physics-calculus-based.png

Dear Professors & Politicians,

Is the Afghanistan debacle Biden's fault???

No. Of course not. Please check out the attached first slide.

The thing is, Biden is following the trajectory prescribed by Bush, Obama, and the Big FooL, especially the Big FooL, who made a ridiculous deal. Biden is doing the implementation, and is in the right direction of quitting from Afghanistan, which alone has down-payed Biden with 70 points.

It's like in software engineering, that the product design and the software architecture are determined in the first phase, which typically involves few people, and that the coding and testing are conducted in the second phase, which typically involves much more people. The first phase plays the pivotal role, and the second simply follows the trajectory.

Thus, Biden actually is doing a very good job, terminating a foolish war, decisively.

Biden indeed made a mistake, for being too optimistic about the situation. But he quickly has the thing under control, and after all that's the consequence of the Big FooL's ridiculous deal.

Thus, by the same token, Dump Trump!!! (part xi)

(2)

Please check out all remaining slides.

There exist some fundamental flaws in US political system. We have to fix it.

On the other hand, democracy demands logicality out of the citizenry, even in the futuristic scientific/optimal political system. For this sake, quality education with emphasis on analytical skills is demanded.

For expedient purpose, one may simply study several best textbooks as attached:
(i) Math: discrete (permutation, logic, sets, and groups only) + continuous
(ii) Physics: calculus based
(iii) Chemistry, Biology, and Medicine: the practically useful pathophysiology should be familiarized by the public
(iv) Computer Science: introduction and the most powerful computer language of C++
(v) Engineering: contrary to intuitive though very mathematical mechanical engineering, electrons can't be seen with naked eyes, has a close connection to the information era, and is still a fundamental myth.

Accumulatively these books could be done within one year. These books actually should be taught in k10~k12 schools.

God bless America

No, it's not. Biden actually did a very good job. Can't figure it out? Then read attached recommended books, & solve 50% problems.
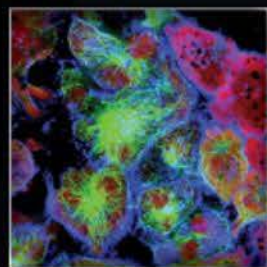

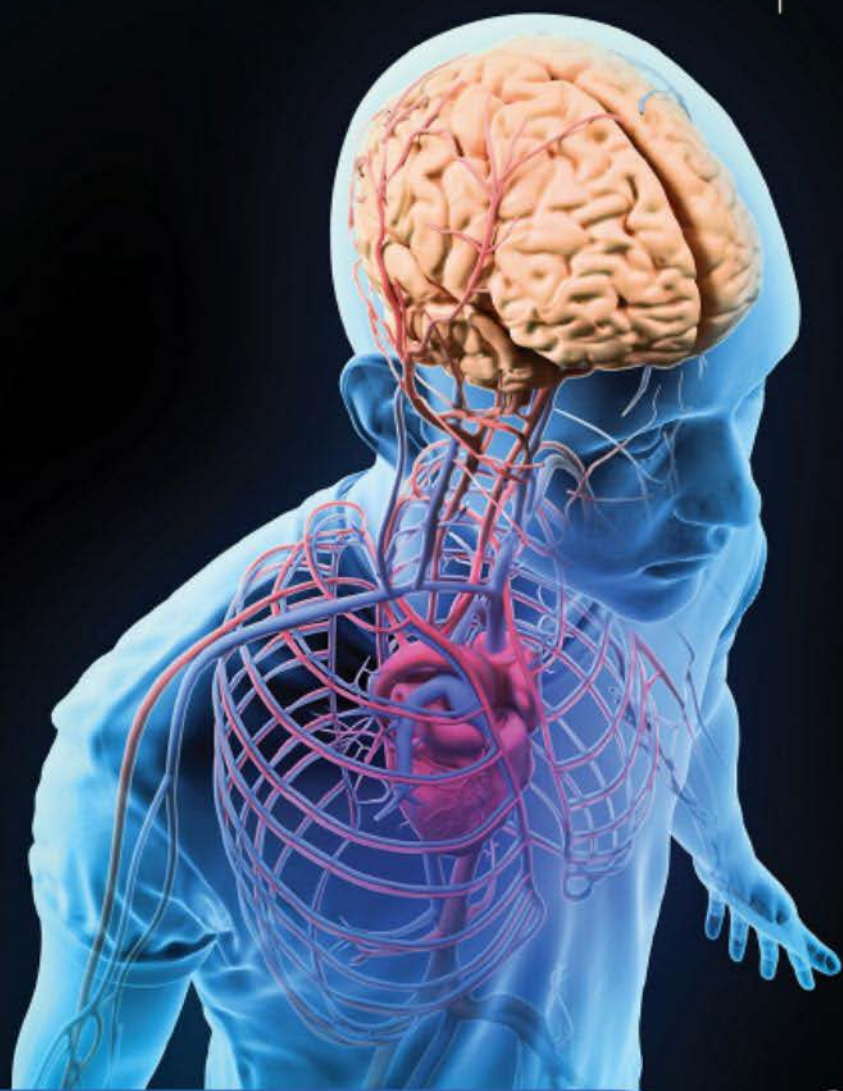

CNN continues hammering Biden over Afghan turmoil: 'If this isn't failure, what does failure look like?'

DOUGLAS C.
GIANCOLI

Dear Professors & Politicians,

Trump was weak, psychologically and intellectually.

(i) Recall, Trump was frustrated with corona fall 2020 -- a full display of weak nerves.

(ii) Recall, Trump caved in and awarded DemocRatic Black rioters & looters with $500,000,000,000 -- a full display of weak nerves, and weak intelligence.

Blacks are the base of Party Donkey. How dare the Big FooL think about Biden's base? Wasn't that a daydreaming?

Of course, the best solution, repeatedly recommended by a computational physicist, might be too arcane for politicians even with strong intelligence to figure out: Award Hispanics with $500,000,000,000.

In this fashion, the conflict between two gigantic racial groups will be stirred up, and Party Donkey will be in Big trouble holding both Blacks & Hispanics simultaneously under the same roof.

This trick is called, 'Divide & Conquer', a universal technique permeating in every line of mathematics, physics, computer science, and engineering.

(iii) The same is true for the Trumpian Deal with Taliban.

What the hell was it? It can be called a deal???

It was a total cave in.

As we all know, if a customer is praising our product, she/he likely won't buy. But if the customer is complaining about the quality or the price, she/he likely will buy.

The same should be true for quitting from Afghanistan. This is just a basic businessmanship. But the boasting/bragging/crowing Trump was just... too weak, psychologically & intellectually.

(2) Biden is strong

Biden has strong nerves. It surprises me, that he just sticks with his implementation. He did reverse some troops, but for escorting purpose only. He didn't strike back.

He takes blames, but stays on course. He doesn't falter. This is called resolution, a leadership property.

The good from the bad is, Biden is telling people all around the world, that US means what it meant. Take US' words seriously.

God bless America

Subject: OMGosh!!! Another 5,000 deaths!!! Afghanistan: Big FooL's woke Deal; Biden's rating

1-us-cases-deaths.png
2.png
3.png
4.png
5.png
6-trumpian-deal.png

Dear Professors & Politicians,

Please check out the attached first slide.

OMGosh!!!
Another 5,000 deaths!!!
Another 5,000 Trumpers!!!

If this trend continues its way, Trumpers are going to largely extinct, then no enough votes are left for Party
Lincoln 2022 midterm!

NATIONAL Mask Mandate!!!
Fine any violation by 100 bucks!
To 60 days after disappearance of the final case!

(2) Big FooL's woke

Please check out the remaining slides.

I am holly shocked by Trump's Deal with Taliban.

I was not very aware of the deal, but when I am, I am shocked.

What?

US retreat: Taliban+1
Transfer power to Taliban: Taliban+1

What kind of Tablian' virtue & merit awarded Taliban twice???

What the hell is this deal???

A horribly woke deal!

As we all know, to make a good deal, someone has to be intellectually logical and psychologically strong. But if someone isn't, then she/he probably can make a common sense deal.

But Trump made a horribly woke deal, far below a common sense deal.

This reminds Big FooL's failed deal with the dictator in N Korea.

(3) Big CEO?

The Big FooL constantly bragged about his CEO experience. Let's take a closer look.

The standard operation, prevalent in business, would be: Let the AF president talk truce with Taliban, and form a coalition government. After the deal is coined, the AF president just waves hand, and US force disperses.

This gives an impression that the AF president can invoke wind and rain at will, and elevates the status of his administration, though the real power actually of course resides in US.

But the Big FooL circumvented AF President and directly negotiated with Taliban.

The reality show TV star is a pathologic showman, has an insatiable appetite for limelight.

As the leaving CEO and founder of a corporation, you ought to take any chance to render the new CEO to practice power wielding. This is common basic business sense.

But the crowed Big FooL didn't have.

(4) Biden's rating

Biden's is doing horribly in Afghanistan?

I would rate a score of 80 out of 100 for Biden.

In other words, he is implementing very good, in the sense that if the current trajectory is followed.

Of course, while the wish of exiting the Afghanistan mire is absolutely correct, the Deal was bad. The best deal, as I have been yelling for months, is to set up a monetary fund, to exit, to control Taliban, and to demand BigGuyNation to pay more -- one bird kills three stones simultaneously.

But on the premise of Trump's deal -- since the New Deal as I proposed could be too arcane for Biden's administration to figure out -- Biden's implementation falls in the category of the very good.

Because any elongation essentially won't help much. And, anyway Big FooL's May 1st deadline could be even messier.

The reason I can't rate 90% for the implementation is, some troops should be retreated after full evacuation. The reversal of 6,000 troops is the evidence.

(5) Poor + Islamic + Black

Afghanistan is horribly over populated. We shall not simple-minded-ly divide the 30,000,000 populace by the size of the land. That's wrong math. Instead, we shall divide the populace by the size of the arable land and the amount of fresh water, and take an average. I would guess the infertile & dry Afghanistan only suits to support 3,000,000 populace.

How to fix it?

One may brainwash, since religion indeed is a big factor, as in the terrifyingly over populated Muslim nations in sub-Sahara Africa. But as economy grows, people will be busy with money making, and busy with life enjoying, thus have less time producing & raising offspring.

Genetically, Afghans are Whites, in broad sense. So, it's not the worst scenario yet. Poor+Islamic+Black = a disastrous combination for mankind, a grave threat to mankind, a mammal challenge to mankind. We have to figure out how to fix it.

(6) Divide & Conquer, Carrot & Stick

Why Bush invaded Afghanistan? Merely to capture Bin Laden?

Of course not. At least there were two extra purposes. Afghanistan neighbors China with a small opening, thus Bush thought in that fashion US force can reach the boundary of China. More importantly, as a deep Christian Bush envisioned a horrifying picture of jihad, thus wanted to transform Afghanistan.

It turned out both were wrong ideas.

Islamic nations don't have a mindset to transform yet. They still deeply love their religion, which clearly poses a Big problem for them.

While brainwashing should be proceeded, economic approach should assume as the primary solution. But by no means, a military approach will work effectively & efficiently.

Hence, what US should have been doing is, as repeatedly claimed as a universal approach to tackle international conflicts, to set up a fund, to help Afghanistan, to ask other nations especially the BigGuyNation to pay, and to avoid US money & blood.

Of course, the BigGuyNation won't comply. But then, US can persuade Arabian nations to persuade the BigGuyNation. In this fashion, either BigGuyNation has to pay, or the chemical bond between the BigGuyNation and Arabian nations gets weakened.

In other words, the principle of Divide & Conquer is applied.

And once the fund has some money in, a cultural evolution can set off. This approach conforms to the principle of Carrot & Stick.

By following these two principles, one bird could knock out three stones.

Politics needs enthusiasm & bravery -- politics could be life threatening, but it is complex and needs good logic, especially when it involves a fight associated with BigGuyNation, a nation where politicians by definition are very very smart & very very professional.

God bless America

OMGosh!!!

Another 5,000 Trumpers died!!!

Stop woke worrying about Afghanistan!!!

Worry about Trumpers!!!

15.png
16.png

Dear Professors & Politicians,

So, no better solution to the Afghanistan equation exists???

Please check out the following link:

https://abcnews.go.com/Politics/biden-trump-bear-responsibility-afghanistan-cheney/story?id=79458255

So, Trump is wrong, again!

The game has been over, but it might be still worthy to discuss a universal philosophy to many international conflicts.

(1) Rights & wrongs of US presidents

(i) Bush was right, for starting the Afghanistan war;
(ii) Bush was wrong, for starting the Iraq war;
(iii) Obama was right, for killing Bin Laden in Pakistan;
(iv) Obama was wrong, for not ending the Afghanistan war after the decease of Laden;
(v) Trump was right, for the wish to end the Afghanistan war;
(vi) Trump was wrong, for the bad deal and the bad implementation;
(vii) Biden was right, for continuation of the Trumpian wish;
(viii) Biden is wrong, for continuation of the Trumpian deal and implementation.

(2) What's the asymptotic solution?

An asymptotic solution means a futuristic converged solution, which ought to be:
(i) US stops losing servicemen in Afghanistan;
(ii) US stops wasting Big money in Afghanistan;
(iii) US focuses on east Asia, with priority on N Korea.

Please check out the attached first two slides. Why China on one hand urges US to stay in Afghanistan, on the other hand gives Big support to Taliban, while Afghanistan has an internationally recognized legitimate government? Recall, China pumped big money to Black Lives Matter.

(3) Senator Ernst

(i) Why the Senator didn't call on Biden before-the-fact?
(ii) Isn't what Biden is doing following Trump's trajectory? So, Trump is wrong, again?
(iii) So, what is the Senator's solution?

(4) New Deal, THE solution

As recommended months ago and repeated for a couple of times, US ought to make a New Deal with Taliban, by organizing and setting up a monetary fund for Afghanistan. In this fashion:
(i) US can still militarily exit Afghanistan completely;
(ii) US can control Taliban, and induce it to do the good for Afghanistan people;
(iii) US can force US' challenger to pay more money;
In other words, one bird knocks out three stones simultaneously.

As a matter of fact, this is a new philosophy to handle an array of international matters.

(5) Implementation of New Deal

The best time has long passed, Taliban, financially pumped by China, surely will reject US talk. Thus US need take several preliminary steps to go back to the position where the the New Deal could be possibly implemented:

Step 1:
Convene international community to address the instability and human rights issues in Afghanistan. Expose the Taliban-China chemical bond.

Step 2:
Airstrike Taliban, to force it back.

Step 3:
Negotiate with Taliban.

Step 4:
Set an international monetary fund. Ask the cash affluent BigGuyNation to pay more.

Step 5:
Welcome Taliban to participate in Afghanistan government.

In this fashion, the table could be turned around, and a crisis could be converted into an opportunity.

God bless America

Taliban co-founder Mullah Abdul Ghani Baradar, left, and Chinese Foreign Minister Wang Yi pose for a photo during their meeting in Tianjin, China, on Wednesday, July 28.

On the other hand, China supports Taliban in Big money.

Subject: NATIONAL Mask Mandate!!! Afghanistan; Capitalist infrastructure & Socialist $3,500,000,000,000

israel-weekly-cases.png
af-1.png
af-2.png

Dear Professors & Politicians,

Please check out the attached first slide.

So, still counting on vaccines???

Last year I emailed a sequence of recommendations. If one of them was taken, at this point of time Donald J Trump would be still sitting in the Oval Office twittering.

Likewise, I repeatedly claim that by January 31, 2020, long ahead of American corona outbreak, I concluded that masking is the 'necessary & sufficient condition' to impede, fully stop, and completely eradicate the corona.

By 'necessary condition', it implies vaccination is not the solution. Otherwise, masking is no longer necessary but optional.

Now look, what is happening? And, what to happen?

NATIONAL Mask Mandate!!!
Fine any violation by 100 bucks!

To the very very end: until two months after the disappearance of the final case!

(2) Afghanistan

Please check out the remaining two slides.

So, what is THE solution???

Please think it for a while.

(3)

Please check out the following link:

https://www.foxnews.com/politics/manchin-budget-reconciliation-democrats-spending-plan-serious-concerns

I have read all recent negative Fox articles on the infrastructure bill. They are all wrong, to be frank & to be straightforward.

(i) Many issues were mentioned in those articles. But collectively, that accounts for far below 10%. Some are not issues at all, like roadside flower planting. I was actually impressed by the bill for its thoughtfulness.

(ii) Many Republicans, including Trumpian Republicans, are confused 'good' with 'perfect'. The infrastructure bill is by no means perfect, but it is good (actually excellent). Thus, those 19 Republican senators were right, that they voted for a good bill.

(iii) The infrastructure is actually more than good. It is the optimal. In other words, it is the best result under current circumstance. Please bear in mind, it takes only one month to abolish the filibuster and pass slew of rabid socialist bills, including the election law that would kill all Republican White House aspirations in the next 30 years, if the moderate Democrats are fully irritated by Republicans. In other words, many Republicans, especially Trumpian Republicans, must look at the self in a mirror first, then think about if the self is qualified to chase a perfectly beautiful & sexy girl.

(iv) Socialization needs money. The monetary relation between the capitalist infrastructure bill and the socialist $3.5T bill roughly obeys the conservation law. In other words, the total, i.e. the maximum money US still can spend, is roughly conserved. Thus if $1.1T is spent for the capitalist bill, then nothing may be left for the socialist bill, and vice versa.

It surprised me that the 69:30 vote on the infrastructure exceeded the transcontinental interstate highway bill in 1950s, which tells US long has the problem of poor judgement. It should have been 100:0. Both the interstate bill & the infrastructure bill should have been voted by 100:0. This also tells us, Trump is not the fundamental problem (though a big problem), in that there was no Trump in 1950s. There are some fundamental problems in US political system, in culture, or in education. We have to fix them, otherwise a beat by China is all but certain.

In term of political fight, many Republicans, especially Trumpian Republicans, are doing illogically.

(i) Divide & Conquer, Carrot & Stick

The principle of 'Divide & Conquer' is so powerful & so universal, that in mathematics and software engineering, for instance, this principle is employed constantly, for virtually every minute. We always divide a big problem into smaller pieces, then conquer them.

The same is for corona. Masks divide the entire massive populace of corona into pieces, then let massive number of human lungs to conquer them (or the corona kill the hosts, then the corona themselves get killed); that's why masking is God's method to solve corona, and as we all know, God's method is always simple & powerful.

So, there are far-left DemocRats, moderate Democrats, and moderate Republicans standing in front. What far-right Republicans should be doing is, condemning far-left DemocRats, praising moderate Democrats, and saying nothing about moderate Republicans. In this fashion, the principle of Divide & Conquer is followed, and the principle of Carrot & Stick is followed.

Likewise, there are China, Russia, and Germany standing in front. US ought to criticize China, praise Russia, and say nothing about Germany. In this fashion, US could possibly retain global dominance. Thus, the Trumpian handling of the Germany-Russia pipe was wrong. In other words, Trump is wrong, again.

(ii) Pelosi

Pelosi's binding of two bills, the Capitalist bill of infrastructure and the Socialist bill of $3.5T, is egregiously wrong. This lady is so corrupted, so power abusive, and so erosive. Every bill ought to be voted alone. If two bills are bound together, then they should be combined into one piece at the first place.

Pelosi herself is not a socialist, which has been designated for AOC & Bernie Sanders. But Pelosi constantly applies rules unlawfully or wrongly.

Biden is even more not a socialist. Biden is more moderate than Pelosi, though less moderate than Manchin & Sinema.

Thus, Party Lincoln ought to condemn AOC & Sanders, and Pelosi, and praise Manchin & Sinema, and even Biden. In this fashion, the principles of Divide & Conquer and Carrot & Stick are applied faithfully, and America's interest is best served.

(iii) The good in the bad

While the $3.5T overall is bad, it contains some good stuff:

(a) The family leave pay: It benefits little to low-income class, but benefits a lot to middle class. Thus, it encourages the stronger populace to have more children, and does not encourage the weaker populace to add more burden to the society. Thus it is upward and Capitalist.

(b) Green Deal ought to be partially considered, in that the continent in the South Pole is melting, catastrophically. Why more hurricanes in US? Because there is more energy in the atmosphere, due to global warming. Why more burning in California? Because higher temperature vaporizes more H_2O to the atmosphere, thus the less is left for the ground.

(c) US is doing horribly in education, especially in math & physics. A judicious midway compromise is 50% tuition waiver for all students in colleges, both community colleges & 4-year colleges.

Note I: The application of half tuition waiver to community colleges alone, attracts stronger students to not-that-good education, thus it is downward & Socialist.

Note II: Here is an advanced application of the principle of 'Divide & Conquer', that Party Lincoln proposes & insists the 50% tuition waiver be applied to Hispanic students first, then Blacks, then the rest. In this fashion, the competition between Blacks & Browns can be stirred up, and Party Donkey is gonna lose a hell number of votes!
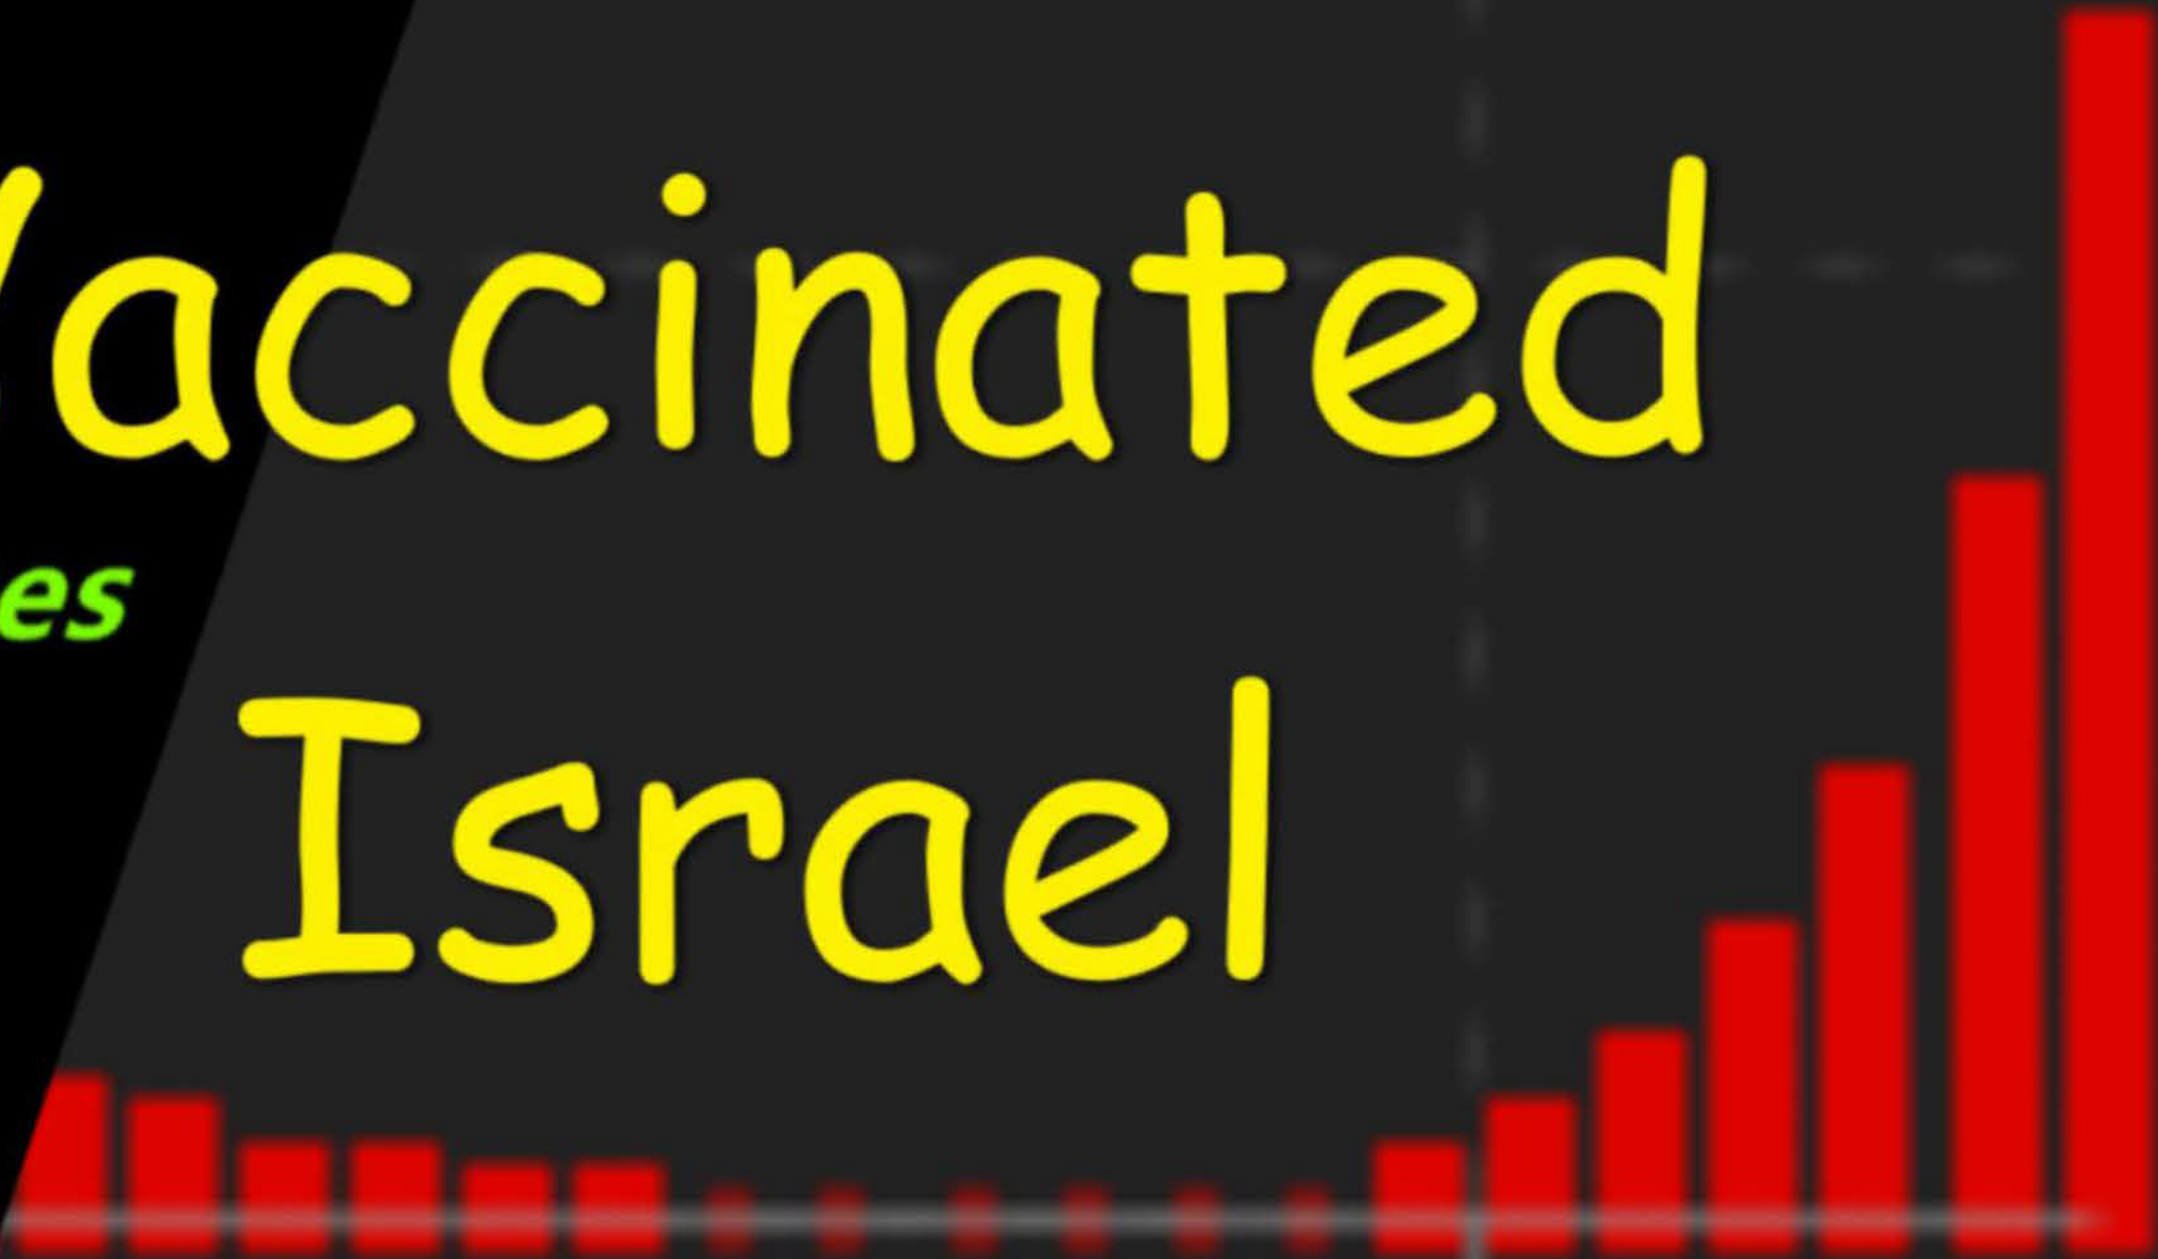

God bless America

**So, what is the Democratic solution?
What is the Republican solution?**

POLITICS

After more than $2 trillion spent by the US, Afghanistan is falling back to the Taliban

So, dump Trump's initiative, and continue to spend massive American lives & money in Afghanistan?

Subject: Thanks to Professors Shane, Levinson and Professor Calabresi

Hello,

I have moved my opening observations and closing observation to the end. My points are not legally oriented. They are directed to the current Covid-19 compliance dilemma with a suggestion with some similarity to the supreme court decision on the election of George W Bush. It's not exactly the same and that I believe that medical experts and open session congress, supreme court and President together hashing over the facts and staying in place until a solution can be arrived at. Comments by additional participants will be shown immediately after this paragraph to maintain a easy to read thread of the various legal arguments and input. COVID-19 is a deadly and very unusual event and time is definitely an issue, but at the same time the solution needs to maintain the separation of powers enshrined in the US Constitution. It's a very narrow beam we walk.

From: Steven G Calabresi <   (b) (6)

Hi All:

Sandy's mention of the *Youngstown* case reminds me of two points. First, this is a *Youngstown* Category 2 case. Congress has not forbidden the President from acting; it has merely failed to take timely action itself. Second, *Youngstown* is not the latest word from the Supreme Court on presidential emergency powers and private property. That honor goes instead to *Dames & Moore v. Regan*, which upheld a presidential seizure of property to effectuate the release of the 52 Americans held hostage at the Iranian Embassy.   Beyond that, there are always the precedents for unilateral presidential assertions of enormous power when Congress is in recess, which were set by Abraham Lincoln in the Civil War between March 4, 1861 and July 4, 1861. I do not agree either as a policy matter or as a matter of constitutional law with what President Biden has done, but there are arguments that could be made to support it.

From: Shane, Peter <   (b) (6)

I agree that the *Debs* dicta are breathtaking in scope. But the presidential assertion of an inherent power to sue for an injunction strikes me as way more modest than a claim to inherent power to impose public health-related restrictions on the use of private property. An EO of the kind suggested, but not rooted in statutory authority would be *Youngstown* on steroids.

From: Levinson, Sanford V <   (b) (6)

I wonder if In re Debs provides a wild care for "imaginative" assertions of executive power. This is not to say it should be a "winning argument," but I do think it represents an astonishing legitimation by the Supreme Court or undelegated power to the Executive.

sandy

From: Shane, Peter <   (b) (6)

Honored as I am to be in this group, I can, in reply, only copy and paste a paragraph from something I published today on the eviction moratorium:

"The administration acknowledges that any power it has to protect public health must come from Congress, presumably exercising its Commerce Clause power to protect the nation from significant threats to interstate commerce, including public health threats that arise from local activity. The legal fight is about whether the CDC is properly interpreting two sentences in Section 346 of the 1944 Public Health Act, which is based on that power. . . .The only constitutional question plausibly implicated is whether the president would have *inherent* Article II authority to impose a health-protective peacetime eviction moratorium. The answer to that

question is clearly 'no.' It is hard to imagine any competent constitutional lawyer anywhere on the political spectrum concluding otherwise."

I guess other responses from this list may indicate whether my "imagination" is just too limited.

Best, Peter

Subject: A question for 50 constitutional scholars in 'red' and 'blue' states.....

Hello !

I guess I could be considered a one man volunteer activist in favor of federally mandated COVID-19 vaccination. It impacts me personally as I believe my mother who passed away in late March, 2020 died of COVID-19. Also, I (b) (6) . So, naturally I fear getting COVID-19 and I (b) (6) in November. I have completed one clinical trial with 2 shots of Pfizer's vaccine back in February and did receive the WHO recommended dosage. Now, I have entered another clinical trial to boost the Pfizer vaccine with Johnson & Johnson. So I have a personal interest in coming through this intact.

Now, for the nearly 50 constitutional scholars that are reading this email let me explain what kind of damage COVID-19 can inflict. It can cause brain damage, diabetes, heart damage, lung damage, vascular damage, amputation, strokes, heart attacks, deafness, hair loss in women, erectile dysfunction and infertility in women and men, amputation due to gangrene that can occur anywhere in the body not just the extremities and if I spent another hour on this I could double the list.

Now let's talk about the political situation. In 2016 the media went after Donald Trump hammer and tong for 3 solid years. After Joe

Biden was elected President the republican party and media have decided to return the favor in spades. Both parties are so full of blood lust for each other than every discussion on subdueing COVID-19 in run through the filter of gaining political advantage and inflicting political damage. For the democrats the payoff is seeing red state citizens dropping like flies and for the republicans the payoff is casting democrats as usurpers coming for your guns and bibles and encouraging conspiracy theories about what the vaccine 'really is all about'.

With blood lust at every level of government, federal, state and local, I can see no alternative, but an executive order mandating vaccination for all American citizens. Joe Biden has decided to work around the mess by encouraging employers once the FDA approves the mRNA vaccines to mandate COVID-19 vaccination for all employees. I suspect however that when the time comes many employers will 'ADVISE' rather than 'MANDATE' the COVID-19 vaccine and their justification will be that they are only doing what the CDC is doing now - 'advising' or more accurately 'wishing'. All the while many experts are extremely concerned about an even more deadly variant emerging that is vaccine resistant. The virus advances like a blitzkrieg and our response is Neville Chamberlaine. There is the PHSA that could potentially provide President Biden a means to mandate all citizens through executive order, and there may be other ways, or perhaps it can be justified within our existing US Constitution. That is what I would like to have feedback on.

So. my question to the constutional scholars is this ? Is an executive order an option to provide a top down command system to get us out of our vaccination flat line ? Can it be done in a way that will be supported by the Supreme Court at least until the job is done ? I will leave you with two graphs showing the difference in results between the US which is 'advising' and France which is 'commanding'. France is not putting a gun to anyone's head, but if their citizens want any kind of life other than hanging out at the house they need to have evidence of vaccination. As a result the graphs show that France can get another 10% vaccinated 5.5 times faster than the US. It will take us 3.5 months at our current rate to add another 10%. In addition, because Delta is so much faster and more aggressive the target vaccination rate is now 85-90% according to virologists, not 70% full vaccination. During this long and torturously fumbling effort we are giving COVID-19 time and people to mutate within, likely causing a more vaccine resistant variant. The law lacks flexibility, but the virus is infinitely malleable. With that background, here are to two graphs. How can we uphold the US Constitution when this emergency and future variants keep hounding us.

How would you suggest giving the President of the United States emergency power to mandate vaccines during pandemics ? We really need target 85%+ full vaccination rate to consider ourselves somewhat safe...Your insights could be very valuable.

Best Regards,
Dan Hearn

Dec 20   Apr 14   Aug 7

No. of days   116   230.958

During the last week reported, United States averaged about **685,736 doses administered** each day. At that rate, it will take a further **96 days** to administer enough doses for another 10% of the population.

Thanks Professors Shane, Levinson and Calabrese,

Thanks for your insights into the legal considerations of an Executive Order for vaccination. I would imagine in congress with parties not as hostile to one another, if state and local entities could not obtain uniform compliance in COVID-19 vaccination, that a bill would be passed to federally mandate the vaccination and, if there wasn't so much social media misinformation and manipulation there would be a more urgent desire for nearly everyone to get vaccinated or at least enough (85%+) as to grind the virus transmission down. Between congressional animosity and the covid-19 pandemic which could potentially go on for years through guaranteed continued mutation it seems we are at the 'you can't get to there from here' stage.

If I were President, based on what I have heard from Professors Shane & Levinson and Calabresi I would first try my luck with Congress to vote on mandating vaccinations from the Federal level nationwide. Hopefully I will be proved wrong and companies and corporations will step up when the FDA soon formally approves the mRNA vaccines and we will be able to reach a vaccination rate of 85-90%. I predict that it will bump us up from 50% to 60-65% which will be far below what is needed to reach herd immunity and will leave us open to future and without exaggeration possibly more deadly variants. A british virology institute stated that a mutation could arise with Delta's transmissability and a 30% kill rate. Is our Constitution able to accomodate that ? In an emergency even the most vile politician may be forced to change his mind, but how many bodybags, before he comes to that point ?

I believe that the practice of medicine requires knowledge at a level that congress doesn't possess. I believe that medical experts should be given a seat at the table. Not to vote, but in the case of public health emergencies like this which is destructive to every sector of commerce and society that knowledgeable experts should be given much more weight than they are presently. When it comes to defense, nuclear weapons, congress writes a blank check, doesn't even ask that many questions. What if this were biowarfare ? Are we going to continue to be stuck within these constraints. Is there no remedy ?

I'm a tech guy. I don't have my brother's legal brain, but it seems to me that there needs to be a mechanism, when congress is more concerned about scoring points than the public welfare and when the political war extends from the federal, state and local level, that a mechanism be created to protect us from our own selfishness, spite and stupidity. Perhaps in this Black Swan moment the Supreme Court, the Congress, the President and a bevy of medical experts would be required to convene and keep at it until an understanding is met. I also have a serious problem with closed session of congress in this type of situation. The ignorance of the American people of medical matters is what is making the situation more exploitable.

The work isn't over. I would imagine the framers of the US Constitution didn't view it as a marble column. If they were here today, in the current circumstance, they would be nimbly reviewing all of their precepts and working towards a solution that keeps the balance of power in place while creating as much public understanding of this issue as possible. If they could only visit us now. What would they say ?

Best Regards,
Dan Hearn

Subject: Harvard Harvard Harvard;   NATIONAL Mask Mandate!!!

harvard-1.png
harvard-2.png
harvard-3.png
harvard-4.png

Dear Professors & Politicians,

Please check out the attached slides.

Harvard is failing US.

Harvard stands for US' finest minds, yet is unable to think corona logically.

Recall, back to April 2020, many scientists at Harvard were so obsessed with blanket testing as the powerful and even the unique solution to battle corona, and said of 500,000 tests per day as the threshold.

No. The threshold should be 150,000,000, half of the entire population, per day.

If one has ever studied a standard course Digital Signal Processing in electrical engineering, a term 'Nyquist frequency' should immediately jump to the top of mind. Upon such an analogy, one would be careful enough not to estimate illogically.

(1) Slide one

It's stunning that the failure of the fully vaccinated Israel fails to serve as an omen for US scientists, especially finest minds at Harvard.

(2) Slide two & three

It's stunning the Trumpian politician of DeSantis, holding a Harvard degree, has intellectual problem, has integrity problem, and has a politically dangerous characteristic of Trumpian stubbornness. By the way, how did he get into Harvard?

(3) Slide four

It's stunning an anti-Trumpian politician of Sasse, holding a Harvard degree, voted against the historic great booster bill of infrastructure. What was he calculating? What was he afraid of? The Big FooL of Trump anyway WILL fade after 2024, since either the Big FooL dare not run 2024, or he runs then gets beaten to death by rabid DemocRats.

NATIONAL Mask Mandate!!!
Fine any violation by 100 bucks!
To be very very end: until two months after the disappearance of the final case!

God bless America

& led by DeSantis' State of Florida

Alarming 94K surge in COVID-19 cases among kids, hospitals overwhelmed

DeSantis, a Harvard graduate, a Trumpian fool, & a Trumpian fabricator.

eSantis fires back at Biden: Every COVID variant on this planet' is coming through his open border

It's stunning Senator Sasse, a Harvard graduate, & reelected 2020 thus immune from Trumpian persecution, voted against the infrastructure.

255,000 cases!!!

& mostly trumpers!

where is desantis???!!!
shut your mouth up & do your job!!!!!!

physicistfortrump6 · 14 seconds ago

dear trumpian fools,

you even can't figure out the simple corona.
how can you figure out the more complex infrastructural bill?

you are so enthusiastic about politics.
but unfortunately you got very weak logic.

here is an advice for you:
don't get into details.

if you stay outside & use a rough synthesis, or common sense,
you may have 50% chance to get right.

but if you dare go inside & use analysis, and suppose there are 5 steps in it,
then your chance to get right reduces to 1/32.

so, please stop thinking,
stop taking cue from the Big Fool.

just use your common sense,
or listen to people who are way more logical than you.

god bless america

Subject: OMGosh!!! 128,000 cases!!! Math & Logic: NATIONAL Mask Mandate!!!
us-cases.png
horrible-math-horrible-logic.png

Dear Professors & Politicians,

Please check out the attached first slide.

(2) Math & Logic: NATIONAL Mask Mandate!!!

Please check out the following link and the attached second slide:

https://edition.cnn.com/us/live-news/coronavirus-pandemic-vaccine-updates-08-02-21/h_4258aa07cbf2206435b5f84328ddab33

The same old & horrible bugs in Math & Logic:

(i) an elementary-school-level BUG:

Among those 163,000,000 vaccinated people, only a tiny fraction are exposed to corona. Thus, the efficacy formula for the severely infected:
6600/163000000=0.004%
is WRONG, in the denominator.

(ii) ...

(iii) ...

(iv) ...

(to be continued)

God bless America

OMGosh!!!
128,000 cases!!!
a 43% weekly
increase!!!

so, are trumpian
vaccines
working???!!!
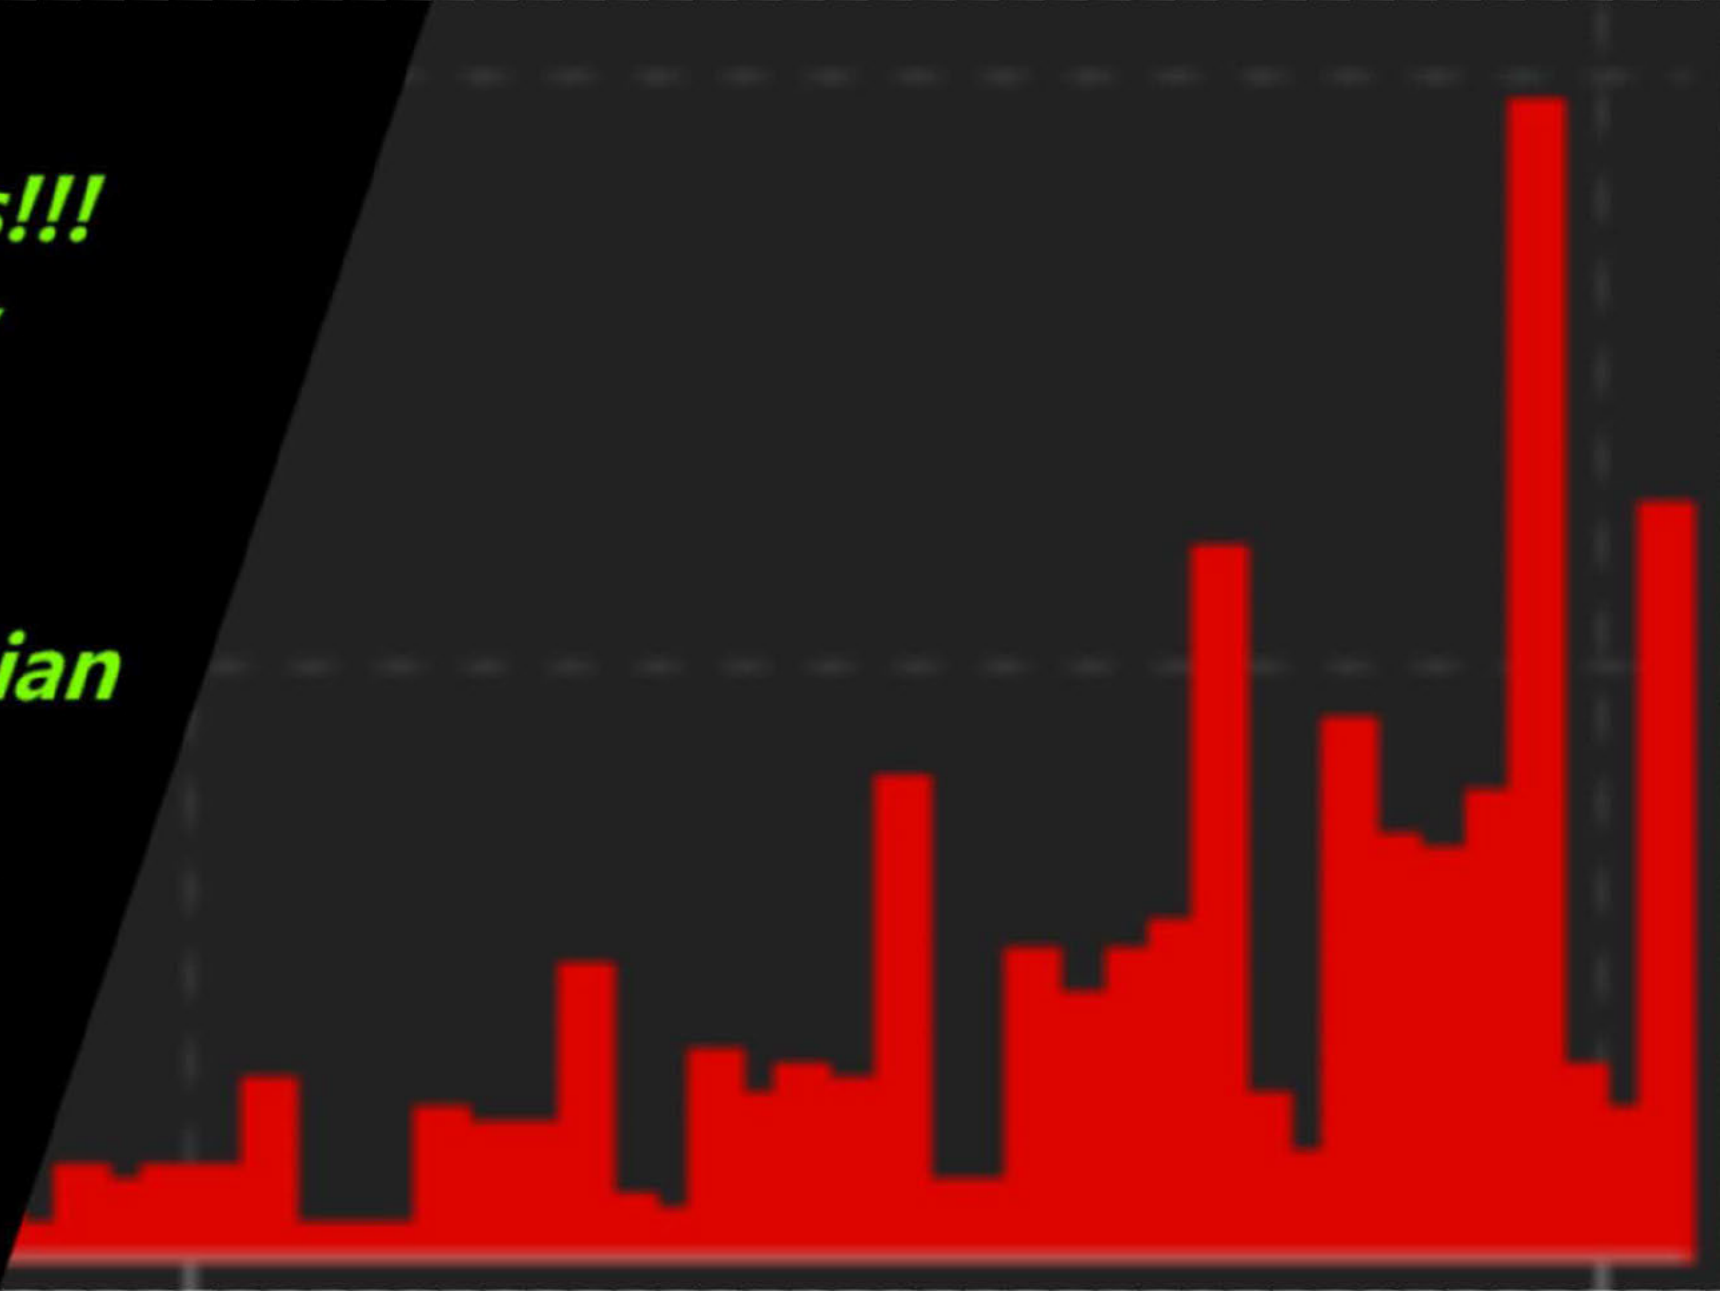

Less than 1% of fully vaccinated people experience a breakthrough Covid-19 infection, analysis finds

From CNN's Deidre McPhillips

Less than 1% of fully vaccinated people experienced a breakthrough infection, according to a Kaiser Family Foundation analysis of official state data.

The federal government only reports data on breakthrough infections that result in hospitalization or death.

According to the latest data from the US Centers for Disease Control and Prevention, less than 0.004% of people who have been fully vaccinated against Covid-19 experienced a breakthrough case resulting in hospitalization, and less than 0.001% have died from the disease. That's about 6,600 severe breakthrough cases out of more than 163 million fully vaccinated people.

But the KFF analysis shows that breakthrough infections of any kind are also extremely rare.

About half of states report data on Covid-19 breakthrough cases, and in each of those states, less than 1% of fully vaccinated people had a breakthrough infection, ranging from 0.01% in Connecticut to 0.9% in Oklahoma.

Also, more than 90% of cases – and more than 95% of hospitalizations and deaths – have been among unvaccinated people, according to the KFF analysis. In most states, more than 98% of cases were among the unvaccinated.

Subject: Math & Logic: NATIONAL Mask Mandate!!!

1-vaccine.png
2-vaccine.png
3-vaccine.png

Dear Professors & Politicians,

(1) Vaccines only have 30% overall efficacy. The so-called 95% efficacy refers to the efficacy of vaccinal generation of antibodies, which surely won't be 100% efficacious.

(2) Masks have 90% overall efficacy.

(3) When everyone wears a mask, the masking efficacy increases to 1-(1-90%)*(1-90%)=99%.

(4) When everyone gets fully vaccinated, the vaccinal efficacy may not increase to 1-(1-30%)*(1-30%)=50%.

And,

(1) The vaccinal approach is very very late, unsuitable for a rapidly moving pandemic.

(2) Vaccines promote mutation & variants.

(3) There exists a possibility that while vaccines may protect against some similar variants to some extent, they reduce the immunity to dissimilar variants.

(4) Vaccines might have long term implications.

(5) It is lucky that corona is not a HIV-type virus, that it is able to stay in equilibrium status in human lungs for extremely lengthy time & pops up much later. Otherwise this crazed practice of vaccination could result in an extinction of the entire US population, if under a bio war attack from some hostile foreign nation.

(6) For the above technical & political concerns, the concurrent vaccinal practice is extremely corrupted & extremely dangerous.

Please also check out the attached 3 slides. Thus,

NATIONAL Mask Mandate!!!
Fine any violation by 100 bucks!
Until 2 months after disappearance of the final case!

God bless America

because vaccination is not 100% efficacious?

HEALTH

Fully vaccinated woman, 33, reportedly dies from COVID after rare complications

So confident, that vaccination is God's solution? Have these vaccines been subject to double-blind trials? What about long-term effects?

HEALTH

North Carolina county launches 'doses to doors' vaccine campaign

↑ 4 New Comments

physicistfortrump6 · 56 seconds ago

90%+ are the unvaccinated.
thus vaccination is God's solution?

there is a big correlation between vaccination & masking:
those more akin to vaccination are exactly those more akin to masking.

the fully vaccinated israel should be able to forecast a fallout of the vaccinal fantasy.

Dear Professors & Politicians,

As the corona & the Olympics unfolding, Russia is weak, but China is strong. Thus, it's silly , especially among many Trumpian politicians, to keep focusing on Russia, a nation with 10% GDP of China. Instead, US ought to buy oil & minerals from Russia, to influence or even control it.

Please check out the attached slides.

1: Previously, US was all in Afghanistan;
0: Now, US wants all out Afghanistan.

However, as recommended months ago, the world is not a binary yes or no, and there exists somewhere in between: US could make a New Deal with Taliban, by organizing and setting up a monetary fund for Afghanistan. In this manner:
(1) US can still militarily exit Afghanistan completely;
(2) US can control Taliban, and induce it to do the good for Afghanistan people;
(3) US can ask the US' challenger to pay more money;

In other words, one bird knocks out three stones simultaneously.

As a matter of fact, this is a new philosophy to handle international matters, such as the redistribution of Palestine people to neighboring nations, recommended months ago as the ultimate solution to resolve the Israel-Palestine conflict.

vaccinated-vs-unvaccinated-1.jpg
vaccinated-vs-unvaccinated-2.jpg

Dear Professors & Politicians,

Still in love with vaccines???

Vaccines not only promote mutation. According to some medical/health scientists:

Contrary to general purposed human natural immunity, man-made immunity does better against special types of viruses. Here is the key point: by doing so, it elbows out natural immunity.

If this is indeed true, while vaccines might do better in some variants similar to the original corona, they do worse in other variants dissimilar to the original corona.

Please check out the following link and attached slides:

https://www.foxnews.com/media/white-house-washington-post-new-york-times-covid-spread-vaccinated

Thus,

Subject: Math & Logic: when for the pandemic to end???   NATIONAL Mask Mandate!!!

1-makary.png
2-gottlieb.png
3-gottlieb.png
4-gottlieb.png

Dear Professors & Politicians,

When will the pandemic end???

Please check out the attached 4 slides, which were emailed to a subset of current recipients on March 14, 2021.

So, look, a couple of months ago two prominent US medical/health scientists predicted a quick end of the pandemic, but a computational physicist pointed out it would take 30 months, that is, the pandemic would be around by Fall 2023.

So, medical/health scientists are wrong, again.

I love to predict. And I repeatedly claim my last major mistake in scientific, business, and political predictions took place in year 2007, on parallel computing.

Now, qualitatively,
(1) It takes months to reach US vaccination ratio of 90%.
(2) It takes months to have two additional booster jabs.
(3) It takes months to observe the pandemic yet can't be rallied.

(4) Then, more fragmented Mask Mandates will be imposed.
(5) It takes months & months to go back & forth on fragmented Mask Mandates, before eventually the pandemic slowly converges to zero.

(1)+(2)+(3), the process to get completely frustrated with vaccines, would span approximately 1 year, and (4)+(5), the process of the incomplete, both in space & in time, Mask Mandates would span approximately 1 year. In sum, it arrives at the same expected ending time of the pandemic, Fall 2023.

(2)

Of course, if the computational scientist is listened, the corona will always be completely eradicated within 3+2=5 months, as claimed before, irrelevant to the status in quo, and irrelevant to delta, sigma, omega, or whatever variants. So,

NATIONAL Mask Mandate!!!
Fine any violation with 100 bucks!
To the very very end!

Johns Hopkins expert says COVID-19 pandemic could end by April

CNBC ✔ **@CNBC · Mar 13**

"I think we are going to be getting together long before July and I think we should give public health advice in-line with where people are," @ScottGottliebMD says. He thinks that most people will be able to get the vaccine in April as supply increases. cnb.cx/3qGw7oO
pic.twitter.com/CBwRCM2z7T

Replying to @CNBC and @ScottGottliebMD

2/4

There are still 60,000,000 windmill-tilting & mask-defying Conservative Whites goofing around. Based on the equation between the transmission multiplier and the masking ratio, I estimate half of them will contract the corona before the pandemic is fully killed.

"I think we are going to be getting together long before July and I think we should give public health advice in-line with where people are," @ScottGottliebMD says. He thinks that most people will be able to get the vaccine in April as supply increases. cnb.cx/3qGw7oO pic.twitter.com/CBwRCM2z7T

Replying to @CNBC and @ScottGottliebMD

3/4

At time being the monthly new cases are around 2,000,000. Suppose we take a linear interpolation, which, following the current trajectory, is quite generous, then we obtain 60,000,000/2,000,000 = 30 months.

Yet, the factor of back & forth is not taken into account.

Dear Professors & Politicians,

US response to the corona has been so far so horrible. It's time to bow to facts, and LOGIC/MATH.

Please check out the attached slides as well as an article.

As exposed in last email, which was a re-recap, so far NONE of in vivo vaccinal data supports the claim that vaccines are extremely effective.

NONE.

Please spend a couple of minutes to read the attached article/analysis, which is a recap too, and this could possibly save you hundreds of days on a wrong direction.

Crowed Corona Israel Data

by PhysicistForTrump[／]

July 27, 2021

1   Introduction

1.1   Remdesivir

To give a ∞avor of how challenging the medical science could be, and how possibly medical scientists could be wrong, we would like to remind the ∞at-out failure of the renowned, cherished, and so-claimed proven remdesivir:

'A very, very bad look' for remdesivir

which was published on the renowned scientiflc/technical/professional magazine of Science by October 2020[1].

1.2   Correlation   between   masking   and   vaccination

The correlation between the masking and the vaccination has also been known to Left Sticks at CNN:

† https://edition.cnn.com/2021/07/28/politics/mask-wars-are-back/index.html

that those more inclined to take jabs are exactly those more inclined to wear masks.

／The author of this article has converted from a die hard supporter into a die-hard objector of Trump, however the 'PhysicistForTrump' is retained to identify the same sequence of articles.

2 Spuriousness

2.1 Israel data

\Observational data in Israel revealed that in a group of over 715,425 people one week after receiving their second jab, only 317 got corona. It also revealed that out of 163,000 given both jabs, only 31 were infected, compared with 6,500 infections among a control group of unvaccinated people."

So, vaccination can bring down infections by 6500÷31 = 210 times? It sounds amazing!

2.2 Double-blind trials

However,

† There is a correlation between masking and vaccination, that those more inclined to take jabs are exactly those more inclined to wear masks. To have a logically correct trial, you have to remove the gigantic factor of the mask, by directly removing it, or by ensembles. Ensembles could be reduced to double-blind trials.

Thus, the analysis for the Israel data is ∞atly wrong, and a dissertation with such analysis would be rejected by the committee to confer a Ph.D. degree. The Israel data simply tells nothing.

2.3 Other data

We may find rampant logical & arithmetic bugs in other data & analysis, for instance:

† https://www.foxnews.com/health/pfizer-moderna-covid-19-vaccines-infection-risk-cdc-study

† https://www.foxnews.com/health/4000-fully-vaccinated-tested-positive-virus-massachusetts

3 Conclusions

NATIONAL Mask Mandate!!!

To the very very end!!!

Fine any violation by 100 bucks!

6m ago

1 in 1000 "breakthrough" infections is fantastically less than would be expected if the vaccine is 95% effective, as advertised. Math majors

~~with the expected~~

wrong math.
most of those vaccinated didn't expose to the virus!

wrong math, again!!!

BREAKTHROUGH CASES

Almost 4,000 fully vaccinated people in Mass. test positive for COVID-19

but, for instance, those vaccinated are more akin to masks.

Please remain in your car with the windows rolled up.
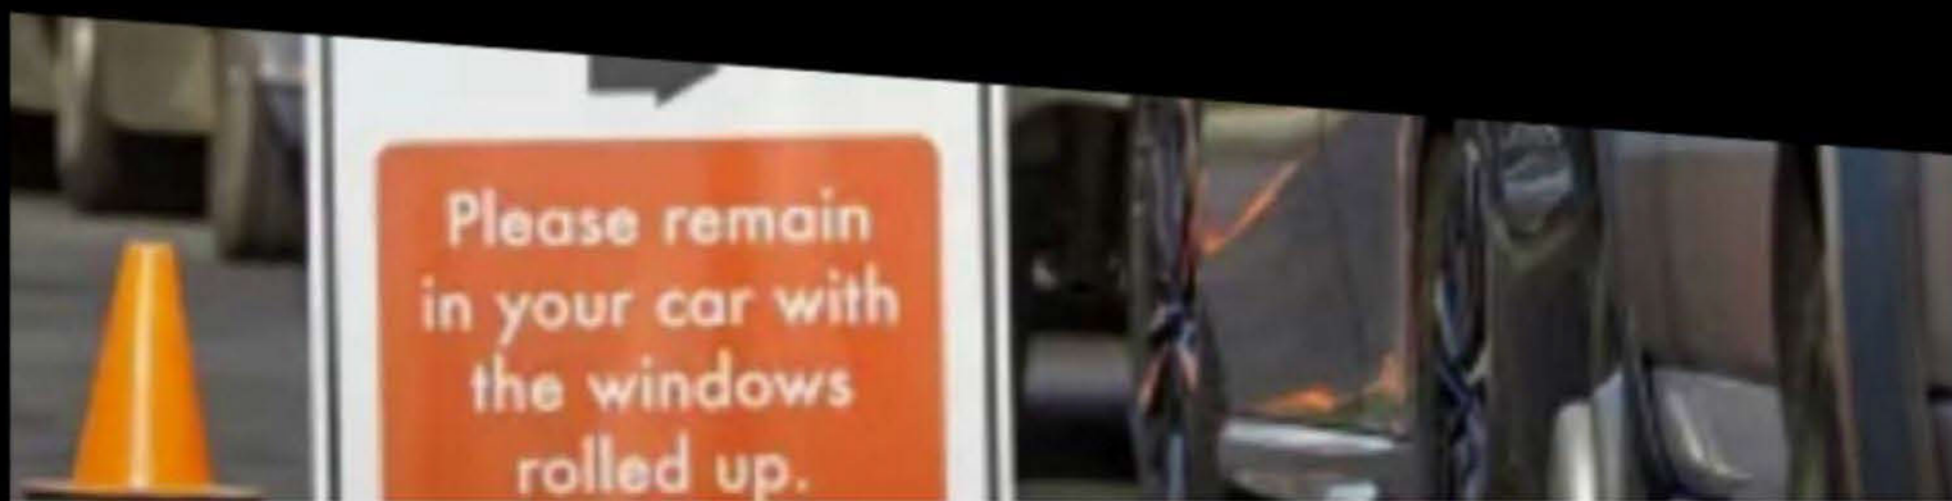

HEALTH

Over 90% of Mississippi's COVID-19 cases among unvaccinated people, gov warns

The news comes as the highly transmissible delta variant was said to account for 83% of infections in the U.S. and blamed for rising cases nationwide, with unvaccinated individuals accounting for nearly all of hospitalizations and deaths. CDC Director Dr. Rochelle Walensky noted 46,318 daily

~~ith the seven-day~~

but, for intance, those vaccinated are more akin to masks.

21 seconds ago

dear trumpian fools,

overall efficacy:
(1) masks: 90%; the what & how is extremely obvious. as to why, you need an expertise in aerodynamics or in statistical mechanics to figure it out, and thats why US medical/health scientists failed to convince the trumpian science crackpots.

(2) lockdowns: 70%, & not sustainable;

(3) social distancing: 50%; if indoor 6 feet, then outdoor still 6 feet? or, if outdoor 6 feet then indoor still 6 feet? you know what, you need a doctorate in aerodynamics to possibly figure out the proper social distances, and thats why what you were told by medical/health scientists were largely nonsense.

(4) vaccines: 30% (the cherished so-called 95% actually refers to the efficacy to generate antibodies by vaccines, but what is the efficacy of antibodies?????????), and very very very late, and can't handle variants & actually help generate variants, and very corrupted & very very dangerous operation;

(5) hand washing: 0.01% efficacy; recall, people were told to do handwashing in a crazed fashion; now, are they still doing so? what is the implication of this thing to the vaccinal thing?

so,
(1) are trumpian vaccines working???

Dear Professors & Politicians,

Please check out the attached first 4 slides.

OMGosh!
52,000 cases!!!

So, are Trumpian vaccines working???

NATIONAL mask mandate!!!

(2) China China China (part iv)

Please check out the attached remaining 4 slides.

(a) First China slide:

China thinks it should be China, not US, that assumes the world's ruler. Because China thinks US is weak:
(i) The corona debacle and the US:China = 500:1 mortality ratio give an overall picture.
(ii) China thinks US' one-person-one-vote democracy is a joke: Politics is rather professional & complex. How can policies & the fate of a nation be decided by massive immoral, illogical, & ignorant mobs?

China makes some logical sense, to be frank. Imagine a corporation run by a bunch of immoral, illogical, & ignorant mob, not by a professional & experienced CEO. Do we want to invest?

At least I won't waste time & money with such a corporation.

Then, how to fix it?

An excellent solution actually exists. Hopefully we could have some time in the future to introduce the idea.

(b) Second China slide:

The situation might be even worse than Senator Cotton thought. Seemingly the senator was mainly worrying about the military wokeness. That's a Big worry, of course.

But the second Big worry is, US has been financially broken. The socialist Biden already made some contribution merely within 6 months in office, to push up US national debt & inflation. But please make no mistake about it, that the Big Fool contributed $8,000,000,000,000 within merely 4 years.

As explicated in a previous email regarding tax, it turned out that even the highly crowed signature feat of the Big Fool, turned out to be wrong.

In other words: Trump is wrong, again.

However, there exists the third Big worry, which could be easily neglected. As we all know, a war is not just determined by weapons/instruments & technologies/knowledge, but also determined by strategies/tactics/logic/analysis. US may still edge out China in military instruments & technologies in the next 30 years, but US military seems to be weak in logic and is unable to think properly.

The corona debacle suggests such a frightening reality.

(3) Third China slide:

The leaving leader of Germany was horribly wrong about immigration. She literally destroyed Europe. The other destroyer was the leader of France. France is finished, irreversibly. The trio 'socialism+massive illegals+massive liberal Blacks' has put France on the death sentence.

However, the quantum chemistry PhD was right about Russia.

First of all, at the end of the day, race matters. Russians are Whites.

Second, divide & conquer. It would be really foolish to keep pushing Russians toward the biggest challenger of US.

Third, don't we remember saying like 'Customers are God'? Don't worry about buyers being controlled by suppliers. The reality would be more likely the opposite.

(4) The final China slide

It's very good thing that oil price rises, for the mankind. As we all know, the South pole is melting; As a consequence, many many coastal cities would submerge under water. Thus, a rising oil price would suppress oil consumption & reduce carbon dioxide emissions.

For this reason alone, Biden, though a horrible socialist, is correct, that US ought to stop exploring domestic natural resources but resort to importation.

Energy independence is a wrong idea. Why should energy be independent? We shall not set an ad hoc rule, then elevate it to a principle. After all, it is neither written in the Bible, nor a fundamental law of physics. It just could be wrong, or correct only under limited circumstances.

To the contrary, as elucidated before, buying oils from foreign nations, especially from Russia & Persia, can knock out 5 stones by one bird:
(i) Fossils & minerals only can last 100~300 years, and advanced technologies in quark energy and man-made minerals such as man-made gold might take 300 years to come into life.
(ii) Rising oil price could suppress global warming.
(iii) It can help deter socialization.
(iv) It can help control Russia & Persia.
(v) It can help compete US' biggest challenger.

So, energy dependence is a hugely good thing!

By the way: Trump is wrong, again.

(to be continued)

God bless America

dear trumpian fools,

i have been wearing a mask since jan 20, 2020.
& i have infinite 'degrees of freedom' -- a sexy terminology in classical mechanics, lagrangian & hamiltonian analytical mechanics to be specific, in quantum mechanics, in statistical mechanics, & in computational physics.

facts:
masks are enormously effective.

logic:
to understand why, you need expertise in aerodynamics & in statistical mechanics. thats why all the medical/health scientists on this planet failed to convince self-assumed science crackpots.

god bless america

1-US-cases.png
2-UK-cases.png
3-corona-vaccine-mask.png

Dear Professors & Politicians,

Please check out the attached three slides.

OMGosh! 79,000 cases in US!!!
OMGosh! Massive infections in the more vaccinated United Kingdom!!!

So, are vaccines working???

I have been here yelling for half year, and on internet for one year & half, per corona.

I concluded by Jan 31, 2020, that masking is the necessary & sufficient condition to impede, fully stop, & completely eradicate the gigantic virus of corona.

Thus, impose NATIONAL mask mandate, until two months after the disappearance of the final case!!!

God bless America

God bless America

OMGosh! 79,000 cases!!!

So, are vaccines working???

OMGosh! The more vaccinated United Kingdom!!!

physicistfortrump6
Just Now

dear democRatic & trumpian fools,

china: 4,600 deaths, 1,400,000,000 population;
US: 600,000 deaths (including 500,000 maskless trumpers), 330,000,000 population;
a gigantic 500 times of difference!!!

so, what made you still so confident?

stop listening to dr trump!
stop listening to medical/health scientists!
they are all clueless!

the 95% actually refers to the efficacy of generating antibodies by vaccines!
but what the hell is the efficacy of antibodies???
100%?????????

vaccines actually only have 30% overall efficacy!
but masks have 90%!

i concluded by jan 31, 2020 that masking is the necessary & sufficient condition to impede, fully stop, & completely eradicate the gigantic virus of corona!!!

god bless america

10-2024-harris-vs-cruz.png

Dear Professors & Politicians,

The corona lab-leak theory has been brewing for a while. Is it a really viable theory?

I am sorry I actually concluded the whole corona matter by the end of January 31, 2020, including a tiny fraction for the origin of the virus, but as a deep conservative I refrained from speaking up about the lab-leak theory. However, now the Big Conman is stoking again, which would waste Party Lincoln as well as many other Americans a lot of time. Thus, please check out the attached first three slides, and the following transcript:

Dear Trumpers,

On the lab leakage theory:

The UFO paradox has been around the corner over 60 years. I thought this kind of problems should be left for others to solve. But.. anyway, the UFOs are simply mini cyclones.

If you are not convinced, then ask someones with background in aerodynamics or physical oceanography. They probably won't figure out the idea by themselves. But once they are informed about the idea, they should be able to judge the idea properly.

I cite the right above example to enhance your confidence in me, a computational physicist & a political zealot.

Now, the lab leakage theory should be fake. Why?

Let:
A be the probability of generating the corona in nature, in some bat to be more exact;
B be the probability of generating the corona in the Wuhan lab;
C be the probability of the initial spread in the wet market, not somewhere else.

And we know that Prob (A) >> Prob (B).

Then, Prob (A*C) >>>> Prob (B*C)

Thus, the lab conspiracy theory does not hold the water.

Please stop wasting time with the Big Fool, to try so hard to lessen the Big Fool's corona sin. Please focus on other way more significant things, such as how to beat up the corona within 1 month, and how to completely eradicate it within 5 months, globally.

By the way, I won't be intimated by the fact that Biden's scientists are starting to look into the case. I am a logical computational physicist with independent & innovative thinking.

God Bless America

(2) 2024 Presidential Prediction (Dump Trump!!! Part ix)

Please check out the attached remaining seven slides on 2024 presidential prediction. The Big Fool is a Big Obstacle for Party Lincoln to take back the WH, and subsequently to Save America. Thus, Dump Trump!!!

(to be continued)

God bless America

Math tells the virus was developed in nature and proves Trump is wrong, again.

the logical process is in the other post.

by the way, you might think you are very scientific to have "evidence" on lips. but mathematicians & theoretical physicists, two categories of brilliant scientists, don't mention about 'evidence'.

they keep talking about some logical things, albeit they dont frequently use the word 'logic' explicitly.

Dear Professors & Politicians,

Are corona vaccines really working good?

Now, so many super brilliant mathematicians at Harvard & at John Hopkins have been on the three email lists. Thus, we may recap something emailed three months ago. Please check out the following link and the attached 10 slides:

https://www.foxnews.com/health/6k-covid-19-vaccine-recipients-got-virus

As pointed out in the slides, there were three Big logical mistakes in the line of Dr Fauci's thinking:
(1) The denominator was wrong; this is purely a math/logic mistake;
(2) The numerator was wrong; this is a modelling mistake;
(3) The whole methodology was wrong; It is unacceptable for mathematicians, physicists, & engineers to have no idea of 'ensemble', and for medical/health scientists to have no idea of 'double-blind experiment'.

Besides, as pointed out in the final two slides,
(4) there exists the fourth Big logical mistake,
and a massive physics education would help solve an array of US problems, including this one, and even including the rampant racial unrest across vast American land.

Now, if Harvard & John Hopkins medical/health scientists, who for sure are technically very strong but somehow didn't have sufficient exposure to math, don't feel sure about the 3+1=4 logical bugs aforementioned, please discuss with your fellow colleagues in math departments. This is why Harvard medical professors and Harvard math professors are put together in the same email list, and so are for John Hopkins. These mathematicians are mathematically better than me by 1,000,000 times, seriously.

We shall make no mistake about it:
(i) Dr Fauci represents the best part of American scientists. Republican scientists & republican politicians shall not get excited that Dr Fauci is wrong again, in that 90%+ of US scientists are pro-DemocRatic and the statistical average of best liberal scientists seems technically stronger than the conservative counterpart.
(ii) These 3+1=4 mistakes are called 'logical' mistakes, because they are not about facts. We shall distinguish algorithm/theory/logic from data/experiment/fact. They are completely two different categories of species.
(iii) This set of 3+1=4 mistakes undermines all the recent wishful thinking of data in support of vaccinal effectiveness. But the silliness & danger of the vaccinal approach far exceed the issue being presented. Hopefully we can re-address the remaining issues later.

In a long-run, America MUST greatly ramp up math & physics education NOW, otherwise a bitter loss to China in global dominance will NOT be averted.

Why physics should join math education? Because I claim myself as a computational physicist?
(a) Modelling is an absentee in math. Basically, step one is to formulate a problem; step two is to solve the problem. Math addresses the step two only. Physics makes the whole story complete.
(b) Physics is a rigorous precision-science, that it's hard to have different opinions, and needs math badly. Learn by doing, we know. Thus, without physics the partner, math learning could be boring & ineffective to many people (albeit not to me -- if I can make a living by learning math then I would choose to do so for my entire life).

God bless America

So, vaccines are working excellently!

Nearly 6K fully vaccinated Americans got COVID-19 – out of 66M: CDC

"You will always see some breakthrough infections no matter the efficacy of your vaccine," Dr. Anthony Fauci told the outlet.

"Before people get excited about the quantitative number of infections, they need to understand what the denominator is, and we're going to see breakthroughs in numbers that are going to be well within the 90 percent, 95 percent, 97 percent effectiveness rates of the vaccines."

& Dr Fauci got very excited!
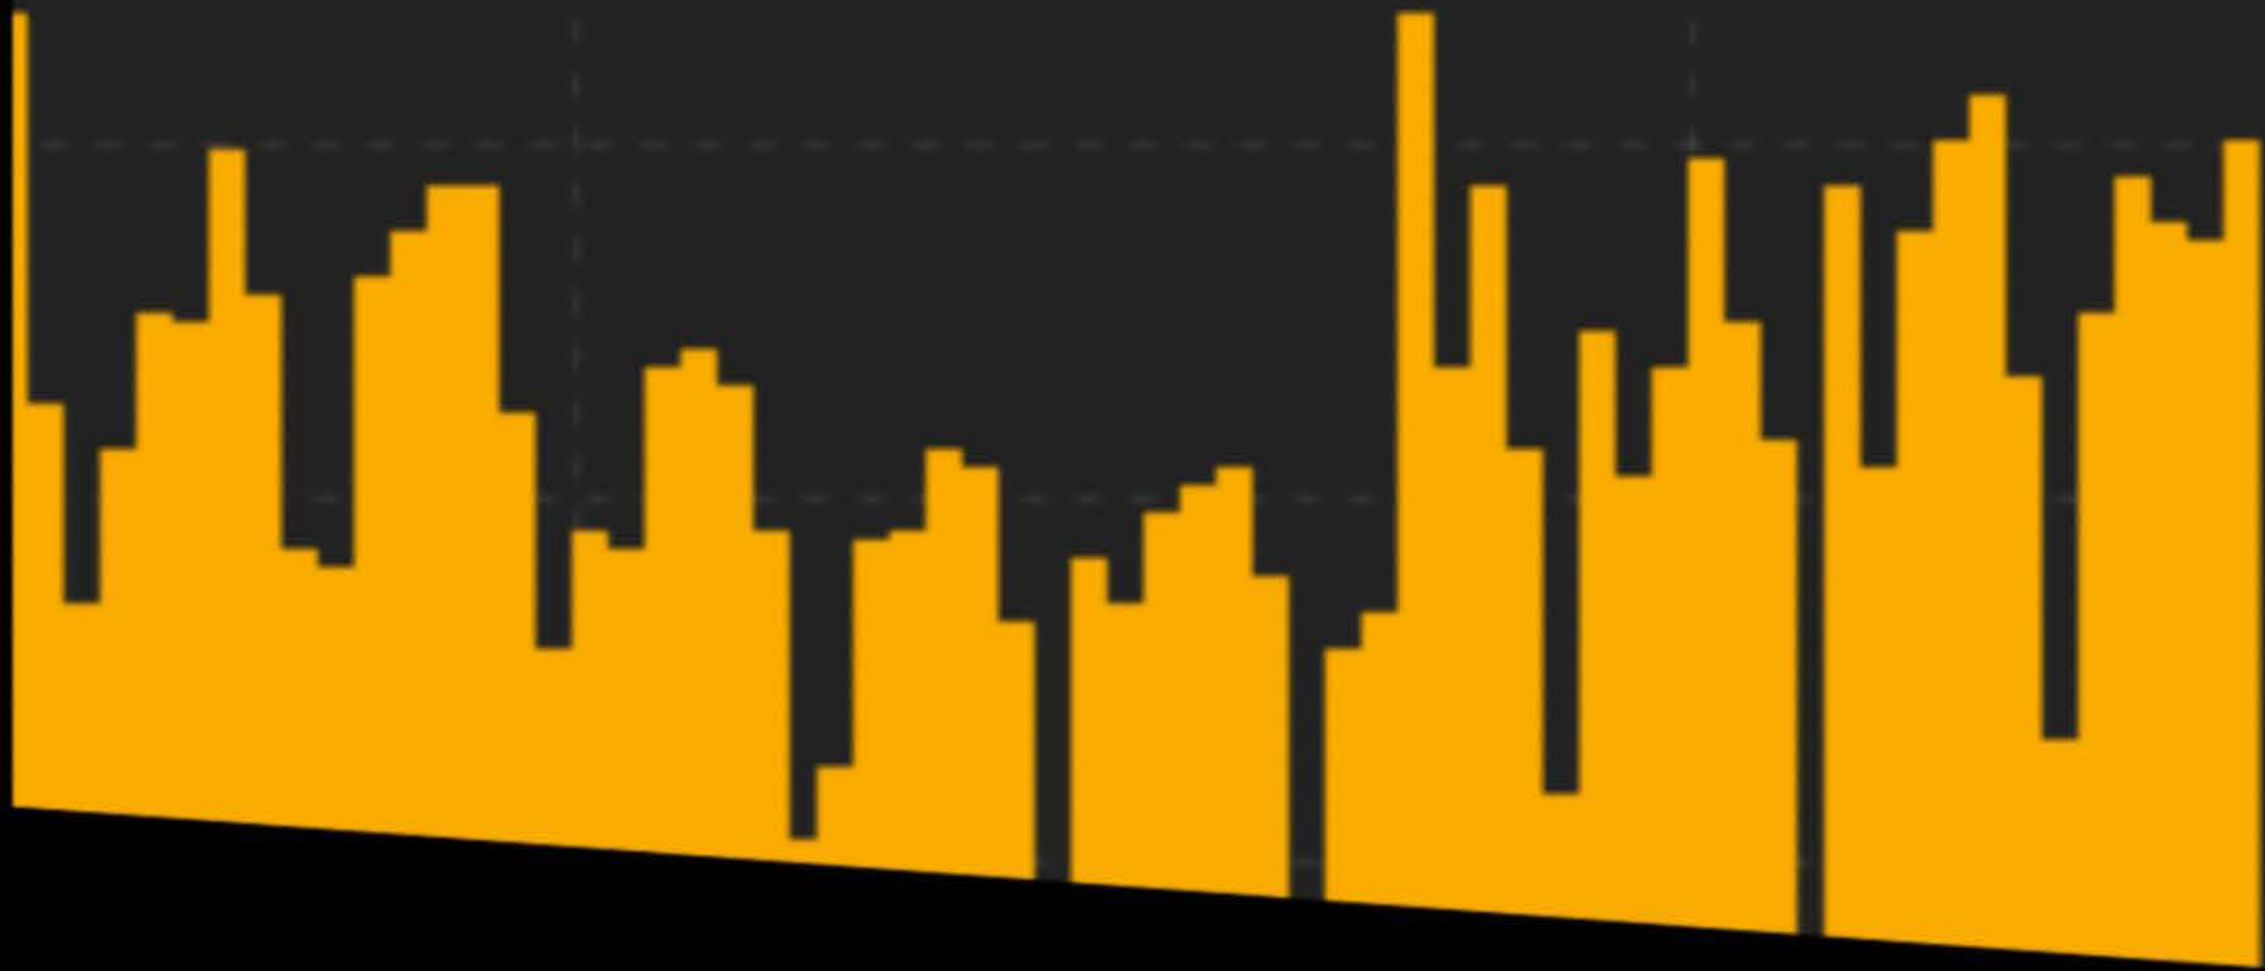

Buta... Why?:
OMGosh!!! 80,000 cases!!!

Nearly 6K fully vaccinated Americans got COVID-19 – out of 66M: CDC

Three HUGE logical mistakes!!!
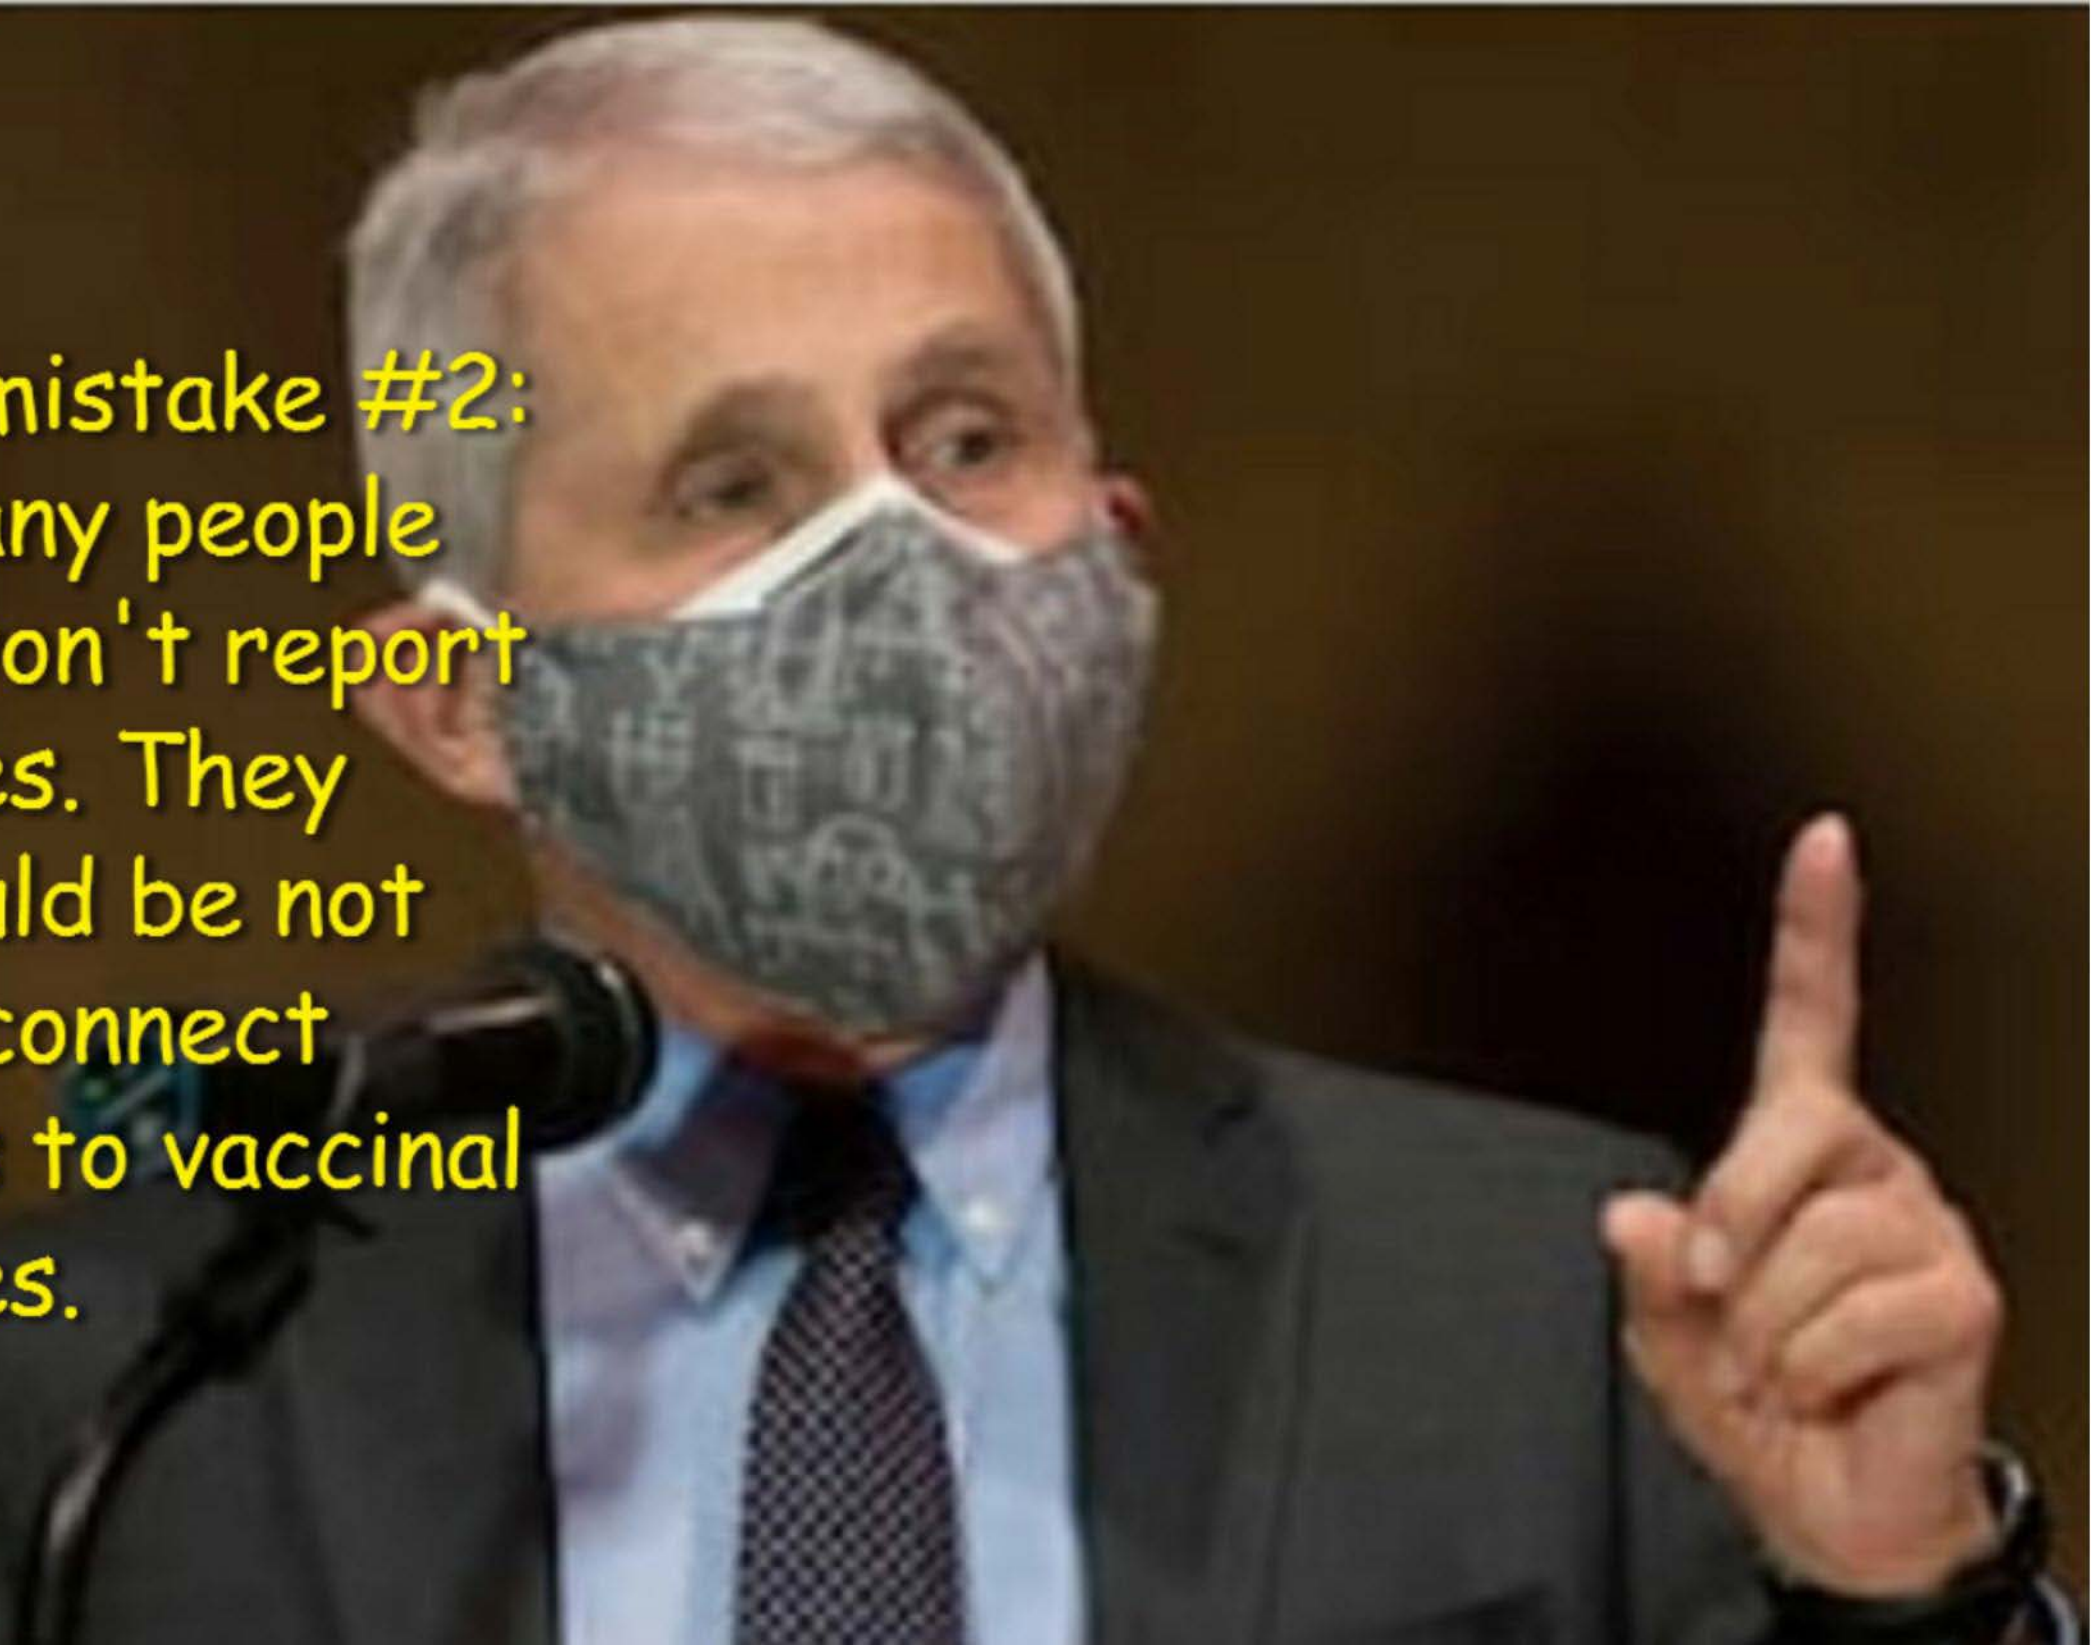

herrera53

41m ago

That's a misleading statistic. What we should be asking is of those who received the vaccine, how many were exposed to the virus. Certainly far less than 66M. This is how stats can be very misleading.

Here is one of three HUGE logical mistakes!

Besides calculus: set & logic, linear algebra, calculus-based probability, elementary numerical analysis -- an excellent combination!

Good?

Difficult?

The only two volumes mysteriously disappeared, among 300 technical books owned by a Ph.D. student.

American brainpower booster

These two self-contained volumes were so well written that a talented ninth-grade girl ever went through at ease.

Subject: OMGosh! 48,000 cases!!!   Tax Tax Tax (part v) (important!!!)

1-us-cases.png
2-tax-v.pdf
3-big-fool-advising.png

Dear Professors & Politicians,

Please check out the attached first slide.

OMGosh!
48,000 cases!!!

So, is vaccination a smart idea???

NATIONAL Mask Mandate!!!

(2) Tax Tax Tax (part v) (important!!!)

Please check out the remaining attachments.

US is broken, for the $28,000,000,000,000 national debt. Based on some judicious considerations, a unified continuous &

smooth function for income tax is proposed for the first time, 50% is recommended for the maximum of US income tax ratio, and 15% is suggested for the corporate tax.

The Big Fool Trump is advising again. To compete money against the reverse-elimination socialization, the physical infrastructure must be funded ASAP. Party Lincoln must stop taking cues from the Big Fool, otherwise a bitter defeat in 2022 is inevitable -- my last major mistake in scientific or political prediction took place in year 2007, on parallel computing.

(to be continued)

God bless America

Tax Tax Tax, Part V

by PhysicistForTrump⁄

July 4, 2021

Based on order of magnitude analysis, 50% is proposed for the maximum income tax ratio and a continuous & smooth function for income tax is proposed

$$y = -12000 + 50\%x - 1154156\ln\left[1 + \frac{x}{100000}\right]$$

And based on several rules, 15% is proposed for corporate tax ratio. Several other special factors are considered to recheck the reasonability of proposed taxes.

1   Income Tax Function

As analyzed previously, the piecewise constant function of income tax ratio, rampant on this planet, looks rugged & ugly and may be replaced by a unifled continuous & smooth cubic polynomial. Unfortunately, it turns out the combination of the high order term and the monetary exponential nature brings in numerical over-sensibility or instability, that a small numerical error during the process of calculation could be amplifled to a large error in the flnal outcome. Thus, the following milder function is proposed instead

$$y = a + bx + c\ln\left[1 + \frac{x}{L}\right] \tag{1}$$

where x stands for income and y stands for tax, L denotes a prescribed characteristic income, to non-dimensionalize x and to improve numerical accuracy, and coe–cients a, b, and c can be determined through several means.

⁄The author of this article has converted from a die hard supporter into a die-hard objector of Trump, however the 'PhysicistForTrump' is retained to identify the same sequence of articles.

2 Order of Magnitude Analysis

Order of magnitude has been introduced before

$$10^0; \ 10^{\frac{1}{2}}; \ 10^1; \ 10^{\frac{3}{2}}; \ 10^2; \,; \,; \ = \ 1; \ 3; \ 10; \ 30; \ 100; \,; \,;$$

which suits scenarios where a multiplicative operation is more appropriate. For incomes which display a more exponential distribution, the order of magnitude could be

$$\$18,000; \ \$30,000; \ \$100,000; \ \$1,000,000; \ \$100,000,000$$

where neighboring incomes increase by increasing order of magnitude, $10^{\frac{1}{4}}; 10^{\frac{1}{2}}; 10^1; 10^2$. For scenarios with constrained end points such as percentages the order of magnitude could be

$$1\%; \ 3\%; \ 10\%; \ 30\%; \ 50\%; \ 70\%; \ 90\%; \ 97\%; \ 99\%$$

where ratios larger than 50% can be regarded as the complements of ratios smaller than 50%. Based on the aforementioned order of magnitude analysis, several quantum points could be proposed for income tax or income tax ratios

† For annual individual income $0 (uber low-income): -$12,000

† For annual individual income $100,000 (middle class): 30%

† For annual individual income $1 (uber rich): 50%

where the negative tax means as a social welfare, the tax ratio 30% also represents for the entire population, and *1* stands for the inflnity.

3 Coe–cients

The aforementioned three quantum points in Section 2 can be used to determine the three coe–cients in tax function (1), where the characteristic income can be set as $L = \$100,000$. After substitution of $x = 0$ into equation (1), the flrst quantum point reduces the tax function to

$$a = \ ¡ \ 12000$$

To apply the second and the third quantum points, equation (1) can rearranged to

$$\frac{y}{x} = \frac{a}{x} + b + \frac{c}{x}\ln\left[1 + \frac{x}{100000}\right]$$

Then the third quantum point at $x = 1$ gives

$$b = 50\%$$

And the second quantum point at $x = 100000$ gives

$$\frac{12000}{100000} + b + \frac{\ln 2}{100000}c = 30\%$$

After elimination of b through the right above two equations

$$c = 1154156$$

Finally, a unified continuous & smooth function for the income tax is obtained

$$y = 12000 + 50\%x \; 1154156\ln\left[1 + \frac{x}{100000}\right] \tag{2}$$

Several additional quantum points can be used to check the reasonablility of the income tax ratio formula (2)

† At income $x = \$1,000,000$, expression (2) gives tax ratio $y=x = 46\%$, which seems reasonble.

† At income $x = \$30,000$, expression (2) gives tax $y = \$2809$, which implies DemocRatic Blacks are goon a love it! Because they don't have to pay tax!

Alternatively, the formula (2) can be rewritten as

$$y = 12000 + \left[50\% \; \frac{1154156}{x}\ln\left[1 + \frac{x}{100000}\right]\right]x \tag{3}$$

Thus for DemocRatic Blacks with income closer to $30,000, formula (3) reduces to

$$y = 12000 + 40\%x$$

In other words, they pay 40% tax annually, meanwhile get a monthly check of $1,000.

4   Corporate Tax

What are basic rules to determine the corporate tax? First, the proflt should be enticing enough for entrepreneurs and investors. In a typical corporation, human cost accounts for 30% and other operation cost accounts for 30%, thus 10% of corporate tax would be desirable, to leave enticing 30% for proflt.

Second, the gross tax of a nation should approximately account for 30% of its GDP. As mentioned previously, 30% is considered as the average income tax ratio for the entire population. Thus, 30%(human cost ratio)£30%(income tax ratio)+30%(proflt ratio)£30%(income tax ratio)+ 10%(corporate tax ratio) = 30%. Perfect!

However, historically the corporate tax ratio has been far higher than 10% and an international agreement on the minimum 15% has been reached for international corporations. As a result, 15% of corporate tax is proposed for all corporations in US, domestic or international.

5   Recheck

Indeed, lower tax (income+corporate) then more money for investment, thus expanding economy. However, if the continued low tax results in more debts (or equivalently in ∞ations), at the end of the day the economy would cease to expand, then shrink. Or from the angle of the Lafier Curve, under the status of too-low tax, the economic increment/gain would be unable to beat the rise of debt, then the prosperity is unsustainable. Here is the US reality:

† According to some theories, if the tax ratio exceeds 50% then a further raise of tax certainly would shrink the economy, but if the tax is below 50% then a tax raise would eventually expand the economy.

† According to some theories, the critical point for sovereign debt is around 2=3 of GDP, beyond which a nation would swirl into an irreversible quantum well and possibly never be able to crawl out. Now after the destructive Trumpian presidency, US sovereign debt has hit a terrifying 4=3 of GDP. At this point of time, what should have been being done is to pray God for the unique status of US currency, immune from the theoretical catastrophe.

4

† US governmental overspending actually is as severe as thought, in that the nation is not socialized yet. The bigger evil is the decades of rampant personal overspending.

† US physical infrastructure has arrived at a point that a blanket renovation is imperative. And to compete money against socialization, the physical infrastructure must be proceeded ASAP, contrary to the Big Fool's recent comment on the bipartisan $1.2T. The total would be around $10 trillions.

† The idea of energy independence turns out to be short sighted, or even silly. US must instead buy foreign resources and push up the international oil price, to 'knock out 5 stones by 1 bird', as discussed before repeatedly. The abolishment of energy independence needs money.

With all these special & vital factors put together, it becomes obvious that, while corporate tax should be remained low to maintain global competitiveness and to expand the economy, the income tax must be greatly ramped up. Like or not, this is the only way to thrive. By the way, even the highly crowed signature feat of Trump's tax cut turned out to be largely wrong.

(to be continued)

The Big Fool is advising again.

To compete against socialism, the physical infrastructure must be funded ASAP.

Subject: Mysteries of Mental Illness

Mysteries of Mental Illness

A four-part documentary film exploring the story of mental illness in science and society.

https://www.pbs.org/wgbh/mysteries-mental-illness/

Best regards,

Kevin Costa

https://pubmed.ncbi.nlm.nih.gov/33176598/

Greetings.

Have the data from this Milanese study been disproved ?   Those are SARS-2 antibodies present in Italian blood draws Sep 2019.

If not, did SARS-2 antibodies first appear in the EU before that, or how might that subject subset be so isolated ?   Regardless, are there similar pre-pandemic blood draw studies in any of 190 countries worldwide ?   2019 blood draw antibodies being perishable, is that not a rudimentary priority inclusive of broad expertise ?

Study or abstract links would be appreciated. Reply sender only or reply all. Thanks.

It looks like DemocRatic Blacks are the enemies within. 97% of all problems in America at the end of the day lead to DemocRatic Blacks, who in turn lead to genetics -- to be scientific & honest.

However, Americans ought to face the reality and solve the big problem peacefully, logically, & fundamentally. On the other hand, China so far has made little contribution to the world, except benefiting itself.

Thus, a solution is proposed as in the attached remaining slides.

(to be continued)

God bless America

while all other races went out of africa and adapted to new environment and mixed together. blacks remained in sunny africa, kept relatively separated from each other & got less wars --- look, there are 1,000 languages south of the sahara.

so, what is the ultimate solution?

find a race featuring the following:
(1) light skin color,
(2) high iq,
(3) explicit gene,
and mate with.

thus, mate with chinese in china to catch up 100,000 years of mutations by single one stroke.

Subject: Mask Exemptions During the Covid-19 Pandemic for people with medical problem, What we should do? What is Guideline in your country?

To all my friends: Hi, how are you? I have a question again. You are always helpful to me.

Sometimes I see somebody is not wearing a mask in public places' like a bank or she is working in a bank without a mask serving the public. Today I went to the bank, and I saw one of the employees, without a mask, when I asked her where is your mask, she said because of medical reasons I can't wear a mask. I went to Manager, and I asked her why she was not wearing a mask. She told me the same thing, and she said according to guidelines it is okay to work without a mask when you have health problem. I asked her if she could work inside one of the office, rather than dealing with the public. She said no. She can work with the public no problems.

Would you please tell me in China or other oriental countries, if somebody has a medical problem, how chinese government handles the situation?

I just don't want anybody to get sick. Would you please give me your scientific opinion.

The way in the Middle East the lady covers their face, is it okay to use that as a mask? Is it safe?

It is safe for other people to deal with her. It was plexiglass in front of her like a cover, but I am still not sure if it is okay.

Do you think this kind of face covering in the Middle East is okay for the people with medical problems, in other countries?

How about the one in the left "purple colour" hat and face covering? or one in the right "black colour" Is it safe? Maybe it is more comfortable for people with problems.

And also please tell me what age the children must use a mask.

How can I say thank you for your kindness?

I love you all. Thank you for your help and information.

Batoul

Smoking Gun! One Month Before COVID Outbreak, Fauci & Moderna Sent "mRNA Coronavirus Vaccine Candidates" To Wuhan Lab-Linked Doctor

Doctor infecting human tissue with bat viruses allowed to help create the "resolution" to the outbreak.

by Kelen McBreen

June 23rd, 2021 11:46 AM ET

Image Credit: Sopone Nawoot / Getty

Documents show Anthony Fauci's NIH and pharma giant Moderna shared "mRNA Coronavirus Vaccine Candidates" with an expert who **mentored the Wuhan bat lady** and "**helped test the COVID vaccine**" over a month before COVID-19 was identified.

Originally posted by *Axios* last year, documents reveal the U.S. government and Moderna teamed up to send material transfer agreements to top specialists just days before COVID-19 was leaked in Wuhan, China.

The transfer agreement was signed by multiple parties between December 12th and 19th of 2019.

According to the official narrative, the World Health Organization (WHO) became aware of a pneumonia outbreak in the city of Wuhan on December 31, 2019.

Not until January 9, 2020 did WHO release an official statement regarding the novel coronavirus found in a hospital patient in Wuhan.

One of the signees of the transfer agreement, Dr. Ralph Baric of UNC Chapel Hill, has extremely close ties with the Wuhan Institute of Virology.

In the material transfer form, Fauci and Moderna ask Baric to "perform challenge studies with the mRNA vaccine in a (redacted) model as described on Exhibit A."

However, "Exhibit A" is also redacted in the document.

Dr. Shi Zhengli, infamously known as the Wuhan "Bat Woman," was a lead researcher alongside Baric until she left the UNC-Chapel Hill lab for the Wuhan Institute of Virology.

In fact, Zhengli and Baric published a paper in 2015 describing, "A SARS-like cluster of circulating bat coronaviruses shows potential for human emergence."

How would they know the cluster specifically associated with the Chinese horseshoe bat shows potential for human emergence?

Well, in their own words, they "built a chimeric by encoding a novel, zoonotic CoV spike protein—from the RsSHC014-CoV sequence that was isolated from Chinese horseshoe bats."

Next, researchers purposely infected human lungs "for HAE cultures" that "were procured under University of North Carolina at Chapel Hill Institutional Review Board–approved protocols."

While "gain-of-function" research was banned in America in 2014, the 2015 Baric/Zhengli paper admits, "Continuation of these studies was requested, and this has been approved by the NIH."

Interestingly, a note at the end of the research paper explains the authors originally omitted the fact that EcoHealth Alliance (EHA) funded their work.

EHA is the same group Fauci's NIH used to funnel money to the Wuhan Institute of Virology where Baric's co-worker Dr. Shi Zhengli is the lab director.

EHA's president, Peter Daszak, was also the only American sent to Wuhan to "investigate" the lab leak theory, which he unsurprisingly dismissed.

In fact, as lead investigator for the WHO investigation, Daszak determined within 3 hours of

visiting the Wuhan lab in February 2021 that there was "nothing to see here."

With Daszak's obvious conflict of interest regarding the Wuhan lab and gain-of-function research now making headlines, he was just **recused from his position** as head investigator looking into COVID origins for the medical journal *The Lancet*.

After Dr. Ralph Baric experimented with gain-of-function research, he created the coronavirus treatment drug **Remdesivir for pharma giant Gilead**, a company that has received over $6.5 billion from Fauci's NIH in the past few years.

Now, **Baric has teamed up with scientists** to create another money-maker in what they call a "universal vaccine" that targets coronaviruses.

"The vaccine has the potential to prevent outbreaks when used as a new variant is detected," said Baric.

"With this strategy, perhaps we can prevent a SARS-CoV-3," a co-creator of the universal vaccine ominously stated.

In 2018, Baric spoke at a conference on the 100-year anniversary of the 1918 Spanish Flu Pandemic and explained one day somebody could sell vaccines to people who want to vaccinate themselves at home.

"Most likely, somebody will come up with a way to sell that in a legal way, not a safe way," he said.

Could the "universal" coronavirus vaccine he just helped create be marketed for at-home use?

Baric even detailed how one could hypothetically "make money in the next pandemic," providing a "global catastrophe opportunities" chart.

See the full speech below.

Another entity that would like to keep the origins of COVID-19 a secret is the Chinese military, **which was on the record conducting secret research** at the Wuhan Institute of Virology.

A new report by *the Washington Post*, an outlet that previously denied the lab leak theory, **acknowledges** classified military research was carried out at the lab and that records will almost certainly remain sealed by the Chinese government for two decades.

"The secrecy may help to explain why efforts to confirm or disprove the lab-leak theory of the pandemic's origins have made little progress," the report admits.

As Rep. Mo Brooks (R-Ala.) recently asked, why would a group of scientists intentionally take dangerous viruses that don't harm humans and alter them in order to do so if not for military purposes?

This reporter didn't see it coming

��� **pic.twitter.com/hHfmnFo2SA**

By the way… if anyone was wondering why the internet overlords are censoring the lab leak theory, it could be the fact that **Google has been funding EcoHealth Alliance for over a decade.**

Ralph Baric: COVID-19 Wuhan Lab Collaborator Tells Audience How To Make Money During A Pandemic

Infowars

June 23, 2021

From the University of North Carolina, Ralph Baric, the gain-of-function researcher who worked directly with the Wuhan lab, describes how quickly mRNA vaccines could be made and how to make money during pandemics.

Dear Professors & Politicians,

Please check out the attached first slide for the corona rebound in the United Kingdom. It's also a piece bad news for vaccines.

(2) Filibuster Filibuster Filibuster

Please check out the attached 2nd, 3rd, and 4th slides and the attached pdf file for an analysis on the senatorial filibuster.

(3) DC statehood

Please check out the attached final slide on DC statehood.

American statehood architecture is an interesting & brilliant design!
(i) Each state is like a country. It has the full functionality of a country, except military.
(ii) All states share a common land, donated by Maryland & Virginia, and share a common government.

(iii) Each state has two representatives in the common government, as every nation in the world has one representative in the United Nation, no matter its size.
(iv) Each state has representatives for its people in the common government.
(v) DC remains neutral.

A logically beautiful & pleasing design! Great founders!

Thus, DC absolutely must not be included in the Senate. That would be a logical disaster!
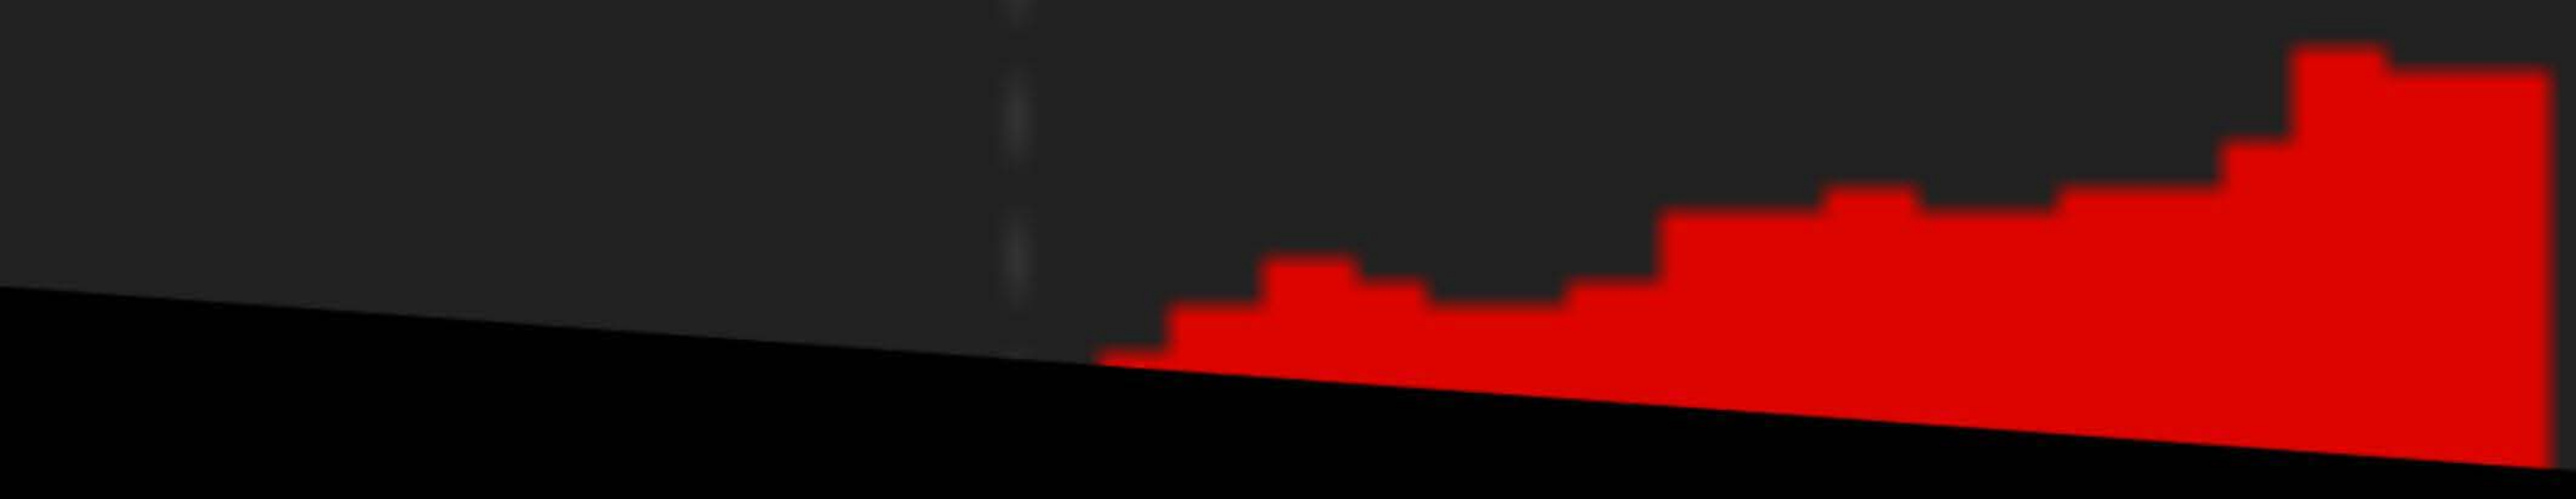

Also, if DC is included in the Senate:
(i) It violates the neutral status of DC, since people in Capital live in DC;
(ii) It makes more sense for DC to return Maryland;
(iii) And after that, Maryland has to donate land again, to form a new DC...

1 cent:
To follow the same logic flow, House could be expanded from 435 to 436, with DC included.

God bless America

UK corona is resurging. Very simple: it's an exponential, thus 100 makes little difference from 10,000. You must press on to the very end.

It's interesting to observe those who are trying very hard to destruct America are mostly Blacks.

Filibuster

by PhysicistForTrump

June 21, 2021

(a)

(b)

Figure 1: Filibuster, (a) Senator Lindsey Graham, R-SC, (b) Senator Tim Scott, R-SC.

Figures 1 (a) and (b) give a basic idea of the ongoing Washington wrestle over the fllibuster. (The author of this article was a die-hard supporter of FP Trump, but has converted into a die-hard objector of Trump, albeit will remain a die-hard supporter of Party Lincoln. To identify the same sequence of articles, the 'PhysicistForTrump' is retained.)

1 A Brilliant Design

How to make a good policy?

† Phase I: Be bold, imaginative, and inclusive, to put everything on the table. This is an induction/expansion process. House was designed to serve this purpose.

† Phase II: Be prudent, logical, and selective, to narrow down the optimal policy. This is a deduction/condensation process. Senate was designed to serve this purpose.

The expansion-condensation pair is quite ubiquitous in the universe. For instance, the energy of electromagnetic waves propagates at 'packet' form, which looks like an expansion-condensation pair, and we know, it propagates at the speed of light. Thus, the House-Senate pair is a brilliant design. Once again, the brilliance embodied in US political architecture is admirable.

The senatorial fllibuster is a brilliant design too. It flts in the large gap between simple majority and super majority, and it corresponds to convergent & stable series in mathematics. Without the fllibuster, the political pendulum would swing from one extremity to the other, corresponding to divergent & unstable alternating series. In the one-person-one-vote democracy with more than one major political party, such alternating series imply self cancellation and would secure a concession to the autocratic China.

2 A Little Renormalization

Nonetheless, the concurrent fllibuster rule contains two inconsistencies:

† Simple majority: 6/12+ (51 votes to get a bill passed)

† Filibuster: 7.2/12 (60 votes to get a bill passed)

† Super majority: 8/12+ (67 votes to get a bill passed)

In the fllibuster case, the numerator isn't a whole number, and the '+' is missing in the exclsuive/exclusive treatment of the boundary. To make the rule simpler & smoother, the fllibuster could be renormalized as:

† Filibuster: 7/12+ (59 votes to get a bill passed)

Senators	State	Red /Purple	Close Election	2022 /2024	Political Prospect	Political Views	Character & Logic	Overall Chance	Carrot & Stick
Joe Manchin	WV	6	1	0	1	6	1(?)	15	C
Jon Tester	MT	5	1	0	2	2	1(?)	11	C & S
Mark Kelly	AZ	1	1	2	2	2	1(?)	9	C & S
Kyrsten Sinema	AZ	1	0	0	3	3	1(?)	8	C
Maggie Hassan	NH	-1	2	2	2	1	1(?)	7	C & S
Catherine Masto	NV	0	1	2	2	0	1(?)	6	S
Sherrod Brown	OH	4	0	0	1	0	1(?)	6	S
Raphael Warnock	GA	1	1	2	2	-1	1(?)	6	S
Jacky Rosen	NV	0	1	0	2	1	1(?)	5	C & S
Gary Peters	MI	0	2	-2	2	2	1(?)	5	C & S
Bob Casey Jr.	PA	1	0	0	2	1	1(?)	5	C & S
Jon Ossofi	GA	1	2	-2	3	0	1(?)	5	S
Tammy Baldwin	WI	1	0	0	2	0	1(?)	4	S
Debbie Stabenow	MI	0	0	0	1	0	1(?)	2	S
Angus King	ME	-1	-1	0	0	2	1(?)	1	C
Jeanne Shaheen	NH	-1	-1	-2	1	2	1(?)	0	C & S
Dianne Feinstein	CA								S

Table 1: Persuadable senators could be narrowed down through 6 factors, color of the state, contentiousness in recent election, time correlation, political prospect, political views, and character & logic. The table was created mainly in March 2021 thus some information might have been outdated and the analysis might be premature.

3 Persuadable Senators

An analysis on persuadable Democratic senators is arranged in Table 1, where 'carrot' means praises and sometimes sofiers.

4 Carrot & Stick

It takes only three months to abolish the fllibuster and pass slew of rabid radical Democratic destructive bills, and per status in quo, Party Lincoln is all but certain to lose several senatorial seats, possibly 6 net seats, in the 2022 midterm, in that Trump, the biggest RHINO hiding within Party Elephants, has been flghting like hell to gut the party. Thus, real Republicans

POLITICS
Manchin on filibuster: WV senator dodges questions on potentially lowering threshold to 55

(a)

Politics
Angus King: I'm 'very reluctant' to abolish filibuster

(b)

Figure 2: Filibuster, (a) Senator Joe Manchin, D-WV, (b) Senator Angus King, D-ME.

must fight like hell to press on persuadable DemocRatic senators, so that even after 2022 the fllibuster still could be possibly preserved. Some exemplary cases are as follows:

† Senator Joe Manchin: Bring a carrot only, and continue to praise him and convince him, such as about the lowering of the threshold as shown in Figure 2 (a).

† Senator Jon Tester: Bring both carrot & stick, and press on very hard, for a stance. Remind the senator of the redness of the state. Of course don't forget to bring with convincing arguments.

† Senator Mark Kelly: Bring both carrot & stick, and press on very hard. Before, the senator promised to vote by logic; after, he voted by tribe. Promise made, promise broken.

† Senator Sherrod Brown: Bring a stick, and press on very hard, for a stance. Remind the senator that Ohio is red.

† Senator Raphael Warnock: Bring a stick, and press on very hard. As in Arizona, in purple states an adverse stance on fllibuster or a dodge may not hurt, but pressing on is still very good, and saves way more money than an ad blitz.

† Senator Angus King: Bring a carrot, since the senator expressed the reluctance (Figure 2 (b)).

4

† Senator Dianne Feinstein: Bring a carrot. The senator will retire at the end of the term, thus could vote by logic.

5 Pathlines

How to press on? In non-campaign mode, pathlines include:

† Lobbying: The most e–cient approach is to lobby, i.e., to directly talk to persuadable senators. But good arguments must be well prepared in advance. This approach costs zero money.

† DemocRatic Media: The second most important approach is to foray into DemocRatic media to directly talk to 80,000,000 swing voters. This approach costs zero money and can produce a few byproducts. Party Lincoln may dispatch so-called RHINOS to fulfll the task, since they are more welcomed there.

† Protest: After the Capitol riot misled by Trump, Republicans may be scared by the idea of protesting. However, peaceful street protest is still flne, and useful to pressurize individuals. And this approach could possibly make a big piece of news and draw wide attention, and it costs zero money.

† Emails/mails: Emails/mails ain't efiective, but due to extremely low cost the e–ciency of this approach isn't low.

There are several other approaches, but they cost money and suit better in campaign mode.

6 Summary

Party Lincoln has been working very hard, but far from hard enough yet. A lot of basic work hasn't been done yet. Make no mistake about it, that as long as Trump stays in the way, the Party is all but certain to lose 2022, and 2024. Thus, Party Lincoln must flght like hell.

4-hannity.png
5-hannity.png
6-big-loser.png
7-big-loser.png
8-big-loser.png

Dear Professors & Politicians,

Please check out the attached first slide as well as the following link:
https://www.foxnews.com/health/brain-scans-coronavirus-significant-grey-matter-loss

If true, corona vaccines especially mRNA vaccines may result in similar long-term damage.

(2) American First?

Is the 'American First' a smart idea or a smart slogan?

Let's begin with an example. America buys more from France than sells to France. Thus if tariff free, America loses and

France gains. So, Trump was right again?

We have to look at the whole picture. We have to compare the amount of the direct loss of trade deficit with France against the amount of the direct and indirect losses of the alienation with such a vital ally. Many indirect losses may not be obvious. For instance, France might seek to sell advanced technologies to China to compensate the trade loss due to US tariff.

Under many circumstances, America First is actually narrow-minded or shortsighted, that a good solution in a small picture could be a bad solution in a big picture, or that a good solution for the short term could be a bad solution for the long term. By an inspection via naked eyes, we may judge the tariff on China was good, but the tariff on France seemed bad.

Even if 'America First' is good for a specific case, what is the point of speaking up loudly to the world? To alienate more allies? To expose more cracks for China to exploit and wield a 'divide & conquer'? Trump's inept fiddling was just ridiculous.

So, Trump was wrong again.

(3) Energy independence

Why US must be energy independent? It is written in the bible? We couldn't find it. It is about facts? We don't get it. It is about logic? We will just see the opposite, as to be explicated in the next section.

We shall only follow three matters, God, facts, and logic. God is about something good & right, and hard to elucidate -- like the axioms in mathematics. Facts are like islands. Logic is like the connection among islands. Without logic, facts are messy & disordered, and can't form a systemic & coherent & consistent force. We shall avoid worshiping any person, who might be evil & wrong. We shall avoid digging silly infinite quantum wells, and jumping in. Then, we may never be able to crawl out.

(4) An analysis on the US-Russia summit

Please check out the attached remaining slides. Instead, US ought to buy Russian energy and push up the oil price, to knock out five Big birds by one little stone:
(1) Natural resources are precious. Try the best to preserve them.
(2) Divide & conquer. Control Russia and make Russia the arm stretch of America.
(3) High price can slow down the pace of the America's rival.
(4) High price can reduce global warming.
(5) High price can make the DemocRatic destructive & irreversible socialization less plausible.

(5) Dump Trump!!! (part viii)

Per the aforementioned, Dump Trump, a Big China bot hiding in America!

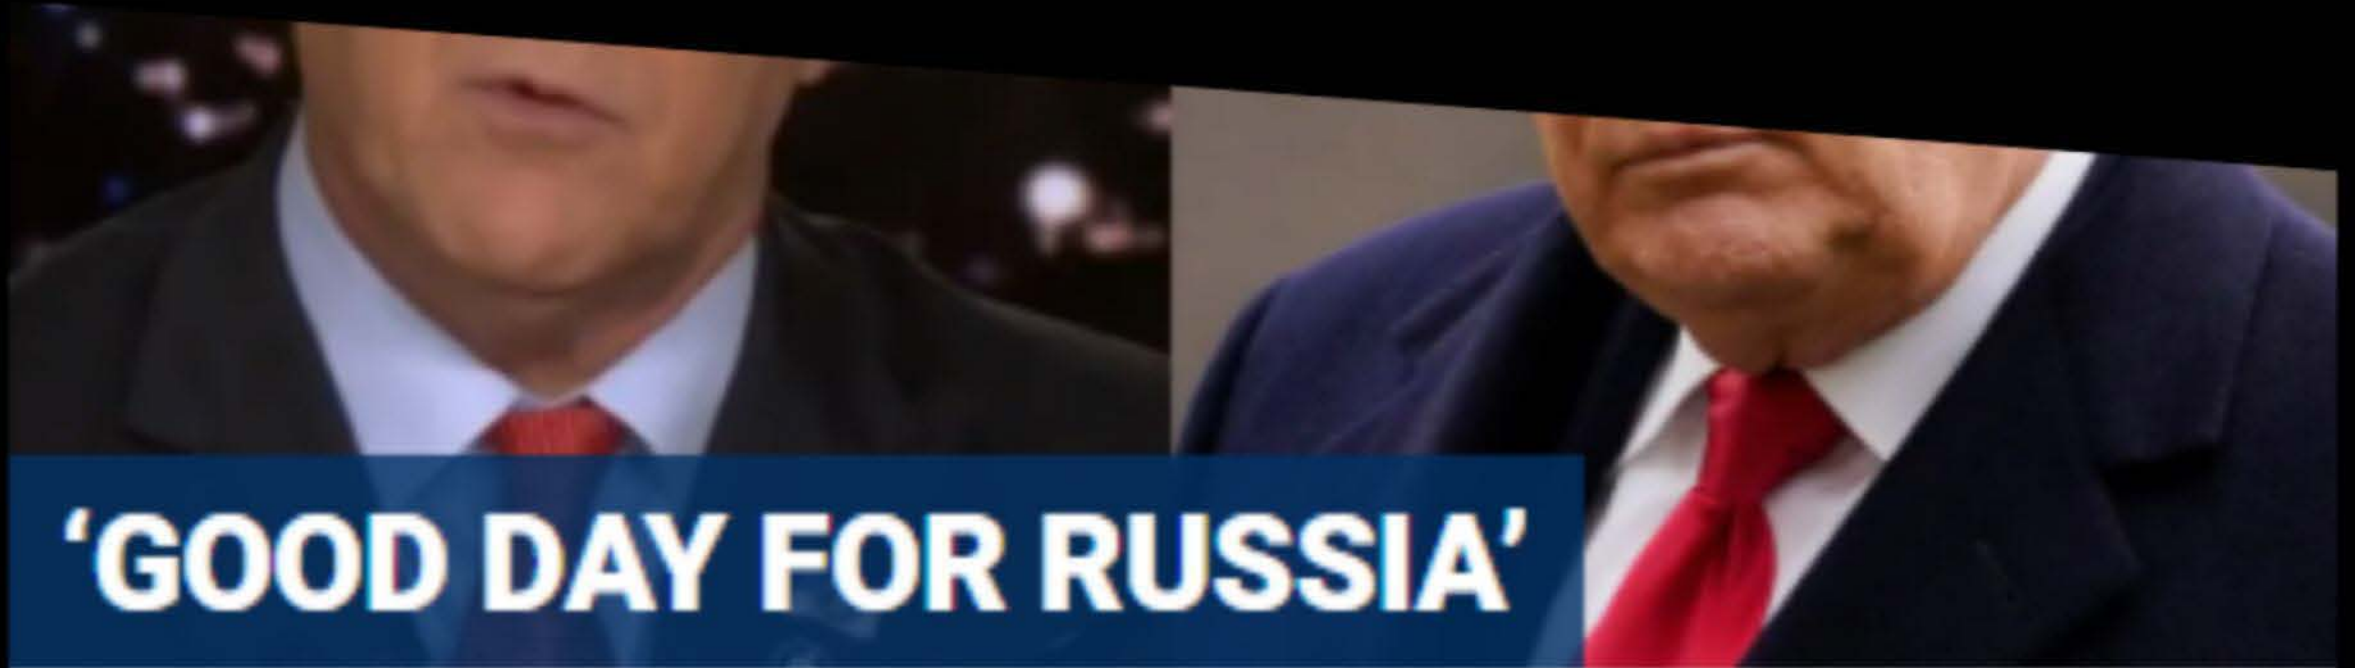

God bless America

OMGosh!
Long-term
effect!
What about
mRNA?

HEALTH

**Brain scans of coronavirus patients suggest 'significant' grey matter loss over time: study**

If logical enough, Hannity should have figured out Trump is the Big destructive RHINO hiding in Party Elephants, thus stops invoking Trump.

'GOOD DAY FOR RUSSIA'
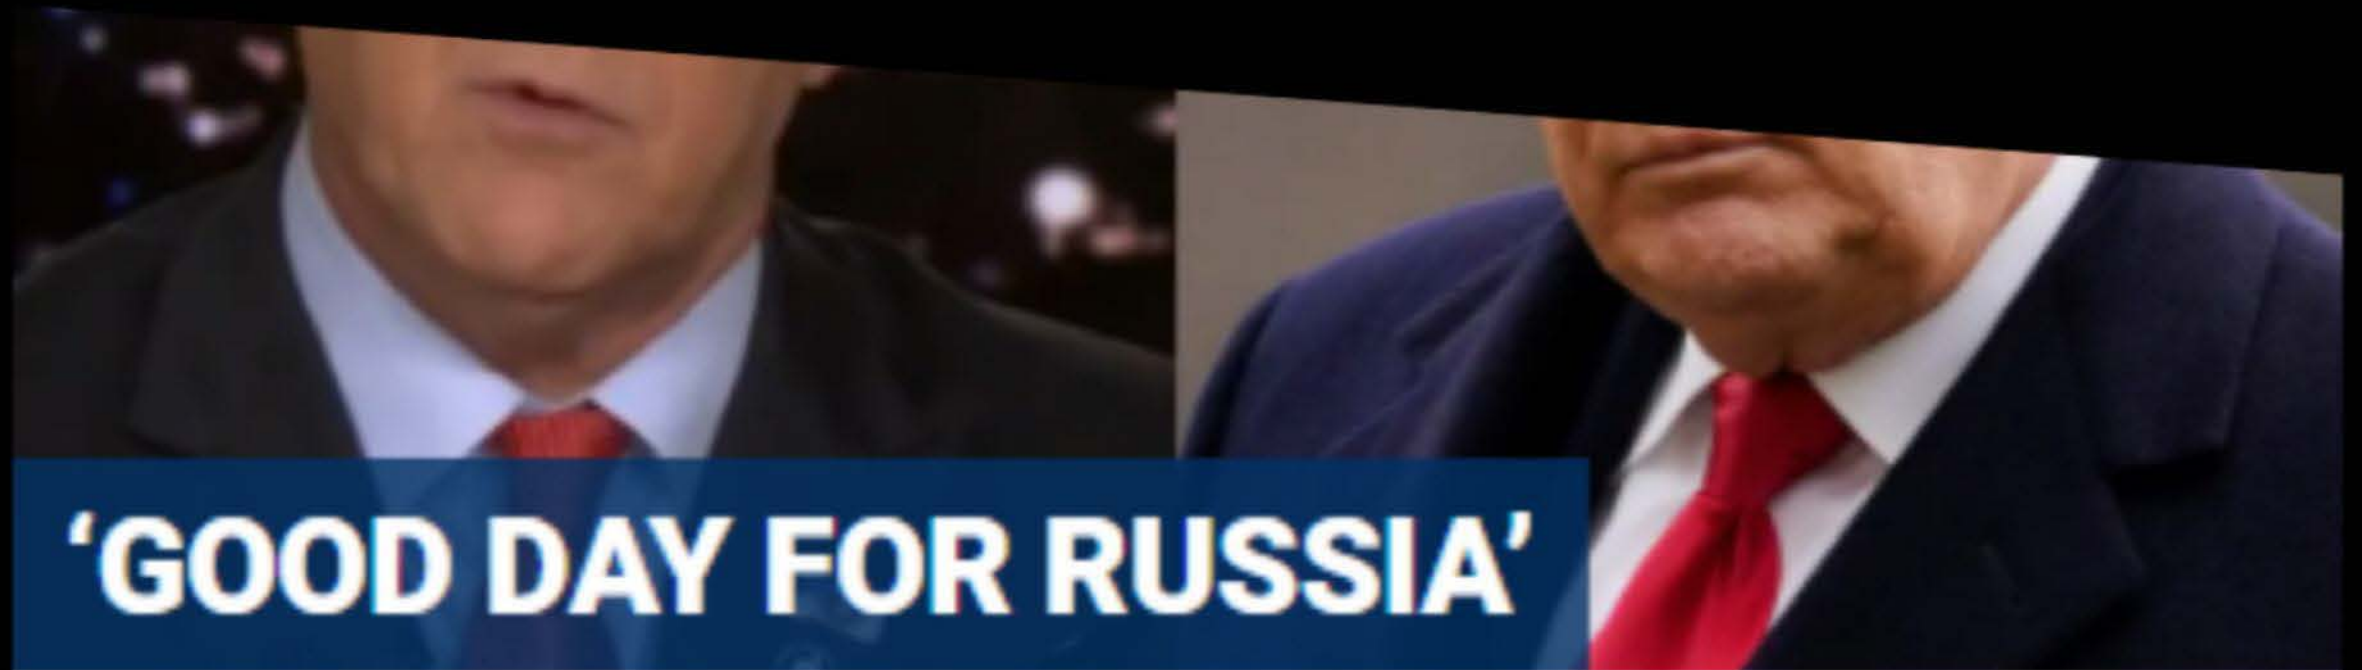

Trump analyzes Biden-Putin summit in 'Hannity' exclusive

What? Trump analyzes? OMGosh, is a fool capable to analyze? In mathematics, 'analysis' is rather a forbidding terminology.
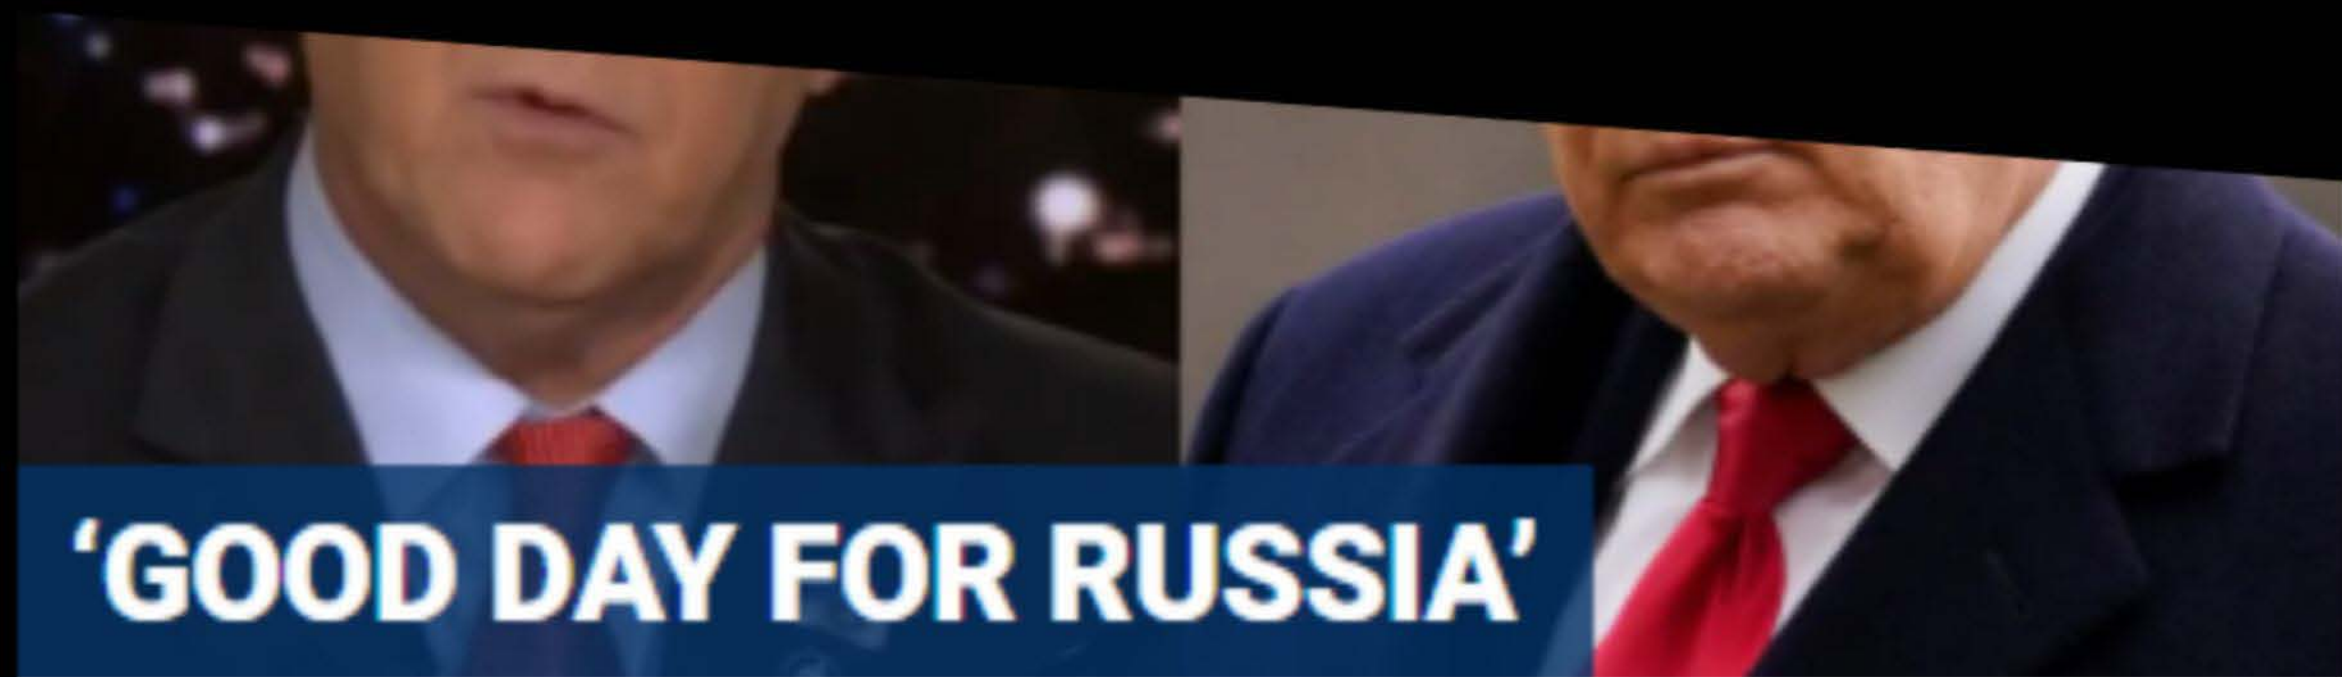

'GOOD DAY FOR RUSSIA'

Trump analyzes Biden-Putin summit in 'Hannity' exclusive

Look, the Big Fool even can't figure out simple masks. How can he figure out the international quantum entanglement?

'GOOD DAY FOR RUSSIA'

Trump analyzes Biden-Putin summit in 'Hannity' exclusive

Divide & Conquer, Carrot & Stick.
If still don't get it, then just keep reciting it. Hopefully
someday one may all the sudden figure it out.
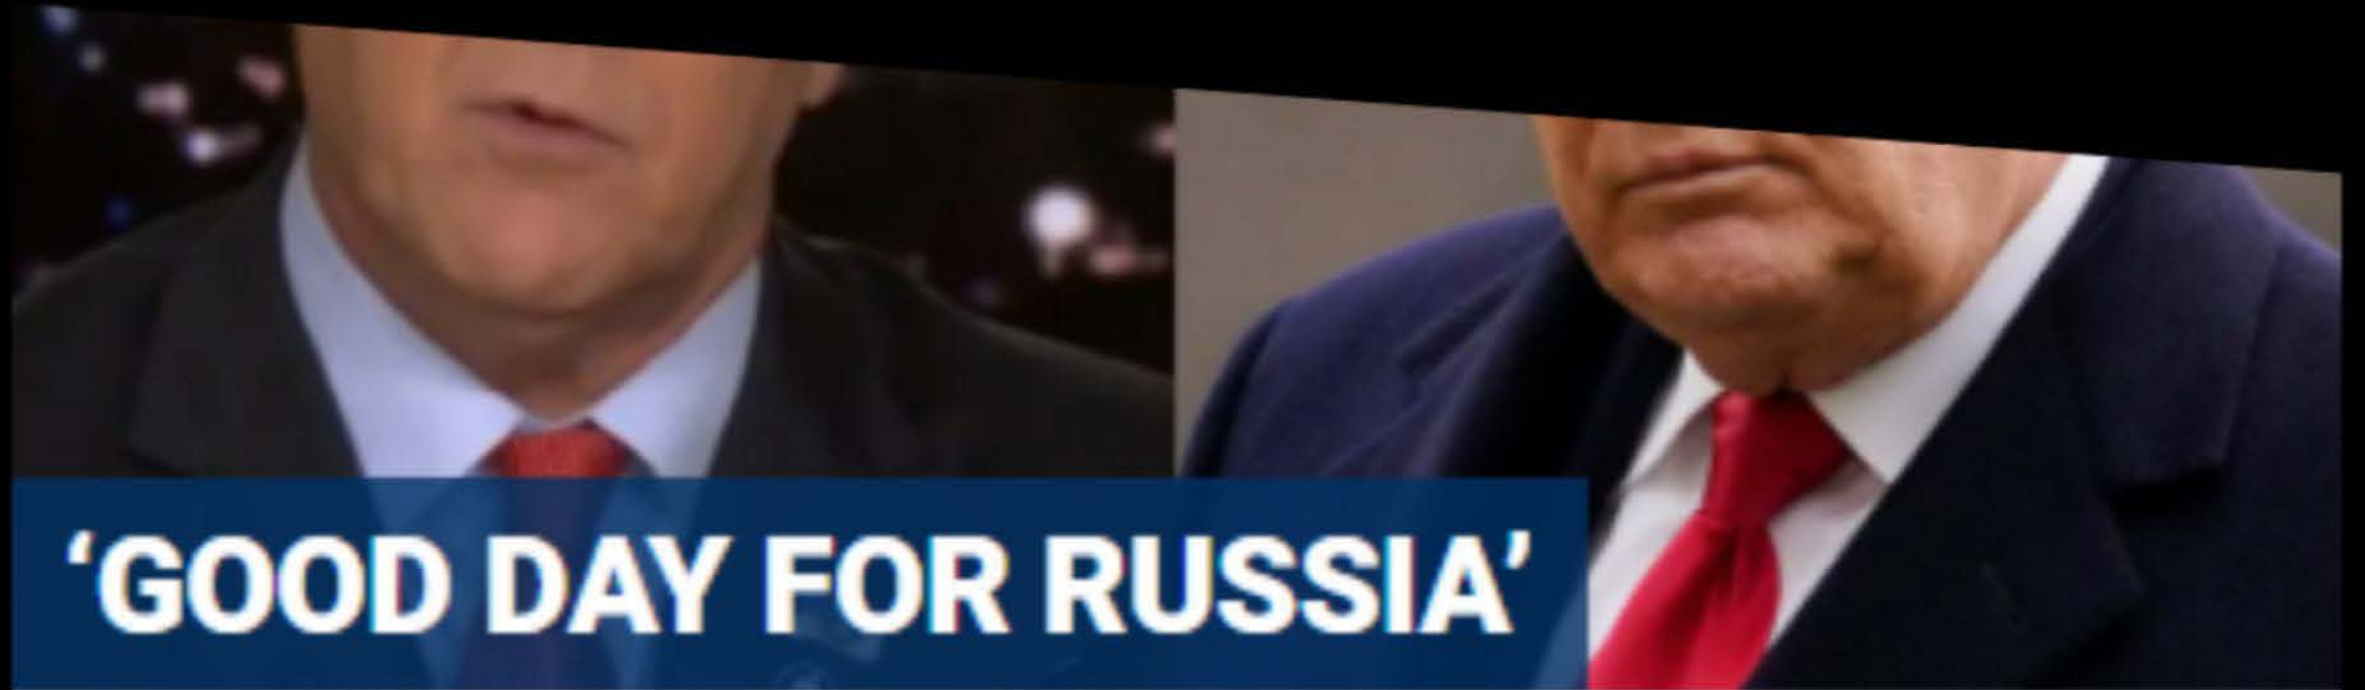

'GOOD DAY FOR RUSSIA'

Trump analyzes Biden-Putin summit in
'Hannity' exclusive

Biden-Putin summit: Who won and who lost? Experts offer key takeaways

think Biden may have played his

Conservation laws of physics? Why not proportionality rule? As we know, y=a+bx implies both proportionality rule and conservation rule.

Biden-Putin summit: Who won and who lost? Experts offer key takeaways

Biden may have played his

Obviously, both won. The loser is the BigGuyNation who has a chemical bond with Russia.

Biden-Putin summit: Who won and who lost? Experts offer key takeaways

...think Biden may have played his

US ought to preserve domestic natural resources, buy Russian oil & minerals, and push up prices. One stone knocks out five Big birds.

Subject: OMGosh!!! 600,000 deaths!!! Dump Trump!!! (part vii) About the emails

1-trumper.png
2-trumper.png
3-calculus.png

Dear Professors & Politicians,

OMGosh!!!
600,000 deaths!!!

(2) Dump Trump!!! (part vii)

Please check out the attached first two screenshots.
Dump Trump!!!
(to be continued)

(3) About the emails

The email lists have been just expanded. Before, medical/health scientists in general, Republican politicians, and Harvard medical/heath scientists were included. After, Harvard mathematicians, John Hopkins medical/health scientists, and John Hopkins mathematicians are added in.

Who am I? In statistical average, I can be called a computational physicist. I am also a political zealot. I have been a die-

hard supporter of FP Trump for 5 years, but recently converted into a die-hard anti-Trumper. Nevertheless, I will remain as a die-hard supporter of Party Lincoln.

Why emails?
(a) Through the corona debacle, American weakness is fully exposed. The leading issue actually is the illogicality -- a great many of Americans may not have extracted & identify this. Illogicality has permeated every corner of the vast American land, among the general public, media, politicians, and even scientists. Rampant illogicality disqualifies Americans from playing with democracy.

(b) Some might not be aware of, but America, as well as the world, is facing an array of great challenges. On the other hand, the next 30 years define the next 1,000 years. Unfortunately, America seems unable to meet the challenges, per status in quo.

(c) The tragic corona debacle serves as a vivid case study, to fix the logic. Professors in two departments at two universities are purposely put on the email list, hopefully to promote more interdisciplinary communications.

(d) American political ecosystem needs, badly, more scientists especially mathematicians and physicists get involved.

(e) America must massively ramp up education, especially math education. Basic calculus ought to get into pre-college education. Please check out the attached third screenshot.

How many prospective emails? About 30. Then, only politicians may continue to receive some emails, sporadically. For those annoyed, please simply ignore these emails. Sorry for that, but ignoring an email is way way more time-efficient than writing an email.

God bless America

Dear Doctors & Politicians,

Please check out the attached first slide. An LA doctor and his wife got infected months after taking double vaccines. One may bring out the same old argument: It is never said corona vaccines have 100% efficacy.

But that pharmaceutical efficacy refers to the efficacy of creating antibodies by vaccines, right? How is the efficacy of antibodies in creating immunity, 100%???

Is it appalling the entire body of world's medical/health scientists don't differentiate these two completely different concepts.

(2) Dump Trump!!! (part vi)

the only RHINO in party Lincoln is Donald J Trump.
hang donald trump!!!

hang Donald Trump!!!

true, but equally clueless. how can the 82-year-old biden be on the ticket again? obviously it will be harris.

N nunyabizz...

37 minutes ago

If the republicans want Biden to win, then put Trump on the ticket.

Reply 👍 9 👎 9

8+ years. Harris will also win 2028.

cocostik7779311
24 minutes ago

I hope trump runs again. That will definitely guarantee four more years in the White House for the Democrats.

Reply   👍 6   👎 12

And, if DemocRatic election law is imposed, massive illegals are legalized, and socialist agenda is materialized, it could be 300 years.

whitejakefromstatefarm

6 minutes ago

Desantis and Noem or Scott. I want Trump to just go away. He will energize the left if he runs. I really got tired of wondering what he would say during his time in office to give them ammunition. He's divisive and immature. We need a real leader, not a spoiled brat.

a civil war led by a weakman crowing for no-war presidency?

Actually even Trump's policies were wrong here & there. Many were shortsighted, or illogical during implementation.

S123

1 hour ago

I hope Trump doesn't run - if he is the Republican nominee, Biden/Harris would win. Trump is a polarizing figure just like Hillary Clinton and he can't win. I would like someone younger who believes in Trump's policies such as DeSantis or Haley. If Trump runs, I will stay home and not vote (just like in 2020) even though I voted for him in 2016. *(Edited)*

Dear Doctors & Politicians,

The corona situation in UK doesn't look good. Please check out the attached first slide. As the vaccination makes progress, the cases in UK instead ticks up. Of course logically speaking one may argue that without vaccines the UK situation could be much worse thus vaccines have been making a gigantic contribution, but the relatively rapider decline of the curve in the absence of vaccines suggests vaccines fail to function on a par with other measures such as masks & lockdowns.

(2) Dump Trump!!! (Part v)

(a) Trump's IQ

Putin just said if Trump wasn't smart he wouldn't be elected as the president. Please check out attached second & third slides.

First of all, while Putin is very smart (and evil) in domestic political fighting, he fails to display smartness in handling Russian economy, and fails to display great smartness in handling international relations. Let's look at the Russian GDP per

capita growth. It is horrible. Russia abounds in natural resources and abounds in sharp brains. But Russia failed. Why?

Obviously one of reasons is, the leaders ain't smart enough.

As to the international relations, Russia could handle way better. If Putin possesses great smartness, he should have convinced President Bush or President Obama, that Russia is no enemy to America, that Russia is willing to assimilate into Western civilization, and that Russia is willing to break up the chemical bond with China whose population is of a totally different race, culture, and language, who has thousands of miles of border dispute with Russia, who could grow as big as 10 Japans, and who wants to be the world's ruler.

Thus, Putin is smart, but not that smart. As a consequence, the probability of his analysis and judgement being wrong isn't low.

Secondly, why Trump made 2016? Because of smartness?

The leading factor was, he was interesting and in US history never had a billionaire, and an outsider, been the president. In other words, he offered lots of imagination, or day dreaming.

Then, during his presidency and especially during his fight for the reelection, his IQ was fully exposed. Recall the presidential interviews 2020 on ABC and NBC, this guy even can't speak. He just kept repeating separate statements. He couldn't glue those statements together by logic. He couldn't respond per question and easily went astray.

Look, with the better ideology of conservatism, he was disgracefully trashed by a senile man with poor memory. Why? Because the senile man possesses a better logic.

And he kept lying. People lie. It is possible that no person on this planet could be found that never lies during her or his lifetime. But few people lie that often, and almost no people lie that pointlessly & foolishly.

Biden lies too, but he lies with clear aims and he lies big. Biden doesn't lie on small matters. This is the strategy of many smart people, that they keep honest as possible as they can on small matters, to establish their credibility. Then, they lie on big matters, to gain big.

But Trump kept lying pointlessly & foolishly.

To this point, we may confidently conclude Trump is a low IQer.

(b) Destructive

Please checkout the attached slide 3-destructiveMan.png for the explanation of a critical point in economics. Trump pushed up US national debt by $8T. That is horrible and destructive!

(c) Classless

Please check out the attached slide 4-classlessMan.png and the following link:
https://twitter.com/ProjectLincoln/status/1403363032818929664

LincolnProject is disgraced, for its sex scandal. However, facts supplied by it are still facts.

(d) Corrupt

Please check out the attached slide 5-corruptMan.png and the following link:
https://abcnews.go.com/Politics/wireStory/seized-house-records-show-trump-admin-78234981?cid=clicksource_4380645_5_film_strip_icymi_hed

This is another Trumpian corruption. Previously we already have many corrupt examples like the Trumpian attempt to abolish the filibuster, the earmark, and the $2,000 check.

This guy is simply the most corrupt rhino hiding within the party of elephants. Ironically, this animal keeps mentioning Washington establishment.

Now, we may even start to think that the political persecution of the first impeachment inflicted by the vicious Pelosi was actually justified.

(e) Weakman

Trump pretends to a strongman, but numerous evidence just proves the opposite. One of such is the aftermath handling of the Capitol riot. It was not an insurrection but a riot evolved from a protest. Those rioters, misled by Trump, were actually patriots and backbones of America. They are under political persecution now. But has Trump said a single word on behalf of them?

Please check out attached three slides 6-weakMan.png, 7-weakMan.png, and 8-weakMan.png, for further discussion on this matter.

(f) Double Big Mac Loser2024

Please check out the attached final slide. A Big Mac is already big. But that could't feed the power hungry Trump yet. He needs Double Big Macs!

(to be continued)

God bless America

Cases in UK dropped rapidly in absence of vaccines, but augment with more presence of vaccines. WAF.

Putin is smart in eliminating domestic rivals, but isn't so in handling Russian GDP and international wrestles. So, Putin's comments...

Putin calls Trump an 'extraordinary individu 'career man'

The Debt-to-GDP Ratio

Investors compare the debt to the nation's ability to pay it off. The debt-to-GDP ratio does just that. It divides the debt by the nation's gross domestic product. That's everything the country produces in a year. Investors worry about default when the debt-to-GDP ratio is greater than 77%. That's the tipping point, according to a study by the World Bank. It found that if the debt-to-GDP ratio exceeds 77% for an extended period of time, it slows economic growth. Every percentage point of debt above this level costs the country 0.017 percentage points in annual economic growth. [6]

Note: The tipping point for emerging market countries is 64%. If the debt-to-GDP ratio is higher, it will slow growth by 0.02 percentage points each year. [6]

At some point, the country can't afford to keep rolling over debt. When it threatens to default, it creates a crisis. That's what caused the Greek debt crisis, leading to the eurozone debt crisis. [9] Iceland defaulted when it bailed out its banks. [10]

Just Now

i even doubt trump could be able to emerge from 2024 primary.

there is a fundamental difference between 2020 & 2024:

in 2020, trump faced the challenge only in the general, thus many democRatic lethal attacks couldn't penetrate into trumpers' brains, since they live in the republican ecological system only.

but in 2024, the lethal attacks on trump would take place within the republican ecological system and penetrate into trumpers' brains, during the primary.

that is a gigantic difference...

the bottom line is, according to the concurrent vicious & foolish trumpian revenge, party lincoln is all but certain to lose 2022 senate, badly. then the filibuster may be abolished, and the election law may be federalized. as a consequence, all republican hopes, including trumpian, would be quenched.

Dear Doctors & Politicians,

Please check out the attached first slide for recent corona infection in a cruise liner packed with doubly vaccinated vacationists.

(2) Dump Trump!!! (part iv)

Please check out the attached remaining slides as well as the following link:
https://edition.cnn.com/2021/06/10/politics/mitch-mcconnell-donald-trump-senate-2022/index.html

To be frank, the radical left socialist mob media of CNN has much better & logical analysis than the orthodoxical Fox, and that partially contributes to the successful beating of Trumpians/MAGAs by radical left sticks, again & again in the past 30 brutal wrestles.

Logic and language are highly correlated to each other. Philosophers feature mastery of logic & mastery of languages, so do lawyers, though they might choose to lie or to deliberately confuse. The capability of handling subtlety tells the mastery. Based on this criterion, CNN does better than Fox.

On a basic level, logic means a correct connection among facts. As we all have observed, each statement by a radical left stick is correct by itself. But they jump around from statement to another. In other words, there are no correct logical connections among their statements. That's why they have been so wrong.

Likewise, the Big Fool shares the same feature. I converted into a die-hard supporter of FP Trump, for his plan to build the US-Mexico Greatwall, because I knew even back to childhood that by the single stroke of a massive influx of weak population, US will be permanently & irreversibly ruined -- that's why so many people in the BigGuyNation are hoping & praying for an open border of US such that the BigGuyNation can be secured to overtake US. But I didn't pay much attention to the Big Fool until the past 1.5 years.

And what I found was shocking, that this is a sheer fool, as being said by many many people, including radical left sticks. Look, each statement of Donald J Trump could be correct, if he was not lying. But the connections of his statements were totally nonsense, thus as a whole he spoke nonsense.

but vampires go away only by force

what an assh*le. always fighting republicans like hell. but too weak to fight democRats!

Senator Lisa Murkowski has cost the great people of Alaska billions and billions of dollars by voting for Radical Left Biden appointees, which in turn led to the revocation of ANWR drilling, which Alaskans have been fighting to see happen for six decades. Not only did Murkowski kill the biggest economic stimulant for the State, but also one of the biggest energy producing sites in the world. Nobody thought ANWR could be opened. We got it done, and she allowed it to be killed. She's the best friend Washington Democrats ever had—and Alaska's reward for that betrayal is an empowered Left coming after their wealth and jobs. I think she will be met very harshly by the Alaska voters in 15 months, and I will be there to campaign against her!

Subject: Corona debacle, the role of Chinese Americans and Chinese in America; Dump Trump!!! (Part ii)

1-nc.png
2-nc-fox.png
3-nc-fox.png
4-nc-fox.png
5-nc-fox.png

9-nc.png
10-nc.png
11-nc-fox.png

Dear Doctors & Politicians,

What is the corona role of Chinese Americans and Chinese in America?

They knew, way ahead of American corona outbreak, a MASK is a MUST, but did they actively inform Americans of this vitally important piece of message?

No. Then, why not?

This question as well as the brutal wrestle between US and China in the upcoming 30 years, which is the time period to define who will be the world ruler for the next 1,000 years, leads to a broader issue of how to unite or fully naturalize Hispanics, Asians, and as well as many none-English-speaking ethnic groups, both citizens and foreigners, living within America.

The corona inertness of Chinese Americans and Chinese in America is due to a sad to Americans fact that they are more akin to China than to America, though they work and live in America and most of them even have set up stronger family and social ties/circles in America than in China. So, how come?

A leading reason is, they live in a Chinese ecological system. For instance, a significant portion of Chinese Americans and almost all Chinese in America primarily live in platforms and social media presented in language Chinese. Here is a rather ugly-looking and old-fashioned platform, mitbbs.com, but it has been being patronized for decades by virtually all Chinese scholars and students in America, as well as in Canada, Europe, and Australia.

The current ethnically fragmented status poses a great threat to US national security. Then, how to assimilate none-English-speaking ethnic groups into American culture better?

There are roughly 30 measures. Hopefully we could get an opportunity in the future to discuss on this crucial topic.

(2) Dump Trump!!! (Part ii)

The US senatorial vacancy in North Carolina is just sadly gone for Party Lincoln, because the former guy just endorsed a weak candidate, which will induce slew of naive Trumpers to vote in the weak, who subsequently will be trampled by a rabid DemocRat like Cheri Beasley or Jeff Jackson. Personally I was shocked by the endorsement. There are only two candidates who are possibly able to keep the seat for Party Lincoln, the former US House representative Mark Walker and the former NC governor Pat McCrory. Please check out the attached slides for an analysis.

This serves as another example how Trumpian tribal politics guts the Party Lincoln, and why Trump is the Big DemocRat hiding within. If the party still wants to retain the seat, and Trump wants to give up being a RHINO, the endorsement must be reversed.

(to be continued)

God bless America

So early?

GOP Senate hopeful picks up endorsement, Lara Trump steps aside

oldasdirt023

7 hours ago

Lara Trump never had a chance. Her name is toxic.

Reply 👍 2 👎 5

oldasdirt023

7 hours ago

No Trump child, especially Trump Jr.will ever be elected to public office. Their father has made the Trump name just that toxic.

Reply 👍 8 👎 9

Trump has destroyed political prospects of his son, daughter, and daughter-in-law. WAF!

JohnBarronJr

8 hours ago

Trump just guaranteed this guy's loss.

Reply 👍 5 👎 10

JohnBarronJr

8 hours ago

This Ted Bundy guy doesn't stand a chance.

Reply 👍 2 👎 2

Trump's pick will be smashed into pieces by DemocRat Beasley or Jackson. A loser's pick is likely to be a loser.

2012	President	Romney 56 - 42%
2016	President	Trump 53 - 44%
2020	President	Trump 67 - 31%

NC's 13th congressional district was a red region, and more polarized in 2020.

2012	Charles Malone: 160,115	*George Holding*: 210,495	
2014	Brenda Cleary: 114,718	*George Holding*: 153,991	
2016	Bruce Davis: 156,049	*Ted Budd*: 199,443	
2018	Kathy Manning: 130,402	*Ted Budd*: 147,570	Tom Bailey: 5,513
2020	Scott Huffman: 124,648	*Ted Budd*: 267,181	

Based on the backgroud color and compared with the predecessor, Ted Budd fails to impress.

2014 [edit]

North Carolina's 6th congressional district, 2014[6]

Party	Candidate	Votes	%
Republican	Mark Walker	147,312	58.7
Democratic	Laura Fjeld	103,758	41.3
	Total votes	251,070	100.0
Republican **hold**			

2016 [edit]

North Carolina's 6th congressional district, 2016[7]

Party	Candidate	Votes	%
Republican	Mark Walker (incumbent)	207,983	59.2
Democratic	Pete Glidewell	143,167	40.8
	Total votes	351,150	100.0
Republican **hold**			

2018 [edit]

North Carolina's 6th congressional district, 2018[8]

Party	Candidate	Votes	%
Republican	Mark Walker (incumbent)	160,709	56.5
Democratic	Ryan Watts	123,651	43.5
	Total votes	284,360	100.0
Republican **hold**			

2020 [edit]

North Carolina's 6th congressional district, 2020[9]

Party	Candidate	Votes	%
Democratic	Kathy Manning	253,531	62.3
Republican	Lee Haywood	153,598	37.7
	Total votes	407,129	100.0
Democratic **gain** from Republican			

NC's 6th congressional district was blue, and more polarized in 2020. But Mark Walker routed 3 times in a row. That's very impressive!

Deliberately pick the weak. That's why Trump is a Big Democ Rat hiding within Party Lincoln.

Polling [edit]

Poll source	Date(s) administered	Sample size[a]	Margin of error	Ted Budd	Pat McCrory	Mark Walker	Undecided
Spry Strategies (R)	April 21–24, 2021	700 (LV)	± 4.4%	5%	40%	11%	44%
Public Opinion Strategies (R)[A]	April 6–8, 2021	500 (LV)	± 4.4%	9%	48%	13%	–

After the conclusion that Trump made a destructive endorsement, the rationalness of many Republicans, Cawthorn included, is discovered here.

Individuals

- Lara Trump, former television producer[18]

Organizations

- Club for Growth[20]

Mark Walker

U.S. Governors

- Mike Huckabee, 44th Governor of Arkansas (1996–2007) and candidate for President of the United States in 2008 and 2016[21]

U.S. Senators

- James Lankford, U.S. Senator from Oklahoma (2015–present)[22]
- Tim Scott, U.S. Senator from South Carolina (2013–present)[22]

U.S. Representatives

- Madison Cawthorn, U.S. Representative for NC-11 (2021–present)[23]
- Paul Ryan, former Speaker of the U.S. House of Representatives (2015–2019), former U.S. Representative for WI-01 (1999–2019), and nominee for Vice President of the United States in 2012[24]

Dump Trump!!!

B Book'em.Danno

7 hours ago

Doesn't make any sense why the GOP would still want Trump involved in their future. His presidency was the biggest unmitigated disaster of all time.
