoHealth Alliance was engaged in collecting viral samples and intelligence on foreign laboratory facilities.

Photo : Dr Dashak

The organization could hardly exist without external funding, it was common to lay off employees with the ebb and flow of federal or "private" appropriations. Peter did or said whatever he wanted to get money for this or that project.

At a 2016 forum on "emerging infectious diseases and the next pandemic," EcoHealth Alliance President Peter Dashak told colleagues: "We found coronaviruses in bats, a number of them, some of them looked very similar to SARS. So we sequenced a spike protein: a protein that attaches to cells. Then we... Well, I didn't do that job, but my colleagues in China did the work. You create pseudoparticles, you insert spike proteins from these viruses, see if they bind to human cells. At every step of this study, you're getting closer and closer to the fact that the virus can actually become pathogenic in humans. You end up with a small number of viruses that really look like killers." As a result, he received more than \$ 118 million. in the form of grants and contracts from federal agencies, including \$53 million from USAID, \$42 million from the Department of Defense, and \$15 million from HHS.

EHA and USAID

According to an investigation by independent journalist Sam Hussein and The Intercept, much of the money generated by the EcoHealth Alliance was not directed toward human health, but rather to research on viruses used in biological warfare, bioterrorism and other dangerous uses of deadly pathogens.

The EcoHealth Alliance has received a significant portion of its funding from the U.S. Agency for International Development (USAID), a subsidiary of the State Department that serves as a frequent front for the Central Intelligence Agency (CIA). The second largest source of funding was the Defense Threat Reduction Agency (DTRA), which is a branch of the Department of Defense (DOD), and which officially states that it is tasked with "countering and deterring weapons of mass destruction and improvised threat networks."

The U.S. Agency for International Development (USAID) has a long history of working as a contractor for various CIA covert operations. The annual budget of this organization is more than \$ 27 billion. It operates in more than 100 countries around the world. Almost all of its employees are CIA agents. They conduct various secret actions abroad of the United States, in various directions, including: the overthrow of unwanted governments, the development of protest movements and the creation of networks of agents of influence, the introduction of the necessary religious organizations into the social body of certain countries, and so on. An important part of their work is biological weapons. In 2013, WikiLeaks outlined a U.S. strategy to undermine the Venezuelan government through USAID by "infiltrating Chávez's political base," "dividing Chavismus," and "isolating Chávez internationally." In 2014, the Associated Press reported that USAID had contracted a project to develop a competitor to Twitter to foment an uprising in Cuba.

Photo : Dr Barik

From 2009 to 2019, USAID collaborated with the EcoHealth Alliance on the PREDICT program, which identified more than 1,200 new viruses, including more than 160 strains of coronavirus. It involved approximately 5,000 specialists in more than 60 research laboratories scattered around the world. By

Team,

As you know, the ARC that should have gone to the Hill this year with the FY22 PBR still has not cleared OSD and transmitted to the Hill. I've attached a copy of the draft that NCWMD-P has sent up their chain for approval so you have a starting point for the next ARC.

Gents.

-A big development to track is the development of the Russian-led CSTO Bio-Security Committee. On April 20th, as mentioned in previous email, Russia and Armenia issued a joint statement committing not host third-party bio activities that may harm the interests of the each party. Since that time, other CSTO members indicated their support for the Committee, but have not taken a specific stand on that particular question.

-Russia promulgated a false narrative that the US/UKR were planning to conduct a biological attack against Russia (note the Slav targeting weapon is part of all of these stories)

-On April 19, Russian Deputy Ambassador to the United Nations delivered another UNSC statement. This time it reiterated the claims against STCU (etc) that were contained in the MOD April 14 statement. The link to watch the 10 minute statement is in the clips. "Supporting documentation" was contained in an official Security Council document. Unlike previous "data dumps," despite wide coverage in Russian-language press, these documents and the statement itself were not pushed out over social media (VK, Telegram, etc). I am still trying to get the package to compare it to the version from the week before.

-Russia is also pushing a report that DoD and the Department of the Interior funded COVID Research in Nov 2019. (see VK snapshots and Expose article).

The world first started to hear about a novel coronavirus in early January 2020, with reports of an alleged new pneumonia like illness spreading across Wuhan, China. However, the world did not actually know of Covid-19 until February 2020, because it was not until the 11th of that month that the World Health Organisation officially named the novel coronavirus disease as Covid-19.

So with this being the official truth, why does United States Government data show that the U.S. Department of Defense (DOD) awarded a contract on the 12th November 2019 to Labyrinth Global Health INC. for 'COVID-19 Research', at least one month before the alleged emergence of the novel coronavirus, and three months before it was officially dubbed Covid-19?

The shocking findings however, do not end there. The contract awarded in November 2019 for 'COVID-19 Research' was not only instructed to take place in Ukraine, it was in fact part of a much larger contract for a 'Biological threat reduction program in Ukraine'.

Perhaps explaining why Labyrinth Global Health has been collaborating with Peter Daszak's EcoHealth Alliance, and Ernest Wolfe's Metabiota since its formation in 2017.

Source

Karen Saylor, PhD, who co-founded Labyrinth Global Health, has allegedly worked in the international public health field for over a decade and has spent many years living in Africa establishing global surveillance networks, “working with partners to improve Global Health policy on infectious disease detection, response, and control”.

At Labyrinth, Dr. Saylor specialises in studies that aim to understand and mitigate biological and behavioural risk of disease transmission. Dr. Saylor worked with Oxford University Clinical Trials Network in Vietnam on zoonotic disease surveillance research and continues to coordinate with regional partners on emerging outbreaks in animal and human populations.

But who are the partners that Dr Karen Saylor and Labyrinth Global Health choose to work with? They are none other than the ‘Eco Health Alliance’ and ‘Metabiota’.

Dr Karen Saylor, Eco Health Alliance and Metabiota worked together on the United States Agency for International Development (USAID) ‘PREDICT’ program from 2009, while Labyrinth Global Health worked alongside EHA and Metabiota on the PREDICT program from 2017.

Launched in 2009 and funded by USAID, PREDICT was an early warning system for new and emerging diseases in 21 countries. It was led by the University of California’s (“UC”) [Davis One Health Institute](#) and core partners included [EcoHealth Alliance \(“EHA”\)](#), Metabiota, Wildlife Conservation Society, and Smithsonian Institution, and as we’ve just revealed: Labyrinth Global Health. PREDICT was a forerunner of the more ambitious Global Virome Project.

The USAID [describes PREDICT](#) as having made “significant contributions to strengthening global surveillance and laboratory diagnostic capabilities for both known and newly discovered viruses within several important virus groups, such as filoviruses (including ebolaviruses), influenza viruses, paramyxoviruses, and **coronaviruses**”.

Here’s one of the many studies published by Eco Health Alliance, Metabiota and Labyrinth Global Health proving the connection –

Implementing One Health approaches to confront emerging and re-emerging zoonotic disease threats: lessons from PREDICT

PREDICT partnered with the non-profit Eco Health Alliance (EHA) to carry out its 9-year effort to catalogue hundreds of thousands of biological samples, "[including over 10,000 bats.](#)" A PREDICT-funded [2015 study](#) on "diversity of coronavirus in bats" also included Peter Daszak, president of EHA, among its participants.

Eco Health Alliance is listed as a partner of the Wuhan Institute of Virology ("WIV") on archived pages of its website and was mentioned as a one of the institute's "strategic partners" by the WIV's Deputy Director General in 2018.

Notably, the relationship between the WIV and the American Biodefence establishment was advanced by EHA policy advisor, David R. Franz, former commander at US bioweapons lab at Fort Detrick.

WIV's Dr. Shi Zhengli, a.k.a. "Batwoman," had also worked with EHA's Daszak on bat-related studies. As far back as 2005, Daszak and Zhengli were conducting research on SARS-like coronaviruses in bats. Several PREDICT-funded studies on SARS-like coronaviruses and Swine Flu count with both Zhengli's and Daszak's contributions. Perhaps the most noteworthy of these is a 2015 PREDICT and NIH-funded study she co-authored entitled: '*A SARS-like cluster of circulating bat coronaviruses shows potential for human emergence*'.

Meanwhile, Nathan Wolfe is the founder of Metabiota and non-profit Global Viral. He spent over eight years conducting biomedical research in both sub-Saharan Africa and Southeast Asia. Unsurprisingly, Wolfe is a World Economic Forum Young Global Leader. More notably, since 2008 he had been a member of DARPA's DSRC, Defence Science Research Council, until it was disbanded.

All of these people and organisations have been working for at least the last decade studying coronaviruses and helping to set up Biolabs in Ukraine. All using US Department of Defense funds to do so. You can read much more about this here, here and here.

INFORMATION

...the US Department of Defense awarded a contract for Professional, Scientific, and Technical Services to Black & Veatch Special Projects Corp, which is allegedly “a global engineering, procurement, consulting and construction company specialising in infrastructure development”.

That contract involved a Biological threat reduction program in Ukraine. As part of this larger contract, another contract was awarded to Labyrinth Global Health for ‘COVID-19 Research’ on 12th November 2019.

This was awarded at least one month before the alleged emergence of the novel coronavirus, and three months before it was officially dubbed Covid-19. Labyrinth Global Health works alongside the ‘Eco Health Alliance’, and ‘Metabiota’, and participated in the USAID PREDICT program. All of these people and organisations have been working for at least the past decade studying coronaviruses and helping to set up Biolabs in Ukraine. All using US Department of Defense funds to do so.

Information found [here](#) points to Eco Health Alliance having a hand in creating the Covid-19 virus.

All of this requires much further research to fit all of the pieces of the puzzle together, but here’s what we definitely know so far –

- A novel coronavirus emerged in Wuhan in December 2019.
- The world did not get to hear about this novel coronavirus until early January 2020.
- The world did not know this novel coronavirus was called Covid-19 until February 2020, when the World Health Organization officially named it so.
- The US Department of Defense awarded a contract for Professional, Scientific, and Technical Services to Black & Veatch Special Projects Corp, which is allegedly “a global engineering, procurement, consulting and construction company specialising in infrastructure development”.
- That contract involved a Biological threat reduction program in Ukraine.
- As part of this larger contract, another contract was awarded to Labyrinth Global Health for ‘COVID-19 Research’ on 12th November 2019.
- This was awarded at least one month before the alleged emergence of the novel coronavirus, and three months before it was officially dubbed Covid-19.
- Labyrinth Global Health works alongside the ‘Eco Health Alliance’, and ‘Metabiota’, and participated in the USAID PREDICT program. All of these people and organisations have been working for at least the past decade studying coronaviruses and helping to set up Biolabs in Ukraine. All using US Department of Defense funds to do so.
- Information found [here](#) points to Eco Health Alliance having a hand in creating the Covid-19 virus.
- Information found [here](#) points to Moderna having a hand in creating the Covid-19 virus.
- ‘Moderna’, alongside the ‘National Institute of Allergy and Infectious Diseases’ (NIAID) agreed to transfer ‘mRNA coronavirus vaccine candidates’ developed and jointly-owned by NIAID and Moderna, to recipients ‘The University of North Carolina at Chapel Hill’ on the 12th December 2019.

What does all this point to? That’s for you to ponder and decide. But we promise you there is much more to come on the above...

Subject: FW: DoD Disinfo Clips June 1-Monkey pox intensifies
Date: Thursday, June 2, 2022 12:49:40 PM
Attachments: Armycommentaryt.pdf
1jun.pdf

Gentlemen,

Since Friday's data drop, the Russians have been busy amplifying their messages. Despite submitting their materials to the UNSC, I still have not seen them request a special session. The Russian narrative machine is cranking out every conceivable way to link various DoD organizations with the Monkey pox outbreak, and as an indication that we were doing smallpox research.

Additionally, the NAMRU narrative re Indonesia is still propagating. The good news is that it is acting as a catalyst to bring together disparate elements of the Department to develop a proper response.

VR
(b)(6)

Subject: DoD Disinfo Clips June 1-INDOPACOM AOR campaign continues

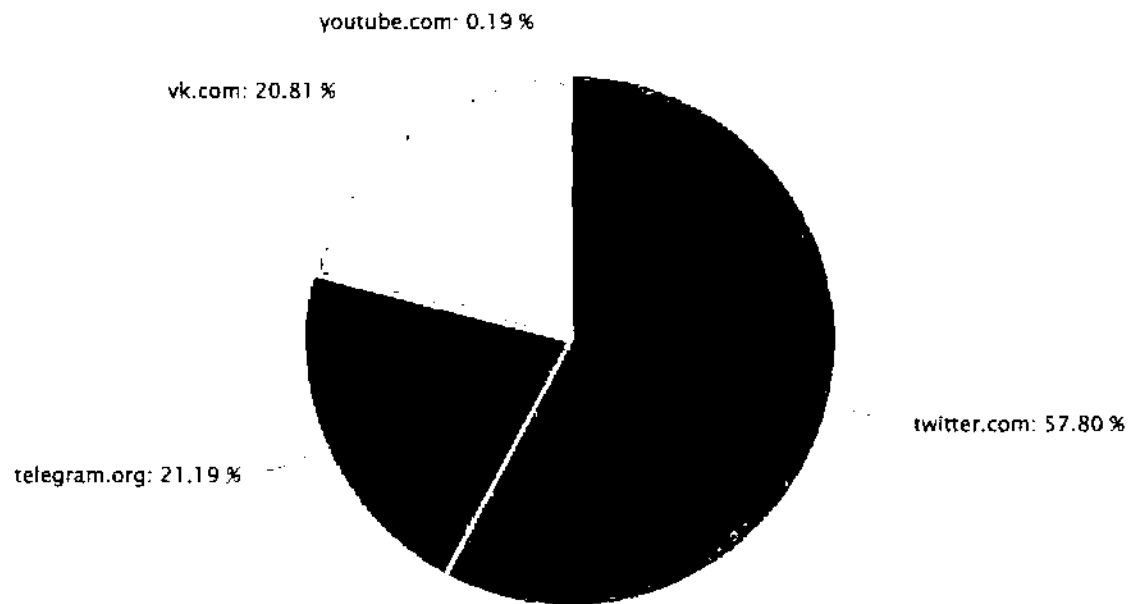

All,

So, things are never quiet for long. Russia has amped up its disinfo taking advantage of the upcoming events in the Pacific and ongoing monkey pox outbreak. In the social media environment, there continues to be considerable activity with common narratives on VKontakte, Telegram, Twitter, and Weibo (Charts are in the 1jun package 3 pages in). The most active platform is Telegram. I am no expert, but it appears that much of what I am seeing on Twitter is hot activity across multiple languages. This perspective is based on two years of seeing the exact same verbiage on dozens of posts, with slight variations, and then almost identical replication in foreign languages. It remains a question in my mind to what extent these platforms truly represent influence touch points, rather than simply exposure.

However, worthy of note, two statistics from this week. The CBS news poll indicated 26% of Americans believe the BW associated lab narrative. This is very similar to one from earlier this year, reported by Mark Galeotti, that put the figure at 29%. When discussing this at dinner last week with a retired Ambassador who had significant time in the NSC (and in BW arms control)--he put this in perspective stating-- "yes, but 20% of Americans believe Elvis is still alive."

The disinformation about NAMRU-2 and Indonesia highlighted several high-impact Russian allegations, chief among them, the exporting of blood samples back to the US without host country authorization. This usually leads to, or at a minimum opens the door to, future attempts to sow discord based on false allegations that the US is developing genetically targeted BW. Russia consistently charges that the US is developing weapons against the Slavic peoples.... It is very possible that Russia or China will use

the NAMRU charges, potentially after roping in additional US efforts in the region, to apply such explosive rhetoric to populations in Asia. The NAMRU story spread quickly through Asia-Pacific media, including coverage by many legitimate news sources in multiple local languages. In the two years that I have been tracking these narratives, I do not recall such an aggressive campaign by Russian in Asia. To Navy's credit they are actively engaged in coordinating with key players to respond.

Not surprisingly, the vast majority of the false reports deal with monkey pox and its origins. It is important to recall that this particular disinfo is part of a decades long Russian campaign that dates back to Operation Infektion/Dallas that alleged AIDS was created in a US Bio Weapons Lab--variations of sources included Plum Island and Ft Detrick. Since that time, I cannot recall a single major disease outbreak that has not been exploited for disinfo purposes and linked back to the US and alleged BW activity. Sadly, these falsehoods form a foundation of cultural "givens" among many in the developing world--therefore new charges are often greeted with a degree of credibility given earlier beliefs about disease origins.

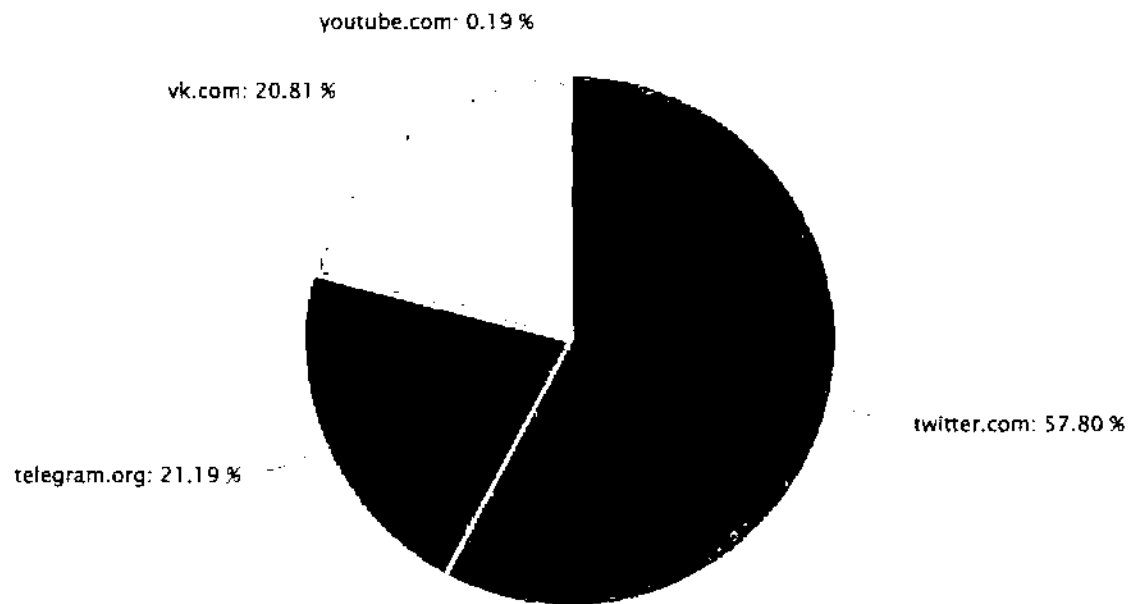

Russia is once again pivoting back to highlighting US work with Central Asian nations. There seems to be a disproportionate focus on Kyrgyzstan, where there is no CTR footprint.

Also, if you read nothing else in the package--read the Russian description of the structure and organization of the US Biological Weapons Program---it is a veritable Rosetta Stone for understanding their charges.

Very Respectfully,

(b)(6)

This does appear to need OSD LA/GC coordination, via DTRA LA/GC, prior to DIR. Really not sure what's driving their order of operations beyond DIR wanting to make sure our response is tied up in a neat package.

CT --

DTRA is responsible for gaining OSD LA and OSD GC coordination prior sending to the Director.

If possible, please get coordination with DTRA LA and GC on your response prior to May 14th. This will give us more time to get external coordination.

Let me know if you have any questions.

Thank you.

CONGRESSIONAL RFI FROM HASC
DoD Contracts with EcoHealth Alliance

Received: 8/12/2021

Question: Please provide answers to the below questions concerning DoD's relationship with EcoHealth Alliance.

1. Were any of the DoD-funded research projects involving EcoHealth Alliance performed in China or in support of research performed in China? If so, which projects, what was the work performed, and what were the risk assessments DoD used to evaluate funding projects in China?

None of the DoD CTR Program-funded research projects involving EcoHealth Alliance were performed in China, nor were they in support of research performed in China.

2. Has DoD issued any awards to Peter Daszak and/or EcoHealth Alliance that are not yet available in USA Spending.gov? If so, please include.

No, all of the DoD CTR Program's awards to EcoHealth Alliance are in USA Spending.gov.

3. Did DoD sponsored any classified research involving EcoHealth Alliance and/or Peter Daszak

No, the DoD CTR Program does not sponsor classified research.

4. Please provide copies of the agreements, initial research reports and all progress/final reports.

The DoD CTR Program has awarded grants to EcoHealth Alliance, which are included in the attached spreadsheet. The CTR program has not used contracts to fund EcoHealth Alliance. Additionally, DTRA-RD documentation on associated grants to EcoHealth Alliance are included in the spreadsheet.

Tue 6/2/2020 4:28 AM

Location(s): Richmond, Virginia

Two Richmond police officers and a suspect were reportedly injured after a shooting on the city's south side early Tuesday morning.

At around 1:25 a.m., Richmond Police Department officers were called to investigate a report of an armed person in the 800 block of Semmes Avenue.

Upon their arrival, gunfire erupted, injuring both responding officers and a suspect. All were subsequently transported to a local hospital for treatment following the incident.

Two additional suspects were also detained for questioning.

The Department's Force Investigation Team is investigating the shooting.

Tue 6/2/2020 3:56 AM

Location(s): Las Vegas, Nevada

American Enterprise Institute on Friday, Pompeo gave no details about immigration quotas or visas, and merely said: "We are taking a look at it." Pompeo is quoted as saying, "We are considering it. I don't know precisely how it will play out. The British have, as you know, a different relationship. A lot of these folks have British national passports. There's a long history between Hong Kong and the United Kingdom; it's very different. But we're taking a look at it." The Washington Examiner (6/1, Gehrke, 448K) and the Washington Times (6/1, Gertz, 492K), among other news outlets, also cover Pompeo's words.

The New York Times (6/1, Qin, 18.61M) reports, meanwhile, that "after staying quiet for days following President Trump's move to curtail relations with Hong Kong, Beijing weighed in on Monday with a relatively measured response, suggesting that it might be waiting for details about Washington's plan." The Times says that on Friday, in "response to Beijing's move to impose broad new national security legislation in Hong Kong," Trump "said he would begin removing policy agreements with the semiautonomous city, including an extradition treaty, commercial relations and export controls."

Researchers Trace Coronavirus To Horseshoe Bats. The New York Times (6/1, Gorman, 18.61M) reports that "an international team of scientists, including a prominent researcher at the Wuhan Institute of Virology, has analyzed all known coronaviruses in Chinese bats and used genetic analysis to trace the likely origin of the novel coronavirus to horseshoe bats." The Times adds that "in their report, posted online Sunday, they also point to the great variety of these viruses in southern and southwestern China and urge closer monitoring of bat viruses in the area and greater efforts to change human behavior as ways of decreasing the chances of future pandemics." According to the Times, "The research was supported by a U.S. grant to EcoHealth Alliance, a New York-based nonprofit, that was recently canceled by the National Institutes of Health."

SOUTH ASIA

US Envoy "Optimistic" About Potential "Intra-Afghan Negotiations." Reuters (6/1, Mohammed, Pamuk) reports that US Special Representative for Afghanistan

Reconciliation Zalmay Khalilzad indicated Monday that "recent prisoner releases and a relatively low level of violence may bode well for the start of peace talks between the Afghan government and the Taliban. ... 'We are in a good place,' Khalilzad told reporters, saying the Afghan government had released 2,400 to 2,500 Taliban prisoners since Feb. 29 and the militant group has freed more than 400 detainees in return." Khalilzad added, "We'll have challenges and difficulties but we are optimistic that finally we're moving forward to the start of the intra-Afghan negotiations."

UN Report: Taliban Maintains Close Ties With Al Qaeda In Afghanistan Despite US Deal. The Washington Post (6/1, Deyoung, Lamothe, 14.2M) reports, "The Taliban has not broken its ties with al-Qaeda, the U.N. Security Council declared in a new report that threatened to undermine a key aspect of the Trump administration's agreement with the Taliban to withdraw U.S. forces after nearly 19 years of war in Afghanistan." The report, released Monday, "states that relations between the Taliban, especially its Haqqani network, and al-Qaeda 'remain close, based on friendship, a history of shared struggle, ideological sympathy and intermarriage.'" Zalmay Khalilzad, the Administration's special envoy for Afghanistan, "said he had not yet read the report but had been told that the information it contains does not extend beyond March 15, two weeks after the U.S.-Taliban agreement was signed." Khalilzad said, "We believe that there is progress."

Pompeo Says Administration Has Plans To "Push Back Against" ICC. Politico (6/1, Forgey, 4.29M) reports that in an interview, Secretary of State Pompeo "previewed imminent action by the Trump administration aimed at countering the International Criminal Court's investigation of alleged war crimes committed by US personnel in Afghanistan." According to Politico, "In an interview on the 'What the Hell Is Going On?' podcast, produced by the conservative-leaning American Enterprise Institute think tank, Pompeo said he is 'very concerned' about the probe being conducted by the Hague-based tribunal." Pompeo is quoted as saying, "You'll see in the coming days a series of announcements not just from the State Department, [but] from all across the United

Bindu.

I'm happy to discuss. I'm here in the office (b)(6) and am available to talk any time today (I'm planning on leaving around 5:00 p.m., but can stay later upon request).

If that doesn't work I can share my availabilities next week with you as well.

Thanks!

FYI - USD R&E had a question about a specific grant with EHA administered by the USUHS, and potential DTRA support. In sum, the answer is no for CTR. See below for my answer. Not sure about DTRA / RD, but imagine it is the same answer as DTRA / RD does not fund this type of work overseas nor are they in the BPC business.

CT and RD Teammates,

Requesting a quick check from both, knowing we've been through this drill a few times already. We've passed the tasker off to R&E for their final answer to this congressional inquiry, but they had one specific follow-up question below.

Did either of your directorates enter into an arrangement with USUHS to perform work with EcoHealth Alliance using the referenced grant?

I also support Dr. Nair in the BRO and will be coordinating actions on the final stages of sending a response back to Congress (b)(6) as fully briefed me on the progress to date and forwarded me your contact info.

Thank you for offering assistance. I was hoping you could help figure out whether DTRA funds were used to support a grant to ECOHealth through the Uniformed Services University of the Health Sciences (USUHS). In addition to the DTRA contracts and grants with ECOHealth Alliance, USAspending shows a grant through the USUHS which looks like it went to fund global health efforts with Africom. https://www.usaspending.gov/award/ASST_NON_HU00012010031_97HW

Do you know if those funds came from DTRA with USUHS as the performer or if they were USUHS funds?

Thank you in advance,

Good afternoon everyone,

If you have not already, can you upload the attached to the subject OPR and add HDGS CWMD Policy to OSD002210-21 manage assignment listing.

Instructions if you need them.

Click on USA (OPR) in the tasker status area
On the tool bar where you see "Save and close" you should see "Manage Assignments " near the end.
Select Manage Assignments
In the search area type USP
USP tasker manager should filter it down to HDGS CWMD Policy

Date: Monday, April 4, 2022 11:00:23 AM
Attachments: 432Z.pdf

Gents,

The big event to watch is what the Russians are going to do with this Arria Format UN Security Council Informal session in NY this coming Wed. Will keep you informed as I learn more. There is a Russian claim that Facebook is blocking lab disinfo content. I do not know the validity of that statement.

VR

Subject: Quick view DoD Russian Disinfo April 1-April 3

All,

The attached is a fast browse/read. There are a number of translated items from Telegram that give some picture of the propaganda fight, including a posting from the Ukrainian National Center for Disinformation.

Highlights:

--Russian Ambassador in Geneva is highlighting the German support to the labs in Ukraine

-Russia is sponsoring "informal session" on global military biological activities this Wed at 10 am in NY at the UN on margins of UNSC

-Duma is issuing statements expressing possibility of inviting Victoria Nuland to testify to their investigative committee

-Russia and China once again mentioning possibility of using some form of multilateral/international mechanism to consider US compliance with BWC

-Duma considers possibility of requesting access to labs receiving US support in Georgia and Kazakhstan

VR

(b)(6)

the collapse of the USSR, was crowned with success. In the same period, Ukraine was turned into a testing ground for running various political technologies, including **bioprojects** used in the military sphere. Evidence the existence of which was discovered by the Russian military during the operation. Facts are stubborn things. Without waiting for the available evidence to be made public, having studied only the information posted on the Internet, one can understand the extent of Ukraine's involvement in the American **biological** courage. Judge for yourself.

This inhuman project originates in 1991, when the United States launched the so-called Nunn-Lugar program aimed at helping Russia and the CIS countries in the disposal of nuclear, chemical and other types of weapons of mass destruction that have been decommissioned and establishing control over their non-proliferation. . The beneficiary of this program was the **Pentagon** , the curator was the Defense Intelligence Agency (the leading body of US military intelligence), more precisely, the National Center for Medical Intelligence, which is part of it, and the main executor was the US Department of Defense Threat Reduction Agency (**DTRA**). After that, two years later, the Ukrainian leadership signed a pact with Washington to prevent the proliferation of weapons of mass destruction, and since 2000, RUMO began to actively implement a **military biological** project in Ukraine, including a number of large companies affiliated with the **Pentagon** , such as like Black & Veatch Special Projects. Starting from 2005, the **DTRA** contracting company began the construction of **biological laboratories** on the territory of Ukraine, where American specialists violated the work, and Ukrainians were forbidden to enter....

The year 2005 marked the beginning of the dawn of American military **biological** activity. After the signing of an additional protocol to the pact between the Ministry of Health of Ukraine and **DTRA** on preventing the spread of technologies, pathogens and knowledge that can be used in the development of **biological** weapons, the Ukrainian **military biological** potential, in fact, passed into the hands of American specialists. But the most interesting fact is that in 2007-2014 at the **biological** three very interesting characters appeared in the field: Nathan Wolf - an employee of the US Department of Defense, Christopher Heinz - the stepson of former US Secretary of State John Kerry and Hunter Biden - the son of US President Joe Biden with his Global Viral Forecasting Institute (Global Viral) and Rosemont Seneca Partners, engaged in non-profit research on transboundary pathogens and projects investing in these. By the way, in 2016, the structure of the founder of Global Viral Nathan Wolf - the EcoHealth Alliance Foundation was involved in research on coronaviruses transmitted by bats at the Wuhan Laboratory Research Center in China.

After the Maidan revolution in 2014, under the control of all the same activists from DIA and **DTRA** , Metabiota, Global Viral and Black & Veatch Special Projects begin to actively work within the framework of the **Biological** Threat Reduction Program (BTRP) with the Ministry of Health of Ukraine, headed by Ulyana- Nadezhda Suprun is an American citizen with a very specific **biography** .

Thanks to such close cooperation, Ukraine has become a **biological** testing ground. In the period from 2005 to 2014, the **Pentagon** deployed a large-scale, expensive system of reference laboratories in Odessa, Vinnitsa, Dnepropetrovsk, Lvov, Poltava, Kharkov, Kiev, Kherson and Ternopil, where pathogens of especially dangerous infections and strains were actively studied.

Sir,

On behalf of Mr. Lutinski: We plan to have the OA6 final draft report for senior leader review early next week. The exercise team has been working with MG Fletcher to close loopholes in the exercise approval process to ensure greater visibility and oversight of Agency exercise participation. STED has started the second cycle of selecting STRI research projects and will brief you on the program next Monday. PA is following up on all hands questions and we finally received a tentative timeline for the FY23-27 PBR.

Details attached.

Thank you very much.

Subject: Summary: House NDAA Passes 316 to 113

Senior Leaders,

Good morning. Last night, the House passed the FY22 NDAA by a vote of 316-113. The bill authorizes \$740 billion in DoD spending - an increase of \$25 billion over the President's request - and \$28 billion for nuclear weapons programs under the Department of Energy. SASC approved similar finding levels in July and the full Senate is expected to take up the measure in the coming weeks.

High profile provisions included in the House-passed version include a 2.7% pay increase for service members, requiring women to register for the draft, and the establishment of a bipartisan commission to review U.S. involvement in Afghanistan over the last 20 years. The bill also includes provisions designed to strengthen U.S. alliances and pivots to Asia, especially through the new Pacific Deterrence Initiative.

Aside from CTR - which received a \$105 million increase - DTRA funding was authorized at the levels from the President's request. Of the 487 amendments considered this week, notable items successfully added to the bill

include:

- Blocks funding for any purpose to EcoHealth Alliance, Inc.
- Directs the Executive Agent to designate a Joint Program Executive Officer for the EOD Program and assigns the DTRA Director to manage the Defense-wide program element funding for the Program.
- Increases funding for the Development of Medical countermeasures Against Novel Entities (DOMANE) program by \$4.5 million to allow for the rapid screening of all FDA approved compounds and other human safe compound libraries to identify optimal drug candidates for repurposing as medical countermeasures for COVID-19 and other novel and emerging biothreats.
- Creates the Global Health Security Agenda Interagency Review Council to implement the Global Health Security Agenda and to appoint a U.S. Coordinator for Global Health Security to coordinate such efforts.
- Establishes a National Security Commission on Synthetic Biology.
- DoD, in coordination with Agriculture, HHS, and DHS, is to develop an annex to the National Biodefense Strategy for a national biodefense science and technology strategy and implementation plan.
- Includes the Global Pandemic Prevention and Biosecurity Act, which seeks to address the source of highly infectious diseases beginning in animal species, including by reducing the sale and trade of live and fresh wildlife for human consumption, and addressing food insecurity associated with a reliance on local game and wildlife.
- Provides an apology to individuals and their families in NM, UT, ID, and other states who were exposed to radiation from nuclear testing.
- Requires reporting on recent security assistance programs to Mali, Guinea, and Chad
- Requires an annual report on and Congressional notification of U.S. efforts to counter malign foreign influence in Africa.
- Requires the Secretary of State to develop a strategy for engagement with Southeast Asia and the Association of Southeast Asian Nations (ASEAN).
- The U.S. is to work with state and non-state partners to shut down certain commercial wildlife markets, end the trade in terrestrial wildlife for human consumption, and build international coalitions to reduce the demand for wildlife as food, to prevent the emergence of future zoonotic pathogens. Authorizes USAID to undertake programs to reduce the risk of endemic and emerging infectious disease exposure and to help transition communities globally to safer, non-wildlife sources of protein.

Very Respectfully,

(b)(6)

Subject: Tasker: EcoHealth Inquiry - CATMS19112021M3TB6E Public Health Implications of Federal Funding Provided for Certain Virological Research

CT & RD,

This morning, DTRA received an EcoHealth Alliance inquiry from the Senate Homeland Security Committee. The letter is dated 11/18/2021, but R&E and A&S have been debating in the interim who is to respond and now a response is expected very soon. The questions they ask are as follows:

- (1) All research proposals or grant applications submitted by or on behalf of EcoHealth Alliance (EcoHealth) and/or the Wuhan Institute of Virology (WIV).
- (2) All documents or communications sent by the agency in response to any research proposal or grant application submitted by or on behalf of EcoHealth and/or the WIV.

It appears that we may be able to respond with the same data provided to HASC in August? I took the liberty of uploading such data to the supporting documents folder in the tasker for your review. Please update or add as necessary. An extension to the suspense date of 6 Jan 2022 is being requested.

Thanks,
(b)(6)

RESEARCH
AND ENGINEERING

THE UNDER SECRETARY OF DEFENSE
3030 DEFENSE PENTAGON
WASHINGTON, DC 20301-3030

July 6, 2020

The Honorable Guy Reschenthaler
U.S. House of Representatives
Washington, DC 20515

Dear Representative Reschenthaler:

Thank you for your letter dated April 30, 2020, regarding a 2017 grant awarded by the Department of Defense (DoD) to EcoHealth Alliance, Inc. I am responding on behalf of the Secretary of Defense.

The 2017 grant awarded \$6.5 million to EcoHealth Alliance for scientific research into combating weapons of mass destruction. In your letter, you stated that EcoHealth Alliance has a history of collaborating with the Wuhan Institute of Virology in the People's Republic of China. No portion of any funds granted by the Defense Threat Reduction Agency's Biological Threat Reduction Program (BTRP) to EcoHealth Alliance supported work at the Wuhan Institute of Virology or any other activity in China.

For grants awarded in support of the BTRP, the program engages with applicants early in the project development process to ensure that they understand there can be no transfer of funds to parties other than those authorized as sub-recipients by the Department. The Department's program managers carefully review grant proposals to ensure that no prohibited activities (technical or financial) are included as part of any funded projects. Finally, the Department performs regular oversight of all grant awards through required reporting to ensure that research is conducted as authorized.

Thank you for your dedication to the Armed Forces and unwavering support of our Service members across the globe. The Department will continue to dedicate its efforts to ensure the best force protection against the most dangerous threats facing our Nation and our Warfighters.

My point of contact is Commander Jon Fay in the Office of the Assistant Secretary of Defense for Legislative Affairs at 703-693-4027 or jonathan.m.fay.mil@mail.mil.

Sincerely,

Michael D. Griffin

Congress of the United States
Washington, DC 20515

March 15, 2021

The Honorable Lloyd Austin
Secretary of Defense
Department of Defense
1000 Defense Pentagon
Washington, D.C. 20301

Dear Secretary Austin:

We write regarding federal funding awarded by the Department of Defense (DOD) to EcoHealth Alliance Inc. (EcoHealth), a New York-based non-profit organization with a history of collaborating with the Wuhan Institute of Virology (WIV).

As *New York Magazine* recently reported, EcoHealth funneled federal grant funding awarded by the U.S. Defense Threat Reduction Agency to researchers at the WIV.¹ This is deeply concerning given the WIV is a possible origin site of the COVID-19 pandemic, and the lab has significant ties to the Chinese Communist Party (CCP) and military biological research.

It is also troubling that, according to government records, published research papers, and significant reporting, this is not the first time EcoHealth transferred taxpayer funding to a CCP lab. EcoHealth has partnered with the WIV since 2004, as discovered by the *Wall Street Journal*.² Additionally, between 2015 and 2019, the WIV received approximately \$598,500 from EcoHealth for a National Institute of Allergy and Infectious Diseases-funded study on the risk of bat coronavirus emergence. Further, a 2015 WIV research project, which utilized Gain of Function (GOF) research on bats in China, was partially funded by EcoHealth through a grant awarded by the U.S. Agency for International Development.³

Government spending data shows that from 2013 to the present, the DOD has awarded approximately \$35 million in funding to EcoHealth in the form of contracts and grants.⁴ Significantly, in 2017, the U.S. Defense Threat Reduction Agency awarded a \$6.5 million grant to EcoHealth to study the risk of bat-borne zoonotic disease emergence in Western Asia.

As you know, the CCP runs the WIV. Following the COVID-19 outbreak, the CCP replaced the former WIV head with China's top biowarfare expert, Major General Chen Wei. The WIV facility houses a Biosafety Level IV laboratory, which is the only maximum-security biosafety containment lab in China, and has a history of safety concerns even prior to the COVID-19 pandemic.⁵ For example, in 2018, two Department of State cables raised concerns regarding safety at the WIV, highlighting "a serious shortage of appropriately trained technicians and investigators

¹ <https://nymag.com/intelligencer/article/coronavirus-lab-escape-theory.html>

³ <https://www.nature.com/articles/nm.3985>

⁴ <https://www.usaspending.gov/search/?hash=e86d1a3de7d3bcdd538f4489363297d0>

⁵ <https://gop-foreignaffairs.house.gov/wp-content/uploads/2020/09/Final-Minority-Report-on-the-Origins-of-the-COVID-19-Global-Pandemic-Including-the-Roles-of-the-CCP-and-WHO-9.20.20-Coverpage.pdf>

needed to safely operate this high-containment laboratory.”⁶ In recent weeks, the Department of State confirmed that several researchers at the WIV became sick with COVID-19-like symptoms in the fall of 2019, and since 2017, the WIV has engaged in classified research with the Chinese military.⁷

Given the similarities between previously federally funded research at the WIV and the DOD grant funding awarded to EcoHealth, we respectfully request answers to the following questions:

1. How much funding awarded to EcoHealth through DOD has been given to or used in collaboration with the WIV?
2. Was EcoHealth authorized by DOD to transfer taxpayer funding to the WIV? If so, how much funding was provided the Chinese WIV, and for what purposes?
3. Was the grant funding awarded to EcoHealth for GOF research?
4. In the wake of the COVID-19 pandemic, has DOD reconsidered, paused, or cancelled work with EcoHealth or the WIV?
5. Has any other DOD grant, contract, or subcontract been used to fund work at the WIV?

Thank you for your consideration of our request. We look forward to hearing from you.

Very respectfully,

Guy Reschenthaler

Mike,
Thanks for forwarding. We identified this funding from CTR early last year. Please pass on to (b)(6) I'm pretty sure PAO is tracking this info. Additionally, studying the origin of viruses is not the same as doing gain of function where you are intentionally manipulating genomes to increase virulence, transmissibility, morbidity and/or therapeutic resistance. Glad he saw that in the news and forwarded so PAO has a heads up.

C B knows what gain of function is and we have never funded work like that. I've always said we are in the "Trust but Verify" Agency, so some boundaries we don't push because it does look offensive in nature.

Thanks,
Ron

Subject: Hmmmm, ...

So, I warned the PAO and the front office and Chem:Bio about this before I left DTRA. An intrepid blogger had discovered this connection in late January 2020 and posted it on a popular blog (Zerohedge) along with grant numbers, certifying officials, etc.)

In short, DTRA was funding gain of function experimentation in bat coronaviruses in Wuhan. I suspect, even the money that went from NIH may have originated from DTRA.

DTRA may get its 15 minutes of fame.

Perhaps you would like to alert DTRA PAO. The link is to the RedState blog article which has a link to the Daily Mail (UK) article.

Money quote from RedState:

"Research papers published by the two on coronaviruses identify the grant funding as having come from USAID and PREDICT. But that limited attribution didn't reveal that the funding distributed through PREDICT had, in part, come from the Defense Department — specifically the DOD "Defense Threat Reduction Agency.""

Why Was the U.S. Department of Defense Funding Bioweapons Research at Wuhan? - RedState <
Caution-https://redstate.com/showreel/edrew_2021/06/06/why-was-the-us-department-of-defense-funding-bioweapons-research-at-wuhan-391796 >

From the Daily Mail:

Sub headline that reads:

* Grants from the Pentagon included \$6,491,025 from the Defense Threat Reduction Agency (DTRA) from 2017 to 2020

The article states, "Grants from the Pentagon included \$6,491,025 from the Defense Threat Reduction Agency (DTRA) from 2017 to 2020 with the description: "Understanding the risk of bat-borne zoonotic disease emergence in Western Asia."

The Pentagon funneled \$39million to a charity that funded Wuhan lab | Daily Mail Online < Caution-<https://www.dailymail.co.uk/news/article-9652287/The-Pentagon-funneled-39million-charity-funded-Wuhan-lab.html> >

(b)(6)

(b)(6) is a SOCOM LNO assigned to the USEMB India. He will be there for the next three years engaging with his Indian counterparts focused on training and relationship building. At SOCOM's request, I recently gave a CTR presentation to SOCOM personnel to include about 10 foreign partners (SOF LNO's to SOCOM in Tampa). (b)(6) virtually attended that presentation and had some follow up questions about our engagement with India, and I spent some time going over our Nuke/Bio activities in country. (b)(6) had some interesting suggestions and shared some insight into potential Indian demand signals in terms of Border Security, which I will research further. Over time, (b)(6) may develop partnerships with some of the people who could be involved in nuke security and loose material. No action required, just establishing relationships that could be of future value. (b)(6) contact info is below.

(b)(6)
Subject: WAT Snapshot Comparison

Dr. Pope,

As a supplement to the business meeting slides I sent a few minutes ago, I've attached a WAT Snapshot Comparison that compares the UICs that were planned on being awarded in November as of 14 November with those same UICs as of today. After the business meeting slides were produced, some of the programs, BTRP and PPP in particular, made updates to their WAT spend plan. Since those changes are not captured in the business meeting slides, this WAT Snapshot Comparison provides updated data as of this morning as to the status of the UICs with planned obligation dates in November.

The key takeaway is the following: as of 14 November, 28 UICs were planned to be awarded by the end of November. Of the 28 UICs, by 30 November, 6 were awarded, 21 were still planned, and one was removed. Of the 21 UICs still planned, 18 UICs' EADs were pushed to the right (shaded yellow).

Thank you.

CONGRESSIONAL UPDATE

May 4, 2021

HEADLINES

- **Senate:** Not in session this week. Returning next week for votes.
- **House:** Committee work only this week. Returning next week for votes. HASC-ISO held their annual CWMD posture hearing today. A summary can be found below.

HEARINGS OF INTEREST

FY22 DoD CWMD Strategy, Policy & Programs

- May 4, 1100
- House Armed Services - Intelligence & Special Operations Subcommittee
- Witnesses:
 - Jennifer Walsh (A/ASD-Homeland Defense & Global Security)
 - Dr. Brandi Vann (A/ASD-NCB)
 - VADM Timothy Szymanski (Deputy Commander, USSOCOM)
 - Dr. Rhys Williams (A/DIR, DTRA)
- The virtual hearing was attended by eight of fifteen members on the Subcommittee. Chairman Gallego opened the hearing by expressing his concern over a possible weaponized COVID-like virus. He also asked the panel about the quality of our CWMD efforts with allies like South Korea, India and Japan. Ranking Member Kelly highlighted the threat of poisoning from biological agents as evidenced by recent Russian activity and how we preserve or strengthen international norms in the chem/bio arena. He also asked specifically about DoD grant funding for EcoHealth Alliance and their subsequent work with the Wuhan Institute of Virology - Secretary Austin recently received a letter on this topic from a separate group of House Members.
- Rep. Bacon asked Dr. Vann if Iran was our number one threat for nuclear proliferation and if there were concerns with Iran colluding with Al Qaeda and WMD. He finished by commenting on the current status of Open Skies. Rep. Waltz, a green beret and former Director of the OSD Afghanistan policy desk, inquired on what CIED capabilities we are leaving behind in Afghanistan and what the withdrawal plan looked like. Other members raised questions about synthetic biology, fentanyl, the Korean Peninsula, and the impact of the withdrawal from Afghanistan on CWMD efforts including the Pakistan nuclear program. A number of questions were deferred to a classified discussion or written response.

POSTURE HEARING RECAP

United States Nuclear Deterrence Policy and Strategy

- April 28 (SASC-Strategic Forces)
- While the hearing was sparsely attended, SASC full committee Chairman Reed did join and asked questions. As expected, there was agreement among panelists and witnesses that nuclear

Subject: Weekly Legislative Update - 09.21.21

Senior Leaders,

Good afternoon. Attached is this week's legislative update. Also attached is a list of FY22 NDAA amendments recently approved by the House Rules Committee considered to be in order for House Floor debate. We expect they may take up the NDAA tomorrow afternoon after the government funding discussion is resolved.

Some amendments we will be tracking closely include:

- Rep. Crawford (121) - Directs the Executive Agent to designate a joint program executive officer for the EOD

Defense Program.

- Rep. Dunn (131) - Increases the Development of Medical countermeasures Against Novel Entities (DOMANE) program to allow for the rapid screening of all FDA approved compounds and other human safe compound libraries to identify optimal drug candidates for repurposing as medical countermeasures for COVID-19 and other novel and emerging biotreats.

- Rep. Joyce/Langevin (210) - Directs the Secretary of Defense, in coordination with the Secretary of Agriculture, Secretary of Health and Human Services, and the Secretary of Homeland Security, to develop an annex (to the National Biodefense Strategy described under Section 104 of title 6, United States Code) for a national biodefense science and technology strategy and implementation plan, no later than 180 days after the date of enactment of this bill.

- Rep. Reschenthaler (354) - States that no funds authorized under this Act may be made available for any purpose to EcoHealth Alliance, Inc.

- Rep. Smith (396) - Requires the GAO to conduct a study of the possible experimentation of ticks, insects, or vector-borne agents by the DOD between 1950 and 1977 for use as a bioweapon.

Very Respectfully,

(b)(6)

Duyne (TX)	espionage.	
354. Resenthaler (PA), Van Drew (NJ), Perry (PA), Harshbarger (TN), Keller (PA), Budd (NC)	#148 (REVISED) States that no funds authorized under this Act may be made available for any purpose to EcoHealth Alliance, Inc.	(10 minutes)
355. Resenthaler (PA), Kim, Young (CA), Van Duyne (TX)	#160 (REVISED) Adds countries that are major producers of fentanyl and fentanyl-like substances to the Majors List and adds a new section on fentanyl to the annual International Narcotics Control Strategy Report.	(10 minutes)

November 9, 2021

HEADLINES

- **Congress:** This week, Congress is holding committee hearings, but no votes are scheduled. When Members formally return on 15 November, they will have three more weeks in session, but schedule changes are expected due to the long list of priorities requiring action before the year is out. Their to-do list includes: extending government funding, raising the debt ceiling, completion of the NDAA, and coming to an agreement on the President's large social spending package.
- **Senate:** Early indications point to the Senate floor taking up the FY22 NDAA the week of 15 November. SASC is likely to hold a hearing on 2 December for ADM Christopher Grady to be the next Vice Chair of the Joint Chiefs of Staff.
- **House:** Last Friday, the House passed the long-awaited \$1.2 trillion infrastructure package and sent the bill to the President for his signature.
- **Government Funding:** The current continuing resolution expires at midnight on 3 December, however, a shutdown is unlikely. Leadership of the respective Appropriations committees met on 2 November, but could not reach an agreement on top-line numbers for defense and non-defense spending. There is a potential that Congress could pass another short-term funding bill, but any votes are expected to be delayed until after Thanksgiving.

CONGRESSIONAL ENGAGEMENTS

- *2 Nov: Call with SASC staff*
 - CT Director Dr. Robert Pope spoke with SASC staff member (b)(6) concerning a block on Defense funding going to EcoHealth Alliance in the House version of the NDAA. Dr. Pope explained why CTR conducts these biosurveillance studies with our partners and the good partnership DTRA has had with EcoHealth.
- *6 Nov: CODEL to Jordan*
 - Sen. Joni Ernst (R-IA) visited the DTRA-provided Jordan Border Security System as part of a CODEL visit to Jordan, Israel, and Albania. She was able to tour a section of the border via helicopter and met with some JAF officials. A summary of the visit is pending.
- *11-12 Nov: CODEL to Offutt AFB*
 - Sen. Jon Tester (D-MT), SAC-D Chair, is to visit USSTRATCOM to receive briefings on the operations and programs focused on strategic and integrated deterrence to include a Global Operations Tour to visualize how the NC3 process integrates with required mission partners.

NOMINATIONS

Subject: Weekly Legislative Update - 12.15.21

Senior Leaders,

Good afternoon. Attached is this week's legislative update.

Today, the Senate passed the NDAA and sent it to the President. The update also includes a summary of last week's hearing on biosecurity and I've attached a condensed transcript.

V/r,

(b)(6)

DTRA Legislative Affairs

(b)(6)

HEADLINES

- **Senate:** The upper chamber will be in session this week, and possibly next, as they attempt to complete three priority items before the holidays: the debt limit, the NDAA, and the Build Back Better Act – a \$2 trillion climate and social spending bill. The debt limit was approved yesterday and today the NDAA was agreed to and sent to the President. SASC also sent the JCS Vice-Chair nomination of ADM Christopher Grady to the floor.
- **House:** Yesterday, the House completed their work for the week with votes on the debit limit, combating Islamophobia, barring the importation of goods made with forced Uyghur labor, and holding (b)(6) in contempt of Congress over his refusal to comply with the January 6th special committee. This is likely the final week in session for the House this year.
- **NDAA:** The Senate voted to pass the \$768 billion defense bill today by a vote of 89-10. The measure now goes to the President for his signature. The bill language is identical to the text that was released last week. A key provision on EcoHealth Alliance bars any funding of projects conducted in China. Funding-wise, notable increases include \$105 million more for BTRP and \$5,877 million more for overall RDT&E.
- **Debt Limit:** Yesterday, both chambers approved of the final step to raise the debt limit by another \$2.5 trillion. The bill's passage sets up another showdown on the debt ceiling as soon as November 2022.
- **Nominations:** DoD nominees (b)(6) (CIO) and (b)(6) (Operational Test & Evaluation) were confirmed yesterday. However, with 158 nominees blocked over holds placed by conservatives on other key posts, Senate Majority Leader Schumer has threatened to keep his chamber in session over the weekend and into next week to get movement on the slate. Two Republican Senators have placed holds on high profile Defense and State Department nominees over their objections to related administration policies. Sens. Ted Cruz and Josh Hawley have pledged to maintain their holds until they get a vote on sanctions over the Nord Stream 2 pipeline effort and more accountability over the pullout of troops from Afghanistan, respectively.

KEY HEARING SUMMARY

Biosecurity for the Future: Strengthening Deterrence and Detection

- 8 Dec, 1000
- House Foreign Affairs - Subcommittee on Asia, the Pacific, Central Asia & Nonproliferation
- Witnesses:
 - (b)(6) (Nuclear Threat Initiative)
 - (b)(6) (Johns Hopkins University-School of Public Health)
 - (b)(6) (Council on Strategic Risks; Former ASD-NCB)
 - (b)(6) (Sculpting Evolution Group, Massachusetts Institute of Technology)
- **Summary:** Discussion alternated between the prevention and defeat of naturally occurring health challenges as well as acts of bioterrorism. The chairman advocated for improved international

biosecurity systems, but also praised advancements and investments in efforts such as gene sequencing, bio surveillance, and detection. The ranking member was critical of China's efforts to hide COVID, highlighted the fact that lab accidents are frequent, and sought a better enforcement mechanism for the Biological Weapons Convention. Former ASD(NCB) (b)(6)

(b)(6) focused on a "deterrence through denial" strategy for biological weapons that would render any bio threat ultimately unsuccessful through the availability of sufficient countermeasures. He stated that we have the technologies today to make this strategy a reality.

(b)(6) optimism was contrasted by the testimony from (b)(6) who was highly critical of scientists who seek to learn and share which viruses could cause new pandemics as their research will eventually assist bioterrorists. Professor (b)(6) called out Eco Health Alliance as a prime culprit in this area and blasted federal funding for making it all possible. (b)(6)

(b)(6) encouraged the panel to support more focused research as opposed to the "overly broad surveillance and basic analysis" that is currently conducted to combat zoonotic events. He also expressed support for vaccines and felt that the medical community should be more proactive in pushing back on anti-vaccine elements. Finally (b)(6) promoted a three-pronged approach to biosecurity, which included (1) stronger global norms, (2) development of a reliable system for attribution and accountability, and (3) an increased financial commitment from the U.S. and global partners to make these goals a reality.

NOMINATIONS

Department of Defense:

- *Confirmed (Date)*
 - (b)(6) DoD Chief Information Officer (14 Dec)
 - (b)(6) – Dir, DoD Operational Test & Evaluation (14 Oct)
- *Intention to Nominate (Date Announced)*
 - (b)(6) er Secretary of the Navy (13 Dec)
 - (b)(6) SAF Asst. Secretary-Financial Management & Comptroller (13 Dec)
 - (b)(6) Army Asst. Secretary-Manpower & Reserve Affairs (8 Dec)
 - (b)(6) - USD-A&S (Nov 30)
- *Reported to Full Senate (Date reported)*
 - ADM Christopher Grady – Vice Chair, Joint Chiefs of Staff (14 Dec)
 - (b)(6) – DUSD Personnel & Readiness (8 Dec)
 - (b)(6) – Army General Counsel (8 Dec)
 - (b)(6) – DUSD for Policy (28 Oct)
 - (b)(6) – ASA Acquisition, Technology & Logistics (28 Oct)
 - (b)(6) – USN General Counsel (28 Oct)
 - (b)(6) – Under Secretary of the Army (21 Oct)
 - (b)(6) – USD for Research & Engineering (21 Oct)
 - (b)(6) – USAF Asst. Secretary-Acquisition, Technology, Logistics (21 Oct)
 - (b)(6) – Asst. Army Secretary for Installations & Environment (21 Oct)
 - (b)(6) – USAF Asst. Sec.-Manpower & Reserve Affairs (21 Oct)
- *Nomination Hearing Held (Date of Hearing)*

KEVIN ESVELT: Thank you, Chairman Bera, Ranking Member Chabot, members of the Subcommittee. Thank you for inviting me here today. And Additional thanks to my fellow witnesses for outlining the situation.

As a practicing biotechnologist I am deeply concerned that pandemic viruses pose a proliferation threat greater than that of nuclear weapons. The US government can take specific steps that would greatly reduce this risk. The threat is severe because new technologies have given thousands of skilled individuals the ability to assemble infectious viruses using materials and equipment that can be ordered online.

If scientists learn and share which viruses could cause new pandemics, no matter how pure our motives, everyone with these skills will gain access to credible weapons of mass destruction. For example, even though there are no virologist in my own lab at MIT, perhaps a third of us could order synthetic DNA in the mail, and successfully follow published step by step virus assembly verticals.

Thankfully, scientists don't yet know of any animal or lab-created viruses that would cause another pandemic. But, some well-meaning programs that aim to prevent or mitigate natural pandemics are trying to identify all of the viruses that could cause them and publish a list of the most threatening ones. This inadvertently threatens US national security and the world's future. I do not believe that there are remotely commensurate benefits. The vast majority of pandemic viruses would never naturally jump into humans and finding the remainder would not speed vaccine development.

The main proliferation risk comes from laboratory experiments performed by Eco Health Alliance and similar programs to determine which viruses would likely cause pandemics. These experiments are the equivalent of nuclear tests. They first received federal support back when it was much harder to make viruses. And funding has continued under administrations of both parties.

Nations from the Netherlands to China to Germany have also funded these kinds of experiments. In my opinion, they should be stopped. Not just in China and in the US, but everywhere.

If successful, pandemic virus prediction will give thousands of actors the ability to ignite more pandemics at the same time than would normally occur in a century.

If there is published peer-reviewed research describing the potential of these viral weapons, threats to use them will be all too credible. Imagine a rogue state warning that infectious samples of all the top ranked pandemic viruses will be released in airports if their regime is overthrown. Extremist groups, apocalyptic cults, or even a lone wolf bioterrorist could kill more people than any nuclear weapon.

So what can be done to minimize our vulnerability to pandemic proliferation? First, Congress should issue a finding that pandemic virus prediction threatens the security of the United States. That alone would change the tenor of the discussion and lead federal agencies with little security expertise to rethink their support and oversight of such experiments, which are only performed by a tiny fraction of neurology labs.

Second, the US and other governments should limit access to synthetic viral DNA. The California State Legislature recently passed well-targeted legislation with this intent, but it was vetoed on the grounds that security bills should be enacted federally.

Subject: HASC RFI on EcoHealth Alliance
Date: Wednesday, August 18, 2021 4:26:00 PM

Dr. Williams,

For your situational awareness, late yesterday DTRA received an RFI from the HASC regarding DTRA work with EcoHealth Alliance. Most of the RFI includes questions we have answered before stating CTR didn't fund any work in China. The new part of this RFI is a request for copies of "the agreements, initial research reports and all progress/final reports." We have those assembled for transmission and will route to the FO with the rest of CT's tasker response. We're also sending all of this to TRAC and CWMD-Policy for their review and awareness.

Date: Thursday, May 13, 2021 7:35:27 AM

Good morning,

Sharing a very long article that is probably of interest to you. "The origin of COVID: Did people or nature open Pandora's box at Wuhan?" It gets fairly technical in parts, but it discusses the theory of COVID coming from the Wuhan Institute of Virology. The author also mentions EcoHealth Alliance and its funding sources, and more. I am still working through the article, but will flag anything of note as I can read through it.

Subject: INFO: EcoHealth Alliance Tasker Update
Date: Wednesday, May 13, 2020 2:35:13 PM

Sir,

The EIS folks have changed their guidance yet again (first an emailed query from Todd, then a formal tasker asking for answers to the 3 questions, which we were told separately to run by DTRA/GC and DTRA/LA; now a Form I and Action Memo that needs to be formally coordinated with GC and LA before DIR sees it, which they will then coordinate with OSD/GC and OSD/LA before it goes up to U/S Lord) on this. I've been coordinating with Joe and BTRP on the language, so their formal signoff on a package shouldn't take long.

I'm having my team put things in the new required format(s), but flagging that you will receive a Form I for signature once we assemble it and get GC/LA signoff on same.

Sorry for the moving goalposts (I'm not sure what's generated this upstairs; same thing happened with Seibert's ETP package this morning).

Subject: INFO: I AM BIO Ep. 12 Partial Transcript
Date: Thursday, April 23, 2020 1:55:03 PM

Dr. Pope,

Sir, please find below a rough transcript of the few minutes Dr. William Karesh briefly raised the work of BTRP in relation to zoonotic diseases.

I AM BIO Podcast <<https://www.bio.org/podcast>> ; hosted by Congressman Jim Greenwood

Episode 12: COVID-19's True Origins (with guest Dr. William Karesh of EcoHealth Alliance)

Section mentioning BTRP starts at 32:02; ends at 33:20.

Greenwood: If you ruled the world, Dr. Karesh, what would be the list of things that you would do to reduce the threat of zoonotic diseases in the future?

Karesh: Well, there are quite a few. And I certainly think there have been some programs in the past that are at the US Federal Government level that could certainly be enhanced... The Defense Department has a program under the Defense Threat Reduction Agency called the Biological Threat Reduction Program. They do remarkable work – like engaging with researchers around the world... on these emerging diseases – both animal and human diseases. They require... a scientist from the United States partnering with a foreign scientist. You build a trusted relationship, and you know what's going on in their laboratories, and you communicate. That started back with nuclear threat reduction, with the collapse of the Soviet Union. They started investing in that and expanding – that program could be a lot bigger. ...

Please let me know if you need anything else. Thank you.

Gentlemen,

Lots of variety in the current reporting, but most worthy of note is the Indonesia disinfo, from two perspectives. The first is that this story has only appeared once before in 2022, and then only one time before that in Sept 2021. The timing of this intense barrage in the Russian and Chinese domestic and international news services is suspect given that there was a meeting discussing health cooperation between DoD officials and the Embassy Jakarta less than 12 hours before these stories hit the wires.

It also highlights the need to approach the disinfo problem from a Departmental perspective. While there is a natural fusion between most of the elements of the CBW Defense and CTR sides, there are numerous gaps across the broader Service and DoD health enterprise in coordinating messages and maintain cognizance over activities.

We have engaged representatives from the PICOA who are examining ways of addressing this challenge.

Very Respectfully, and I hope you have a relaxing and refreshing weekend.

Subject: DoD Chinese Russian Disinfo Clips info cutoff 26 May

All,

The main topics and trends of disinfo are summarized below:

-Fabricated attribution of the current Monkey Pox outbreak to DoD and also the Ukrainian labs are increasing in scope and complexity in both Russian and Chinese press.

--For the first time there is an aggressive campaign against US cooperation with Indonesia. Negative stories about NAMRU-2's work in Indonesia were carried by major Russian international and domestic wire services, and picked up in China and amplified by China.

--Stories once again appeared about alleged US Army activities in South Korea attributing a wide variety of "juicy facts" against amorphous "biolabs"

--China conflated reported CDC cooperation in Tokyo with the broader DoD biolab narrative. It is important to remember that in the disinfo

environment, if it looks like a duck, quacks like a duck, the color of the feathers do not matter.

--Both Russia and China are exploiting fears about the current grain international food crisis. They are propagating claims that the US is working on anti-crop agents as well as "insect allies" and "insect cyborgs."

-CBS news did several positive stories, including a video with a tour and visit to one of the public health labs in Ukraine. One piece of data in the video is the statistic that 26% of Americans believe the biolab narrative.

I will also send, via follow-on email, a 2013 joint US-Russian Academy of Sciences Report summarizing their history of bio-engagement. In summary, it is a "love letter" between the two countries before a nasty divorce.

The latest charges that started appearing this am are broad statements claiming that the US is undermining nonproliferation norms, more to follow this weekend.

Have a nice holiday weekend.....

VR

(b)(6)

Pilot Growth's partner, among others, is Metabiota, which, according to the Russian Ministry of Defense, is among the project implementers in Ukraine, which were tasked with creating elements of selective **biological weapons** and which used Ukraine as a **biotesting ground**, a place for testing new drugs. Metabiota CEO **Nita Madhev** appeared in the case file, which the Russian Ministry of Defense showed as part of profile briefings.

On the Pilot Growth website, Madhav commented: "Partnering with Pilot Growth was a great decision for our company; they have been loyal allies and brought a wealth of experience and knowledge to our relationship. We are very lucky to have them on our team."

Such statements indicate a fairly close relationship.

There is one important nuance. Nita Madhav is a former Special Pathogens Officer at the US Centers for Disease Control (CDC). She also worked for Air Worldwide (until 2015). The latter is engaged in modeling large-scale disasters, predicting the consequences of outbreaks of epidemic diseases.

And the Board of Directors of Metabiota is headed by Nathan Wolf (Nathan Wolfe, in open sources is also listed as the founder) - a member of the Council for Defense Scientific Research of the US Department of Defense (DARPA). This department, among other things, is developing the latest weapons for the **Pentagon**. For example, in 2005 Wolf received the National Institutes of Health Director's Award for pioneering research on virus transmission. Wolf is known to have studied monkey viruses. According to some sources, Wolf is also on a board of EcoHealth, another defendant in the biolab case, in which Peter Daszak, whose name is closely associated with the covid pandemic, is a key figure. EcoHealth Alliance is partnering with the Wuhan Institute of Virology. Namely, Wuhan was called the starting point of infection with COVID-19.

Do not forget that Metabiota is associated with Hunter Biden.

But back to Pilot Growth.

The website of this company previously published a forecast made by the same Metabiota: "The probability that in the next 25 years another pandemic or epidemic will occur in the world, from which at least as many people will die as from COVID-19, is from 47% to 57%".

It also clarified that the likelihood of another pandemic of the same or larger scale as COVID-19 is much higher than many experts expect: 2.5-3.3% this year, 22-28% in the next 10 years and 47-57% in the next 25 years.

Metabiota is noted to model the frequency and scale of future pandemics, potential financial losses, and the likely impact of interventions.

There are quite a few releases on the Pilot Growth website that relate specifically to the work of Metabiota.

Notable Pilot Growth Team and Biden Connections

Dr. Pope,

U.S. National Academies of Sciences, Engineering, and Medicine provided the attached report in advance of your meeting with them on this Thursday.

V/R,

(b)(6)

Booz | Allen | Hamilton

CTR A&AS Support Contractor

Executive Assistant in support of the Director

Direct Line (b)(6)
CTR Main (b)(6)

NIPR (b)(6)
SIPR (b)(6)

- CDC provides experts who spend months at a time working in country B, helping to improve laboratory practices and upgrade a legacy laboratory to deal with more difficult pathogens.
- Country C has an Institute Pasteur laboratory that participates in the same regional network of researchers on zoonotic diseases with conferences and joint research organized by the EcoHealth Alliance.
- The State Department's Biological Engagement Program sponsors a nonprofit organization to conduct biosecurity training and upgrades at laboratories in country C.
- Most of these organizations provide information to the World Health Organization (WHO) and participate in regional WHO conferences. As part of its commitment under the Global Health Security Agenda to implement the WHO International Health Regulations (2005), country B is conducting a Joint External Evaluation, while country A is considering doing the same.

In this hypothetical situation there is little or no obvious and unnecessary redundancy, which is good. Likewise, all of these efforts are valuable in and of themselves. Rather than being conceived as a series of separate efforts, though, they could be linked with a coordinated and cooperative strategy to strengthen global health security. Furthermore, the hypothetical situation noted here reflects routine circumstances. Should an outbreak occur in one of these countries, public health and security needs may rapidly change and would increase urgency, and all of the preexisting and additional resources would be needed for an effective response. Pre-established laboratories, pre-deployed protective equipment and pre-existing expertise in handling dangerous pathogens, pre-established supply chains, and pre-existing networks of people and their collaborative relationships would be invaluable in rapidly and effectively responding to an emerging infection or epidemic.

Each of these organizations involved in the hypothetical scenario brings unique capabilities, from the expertise in CDC personnel, to the flexible funding of BTRP and logistical capabilities of DOD, the diplomatic relations conducted by State, the strengthened healthcare infrastructure developed and the Disaster Assistance Response Team deployed by USAID, and the decades of collaboration in the Institut Pasteur resulting in enhanced indigenous capability and operation in the country and the region.

As the above hypothetical scenario indicates, DOD's programs are unique in that they provide a national security focus, while other U.S. government departments and agencies involved in international health

To: [Reif, Kingston A SES \(USA\)](#)
Subject: NCB(TRAC)-Directed Review of DTRA CTR Grants to EcoHealth Alliance
Date: Thursday, January 13, 2022 3:23:12 PM
Attachments: [EcoHealth Alliance Review--signed.pdf](#)

Kingston,

Providing for your situational awareness, in case your staff has not briefed you on this.

CTR over the years has provided grants to the NGO EcoHealth Alliance to assist in biosurveillance studies. Over the past couple of years, the media and Congress have raised questions about EcoHealth Alliance's work with China, with the Wuhan Institute of Virology, and whether EcoHealth Alliance has conducted gain-of-function research.

DoD has answered several Congressional queries in which we have shown that no CTR funds to EcoHealth Alliance have gone to China or to any gain-of-function research.

I assess that (b)(6) request for this review is to fulfill TRAC's chartered mandate to provide acquisition oversight for the CTR program and to provide additional data for any follow-on Congressional queries to demonstrate that DTRA sufficiently oversees work conducted by EcoHealth Alliance for CTR.

I asked the DTRA Inspector General to take the lead for this review within DTRA so my team is not grading its own work. He just provided a status update that indicates their review is proceeding well.

V/r.
Rob

Robert S. Pope, Ph.D., SES

(b)(6)

7500 LEAH AVENUE, MILITARY ANL
BIOLOGICAL DEFENSE PROGRAMS

OFFICE OF THE ASSISTANT SECRETARY OF DEFENSE
3050 OFFENSE PENTAGON
WASHINGTON, DC 20301-3050

MEMORANDUM FOR DIRECTOR, COOPERATIVE THREAT REDUCTION, DEFENSE
THREAT REDUCTION AGENCY

SUBJECT: EcoHealth Alliance Grant Reviews

This document directs the Defense Threat Reduction Agency (DTRA), through the Cooperative Threat Reduction (CTR) Program's Biological Threat Reduction Program (BTRP), to initiate and support a full-scale review of three grants awarded to EcoHealth Alliance (EHA). DTRA may choose which active grants to review, with a strong emphasis on selecting those nearing the end of their periods of performance. DTRA may choose between employing a third-party to conduct the review or conducting the review internally. Please keep my office informed throughout the process, including which grants are selected for review and the review format.

Based on my January 2021 review of all active scientific research grants sponsored by BTRP, EHA dominated the BTRP research portfolio as the prime awardee on seven grants totaling nearly \$34M in research funding. This total encompasses nearly a third of all funding for scientific research awarded through BTRP. The second-highest funded awardee is the University of Florida, with two grants totaling less than \$6M. EHA's active grants are awarded at near-maximum funding levels (at a combined 97% of allowable funding) and recent proposal submissions continue to request a similar level.

Since EHA is a recipient of a large portion of BTRP's grant funds, we must ensure that EHA is expending those funds capably and responsibly, in line with grant requirements, federal regulations, and BTRP's threat reduction mission. Through this review, we aim to ensure that all grant funds are used for the documented purpose for which they were awarded.

Further, conducting a review of EHA grants at this time demonstrates DoD's focus on ensuring accountability from grantees. This is especially important given the increased congressional attention on EHA and its use of federal funding. We should ensure that EHA is conducting research, reporting findings, and managing sub-awards consistent with grant agreements.

Our objectives in requesting this review of three grants are therefore:

1. To review all grant financial records for consistency with specific grant purposes and for compliance with legal requirements;
2. To review all experimental records for proper and ethical data handling, reporting, and dissemination requirements; and
3. To assess whether EHA's internal grant management processes continue to comply with DoD and USG guidelines that would allow for EHA to remain a potential candidate to compete for CTR funding.

I ask that DTRA deliver a comprehensive report on the results of the review to my office by the end of FY22. Please make my office aware if additional time is required to complete this

review. I look forward to supporting your efforts in this regard, and please let me know what my office can do to assist.

My point of contact for this guidance is Ms. Leila Terrell Director for WMD Threat Reduction, at 703-697-5737 or leila.a.terrell.civ@mail.mil.

A handwritten signature in black ink, appearing to read "Kingston Reif". The signature is written in a cursive style with a large, stylized initial "K".

Subject: NCB/ Policy Meeting Notes (5/5/2021)
Date: Wednesday, May 5, 2021 4:42:41 PM

Attendees: (b)(6)

- Policy and NCB are both aware of the EcoHealth Alliance news reporting and Congressional inquiry. (b)(5)

(b)(5)

- USD Kahl is in place: bio is important to him.
 - Policy Deep Dive Schedule, DTA/Interagency discussion. These will be done by SVTC:
 - o Wed 19 May, BTRP: 1030-1500
 - o Thurs 20 May, CSE/PPP: 1030-1500
 - o Friday 20 May, GNS/SOAE: 1030-1500
 - Policy Deep Dive Schedule, CCMD Discussions. These will be conducted the week of 24 May. MTF on the details of each CCMD
 - Policy will follow up with SOUTHCOM, as they have promised to do, and complete a "discussion" with them; a short memo from Policy will codify this discussion. (b)(5)
- (b)(5)
- Agreements; next Agreements meeting is scheduled for 19 May:
 - o Armenia: ball is back in Armenia's court (MoJ); Policy wants to get this one done quickly and keep it low profile.
 - o UKR: State and the UKR EMB in DC are finalizing the clean extension; Policy wants to pursue "burden sharing language" in the implementation agreement.
 - o KEN: package being worked for DASD Johnson signature.
 - o UZB: working with the Policy regional desk to finalize, DASD Johnson will sign this one.
 - o Rom/Bul: Policy is finalizing their research on agreements with these countries.
 - Policy will soon solicit thoughts from NCB and DTRA about the next round of Legislative proposals.
 - Sub-PCC tomorrow (Thursday) on GHSA support/ linkages focusing on Africa and Asia; State leading the discussion.
 - NCB thinking about larger acquisition processes (like PCN's / RVRs), particularly assessing the various products, the need for those products, and how to best streamline and make those processes and information sharing better.

Request NCB and Sustainment take a quick look at this task (copy attached).

It is a congressional regarding a DoD Grant to EcoHealth Alliance. (Same organization the President just shut down NIH Grant)

If A&S has not been involved in this Grant let me know and if you know who may have been involved (Army?) let me know.

Subject: WAT Snapshot Comparison

Dr. Pope,

I've attached the latest WAT comparison. This compares WAT data as of 19 September to WAT data as of 26 September for awards planned through the end of the fiscal year. Please note that some items were pushed to the right; these items are highlighted in blue.

From the "Top 10 list," here are the statuses of those items:

Awarded:

\$2,847,789.07 KZ: STS - NNC Sole Source Contract 2022-2023 Work Season FY21 Funds (incr fund)

\$245,000.00 KZ: STS - NNC Sole Source Contract 2022-2023 Work Season FY20 Funds (incr fund)

\$5,435,426.00 Liberia NRL Construction - FY20 Funds

\$2,335,104.00 WOA (OIE) Strengthening Veterinary Paraprofessional (VPP) 3. Base year.

\$300,000 WOA (OIE) Strengthening Veterinary Paraprofessional (VPP) 3. Base year.

\$25,336,433.00 SNL FY22

\$1,840,491.00 CDC 2022

\$1,270,901.00 Track 1.5 Biosec Dialogues option exercise / JHU

(b)(4); (b)(5)

Subject: RE: Weekly CTR Ops Financial Report
Date: Tuesday, November 22, 2022 11:37:08 AM
Attachments: WAT Snapshot Comparison 21 Nov 2022 for distribution.xlsx

Dr. Pope,

1. Correct - the current FY23 spend plan is significantly below the baseline FY23 spend plan taken on 30 Sep.
2. Looking at the actions that were in the baseline spend plan for October and November, there were 42 UICs in those months and 23 of those were pushed to the right.

(b)(4); (b)(5)

The attached spreadsheet identifies the above UICs and shows how they changed. In Column F, orange highlighting signifies UICs that were removed, red highlighting signifies UICs whose amounts decreased, blue highlighting signifies UICs whose amounts increased, and yellow highlighting signifies UICs whose estimated award dates were pushed to the right. The table starting on row 350 identifies UICs that were added between 30 Sep and 21 Nov.

In terms of UICs that are delayed, of the 345 UICs in the baseline spend plan, the estimated award dates for 41 of those UICs (~12%) have been pushed to the right. The decrease in the FY23 spend plan appears to be primarily due to the fact that UICs have been removed and the dollar amounts of some UICs decreasing, as noted above. A chunk of this is due to (b)(4); (b)(5) in Ethiopia awards that have been removed.

3. To get back on track, we'd have to obligate, approximately (b)(4); (b)(5) more per month than what the current spend plan calls for.

Thank you.

Subject: RE: Weekly Legislative Update - 09.21.21

On another note, the text of the SASC NDAA was recently released and for CTR is aligns with the PB request.

TITLE XIII—COOPERATIVE THREAT REDUCTION
SEC. 1301. FUNDING ALLOCATIONS; SPECIFICATION OF COOPERATIVE THREAT REDUCTION FUNDS.
(a) FUNDING ALLOCATION.—Of the \$239,849,000 authorized to be appropriated to the Department of Defense for fiscal year 2022 in section 301 and made available by the funding table in division D for the Department of Defense Cooperative Threat Reduction Program established under section 1321 of the Department of Defense Cooperative Threat Reduction Act (50 U.S.C. 3711), the following amounts may be obligated for the purposes specified:
(1) For strategic offensive arms elimination, \$2,997,000.
(2) For chemical weapons destruction, \$13,250,000.
(3) For global nuclear security, \$17,767,000.
(4) For cooperative biological engagement, \$124,022,000.
(5) For proliferation prevention, \$58,754,000.
(6) For activities designated as Other Assessments/Administrative Costs, \$23,059,000.

(b) SPECIFICATION OF COOPERATIVE THREAT REDUCTION FUNDS.—Funds appropriated pursuant to the authorization of appropriations in section 301 and made available by the funding table in division D for the Department of Defense Cooperative Threat Reduction Program shall be available for obligation for fiscal years 2022, 2023, and 2024.

Also, the SASC Report had the following language re: CWMD-CSTs

ITEMS OF SPECIAL INTEREST
Training for Weapons of Mass Destruction Civil Support Teams The committee emphasizes the importance of

regular training for weapons of mass destruction civil support teams (WMD-CSTs) to maintain readiness. The committee recognizes that such training opportunities are often only offered at facilities that are located at unreasonably far distances from National Guard units' home stations. The committee assesses that units may incur prohibitively high costs for the travel associated with participating in such training, which may risk diminishing units' activities and effectiveness. The committee thus determines that the Department of Defense and the Department of Energy may lack sufficient capacity to regularly train WMD-CSTs to a degree that maintains readiness.

The committee directs the Secretary of Defense, in consultation with the Chief of the National Guard Bureau and the Secretary of Energy, to study the feasibility of increasing training capacity for WMD-CSTs, including through the creation of new facilities and programs and through the augmentation of extant facilities and programs to provide such training. The study shall estimate the costs associated with increasing training capacity for WMD-CSTs and shall identify prospective facilities and programs that could provide such training. The Secretary shall provide a report on the study to the congressional defense committees not later than December 31, 2022.

(b)(6)
Subject: RE: Weekly Legislative Update - 09.21.21

Update (almost entirely BTRP):

A few others of interest that are all en bloc and will not receive individual votes (but will be included in final passage). Numbers are Floor, not Rules, numbers. Please let me know if you'd like any of the text. These are in addition to the ones (b)(6) already flagged:

(114) GHSA -- similar to several versions of this in bills over the past few years -- Directs the President to create the Global Health Security Agenda Interagency Review Council to implement the Global Health Security Agenda and to appoint a U.S. Coordinator for Global Health Security to coordinate and report on the interagency process for responding to global health security emergencies.

(140) National Security Commission on Synthetic Biology -- Establishes a National Security Commission on Synthetic Biology.

(289) Adds the text of the Global Pandemic Prevention and Biosecurity Act, legislation that seeks to address the source of highly infectious diseases beginning in animal species, including by reducing the sale and trade of live and fresh wildlife for human consumption, and addressing food insecurity associated with a reliance on local game and wildlife.

(322) Guinea -- likely intended to not apply but the amendment is very vaguely worded, not exclusive to 333 or similar -- Requires reporting on recent security assistance programs to Mali, Guinea, and Chad.

(350) WHO and FAO collaboration equities -- Establishes the foreign policy of the United States to work with state and non-state partners to shut down certain commercial wildlife markets, end the trade in terrestrial wildlife for human consumption, and build international coalitions to reduce the demand for wildlife as food, to prevent the emergence of future zoonotic pathogens. Authorizes USAID to undertake programs to reduce the risk of endemic and emerging infectious disease exposure and to help transition communities globally to safer, non-wildlife sources

of protein.

(454) ASEAN -- DOS has lead but may rope in DoD or others, of interest to INDOPACOM -- Requires the Secretary of State to develop a strategy for engagement with Southeast Asia and the Association of Southeast Asian Nations (ASEAN).

(464) PRC/RF AFRICOM Malign Influence report -- Requires an annual report on and congressional notification of U.S. efforts to counter malign foreign influence in Africa.

Sir,

The Azerbaijan amendment did not make it through the Rules Committee. If the EHA amendment does get approved on the floor, which is likely at this point, Policy will most certainly look to submit an appeal if there is a significant impact to the CT program.

Subject: RE: Weekly Legislative Update - 09.21.21

(b)(6) Thanks for this; I was going to ask you about it after the call. Please track this one through the process, as well as any other amendments that may place restrictions on partnership with our FY22 partner countries or performers (like EHA).

"No Federal funds may be made available to provide any United States military or security assistance or cooperation to the defense or security forces of the Government of Azerbaijan."

(b)(6) As currently drafted, it sounds like this would not impact health partners unless they are part of the defense or security forces. Do you see any impacts to BTRP?

(b)(6) -- FYSA.

Subject: Weekly Legislative Update - 09.21.21

Senior Leaders,

Good afternoon. Attached is this week's legislative update. Also attached is a list of FY22 NDAA amendments recently approved by the House Rules Committee considered to be in order for House Floor debate. We expect they may take up the NDAA tomorrow afternoon after the government funding discussion is resolved.

Some amendments we will be tracking closely include:

- Rep. Crawford (121) - Directs the Executive Agent to designate a joint program executive officer for the EOD Defense Program.
- Rep. Dunn (131) - Increases the Development of Medical countermeasures Against Novel Entities (DOMANE) program to allow for the rapid screening of all FDA approved compounds and other human safe compound libraries to identify optimal drug candidates for repurposing as medical countermeasures for COVID-19 and other novel and emerging biothreats.
- Rep. Joyce/Langevin (210) - Directs the Secretary of Defense, in coordination with the Secretary of Agriculture, Secretary of Health and Human Services, and the Secretary of Homeland Security, to develop an annex (to the National Biodefense Strategy described under Section 104 of title 6, United States Code) for a national biodefense science and technology strategy and implementation plan, no later than 180 days after the date of enactment of this bill.
- Rep. Reschenthaler (354) - States that no funds authorized under this Act may be made available for any purpose to EcoHealth Alliance, Inc.
- Rep. Smith (396) - Requires the GAO to conduct a study of the possible experimentation of ticks, insects, or vector-borne agents by the DOD between 1950 and 1977 for use as a bioweapon.

Very Respectfully,

(b)(6)

From: (b)(6)

Subject: RE: Weekly Legislative Update - 09.21.21
Date: Wednesday, September 22, 2021 1:44:04 PM

On another note, the text of the SASC NDAA was recently released and for CTR is aligns with the PB request.

TITLE XIII—COOPERATIVE THREAT REDUCTION
SEC. 1301. FUNDING ALLOCATIONS; SPECIFICATION OF COOPERATIVE THREAT REDUCTION FUNDS.

(a) FUNDING ALLOCATION. Of the \$239,849,000 authorized to be appropriated to the Department of Defense for fiscal year 2022 in section 301 and made available by the funding table in division D for the Department of Defense Cooperative Threat Reduction Program established under section 1321 of the Department of Defense Cooperative Threat Reduction Act (50 U.S.C. 3711), the following amounts may be obligated for the purposes specified:

- (1) For strategic offensive arms elimination, \$2,997,000.
- (2) For chemical weapons destruction, \$13,250,000.
- (3) For global nuclear security, \$17,767,000.
- (4) For cooperative biological engagement, \$124,022,000.
- (5) For proliferation prevention, \$58,754,000.
- (6) For activities designated as Other Assessments/Administrative Costs, \$23,059,000.

(b) SPECIFICATION OF COOPERATIVE THREAT REDUCTION FUNDS. Funds appropriated pursuant to the authorization of appropriations in section 301 and made available by the funding table in division D for the Department of Defense Cooperative Threat Reduction Program shall be available for obligation for fiscal years 2022, 2023, and 2024.

Also, the SASC Report had the following language re: CWMD-CSTs

ITEMS OF SPECIAL INTEREST

Training for Weapons of Mass Destruction Civil Support Teams

The committee emphasizes the importance of regular training for weapons of mass destruction civil support teams (WMD-CSTs) to maintain readiness. The committee recognizes that such training opportunities are often only offered at facilities that are located at unreasonably far distances from National Guard units' home stations. The committee assesses that units may incur prohibitively high costs for the travel associated with participating in such training, which may risk diminishing units' activities and effectiveness. The committee thus determines that the Department of Defense and the Department of Energy may lack sufficient capacity to regularly train WMD-CSTs to a degree that maintains readiness.

The committee directs the Secretary of Defense, in consultation with the Chief of the National Guard Bureau and the Secretary of Energy, to study the feasibility of increasing training capacity for WMD-CSTs, including through the creation of new facilities and programs and through the augmentation of extant facilities and programs to provide such training. The study shall estimate the costs associated with increasing training capacity for WMD-CSTs and shall identify prospective facilities and programs that could provide such training. The Secretary shall provide a report on the study to the congressional defense committees not later than December 31, 2022.

V/r,

(b)(6)

(b)(6)
Subject: RE: Weekly Legislative Update - 09.21.21

Update (almost entirely BTRP):

A few others of interest that are all en bloc and will not receive individual votes (but will be included in final passage). Numbers are Floor, not Rules, numbers. Please let me know if you'd like any of the text. These are in addition to the ones (b)(6) already flagged:

(114) GHSA -- similar to several versions of this in bills over the past few years -- Directs the President to create the Global Health Security Agenda Interagency Review Council to implement the Global Health Security Agenda and to appoint a U.S. Coordinator for Global Health Security to coordinate and report on the interagency process for responding to global health security emergencies.

(140) National Security Commission on Synthetic Biology -- Establishes a National Security Commission on Synthetic Biology.

(289) Adds the text of the Global Pandemic Prevention and Biosecurity Act, legislation that seeks to address the source of highly infectious diseases beginning in animal species, including by reducing the sale and trade of live and fresh wildlife for human consumption, and addressing food insecurity associated with a reliance on local game and wildlife.

(322) Guinea -- likely intended to not apply but the amendment is very vaguely worded, not exclusive to 333 or similar -- Requires reporting on recent security assistance programs to Mali, Guinea, and Chad.

(350) WHO and FAO collaboration equities -- Establishes the foreign policy of the United States to work with state and non-state partners to shut down certain commercial wildlife markets, end the trade in terrestrial wildlife for human consumption, and build international coalitions to reduce the demand for wildlife as food, to prevent the emergence of future zoonotic pathogens. Authorizes USAID to undertake programs to reduce the risk of endemic and emerging infectious disease exposure and to help transition communities globally to safer, non-wildlife sources of protein.

(454) ASEAN -- DOS has lead but may rope in DoD or others, of interest to INDOPACOM -- Requires the Secretary of State to develop a strategy for engagement with Southeast Asia and the Association of Southeast Asian Nations (ASEAN).

(464) PRC/RF AFRICOM Malign Influence report -- Requires an annual report on and congressional notification of U.S. efforts to counter malign foreign influence in Africa.

Subject: Weekly Legislative Update - 09.21.21

Senior Leaders,

Good afternoon. Attached is this week's legislative update. Also attached is a list of FY22 NDAA amendments recently approved by the House Rules Committee considered to be in order for House Floor debate. We expect they may take up the NDAA tomorrow afternoon after the government funding discussion is resolved.

Some amendments we will be tracking closely include:

- Rep. Crawford (121) - Directs the Executive Agent to designate a joint program executive officer for the EOD Defense Program.
- Rep. Dunn (131) - Increases the Development of Medical countermeasures Against Novel Entities (DOMANE) program to allow for the rapid screening of all FDA approved compounds and other human safe compound libraries to identify optimal drug candidates for repurposing as medical countermeasures for COVID-19 and other novel and emerging biothreats.
- Rep. Joyce/Langevin (210) - Directs the Secretary of Defense, in coordination with the Secretary of Agriculture, Secretary of Health and Human Services, and the Secretary of Homeland Security, to develop an annex (to the National Biodefense Strategy described under Section 104 of title 6, United States Code) for a national biodefense science and technology strategy and implementation plan, no later than 180 days after the date of enactment of this bill.
- Rep. Reschenthaler (354) - States that no funds authorized under this Act may be made available for any purpose to EcoHealth Alliance, Inc.

- Rep. Smith (396) - Requires the GAO to conduct a study of the possible experimentation of ticks, insects, or vector-borne agents by the DOD between 1950 and 1977 for use as a bioweapon.

Very Respectfully,

(b)(6)

Subject: RE: Weekly Legislative Update - 11.03.21

Good Morning Sir,

Odd placement for CWMD, but not necessarily a bad thing.

Mr. Plumb has most recently served as Principal Director and Chief of Government Relations at the Aerospace Corporation, an FFRDC. He served in the Navy as a submarine officer in the 1990s, then worked for Sen. Salazar as his MLA (2005-2009) and was PD for Nuclear and Missile Defense Policy from 2009-2012, then Acting DASD Space Policy from 2012-2013. Former Director, Defense Policy and Strategy on the NSC from 2013-2015. He ran for Congress (moderate blue-collar Democrat in New York state) in 2015 and then went to work at RAND as a Senior Engineer. He serves in the USN Reserve. He has a Ph.D. in Aerospace Engineering from CU-Boulder, physics master, etc. -- very clear that he will bring a heavy S&T and RDT&E perspective to the role.

I wouldn't make much of the August 4 date -- that means his nomination was submitted on the eve of August recess, and the Senate didn't even return until mid-September when it continued to focus exclusively on other policy matters. SASC continued to focus on NDAA and related. If you (more accurately) start the clock in mid-September, it hasn't been that long, and Senate has had other things on their mind. I haven't seen and can't find any indication that his nomination is controversial from a personal standpoint; I could see some obstacles on the Space Policy side more generally but both parties have generally acknowledged the need for expansion into this space (no pun intended).

Completely unrelated -- EHA came up in a House Energy & Commerce hearing yesterday in the context of NIH, not DoD. NAR/FYSA.

Hope this helps -- please let me know if you'd like me to track down more information.

Subject: WOHC2020: Initial Lessons Learned

Good afternoon, Dr. Pope.

As requested, I'd like to provide you with an update since the WOHC2020 virtual event began Friday (10/30).

Your session doesn't include any other speakers or live moderators, so the broadcast begins at 10:00am tomorrow (11/3). In the first few minutes, I recommend you present yourself in the Chatbox window under your video. Something like, "Thank you to World One Health Congress and One Health Platform organizers for the opportunity to engage participants today. My team and I are standing by to address any discussion topics you may have." This lets the "audience" know that you're available for real-time discussion.

As I understand it, (b)(6) will set up a group Skype conversation for you to engage BTRP internally. If needed, the team can/will provide insight for potential answers. You can also request that other BTRP personnel address questions directly in the Chatbox. Like social media platforms, you're able to link your answer directly to a participant's question, but it may be a good idea to use their name in the response.

We could expect the discussion to go beyond your ~30 minute broadcast. While I cannot confirm, I suspect these chat threads stay open and available through the access window on December 31, but you have the autonomy to end the live Q&A whenever is appropriate. The discussion may continue to 11:00am. If it appears to be going beyond that, a graceful exit may be required.

Lastly, because your video and the associated Chatbox thread is available for the next two months, I will periodically check the page for new content and make sure you and/or BTRP personnel are made aware.

Happy to address any questions you may have.

Work Cell: (b)(6)

Newsweek cannot confirm the veracity of the DRASTIC group or the existence of the Project DEFUSE documents described. The group says the documents were provided anonymously.

DRASTIC is a group of activists who say they are working towards solving the "riddle" of the origins of the SARS-CoV-2 virus that is behind the COVID pandemic. They say they were given documents by an anonymous source which detail something called "Project DEFUSE."

According to what appear to be funding proposal excerpts published by DRASTIC, Project DEFUSE aimed to reduce the threat of bat-borne coronaviruses through research and was headed by Peter Daszak, president of the U.S.-based research organization EcoHealth Alliance (EHA). It would have run between 2018 and 2022.

DRASTIC states the research proposal would have involved "advanced and dangerous" research into bat coronaviruses in cooperation with the WIV and other facilities, and said the research would qualify as Gain of Function (GoF)—a process that can be used to make viruses more dangerous so that humans can investigate them and improve understanding.

However, DRASTIC said the documents showed that DARPA rejected the DEFUSE proposal in part because of GoF concerns. DRASTIC did not publicly release the actual document it said it had seen.

In a statement to *Newsweek*, DARPA denied funding any activity associated with EHA or the WIV. A spokesman said: "In accordance with U.S. Federal Acquisition Regulations, we are not at liberty to divulge who may have or may not have not submitted a proposal in response to any of the agency's solicitations. Further, information contained within bids is considered proprietary and can only be released by the bidder.

"That being said, DARPA has never funded directly, nor indirectly as a subcontractor, any activity or researcher associated with the EcoHealth Alliance or Wuhan Institute of Virology."

Newsweek has contacted Peter Daszak and EHA for comment. *Newsweek* has also contacted UNC-Chapel Hill, Duke-National University in Singapore, the USGS National Wildlife Health Center (NWHC) and Palo Alto Research Center (PARC), which DRASTIC says are also mentioned in the documents, for comment. *Newsweek* was unable to contact the WIV.

GoF research into coronaviruses has been a hot topic recently, since many are concerned that SARS-CoV-2 could have been accidentally leaked from a lab, sparking the pandemic.

The National Institutes of Health (NIH), for instance, has already denied approving grants that would have supported GoF research on coronaviruses.

Investigation into the origin of SARS-CoV-2 is ongoing. In August, President Joe Biden received a report from the intelligence community into the matter that came back

the collapse of the USSR, was crowned with success. In the same period, Ukraine was turned into a testing ground for running various political technologies, including **bioprojects** used in the military sphere. Evidence the existence of which was discovered by the Russian military during the operation. Facts are stubborn things. Without waiting for the available evidence to be made public, having studied only the information posted on the Internet, one can understand the extent of Ukraine's involvement in the American **biological** courage. Judge for yourself.

This inhuman project originates in 1991, when the United States launched the so-called Nunn-Lugar program aimed at helping Russia and the CIS countries in the disposal of nuclear, chemical and other types of weapons of mass destruction that have been decommissioned and establishing control over their non-proliferation. . The beneficiary of this program was the **Pentagon** , the curator was the Defense Intelligence Agency (the leading body of US military intelligence), more precisely, the National Center for Medical Intelligence, which is part of it, and the main executor was the US Department of Defense Threat Reduction Agency (**DTRA**). After that, two years later, the Ukrainian leadership signed a pact with Washington to prevent the proliferation of weapons of mass destruction, and since 2000, RUMO began to actively implement a **military biological** project in Ukraine, including a number of large companies affiliated with the **Pentagon** , such as like Black & Veatch Special Projects. Starting from 2005, the **DTRA** contracting company began the construction of **biological laboratories** on the territory of Ukraine, where American specialists violated the work, and Ukrainians were forbidden to enter....

The year 2005 marked the beginning of the dawn of American military **biological** activity. After the signing of an additional protocol to the pact between the Ministry of Health of Ukraine and **DTRA** on preventing the spread of technologies, pathogens and knowledge that can be used in the development of **biological** weapons, the Ukrainian **military biological** potential, in fact, passed into the hands of American specialists. But the most interesting fact is that in 2007-2014 at the **biological** three very interesting characters appeared in the field: Nathan Wolf - an employee of the US Department of Defense, Christopher Heinz - the stepson of former US Secretary of State John Kerry and Hunter Biden - the son of US President Joe Biden with his Global Viral Forecasting Institute (Global Viral) and Rosemont Seneca Partners, engaged in non-profit research on transboundary pathogens and projects investing in these. By the way, in 2016, the structure of the founder of Global Viral Nathan Wolf - the EcoHealth Alliance Foundation was involved in research on coronaviruses transmitted by bats at the Wuhan Laboratory Research Center in China.

After the Maidan revolution in 2014, under the control of all the same activists from DIA and **DTRA** , Metabiota, Global Viral and Black & Veatch Special Projects begin to actively work within the framework of the **Biological** Threat Reduction Program (BTRP) with the Ministry of Health of Ukraine, headed by Ulyana- Nadezhda Suprun is an American citizen with a very specific **biography** .

Thanks to such close cooperation, Ukraine has become a **biological** testing ground. In the period from 2005 to 2014, the **Pentagon** deployed a large-scale, expensive system of reference laboratories in Odessa, Vinnitsa, Dnepropetrovsk, Lvov, Poltava, Kharkov, Kiev, Kherson and Ternopil, where pathogens of especially dangerous infections and strains were actively studied.

The Russian Federation, in connection with the facts of US military biological activities in Ukraine, does not exclude the launch of a consultation mechanism under the Convention on the Prohibition of Biological and Toxin Weapons, Russian Foreign Ministry spokeswoman Maria Zakharova said.

Subject: Re: DTRA contact

Thanks!

(b)(6)

Can you please assist us in getting feedback from DTRA on this provision? Would it have any negative impact and, if so, to what extent?

SEC. 6485. PROHIBITION ON FEDERAL FUNDING TO ECOHEALTH ALLIANCE, INC.

No funds authorized under this Act may be made available for any purpose to EcoHealth Alliance, Inc.

Thank you!

(b)(6)

**DEFENSE THREAT REDUCTION AGENCY
RESPONSE TO SASC PSM ERIC TRAGER
REQUEST FOR INFORMATION**

RFI Received: 11/02/2021

Question: Eric Trager, Minority PSM for SASC, contacted DTRA seeking feedback on the House FY22 NDAA provision “Sec. 6485. Prohibition on Federal Funding to EcoHealth Alliance, Inc.” Would it have any negative impact and, if so, to what extent?

Response: *The Defense Threat Reduction Agency (DTRA) provides certain funds to EcoHealth Alliance, Inc. (EHA) to conduct research related to the reduction of biological threats and important computational basic research programs. Barring DoD funding of EHA would reduce or eliminate tools available to the DoD and such a change would likely lead to delays, increased costs, and less-effective outcomes in implementing elements of the DoD Cooperative Threat Reduction (CTR) Program’s biological threat reduction mission.*

DoD CTR works cooperatively with partners countries throughout Africa, Europe, the Middle East, and Asia to reduce biological threats by securing dangerous pathogens, enhancing biosafety to reduce the chances of accidental “lab leaks,” and strengthening the capacity for partner nation human and animal health systems to detect, diagnose, and report especially dangerous disease outbreaks rapidly and accurately, before they become regional or global threats.

EcoHealth Alliance is a highly-effective implementing partner with a proven record of biosurveillance capacity building and biological threat reduction in CTR partner nations. The FY22 House NDAA provision barring federal funding of EHA would result in the cancelation of several ongoing efforts to characterize endemic and emerging biological threats in these regions that could threaten the United States or its deployed military forces.

Eliminating existing contractual efforts with EcoHealth Alliance could also negatively impact DoD’s exploration of Machine Learning (ML) and predictive epidemiology to potentially prepare for and react to the next national or global biological threat. Research in both of these areas is critical to advancing the science to produce decision support tools to better plan and prepare for the next pandemic. EcoHealth Alliance is currently funded to determine the efficacy of ML techniques in predicting the impacts of epidemics on our Joint Forces in early-stage, data-sparse conditions, particularly focused on novel and emerging biological threats – both deliberate and naturally occurring. If successful, EcoHealth Alliance’s research will help to enable rapid decision-making when the next epidemic occurs.

**DEFENSE THREAT REDUCTION AGENCY
RESPONSE TO SASC PSM ERIC TRAGER
REQUEST FOR INFORMATION**

RFI Received: 11/02/2021

Question: Eric Trager, Minority PSM for SASC, contacted DTRA seeking feedback on the House FY22 NDAA provision "Sec. 6485. Prohibition on Federal Funding to EcoHealth Alliance, Inc." Would it have any negative impact and, if so, to what extent?

Response: *The Defense Threat Reduction Agency (DTRA) provides certain funds to EcoHealth Alliance, Inc. (EHA) to conduct research related to the reduction of biological threats and important computational basic research programs. Barring DoD funding of EHA would reduce or eliminate tools available to the DoD and such a change would likely lead to delays, increased costs, and less-effective outcomes in implementing elements of the DoD Cooperative Threat Reduction (CTR) Program's biological threat reduction mission.*

DoD CTR works cooperatively with partners countries throughout Africa, Europe, the Middle East, and Asia to reduce biological threats by securing dangerous pathogens, enhancing biosafety to reduce the chances of accidental "lab leaks," and strengthening the capacity for partner nation human and animal health systems to detect, diagnose, and report especially dangerous disease outbreaks rapidly and accurately, before they become regional or global threats.

EcoHealth Alliance is a highly-effective implementing partner with a proven record of biosurveillance capacity building and biological threat reduction in CTR partner nations. The FY22 House NDAA provision barring federal funding of EHA would result in the cancelation of several ongoing efforts to characterize endemic and emerging biological threats in these regions that could threaten the United States or its deployed military forces.

Eliminating existing contractual efforts with EcoHealth Alliance could also negatively impact DoD's exploration of Machine Learning (ML) and predictive epidemiology to potentially prepare for and react to the next national or global biological threat. Research in both of these areas is critical to advancing the science to produce decision support tools to better plan and prepare for the next pandemic. EcoHealth Alliance is currently funded to determine the efficacy of ML techniques in predicting the impacts of epidemics on our Joint Forces in early-stage, data-sparse conditions, particularly focused on novel and emerging biological threats – both deliberate and naturally occurring. If successful, EcoHealth Alliance's research will help to enable rapid decision-making when the next epidemic occurs.

Attachments: DTRA (CTR and RD) Grants to Eco Health Alliance.xlsx

Sir,

Good morning, (b)(6) (SASC PSM) reached out yesterday re: House NDAA section prohibiting DoD work with Eco Health Alliance. The PSMs are beginning to informally conference and he is looking for more information on what we and DARPA have been doing with EHA. I passed him the attached spreadsheet which we shared with HASC last month. He would like a follow-on phone call with you next week. If we can offer him a few windows, that would be great.

V/r,

	A	B	C	D	E
1	PURPOSE	GRANT PERFORMANCE LOCATION	COST	METRICS	GRANT NUMBER
2	Strengthen South African capacity to collect essential data for Rift Valley fever virus (RVFV) epidemiology and ecology, strengthen South Africa's leadership role within the African continent for the study of RVFV and other vector-borne diseases, and provide the critical data needed to better predict the spread of the virus should it ever be introduced into the United States.	South Africa	\$4,936,359.00	This DoD CTR Program award to EcoHealth Alliance is a grant and as such the metrics component is not applicable	HDTRA1-14-1-0029: Understanding Rift Valley Fever in Republic of South Africa
3	Enhance capacity at key government labs in human and animal health sectors for serological surveillance in animals and human populations to characterize the distribution and detect spillover of henipa- and filoviruses within indigenous populations and on farms in Peninsular Malaysia.	Malaysia	\$4,115,666.00	This DoD CTR Program award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-17-1-0037: Serological Biosurveillance for Spillover of Henipaviruses and Filoviruses in Malaysia
4	Characterize the diversity of coronaviruses and monitor other bat-borne zoonotic virus emergence risks in Western Asia in order to reduce the threat of infectious diseases.	Georgia, Jordan, Pakistan, Armenia, Azerbaijan, Turkey, Oman	\$4,268,851.28	This DoD CTR Program award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-17-1-0064: Understanding the Risk of Bat-Borne Zoonotic Disease Emergence in Western Asia
5	Provide training to Malaysian partner scientists to enhance local serologic diagnostic testing capabilities, biosafety practices, and biosecurity practices to detect the causes of acute febrile illness and other zoonotic diseases with a focus on Bornean Malaysia.	Malaysia	\$277,788.09	This DoD CTR Program award to EcoHealth Alliance is Scientific and Technical Engagement Partnership Technical Directive and as such the metrics component is not applicable.	HDTRA1-17-C-0019 TD-O4-015: Malaysian Partners Luminex Training and Research Preparedness
6	Provide biosafety training to Malaysian partner scientists on field sampling of small mammals and ectoparasites to support the development of sustained local biosurveillance of vector-borne select agent pathogens and other priority diseases.	Malaysia	\$195,152.71	This DoD CTR Program award to EcoHealth Alliance is Scientific and Technical Engagement Partnership Technical Directive and as such the metrics component is not applicable.	HDTRA1-17-C-0019 TD-O4-018: Biosafety in Field Specimen Sampling Training - Malaysia
7	Strengthen Rift Valley Fever Virus (RVF) detection and diagnostic capabilities, promoting South Africa as a leader in RVF diagnostics, and enhance Biological Threat Reduction Program's relationship with the Department of Agriculture, Forestry and Fisheries.	South Africa	\$4,988,987	This DoD CTR Program award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-19-1-0033: Reducing the Threat of Rift Valley Fever through Ecology, Epidemiology and Socio-Economics
8	Build Liberian capacity for threat reduction through an integrated human-animal surveillance approach to high consequence zoonotic pathogens associated with human acute febrile illness.	Liberia	\$4,912,818.06	This DoD CTR Program award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-20-1-0016: Reducing the threat from high-risk pathogens causing febrile illness in Liberia
9	Reduce the threat of Crimean Congo Hemorrhagic Fever (CCHF) by providing critical epidemiological data to monitor the emergence of outbreaks and will improve Tanzania's capacity to detect, diagnose and manage the risk of CCHF.	Tanzania	\$4,995,106.37	This DoD CTR Program award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-20-1-0018: Crimean-Congo Hemorrhagic Fever: Reducing an Emerging Health Threat in Tanzania
10	Strengthen South Africa's, and the region's, capacity to develop and implement surveillance strategies with appropriate biosafety and biosecurity principles, detect pathogens (both molecular and serological) in bats before outbreaks occur, recognize and diagnose outbreaks if they do occur and develop appropriate reporting strategies for the region.	South Africa, Mozambique, Zimbabwe	\$1,616,289.68	This DoD CTR Program award to University Pretoria has EcoHealth Alliance as a subaward and as such the metrics component is not applicable.	HDTRA1-20-1-0025: The Southern African Bat Research Network: Coordinated Biosurveillance for Viral Zoonoses in Bat-Livestock-Human interfaces in Southern Africa

	A	B	C	D	E
11	Build scientific expertise and appropriate capacity to safely and accurately detect, respond and report viral zoonotic agents, enhance India's ability to detect viral threats such as Ebola, Nipah and related viruses, and reduce the threat caused by deliberate release of select agents.	India	\$4,960,857.17	This DoD CTR Program award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-20-1-0026: Biosurveillance for Spillover of Henipaviruses and Filoviruses in Rural Communities in India
12	Enhance Jordan & Iraq's capacity for threat reduction of Avian Influenza and Middle East Respiratory Syndrome Coronavirus that pose serious potential human health, economic, and food production as well as security consequences to U.S. warfighters.	Jordan, Iraq, Lebanon	\$4,899,136.44	This DoD CTR Program award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-20-1-0029: Reducing the Threat of Middle East Respiratory Syndrome Coronavirus and Avian Influenza in Jordan & Strengthening Regional Disease Surveillance Capacity
13	Developed a tool called "Global Rapid Identification Tool System (GRITS)" for undiagnosed outbreaks of emerging infectious diseases (EIDs). GRITS facilitated rapid, high probability diagnosis of outbreaks to pinpoint disease threats more rapidly than current public health systems and diagnostics. This combined digital disease surveillance, network analysis zoonotic disease, and epidemiology.	New York, NY	\$2,387,554.88	This DoD award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-13-C-0029
14	Enhanced a tool called the "Global Rapid Identification Tool System (GRITS)" for diagnosing infectious disease bio events that was developed under a previous DTRA RD-CBI project (HDTRA1-13-0029). The tool was intended to support handling large data in near-real-time on data feeds for diseases or disease characteristics for decision support to warfighter leadership.	New York, NY	\$4,479,678.00	This DoD award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-15-C-0041
15	Funded to determine the efficacy of ML techniques in predicting epidemic impacts in early-stage, data-sparse conditions, particularly focused on novel biothreats both international, and natural. The project will answer fundamental machine learning and data questions to enable rapid decision making based on ML models of epidemic impacts.	New York, NY	\$570,786.75	This DoD award to EcoHealth Alliance is a grant and as such the metrics component is not applicable.	HDTRA1-21-1-0023
16			\$47,605,031.43

Sir,

Attached is the Sen Rand Paul task docs. FY1 – 22-008 was assigned to AL, not CTR. We are only looking at 20-063.

As a reminder, 20-063 is a closed tasker with rolling submissions. I have attached that doc also as a reference.

RE: FOIA Case 20-063

Dear FOIA Officer:

This request under the Freedom of Information Act, 5 U.S.C. § 552, *et seq.*, to the Defense Threat Reduction Agency ("DTRA") reflects **a revision of FOIA Case 20-063**. This request has three parts.

Part 1. We request finished intelligence, policy-related documents, and/or scientific and technical reports regarding the following topics:

- Containment failures AND/OR accidental or deliberate release of biological agents in dual-use biosafety research in BSL-2, BSL-3 or BSL-4 research facilities in Armenia, Azerbaijan, Canada, China, Egypt, France, Germany, Georgia, India, Iran, Israel, Kazakhstan, Malaysia, the Netherlands, Pakistan, Russia, South Africa, Taiwan, Ukraine, the United Kingdom, and/or Thailand.
- Assessments of the risks, hazards and efficacy of BSL-2, BSL-3 or BSL-4 containment schemes AND/OR assessments of the potential flaws or failings and weaknesses in BSL-2, BSL-3 or BSL-4 containment schemes in Armenia, Azerbaijan, Canada, China, Egypt, France, Germany, Georgia, India, Iran, Israel, Kazakhstan, Malaysia, the Netherlands, Pakistan, Russia, South Africa, Taiwan, Ukraine, the United Kingdom, and/or Thailand.

Author(s)

- DTRA staff
- EcoHealth Alliance staff
- Cooperative Biological Engagement Program (CBEP)
- Biological Threat Reduction Program (BTRP)
- World Organization for Animal Health (OIE) staff
- Foundation Merieux
- Metabiota, Inc.

Date Range: January 1, 2015 to the present.

Exposing what the food industry *doesn't* want us to know

Part 2. We request contracts, grants, grant proposals and communications about funding between DTRA staff and EcoHealth Alliance staff about the following contracts and/or grants awarded by DTRA to EcoHealth Alliance, since January 1, 2014.

Award type	Award ID#	Award Description
Contract	HDTRA113C0029	Not available
Contract	HDTRA115C0041	Not available
Grant	HDTRA11710064	Understanding The Risk Of Bat-Born Zoonotic Disease Emergence In Western Asia
Grant	HDTRA11910033	Reducing The Threat Of Rift Valley Fever Through Ecology, Epidemiology And Socio-Economics
Grant	HDTRA12010016	Reducing The Threat From High-Risk Pathogens Causing Febrile Illness In Liberia
Grant	HDTRA12010018	Crimean-Congo Hemorrhagic Fever: Reducing An Emerging Health Threat In Tanzania
Grant	HDTRA11410029	Understanding Rift Valley Fever In The Republic Of South Africa
Grant	HDTRA11710037	Serological Biosurveillance For Spillover Of Henipaviruses And Filoviruses At Agricultural And Hunting Human-Animal Interfaces In Peninsular Malaysia

Part 3. We request contracts, grants, and communications about funding between DTRA employees and employees of Metabiota, Inc. pertaining to the following contracts and/or grants awarded by DTRA to Metabiota, Inc. since January 1, 2013.

Award type	Award ID #	Award Description
Contract	HDTRA112C0024	Not available
Contract	HDTRA114C0104	Not available
Grant	HDTRA11410053	Zoonotic Select Agents In Tanzania A One Health Approach To Rift Valley Fever And Brucellosis Surveillance
Grant	HDTRA11410052	Evaluating Zoonotic Viral Sharing Among Bats, Primates And People In A High Risk Transmission Interface In Southern Tanzania

Please exclude the following documents from your search results:

1. 9th Science Program Review of the DTRA CBEP, February 8-10, 2017
2. The Cooperative Biological Engagement Program Research Strategic Plan: Addressing Biological Threat Reduction Through Research. DTRA. June 2015.

We request that you disclose the above documents and materials as they become available, without waiting until all the documents have been compiled.

If documents are denied in whole or in part, please specify which exemption(s) is (are) claimed for each passage or whole document denied. Give the number of pages in each document and the total number of pages pertaining to this request and the dates of documents withheld. We request that excised material be "blacked out" rather than "whited out" or cut out and that the remaining non-exempt

Rob.

Here is what the team came up with so we can track FOIA requests. If it meets with your approval, I will have (b)(6) add it as an addendum to the tasker tracker and we can review at the Monday FO Sync in conjunction with regular taskers.

Please let me know if you have any questions.

Very respectfully,
