This is fascinating. I would love to see it when it is posted. A reminder that our new potential Board members (who are being vetted by NoGoCo) are accomplished mathematicians formerly at IBM. I am sure they would have interest in this.

Hi Peter, and Kevin:

Yesterday I heard an interesting lecture (part of the Institute for Advanced Studies' Virtual Talk series) about a Covid 19 prediction model that uses machine learning to predict the rate of infections and deaths on the county level in the US. It was developed by Prof Bin Yu, a Mathematician at UC Berkeley, and her students. She said accurate prediction for more than a few days is not really possible with the available data for any of the models currently in use, and at this point their model cannot show correlations with the impact of public health measures. However, since the data get updated every day you can see the history of the prediction vs. reality – again, based on the available data.

It looks as though it has been pretty accurate so far, and the visualization on the website is very intuitive.

I thought it might be of interest to people who are more fluent in the Math behind it than I am. Below is the link.

Thanks, and have a good weekend!

Renowned European scientist: COVID-19 was engineered in China lab, effective vaccine 'unlikely'

Professor Giuseppe Tritto, an internationally known expert in biotechnology and nanotechnology, says that the China Virus definitely wasn't a freak of nature that happened to cross the species barrier from bat to man.

Mon Aug 10, 2020 - 12:27 pm EST

Prof. Giuseppe Tritto in a March 2020 interview.

[Print this Page](#)

August 10, 2020 ([LifeSiteNews](#)) – It will not be possible for the Dr. Fauci's of the world to dismiss Professor Giuseppe Tritto as a crank. Not only is he an internationally known expert in biotechnology and nanotechnology who has had a stellar academic career, but he is also the president of the [World Academy of Biomedical Sciences and Technologies](#) (WABT), an institution founded under the aegis of UNESCO in 1997.

In other words, he is a man of considerable stature in the global scientific community. Equally important, one of the goals of WABT is to analyze the effect of biotechnologies—like genetic engineering—on humanity.

In his new book, this world-class scientist does exactly that. And what he says is that the China Virus definitely wasn't a freak of nature that happened to cross the species barrier from bat to man. It was genetically engineered in the Wuhan Institute of Virology's P4 (high-containment) lab in a program supervised by the Chinese military.

Prof. Tritto's book, which at present is available only in Italian, is called *Cina COVID 19: La Chimera che ha cambiato il Mondo* (China COVID 19: The chimera that

changed the world). It [was published](#) on August 4 by a major Italian press, Edizioni Cantagalli, which coincidentally also published the Italian edition of one of my books, *Population Control* (*Controllo Demografico* in Italian) several years ago.

What sets Prof. Tritto's book apart is the fact that it demonstrates—conclusively, in my view—the pathway by which a PLA-owned coronavirus was genetically modified to become the China Virus now ravaging the world. His account leaves no doubt that it is a “chimera”, an organism created in a lab.

He also connects the dots linking the Wuhan lab to France and the United States, showing how both countries provided financial and scientific help to the Chinese as they began to conduct ever more dangerous bioengineering experiments. Although neither American nor French virologists are responsible for the end result—a highly infectious coronavirus and a global pandemic—their early involvement may explain why so many insist that the “chimera” must have come from nature. The last thing they want to admit is that they might have had a hand in it.

Those of us who, early on, argued for a laboratory origin were dismissed as conspiracy theorists. Our articles were censored as “fake news,” often by American virologists who knew perfectly well what the truth was, but preferred to protect China, and themselves, from scrutiny lest they themselves be implicated.

Dr. Tritto's 272 pages of names, dates, places, and facts leaves such apologists with no place to hide. The story begins following the SARS epidemic of 2003, as the Chinese attempt to develop vaccines to combat the deadly disease. Dr. Shi Zhengli, about whom I have previously written, was in charge of the program at the Wuhan Institute of Virology.

In vaccine development, reverse genetics is used to create viral strains that have reduced pathogenicity but to which the immune system responds by creating antibodies against the virus. But reverse genetics can also be used to create viral strains that have *increased* pathogenicity. That is what Dr. Shi, encouraged by PLA bioweapons experts, began increasingly to focus her research on, according to Prof. Tritto.

Dr. Shi first solicited help from the French government, which [built the P4 lab](#), and from the country's Pasteur institute, which showed her how to manipulate HIV genomes. The gene insertion method used is called “reverse genetics system 2.” Using this method, she inserted an HIV segment into a coronavirus discovered in horseshoe bats to make it more infectious and lethal.

The U.S. was involved as well, particularly Prof Ralph S. Baric, of the University of North Carolina, who was on the receiving end of major grants from the National Institute of Allergy and Infectious Disease. This is, of course, Dr. Anthony Fauci's shop. Fauci was a big proponent of “gain of function” research, and when this was prohibited at Baric's lab because it was considered to be too dangerous, the research was shifted to China.

Prof. Tritto believes that, while Dr. Shi's research began as an effort to develop a vaccine against SARS, it gradually morphed into an effort to use “reverse genetics” to build lethal biological weapons. This was the reason that the Wuhan lab became China's leading center for virology research in recent years, attracting major funding and support from the central government.

I would add that the rule in Communist-controlled China is “let the civilian support the military,” which means that as soon as Dr. Shi’s research showed any potential military uses the PLA would have begun exercising control of the research. This came out in the open with the outbreak, when China’s leading expert on bioweapons, People’s Liberation Army Major General Chen Wei, was immediately placed in charge of the Wuhan Institute of Virology. As for Dr. Shi Zheng-Li, she seems to have disappeared.

As Dr. Tritto explained in an [interview](#) with Italian media:

In 2005, after the SARS epidemic, the Wuhan Institute of Virology was born, headed by Dr. Shi Zheng-Li, who collects coronaviruses from certain bat species and recombines them with other viral components in order to create vaccines. In 2010 she came into contact with American researchers led by Prof. Ralph Baric, who in turn works on recombinant viruses based on coronaviruses. Thanks to the matrix viruses provided by Shi, Baric created in 2015 a mouse Sars-virus chimera, which has a pathogenic effect on human cells analyzed in vitro.

At that point, the China-US collaboration becomes competition. Shi wants to work on a more powerful virus to make a more powerful vaccine: it combines a bat virus with a pangolin virus in vitro and in 2017 publishes the results of this research in some scientific articles.

Her research attracts the interest of the Chinese military and medical-biological sector which deals with biological weapons used as a deterrent for defensive and offensive purposes. Thus Shi is joined by doctors and biologists who belong to the political-military sphere, such as Guo Deyin, a scholar of anti-AIDS and anti-viral hepatitis vaccines and expert in genetic recombination techniques. The introduction of the new engineered inserts into the virus genome is the result of the collaboration between the Shi team and that of Guo Deyin. The realization of this new chimera, from a scientific point of view, is a success. So much so that, once the epidemic has broken out, the two researchers ask WHO to register it as a new virus, H-nCoV-19 (Human new Covid 19), and not as another virus derived from SARS. It is reasonable to think that Shi acted only from the point of view of scientific prestige, without however taking into account the risks in terms of security and the political-military interests that her research would have aroused.

When asked why China has refused to provide the complete genome of the China Virus to the WHO or to other countries, Dr. Tritto explained that “providing the matrix [source] virus would have meant admitting that SARS-CoV-2 [China Virus] was created in the laboratory. In fact, the incomplete genome made available by China lacks some inserts of AIDS amino acids, which itself is a smoking gun.”

The key question, for those of us who are living through the pandemic, concerns the development of a vaccine. On this score, Prof. Tritto is [not optimistic](#):

Given the many mutations of SARS-CoV-2, it is extremely unlikely that a single vaccine that blocks the virus will be found. At the moment 11 different strains have been identified: the A2a genetic line which developed in Europe and the B1 genetic line which took root in North America are more contagious than the O strain originating in Wuhan. I therefore believe that, at the most, a multivalent vaccine can be found effective on 4-5 strains and thus able to cover 70-75% of the world's population.

In other words, by withholding from the world the original genetic code of the China Virus that it created, the Chinese Communist Party is ensuring that no completely effective vaccine will ever be developed by the West.

In other words, China continues to lie, and people continue to die.

Thank you Dr Colwell for your email.

Hello Peter/Vincent,

I wanted to follow up on this email and see if there are interest in developing few protocols on understating survivability of coronavirus in aerosols and droplets. We recently validated our hypothesis on how this virus may be aerosolized and are in process to develop proposal to collect air samples from various locations in the US and then get those analyzed for viability of viruses in the ambient and built environment.

Is it possible for us to schedule a meeting this Friday 08/14? Or next week is also fine with my schedule? We will show you some of the recent results from our data analysis and see if this is of interest to you.

Please advise.

Best regards,
Antar

Hi Vincent,

I'm introducing Rita Colwell to you by email. Rita's a Board member of EHA, former Director of the National Science Foundation which funds most of the non-medial basic biology in the US, and longtime researcher on cholera and other pathogens. She is also involved in commercial ventures around pathogen testing technology. She asked me who she could speak to about survivability of SARS-CoV-2 in aerosol, droplets etc. Her team has been working on a viral trapping approach to test theories on how far viable CoV could travel in the air.

Rita, Vincent is at the Rocky Mountain Lab. He's done a bunch of extremely challenging animal infection expts on high biosecurity pathogens, and was the first person to publish on the viability of SARS-CoV-2 on different surfaces under different conditions. He prob knows more about that than just about anybody.

Rita, Vincent....Vincent, Rita!

Cheers,

Peter

Subject: RE: Airborne transmission of SARS-CoV-2

Thank you Dr Colwell for your email.

Hello Peter/Vincent,
I wanted to follow up on this email and see if there are interest in developing few protocols on understating survivability of coronavirus in aerosols and droplets. We recently validated our hypothesis on how this virus may be aerosolized and are in process to develop proposal to collect air samples from various locations in the US and then get those analyzed for viability of viruses in the ambient and built environment.

Is it possible for us to schedule a meeting this Friday 08/14? Or next week is also fine with my schedule? We will show you some of the recent results from our data analysis and see if this is of interest to you.

Please advise.

Best regards,
Antar

Hi Vincent,

I'm introducing Rita Colwell to you by email. Rita's a Board member of EHA, former Director of the National Science Foundation which funds most of the non-medial basic biology in the US, and longtime researcher on cholera and other pathogens. She is also involved in commercial ventures around pathogen testing technology. She asked me who she could speak to about survivability of SARS-CoV-2 in aerosol, droplets etc. Her team has been working on a viral trapping approach to test theories on how far viable CoV could travel in the air.

Rita, Vincent is at the Rocky Mountain Lab. He's done a bunch of extremely challenging animal infection expts on high biosecurity pathogens, and was the first person to publish on the viability of SARS-CoV-2 on different surfaces under different conditions. He prob knows more about that than just about anybody.

Rita, Vincent....Vincent, Rita!

Cheers,

Peter

Subject: RE: Airborne transmission of SARS-CoV-2

Thank you Dr Colwell for your email.

Hello Peter/Vincent,
I wanted to follow up on this email and see if there are interest in developing few protocols on understating survivability of coronavirus in aerosols and droplets. We recently validated our hypothesis on how this virus may be aerosolized and are in process to develop proposal to collect air samples from various locations in the US and then get those analyzed for viability of viruses in the ambient and built environment.

Is it possible for us to schedule a meeting this Friday 08/14? Or next week is also fine with my schedule? We will show you some of the recent results from our data analysis and see if this is of interest to you.

Please advise.

Best regards,
Antar

Hi Vincent,

I'm introducing Rita Colwell to you by email. Rita's a Board member of EHA, former Director of the National Science Foundation which funds most of the non-medical basic biology in the US, and longtime researcher on cholera and other pathogens. She is also involved in commercial ventures around pathogen testing technology. She asked me who she could speak to about survivability of SARS-CoV-2 in aerosol, droplets etc. Her team has been working on a viral trapping approach to test theories on how far viable CoV could travel in the air.

Rita, Vincent is at the Rocky Mountain Lab. He's done a bunch of extremely challenging animal infection expts on high biosecurity pathogens, and was the first person to publish on the viability of SARS-CoV-2 on different surfaces under different conditions. He prob knows more about that than just about anybody.

Rita, Vincent....Vincent, Rita!

I wanted to follow up on this email and see if there are interest in developing few protocols on understating survivability of coronavirus in aerosols and droplets. We recently validated our hypothesis on how this virus may be aerosolized and are in process to develop proposal to collect air samples from various locations in the US and then get those analyzed for viability of viruses in the ambient and built environment.

Is it possible for us to schedule a meeting this Friday 08/14? Or next week is also fine with my schedule? We will show you some of the recent results from our data analysis and see if this is of interest to you.

Please advise.

Best regards,
Antar

Subject: RE: Airborne transmission of SARS-CoV-2

Thank you, Peter, for the introduction.
Delighted to meet you, Vincent, and hope that my colleague, Dr. Antar Jutla, and I can speak with you to discuss the research we are doing that should interest you.
Tomorrow, Friday, would be good if that fits your schedule. Otherwise we can organize a call next week.
Best wishes to all,
Rita Colwell

Subject: Airborne transmission of SARS-CoV-2
Importance: High

Hi Vincent,

I'm introducing Rita Colwell to you by email. Rita's a Board member of EHA, former Director of the National Science Foundation which funds most of the non-medical basic biology in the US, and longtime researcher on cholera and other pathogens. She is also involved in commercial ventures around pathogen testing technology. She asked me who she could speak to about survivability of SARS-CoV-2 in aerosol, droplets etc. Her team has been working on a viral trapping approach to test theories on how far viable CoV could travel in the air.

Rita, Vincent is at the Rocky Mountain Lab. He's done a bunch of extremely challenging animal infection expts on high biosecurity pathogens, and was the first person to publish on the viability of SARS-CoV-2 on different surfaces under different conditions. He prob knows more about that than just about anybody.

Rita, Vincent....Vincent, Rita!

Cheers,

Peter

FYI in case you all had not heard about this offer.

<https://biology.mit.edu/undergraduate/current-students/subject-offerings/covid-19-sars-cov-2-and-the-pandemic/>

## **“COVID-19, SARS-CoV-2 and the Pandemic” (7.00)**

In Fall 2020, all MIT students and the general public are welcome to join Professors Richard Young and Facundo Batista as they discuss the science of the pandemic during this new class. Special guest speakers include: Anthony Fauci, David Baltimore, Britt Glaunsinger, Bruce Walker, Eric Lander, Michel Nussenzweig, Akiko Iwasaki, Arlene Sharpe, Kizzmekia Corbett, and others. The class will run from **September 1, 2020 through December 8, 2020** and begin each **Tuesday at 11:30 a.m. ET**. [See the syllabus](#) for lecture details.

[View Syllabus](#)

## Live Streaming Instructions

The class is open to all MIT students, as well as any eligible cross-registered students. The live stream will be available to the public, but only registered students may ask questions during the Q&A. To view the live stream, [click on this link](#) and type in the **password: mit-covid**. Miss a class? You'll be able to view a video of the lecture on this page. **Please note: It will take a few days to caption and post each lecture video after the livestream has ended.**

### [Watch Live Stream](#)

If you cannot find what you're looking for on this page, please email [covidcourse@mit.edu](mailto:covidcourse@mit.edu) and we will do our best to respond to your query.

## Lecture 1, Bruce Walker: "COVID-19 and the pandemic"

Thanks to the [School of Science](#) and [MIT Accessibility and Usability](#) for their support in making these lectures open to the public.

*Pamela*

## **Request from Rita Colwell to review PNAS manuscript**

---

SENDING FOR DR. RITA COLWELL:

Dear Dr. Daszak,

My coauthors and I, including including my colleague Antar Jutla at the University of Florida, are preparing to submit a manuscript, The challenge of predicting coronavirus outbreak risk, to the Proceedings of the National Academies of Science journal.

We wish to ask you if you would be willing to provide a review when the PNAS editors call on you. We would truly appreciate your expertise in evaluating the manuscript, which we believe will contribute important work on the spread of Covid-19 illness.

Please let me know if you are available and willing to help with this manuscript.

Thank you for your consideration.

Best wishes,

Rita Colwell

A lecture would be very interesting and timely.  
Rita

On Sat, Nov 14, 2020 at 1:06 PM Peter Daszak <[daszak@ecohealthalliance.org](mailto:daszak@ecohealthalliance.org)> wrote:

FYI everyone – Noam Ross is one of EHA’s 2 ‘Principal Scientists’ and our lead Data & Analytics staff member who we seconded to NY State (Gov Cuomo’s) COVID-19 taskforce. It’s his work that’s behind the ‘micro-cluster’ zoning NYS is doing that’s successfully keeping us one of the better states in this woefully-infected country. He’s just secured a funded contract from New York State for a staff member to work under him to carry on this work. Good news that I’ll give you details about on our next call.

Maybe we can have Noam give a science lecture at our next Board meeting – timing permitting etc.

Cheers,

Peter

Peter:

The University of Maryland received a FOI demand from this organization and the University lawyers were very helpful in alerting me and working with me to respond. The demand was for ALL my emails which the University flatly refused. The University's position is that only email directed to @[umd.edu](mailto:umd.edu) were legally FOIA-able. The final agreement was that only emails with EcoHealth Alliance could be released. The University lawyers' position was that email to me at [rcolwell@umd.edu](mailto:rcolwell@umd.edu) had to be provided as it was under FOIA and it came down to several dozen emails. Unfortunately this organization selected a few to publish in their entirety as you will see from the publication. They even demanded all my emails with Tony Fauci, which the University denied as irrelevant to their demand for EcoHealth Alliance emails.

I am not happy about this, to say the least. When this sordid organization asked me for a comment, I asked to see the statement if I was to comment. They refused to let me see the statement they were going to publish. My response was that I cannot comment on what I am not allowed to read.

You should inform the Board about this sordid journalism. Please use my [rrcolwell@gmail.com](mailto:rrcolwell@gmail.com) email address to protect privacy.  
Rita Colwell

So they did publish their article. The worst part is that your emails are shared as a reference, and there is a lot of non-related stuff in there.

<https://usrtk.org/biohazards/coronavirus-origin-in-doubt/>

US Right to Know is a shady group who is anti-science, especially on GMOs and biotech.

You might want to make sure Peter Daszak sees it.

FYI in case you all had not heard about this offer.

<https://biology.mit.edu/undergraduate/current-students/subject-offerings/covid-19-sars-cov-2-and-the-pandemic/>

## **“COVID-19, SARS-CoV-2 and the Pandemic” (7.00)**

In Fall 2020, all MIT students and the general public are welcome to join Professors Richard Young and Facundo Batista as they discuss the science of the pandemic during this new class. Special guest speakers include: Anthony Fauci, David Baltimore, Britt Glaunsinger, Bruce Walker, Eric Lander, Michel Nussenzweig, Akiko Iwasaki, Arlene Sharpe, Kizzmekia Corbett, and others. The class will run from **September 1, 2020 through December 8, 2020** and begin each **Tuesday at 11:30 a.m. ET**. [See the syllabus](#) for lecture details.

[View Syllabus](#)

## Live Streaming Instructions

The class is open to all MIT students, as well as any eligible cross-registered students. The live stream will be available to the public, but only registered students may ask questions during the Q&A. To view the live stream, [click on this link](#) and type in the **password: mit-covid**. Miss a class? You'll be able to view a video of the lecture on this page. **Please note: It will take a few days to caption and post each lecture video after the livestream has ended.**

### [Watch Live Stream](#)

If you cannot find what you're looking for on this page, please email [covidcourse@mit.edu](mailto:covidcourse@mit.edu) and we will do our best to respond to your query.

## Lecture 1, Bruce Walker: "COVID-19 and the pandemic"

Thanks to the [School of Science](#) and [MIT Accessibility and Usability](#) for their support in making these lectures open to the public.

*Pamela*

Dear OGL Board Members,

Thank you for your prompt responses to our Doodle Poll. Your responses indicate that October 29th from 1-4 PM will accommodate the greatest number of Board Members. We are looking forward to meeting with you then. Please be in touch if you have any questions or concerns.

Sincerely,  
Hannah

Dear OGL Advisory Board Members,

We are excited to be meeting with everyone this Thursday, October 29, 2020 at 1 pm! Please find attached materials for your consideration:

1. Annual Meeting 2020 Packet
2. October 2019 Annual Meeting Minutes

Our meeting will be held on Zoom. The link is:

<https://northeastern.zoom.us/j/96624313201?pwd=aERrY1U5OUVwYkFHbjE4V2FzZithZzo9>. OGL staff will be in the meeting 30 minutes before it begins to help troubleshoot any technical difficulties that may arise. Please consider joining the meeting at least 5 minutes early, so that we can assist you. If you do have any technical difficulties, please reach out to Dan or me by email or by phone (Dan: 603-560-1189; Hannah: 314-580-3353).

Sincerely,  
Hannah

Dear OGL Advisory Board Members,

We're looking forward to seeing you all at 1 pm today for our Annual Meeting. Please find attached the Annual Board Meeting Packet and the October 2019 Annual Meeting Minutes for your reference. Here is the Zoom link for the meeting: <https://northeastern.zoom.us/j/96624313201?pwd=aERrY1U5OUVwYkFHbjE4V2FzZithZz09>

We know that Zoom Meetings can be tedious and chaotic! To make this one more effective and interactive:

1. Please stay muted when not speaking to reduce reverb and background noise. Headsets can also help.
2. When possible, please use your video camera so we can see each other.
3. If you'd like to speak, please either click the "clapping hands" emoji under the reactions button on the bottom of the zoom window, or type directly into the chat window and you will be recognized to speak.

Please consider joining the meeting early, so that we can assist you if any technical issues arise. If you have any issues, please reach out to Rosie or me by email or by phone (Rosie: 781-254-4927; Hannah: 314-580-3353).

See you soon!

Cheers,  
Hannah

## **RE: Meeting with Peter Daszak on Tuesday, August 7th**

---

From: Rita Colwell <RCOLWELL@umd.edu>  
To: Blakely Ashley <ashley@ecohealthalliance.org>  
Cc: Norma Brinkley <nbrinkle@umiacs.umd.edu>  
Sent: August 1, 2012 10:44:21 AM GMT-05:00

Dear Blakely:

This works very well for me. I will plan to arrive around 3 pm and will be glad to catch the 7 pm train back as my schedule is terribly tight.

Rita Colwell

---

**From:** Blakely Ashley [mailto:ashley@ecohealthalliance.org]  
**Sent:** Tuesday, July 31, 2012 2:34 PM  
**To:** Rita Colwell  
**Cc:** Norma Brinkley  
**Subject:** Meeting with Peter Daszak on Tuesday, August 7th

Dear Rita,

I am currently filling in for Sara Howard who is on vacation. Peter has asked me to confirm the details of your meeting with him on Tuesday, August 7th in New York City. Peter would be delighted if you would meet with him at our offices on Tuesday afternoon and he is very appreciative that you are willing to make the trip from the Safe Water organization to our organization. Our office is located at 460 West 34th Street, 17th floor, which is on the corner of 34th street and 10th ave. Please do not hesitate to email or call me if you have any questions regarding our location or transportation concerns.

Peter would like to give you a tour of our office and speak with you privately. He is leaving early on Wednesday morning for Brazil, so unfortunately he will be unable to have dinner on Tuesday night. However, he would be more than happy to drive you to Penn Station for a 7pm train. Again, Peter is really looking forward to meeting with you at our offices and please let me know if I can be of any assistance. Thank you and I look forward to hearing from you.

Warm Regards,

Blakely

Dear Dr. Colwell,

I hope you are doing well and it was great to meet you earlier this month when you visited EcoHealth Alliance. Thank you again for making the trip to our office. I am contacting you because Peter Daszak would like to have lunch with you in Washington, DC on Friday, September 14th. Peter is thrilled about the interest you have expressed in our organization and would like to introduce you to two of our Board members, Ellen Shedlarz and Isabel Rodriguez. Ellen Shedlarz who is chair of the Board and Isabel Rodriguez who is the secretary of the Board wanted the opportunity to speak to you about their role on the Board of EcoHealth Alliance and how they got involved with the organization. Furthermore, Dr. Peter Nara, who is currently Chairman, Chief Executive Officer and President of Biological Mimetics, Inc. (BMI) ([www.bmi-md.com](http://www.bmi-md.com)) and the Endowed Eugene Lloyd Chair and Professor in Vaccinology and Immunobiology, has also shown intrigue in EcoHealth Alliance and we hope he will be able to join the lunch as well. Please let me know if the September 14th date works well with your schedule and we will go ahead and arrange the lunch. We understand that coordinating multiple schedules is always difficult but hopefully we will find a date that will work for all parties. Thank you and I hope you have a wonderful Labor Day weekend.

Warm Regards,

Blakely

Dear Dr. Colwell,

I hope you are doing well. Since, a lunch with Dr. Peter Daszak, Dr. Peter Nara, Ellen Shedlarz and Isabel Rodriguez was not feasible in September, we were wondering if you would be available for coffee or tea on Monday, October 29th at 3:00pm in Washington, DC? EcoHealth Alliance is holding a reception and presentation that evening at the Cosmos Club and Dr. Peter Daszak will be one of the presenters and a few of our Board members will be attending. Please let me know if this is a convenient date and time for you and I will go ahead and schedule it. Thank you very much for your willingness to make this meeting work and I look forward to hearing from you.

Warm Regards,

Blakely

Thank you, Peter. I look forward to the dinner meeting tonight.  
You will enjoy the Cosmos Club interview...usually very informal and pleasant interactions. Sorry I won't be there to co-host you!  
Best wishes,  
Rita

**Subject:** RE: Ai Fiori Dinner Reservation at 5:30pm on Friday, September 14

Dear Rita,

I'm sorry that I won't be joining you for dinner tomorrow night. Ironically, I'll be in DC at the Cosmos Club for my interview!

I just wanted to give you a bit of background for tomorrow's dinner. This is part of our normal process of recruitment of new Board members, and the idea is that I've met with you and now it's a chance for you to meet with a couple of other key Board members so they can talk with you about the EHA Board, expectations for Board service, and get to know you. You'll be meeting with our Board Chair, Ellen Shedlarz and the head of our Nominating and Governance Committee, Isabel Rodriguez.

Ellen is recently retired from Ziff Brothers Bank, where she was head of HR, and prior to that was involved for many years at a senior level in McKinsey and Company Consulting, in recruitment. Isabel has a law degree from Tulane, and has worked as an advisor to business all her career. Both have been EHA Board members for a number of years and have seen the organization grow from its roots as a mainly conservation org to the current mission focused on health, environment and capacity building. I've spoken to them about your background and experience, and they're looking forward to meeting with you. I hope you'll be able to talk about how your career has spanned both environment and health, including conservation, and that as head of NSF you were in charge of our nation's science agenda. We have a long history of being a science-based non-profit with strong scientific leadership on the Board. Tom Lovejoy is an honorary Board member, and in the past Andy Dobson has been a Board member. Currently the Jim Hughes (ex-CDC, currently Emory) and Sam Stebbins (Johns Hopkins SPH) represent the medical sciences, and I hope you'll be able to represent the life sciences, environment and health on our Board. The issue of Board member expectations will come up, including the 3 meetings (which are in NY but only one day each) and an expectation of support. On the latter issue, while most Board members are expected to make an unrestricted monetary donation, this is a 'give or get' and we expect that you will be able to help us identify new potential sources of funds, and that would help very significantly as the 'get' side of this.

Because I'm unable to attend, Billy Karesh will be joining you to represent our science/program team. Billy (cc'd here) is formerly from WCS where he headed up their global health initiatives. He's a veterinarian who's focused his career significantly on wildlife issues, including zoonotic diseases, having published many papers, including in Science on Ebola in gorillas, led a large USAID project on avian influenza, and is currently the Senior Technical Officer for

USAID PREDICT. He's been a key person in promoting the 'One Health' approach which has received considerable momentum over the past decade. I'm sure you've both probably met in the past, and I'm sure Billy will be able to tell you more in person.

I hope you enjoy the dinner, and I really look forward to hearing how it went and hopefully to you joining our Board v. soon,

Cheers,

Peter

Dear All,

Thank you again for all of your flexibility and patience in arranging this dinner. It was greatly appreciated. I have made a reservation under the name 'EcoHealth Alliance' for tomorrow, **September 14th at 5:30pm at Ai Fiori**. Ai Fiori is located in the Setai Hotel and if anyone arrives early they have a nice bar where you can enjoy a drink. It will also be easy to get a taxi from the restaurant to Penn Station and it is also only a 10 -15 minute walk. Please let me know if there are any problems with this dinner and I would be happy to adjust the reservation. I am excited that you all have the opportunity to dine together and hopefully it will be a wonderful evening.

Warm Regards,

Blakely

Dear All,

Due to the impending Hurricane Sandy, we felt that it was the smartest option to try to get you the November 2nd Board books as soon as possible. Therefore, we have messengered books to Board members who have residences or work in New York City and FedEx'd books to Board members who live in Connecticut, New York, Virginia, Maryland, Georgia, London and Germany. The Board books that were messengered should get to their destinations today and the Board books that were FedEx'd should get to their destinations on Tuesday, October 30th or Wednesday, October 31st. The Finance documents are still being prepared and they will be distributed to Board members on Friday, November 2nd and emailed to all other Board members who are unable to attend the Board meeting. Thank you so much and I apologize if the shipment has caused any inconveniences. Have a wonderful weekend and I look forward to seeing most of you next week.

Warm Regards,

Blakely

**Subject:** Availability on Jan. 10, 2013 for a Board dinner and on Jan. 11, 2013 for a Board meeting

Dear All,

Thank you so much for your timely responses regarding whether or not you would be able to attend a Board dinner and meeting in early December 2012. Based on the entire Boards' limited availability for the dates we proposed, we felt it would be better to explore **Thursday, January 10, 2013 for a Board dinner and Friday, January 11, 2013 for a Board meeting.**

We realize that there is a Board meeting scheduled for Friday, February 8th, 2013. **The January meeting would be in addition to the February meeting**, with January's meeting having some components that would then have follow up in February.

Please let me know if you are available to attend a dinner on January 10th and a meeting on January 11th.

Warm Regards,

Blakely

Dear Rita,

We're planning on submitting a paper to PNAS and I wondered if it would be ok if I identified you as the preferred Review Editor in the system. I think this is an interesting piece of work that combines ecology with virology. It addresses one of the critical questions for new emerging zoonoses – how large is the pool of potential zoonoses harbored by wildlife? On the surface, this seems like an insurmountable problem, but we addressed it by repeated sampling of a wildlife species – the giant fruit bat, *Pteropus giganteus*, reservoir of Nipah virus in Bangladesh. We then used deep sequencing to discover as many viruses as possible from nine viral families known to include zoonoses. Finally, using ecological approaches to estimate diversity from discovery curves we were able to derive a rigorous estimate of the total viral diversity in this species, and then extrapolated this to all mammals.

The results are surprising – not only is our extrapolated estimate of total mammalian viruses fairly low (~300,000), we can use costing data from our field and lab work to show that the cost of discovery for all unknown mammalian viruses is actually affordable – a few billion p.a. averaged over 10 years, and far cheaper than the cost of some recent pandemics.

It's an unusual paper, but clearly multidisciplinary, and likely to cause some interest in the field once it's published. I understand if you have too much of an editorial burden, and also appreciate that if you agree, you'll do an objective job which may result in rejection!

In any case, thanks for considering this request.

I've attached the abstract and the full paper to this email, and will upload to the Manuscript system once I hear back.

Cheers,

Peter

Dear Rita,

I hope you are doing well and we are going to miss you at the November 18th Program Committee meeting. However, we are thrilled that you are going to make it to our reception and presentation at the Cosmos Club on November 19th. Dr. Peter Daszak would like to extend an invitation for you to join the presenters and other EcoHealth Alliance scientists following the event on November 19th. Please let us know if you are able to come to dinner at 9:15 pm at Nora restaurant. We will be walking directly from the Cosmos Club to the restaurant after the event.

Warm Regards,

Blakely

Peter:

I leave this morning for Los Angeles, arriving at 11:40 am LA time and I will call in. I return tomorrow at 3:40 EDT and plan to go to the Cosmos Club for the events.

This was an unexpected but urgent trip...will explain when I see you tomorrow.

Best wishes,

Rita

Dear Rita,

We've decided to make tomorrow's Program Committee meeting a conference call. The details are below in case you can call in, although I believe you'll be in transit.

Also, I'm really pleased you'll be able to come to the event on Tuesday and for dinner afterwards, I look forward to seeing you then.

Sam – would you and a guest be able to join us for dinner after the event – it would be a good time for you, Rita and I to catch up on Program Committee business also?

Cheers,

Peter

**Importance:** High

Dear All,

Just wanted to let you all know that, due to diminishing in-person availability, we are now conducting Tomorrow's Program Committee meeting by conference call – the call in details are:

**Dial-in: (719) 785 - 9461**

**Passcode: 9 7 8 4 #**

**The call will begin at 3pm and probably finish by 4.30pm**

I'll send some notes and a pdf later on tonight which we can refer to during the call.

Apologies for this change, and I look forward to talking to everyone who can make the call.

Cheers,

Peter

Dear Rita,

I am so sorry that your train was cancelled and the storm definitely caused havoc for travelers in the Northeast. It is a very unfortunate situation and I understand your concerns. We will definitely miss you at the dinner and the meeting. I know a lot of Board members were looking forward to meeting you. I hope you have a wonderful day and have a good trip to the Gulf of Mexico.

Best as always,

Blakely

wrote:

Vickie:

I can't go on an earlier train and the later train gets me in too late. Plus my husband said he heard on NPR news that the problem with the Amtrak trains is that one of the trains derailed on a bridge in New Jersey due to buckling of the rail from the deep freezing temperatures. This means all trains will be either cancelled or late and I might not arrive in New York till midnight and not get home tomorrow till very late as well. Since I have an important dinner meeting tomorrow night and leave for the Gulf of Mexico meeting on Saturday noon, I just cannot risk getting trapped in New York City (or worse, trapped on a train) and miss all my commitments.

Therefore please call Amtrak and cancel my ticket and refund the money. If they won't refund (or make a fuss), then change the reservation to March 6 for the 6 am Acela to NYC from Union Station and return same day on the 4 pm Acela March 6. That way I can use the ticket for the Safe Water Network Board meeting on March 6, 2014.

Too bad about this as I really wanted to attend the EcoHealth Alliance Board meeting, but weather dictated otherwise.

#### **About EcoHealth Alliance**

Building on over 40 years of groundbreaking science, EcoHealth Alliance is a global, nonprofit organization dedicated to protecting wildlife and safeguarding human health from the emergence of disease. The organization develops ways to combat the effects of damaged ecosystems on human and wildlife health. Using environmental and health data covering the past 60 years, EcoHealth Alliance scientists created the first-ever, global disease hotspots map that identified at-risk regions, to help predict and prevent the next pandemic crisis. That work is the foundation of EcoHealth Alliance's rigorous, science-based approach, focused at the intersection of the environment, health and capacity building. Working in the U.S. and more than 20 countries worldwide, EcoHealth Alliance's strength is founded on innovations in research, training, global partnerships and policy initiatives.

Blakely:

I held off till the last minute, hoping I could attend, but I cannot. I have a major conflict and cannot resolve.  
My best wishes to all,  
Rita

**From:** Blakely Ashley [mailto:ashley@ecohealthalliance.org]  
**Sent:** Friday, October 10, 2014 2:28 PM  
**To:** Board  
**Subject:** Reminder: October 17-18, 2014 Board Retreat

Dear All,

I hope everyone is looking forward to the FY15 Board retreat (Fall Board meeting) that will be held from Friday, October 17<sup>th</sup> at 10am until Saturday, October 18<sup>th</sup> at 1pm at the Banbury Center at Cold Spring Harbor Laboratory. Thank you to everyone who replied to the Banbury Center's email about attending the meeting and whether you will need accommodations. **Please see the information below from the Banbury Center about the accommodations and please note that it is not a hotel but instead an estate.**

*"The Banbury Center is an estate and the Robertson House and Meier House were originally family homes which is why the rooms are not all the same. Sammis Hall was purpose built in 1980 to give us more housing for our meeting participants. None of the rooms have televisions or refrigerators but if someone has medication that has to be refrigerated each building has a refrigerator that can be accessible. We do have hair dryers and ironing boards available. Basia can help with any of those requests."*

### Check-In:

Board members should go to Robertson House to check-in and get their room keys. The hostess Basia will welcome you and then after you drop your belongings in your room you can go to the Banbury Center and Pat will give you packets before the meeting starts. **Please try to check-in to Robertson House by 9:15am on Friday, October 17th so you can make it to the meeting on time.**

### Parking:

If you are driving to the Banbury Center, you do not need a parking pass or have to pay for parking. You may park in front of the Robertson House and there is parking by the Meier and Sammis Houses as well. You may not park in front of the Banbury conference center and all buildings are within walking distance to the conference center.

### Taxi service:

If you are taking the LIRR to Huntington Station or if you need a taxi at anytime to get to or from the Banbury Center or train station please call the number below:

Taxi: 631.271.3600

### Wireless Access:

The Banbury Center has wireless access and the two networks are banbury and tsunami depending on where you are on the estate. Both networks are not passport protected.

**Dress code/attire:**

The Board retreat is a bonding opportunity for Board members to spend time with one another and to engage in productive conversations about the future growth of EHA. **We encourage you to wear casual attire (jeans and sweaters) and comfortable walking shoes since you will be walking around the estate.**

If you have any questions or concerns please let me know. **I have attached the Board retreat agenda and directions. Also, Board books and other documents will be distributed at the meeting.**

Have a wonderful weekend,

Blakely

## **RE: EHA Board dinner confirmed for Thursday, December 18th in NYC**

Blakely:

I am President of the Rosalind Franklin Society which will be meeting on December 17-18, 2014, at the Pew Trust in Washington, DC. I tried to figure out how to get to the Board dinner on the night of December 18, but the logistics just don't work.

Regretfully,  
Rita Colwell

**Subject:** EHA Board dinner confirmed for Thursday, December 18th in NYC

Dear All,

Thank you very much for letting me know your availability to attend a Board dinner on December 18th in NYC to "bless" the FY15-FY17 Strategic Plan. The majority of the Board is able to attend a dinner on Thursday, December 18th and if you could all reserve this date on your calendars that would be much appreciated. We are in the process of choosing a restaurant for the dinner and I will email you with the dinner location and time as soon as we have made a reservation.

Best,

Blakely

## **RE: Important 2015 & 2016 EHA Board dates**

---

From: Rita Colwell <RCOLWELL@umd.edu>

Hi Peter and Blakely:

I have responded to the meeting invitations. As you will note, the April and June meetings are conflicted with prior scheduled commitments but the rest of the dates are OK.

Perhaps I could visit EcoHealth Alliance sometime independently of Board meetings this spring, since I will miss the two board meetings scheduled in April and June. I am in New York City relatively frequently for other meetings.

Would that make sense?

Best wishes,

Rita

**From:** Blakely Larrabee [mailto:larrabee@ecohealthalliance.org]

**To:** Board

**Subject:** Important 2015 & 2016 EHA Board dates

Dear All,

It was great to see most of you on Friday at the Board meeting. Thank you so much for your participation and please see below for the important 2015 & 2016 EHA Board meeting, dinner, benefit and retreat dates that have been scheduled. Please reserve these dates on your calendar and I will also be sending you google calendar invites as well.

### 2015

April 23, 2015 EHA Benefit in NYC

April 24, 2015 EHA Board meeting in NYC

June 18, 2015 EHA Board dinner in NYC

October 15 - 17, 2015 EHA Board retreat in Washington, DC area

December 1, 2015 EHA Board dinner

### 2016

January 21, 2016 EHA Board dinner in NYC

January 22, 2016 EHA Board meeting in NYC

April 21, 2016 EHA Benefit in NYC

April 22, 2016 EHA Board meeting in NYC

October 7-8, 2016 EHA Board retreat (location tbd)

I hope everyone on the northeast stays warm and safe during the next two days and is prepared for the snowstorm!

Best,

Blakely

**To:** Victoria Lord  
**Subject:** RE: Payment for rooms at SMSC during October 15-17, 2015 Board retreat

Yes, mileage from residence (or UMCP whichever is required) to Front Royal, Virginia and return.  
I will write the check to EcoHealth and you can make a copy of the check, OK?

**Subject:** RE: Payment for rooms at SMSC during October 15-17, 2015 Board retreat

Hi,

I'm afraid they need a receipt that you paid before they (UMD) will reimburse you on travel expenses.  
Were there other expenses such as mileage, any meals?

Vickie

Hi Rita,

Attached is the invoice from the EHA October 15-17, 2015 Board retreat. I apologize that the room is not itemized by name but since you were one of the 13 professional rooms on October 16th the amount would be \$83.00 + a \$20.00 sustainability fee would total \$103.00 per night. Please let me know if this is ok or if you need anything else.

Best,

Blakely

On Oct 20, 2015, at 11:28 AM, Blakely Larrabee <[larrabee@ecohealthalliance.org](mailto:larrabee@ecohealthalliance.org)> wrote:

Hi All,

I hope everyone enjoyed their weekend in Front Royal, VA for our annual Board retreat. It was wonderful to see all of you there and thank you for making the effort to attend the meetings and dinners this past weekend.

In the past, EcoHealth Alliance has paid for all dining costs and conference room access at Board retreats. However, we ask that Board members cover the cost of their accommodations and travel to the Board retreat. EcoHealth Alliance has already paid for any van/bus costs during the retreat so you do not need to worry about this cost. However, we ask you to pay for your accommodations at the Smithsonian-Mason School of Conservation. The cost to stay in a room at SMSC is \$103/night and if you stayed for both Thursday, October 15th and Friday, October 16th then the cost would be \$206. EcoHealth Alliance will send a check to SMSC for all dining, conference room and room costs. Could you please reimburse us by sending a check to EcoHealth Alliance for your stay?

Thank you so much,

Blakely

My Safe Water Network Board meeting ends at 3:00 pm on Thursday this week (in New York City). After then, I would like to stop by EcoHealth and meet with Peter Daszak if possible. I had planned to stay overnight in NYC to attend the EcoHealth Board meeting in person but I had to change plans and return Thursday night. My husband, Jack, had knee surgery on April 17 and is doing so well that the surgeon moved Jack's appointment up to this Friday morning in order to remove the sutures (staples). Jack cannot drive so I will be his chauffeur and I also need to be present with Jack to hear from the surgeon about prognosis etc.

Cheers,  
Rita Colwell

 Sent: July 9, 2017 1:52:07 PM GMT-05:00

Daniella and Paul:

I agree with both of you. We need to establish a one year no fee submission. The ASM sessions Daniela highlighted are exactly relevant to GeoHealth and authors should be solicited.

My thoughts on antimicrobial resistance are as follows. My previous research demonstrated clearly a linkage between heavy metal resistance and antibiotic resistance (genes on the same plasmids). A special issue on environmental drivers of antimicrobial resistance would be a very popular publication. We would need to solicit authors for papers in that special issue, if all are agreed that it is meritorious.

Brooks, reschedule out call for this Monday at 3:30 pm or later?

Rita

**Subject:** RE: GeoHealth Submissions

Dear Randy, Dear all,

I meant to write you after attending ASM in New Orleans but was caught up in so many things, sorry for the delayed reply.

As we discussed already, ASM is the best venue to advertise GeoHealth to the public health community. I also had the chance to talk about this with Dr. Mc Entee when we met at EGU in Vienna and she suggested to have an AGU booth at the next meeting. I think this would boost our visibility; as much as I can go around and talk about GeoHealth or distribute flyers, it is obviously not the same thing. We need some strong advertising, word of mouth is not enough.

That being said, I have done my homework and here are the sessions whose authors/presenters should be contacted by the Editorial Team to solicit submissions. ASM Microbe is divided in Tracks. I listed the track leader who should be contacted as a bridge to potential authors. Extended fee waivers is a plus. It would be great to attract researchers that publish in Applied Environmental Microbiology (ASM press). I don't know if AGU and ASM can "officially" talk in this sense, I'll let this to your marketing team.

Here are the sessions ([https://www.asm.org/index.php/abstracts-microbe-2017/tracks-and-subtracks?utm\\_source=asmmicrobehome&utm\\_medium=eesgif&utm\\_content=tracksandsubtracks&utm\\_campaign=asmmicrobe2017#aaid](https://www.asm.org/index.php/abstracts-microbe-2017/tracks-and-subtracks?utm_source=asmmicrobehome&utm_medium=eesgif&utm_content=tracksandsubtracks&utm_campaign=asmmicrobe2017#aaid)):

**Antimicrobial Agents and Infectious Diseases** (Track Leaders: William Hope, FRACP, FRCPA, PhD, Univ. of Liverpool; Michael Ison, MD, MS, Northwestern Univ.)

1. AAID10 Neglected tropical diseases, parasitic helminthic and protozoan infections, malaria, global health, and travel medicine

**Applied and Environmental Science** (Track Leader: Michael Wagner, PhD, Univ. of Vienna)

2. AES01 Aeromicrobiology
3. AES02 Agricultural microbiology
4. AES03 Antimicrobial resistance in the environment

5. AES04 Biofilms in applied & environmental science
6. AES05 Biofuels & bioproducts
7. AES06 Bioremediation, biodegradation, biofouling, and biocorrosion
8. AES07 Detecting & characterizing microbes in the environment and microbial response to petroleum & fuel exposure
9. AES10 Foodborne pathogens
10. AES11 Freshwater and marine microbiology
11. AES16 Microbiology of the built environment
12. AES17 New microbial processes for resource recovery, carbon capture, and resource efficiency
13. AES20 Terrestrial microbiology
14. AES21 Wastewater and drinking water microbiology

**Ecological and Evolutionary Science** (Track Leader: Russell Hill, PhD, Univ. of Maryland Ctr. for Environmental Science)

15. EES02 Biogeochemical processes in the environment
16. EES03 Climate change and microbes
17. EES06 Geomicrobiology

**Host-Microbe Biology** (Track Leader: Victor DiRita, PhD, Michigan State Univ.)

18. HMB02 Climate response in microbial symbionts

Specific sessions/symposia with authors (these are oral I attended but there were dozens of presentations in the equivalent poster sessions, check on line):

**Emerging Topics in Global Health** <http://www.abstractsonline.com/pp8/#!/4358/session/614>

**The Deepwater Horizon Oil Well Blowout**

<http://www.abstractsonline.com/pp8/#!/4358/session/870> An editorial from this consortium would be great, we have insiders already in the group :)

**Microbes in a changing climate** <http://www.abstractsonline.com/pp8/#!/4358/session/674>

**Emerging Mechanisms of Antibiotic Resistance: What Have We Learned** (One Health)

<http://www.abstractsonline.com/pp8/#!/4358/session/461>

**Microbial Feedbacks to Climate Change: Current Status, Challenges and Future Perspectives**

<http://www.abstractsonline.com/pp8/#!/4358/session/467>

**Environmental Microbiology I** <http://www.abstractsonline.com/pp8/#!/4358/session/596>

**Microbe and climate change** <http://www.abstractsonline.com/pp8/#!/4358/session/540>

**Bugs in Water and their Associated Recent Outbreaks**

<http://www.abstractsonline.com/pp8/#!/4358/session/418>

**Environmental Microbiology II** <http://www.abstractsonline.com/pp8/#!/4358/session/607>

Please, also check abstract at the following conferences ((small communities but one health oriented and with interdisciplinary approaches):

**7th Symposium on Antimicrobial Resistance in Animals and the Environment**

<http://arae2017.de/>

**MEdVetNet** <http://mvnassociation.org/medvetnet/index.php/events>

I'm in contact with the two authors that promised submissions (Palazzotto and Schmidt); they are working on that but not yet ready.

Best to all

Daniela

On Jun 29, 2017, at 12:00 PM, Antarpreet Jutla <[Antarpreet.Jutla@mail.wvu.edu](mailto:Antarpreet.Jutla@mail.wvu.edu)> wrote:

Hello All,

I spoke with Randy last week on some different issue and was informed that there were no submissions in the month of June. Considering this, I took liberty of sending this email with my thoughts on increasing submissions.

**Submissions:**

So far the submissions are primarily related to the field of geophysical sciences and there are limited to no submissions from microbiology or core public health communities. I have a mailing list for author from hydrology, climate and geophysics who are working at intersection of human health fields and will send requests for submissions. However, there is a need to engage other communities to encourage submission to GeoHealth.

**Publication fees:**

I believe that publication fees is perhaps one of the biggest deterrent to submissions. I did some research (preliminary), and found that open access journals such as PLOS waived fees for a long time so that the journal can gather sufficient momentum. I think that we should institute a nominal publication fee (or no fee) for first year or so and then start charging fees as the visibility of journal increases. I agree that GeoHealth still charges less fees for open access; but at this point we need to make journal visible and viable considering competition. The downside of this approach is that it will increase burden on editors because we will start to receive really bad manuscripts (such as the few that were submitted in the beginning). But considering everything, editors should be able to handle such workload (atleast I am willing to do so) and can reject submissions without sending for review.

My sincerest apologies if this crosses any hierarchal line of thought, but I think it's time to think on how to enhance publication quality and quantity.

Regards,  
Antar

**Subject:** RE: GeoHealth Submissions

Dear all,

Following up on different ideas to attract public health scientists to GeoHealth I'm thinking of submitting a session proposal for next ASM Meeting 2018 in the track of Applied and Environmental Science. If chosen, this symposium would gather microbiologists working on climate change, global health, one health, etc. Deadline is July 21<sup>st</sup>, see links below for full info.

Dr. Colwell, if you agree I'd like to have you as a convener for the session proposal. If any of the Editors is also interested in participating, please let me know, I will circulate a text proposal for the session soon.

Randy, will Dr. Filippelli joint the call as well? It would be very interesting to hear from one the new Editors in Chief what is his take on the direction GeoHealth should take.

Apologies but I might not be able to join the conference call on Friday due to prior commitments.

Best  
Daniela

[https://www.asm.org/index.php/now-accepting-session-proposals-for-asm-microbe-2018?utm\\_source=bluehornet&utm\\_medium=email&utm\\_content=Callforproposals&utm\\_campaign=asmmicrobe2017](https://www.asm.org/index.php/now-accepting-session-proposals-for-asm-microbe-2018?utm_source=bluehornet&utm_medium=email&utm_content=Callforproposals&utm_campaign=asmmicrobe2017)

## Session Types:

1. **2.5 Hours Symposium:** 2.5 hours long; 1 or 2 moderators lead the session, with 3 speakers that present for 30 minutes each. The remaining time will be filled with oral abstract presentations selected at a later date by the Program Committee, with ample time for discussion.

2. **1 Hour Meet-the-Experts:** 1 hour long; 2 experts speak about 15-20 minutes each, allowing for ample Q/A.
3. **Other:** Track Hub around 30-45 minutes in length and highly interactive; or other Profession of Microbiology session (include proposed session length in the above session description). Max of 1-2 speakers, no moderators.

Daniella and Paul:

I agree with both of you. We need to establish a one year no fee submission. The ASM sessions Daniela highlighted are exactly relevant to GeoHealth and authors should be solicited.

My thoughts on antimicrobial resistance are as follows. My previous research demonstrated clearly a linkage between heavy metal resistance and antibiotic resistance (genes on the same plasmids). A special issue on environmental drivers of antimicrobial resistance would be a very popular publication. We would need to solicit authors for papers in that special issue, if all are agreed that it is meritorious.

Brooks, reschedule out call for this Monday at 3:30 pm or later?

**Subject:** RE: GeoHealth Submissions

Dear Randy, Dear all,

I meant to write you after attending ASM in New Orleans but was caught up in so many things, sorry for the delayed reply.

As we discussed already, ASM is the best venue to advertise GeoHealth to the public health community. I also had the chance to talk about this with Dr. Mc Entee when we met at EGU in Vienna and she suggested to have an AGU booth at the next meeting. I think this would boost our visibility; as much as I can go around and talk about GeoHealth or distribute flyers, it is obviously not the same thing. We need some strong advertising, word of mouth is not enough.

That being said, I have done my homework and here are the sessions whose authors/presenters should be contacted by the Editorial Team to solicit submissions. ASM Microbe is divided in Tracks. I listed the track leader who should be contacted as a bridge to potential authors. Extended fee waivers is a plus. It would be great to attract researchers that publish in Applied Environmental Microbiology (ASM press). I don't know if AGU and ASM can "officially" talk in this sense, I'll let this to your marketing team.

## **RE: September 15-16, 2017 EHA Board Retreat Location**

---

From: Rita Colwell <RCOLWELL@umd.edu>  
To: Blakely Larrabee <larrabee@ecohealthalliance.org>  
Cc: Victoria Lord <vlord@g.umd.edu>  
Sent: August 9, 2017 12:45:24 PM GMT-05:00

Blakely:

I could attend by arriving Friday night and being present Saturday, returning Saturday night. Does that make sense to attend evening and Saturday only? I have very critical meetings on Friday morning and afternoon that Friday, September 15. Please let me know whether I should plan to travel to this Board Retreat. Also, which is best to fly into, LaGuardia or JFK...I would need to taxi to the Conference center.

**From:** Blakely Larrabee [mailto:larrabee@ecohealthalliance.org]  
**Sent:** Wednesday, August 09, 2017 7:18 AM  
**To:** Board  
**Subject:** September 15-16, 2017 EHA Board Retreat Location

Dear All,

I hope everyone is doing well and thank you for letting me know whether you are able to attend the September 15 -16, 2017 EHA Board Retreat. The retreat will be held at the Glen Cove Mansion Hotel and Conference Center, which is located at 200 Dosoris Lane, Glen Cove, NY 11542. We are very excited about the venue and its convenient location on Long Island. It is only 30 minutes outside of NYC, JFK International and La Guardia Airports.

We have secured a group room block for the retreat and if you haven't RSVP'd already you must do so by September 1st to guarantee a room. All rooms will be paid for by EHA under our group contract. Similar to past Board retreats, you are responsible for your transportation to and from the Board retreat venue and we will provide transportation for an off-site dinner on Friday, September 15th. As soon as we put together an agenda for the retreat it will be shared with you. In the meantime, if you have any questions about the Board retreat location please email me or click on the link below.

<http://www.glencovemansion.com/about-us/map-directions/>

Have a wonderful day,

Blakely
