**Subject:** P2-wide M&A updates/contributions for Semi-Annual report and Napa meeting - by COB Friday

Dear P2-wide M&A team,

Peter and our team are working on putting together slides for the ~45min M&A update in Napa, as well as the M&A contribution to the global semi-annual report. We wanted to give you a chance to contribute to both of these. Please send any slides (for Napa), or short bullets (for the semi-annual report) to me and Anna by the end of this week (COB, Friday) if you have something you would like to add. We're looking for new stuff post-Brussels.

Per the agenda, the Napa talk will focus on highlighting our timeline, targets and products for the next 15 months, and also include important project updates post-Brussels. The M&A semi-annual report will be shorter than the previous annual and semi-annual reports (per instructions from David W.) and will focus on products and outputs.

Unfortunately I won't be at the Napa meeting, but Peter, Noam, Carlos, Evan and a few others from our team look forward to catching up with everyone on all things modeling!

Cheers,  
Kevin

Dear all,

Look forward to our P2-wide M&A call in an hour (12 EST, 9am PT). Please use EHA's additional domestic conference line: **REDACTED**

Agenda below, please also see attached .html file with some new global viral curve analyses from our team - something we've talked about for a long time now and have started looking at.

Cheers,  
Kevin

#### Agenda

- Viral Ranking - KJO gave PD brief update yesterday post-call
- M&A Fellow updates
- UCD candidate: Richard Su-Ire
  - confirmed: "Henipavirus risk in Ghana", June 1027
  - working to provide preliminary materials
  - Metabiota candidates
    - Received applications from Pacide Mbala and Jean Michel Takuo, one more pending
    -
- Viral Curves Global Analyses - see attached .html file
- AMR crowdsourcing using Wiki data - Damien
- Next Steps for Pathways - meeting to discuss additional data fields needed?

- Other items from group?

Thank you, Imung.

Jonathan has blocked off Aug 20-24 (though he needs to fly back to Jakarta on Aug 24) and is looking forward to seeing you all in action! Pak Bambang will follow up as the dates get closer to confirm itineraries and see what makes the most sense.

Enjoy West Sulawesi. Best...

- Tim

On Tue, Jul 25, 2017 at 9:26 PM, JoKo Pamungkas <**REDACTED**> wrote:  
Hi Tim,

Thanks for the email. I didn't get it until tonight when we got to Malili subdistrict in North Kolaka district, SE Sulawesi. We would stop overnight before continuing to West Sulawesi area tomorrow.

Our field sampling trips to Gorontalo and N Sulawesi provinces will start on August 20 in Gorontalo areas until August 23, or earlier depending upon the number of samples we can get. After that we will move to Southern part of N. Sulawesi areas for rodent and bat samples collection until August 30. Suryo has been in contact with Farida from FAO about this schedule, so that concurrent and triangulated surveillance can be initiated.

To our best estimate, Jonathan could come and join our team when we are in North Sulawesi, and for your information Prof Amin Subandrio from Eijkman Institute will also be around in Manado on August 24 and 25 for a seminar if I am not mistaken (I copied Dodi here), that said- the Predict-Indonesia human aspect team might also be around in the area around those dates.

As for the translator, I am not really sure I know the answer to this- Pak Jusuf, can you please give us some advice? Thanks!

That is all we can inform you for the time being, we will let you know in advance if there is any major changes, but basically I think those dates are final, most likely.

All the best,  
Imung.

Hi Imung & Friends -

Thanks for everything last week and I hope that your trip is going well so far.

Jonathan's schedule is filling up quickly but he's hoping to be able to join you in August and so we wanted to check with you on potential actual dates. Ideally, he hopes to see both PREDICT and FAO sites and so we welcome your suggestions so that he can block those dates.

Also, would he need to bring someone with him for translation or could someone there help him out where needed?

Best...

Dear Scott and Charles,

Happy New Year to you both.

Are there some specific goals or deliverables associated with the call and a standing agenda? Is the information discussed open for public dissemination or is more focused on gathering information to inform FAO, WHO and OIE but not to be shared more widely? I ask because if we are using USAID funds to support the discussions, we would want to be able to share the information with USAID/W, local Missions, etc.

Any additional information would be helpful to figure out how we might participate.

BK

Dear Billy and Jonna-

Wishing you a happy and healthy 2018!!

Charles, in cc, and FAO have been working together with WHO and OIE on a regular basis conducting periodic regional conference calls that were initially focused on Monkey pox in West and Central Africa but are now expanding somewhat to include other zoonotic diseases, as needed.

We would like to invite wildlife counterparts to participate in these calls and in light of your PREDICT Program as well as linkages to other wildlife organizations (Wildlife Health Specialist Group, CBD, or others), we wanted to ask if you had any advice on who we might ask to participate in these calls- To start, it may be easier if there was a central or west Africa regional wildlife focal point as we want to be cognizant of not having too many people on the call so if you have any thoughts on wildlife organizations/representatives to include, we would appreciate your suggestions.

Thanks and best wishes,  
Scott

Dear all,  
Happy 2018!

My apologies for my delayed contribution. So far, the calls are mainly focused on Monkey Pox. Actually, this first teleconference on the surveillance of monkeypox was convened on the 18 December 2017 to provide an overview of monkeypox disease surveillance in both human and animal population in selected countries in Africa. We agreed on the following tasks/action points ;

1. Develop a draft public health toolkit for monkeypox by end of February 2018 (draft by WHO) and subsequently develop a roll out and dissemination plan for the tool kit
2. Create a list of one-health contacts (animal and human) in each of the 10 target countries (Cameroon, CAR, Congo, Côte d'Ivoire, DRC, Gabon, Liberia, Nigeria, Sierra Leone and South Sudan) – (FAO and WHO/AFRO)
3. Importance of involving research laboratories, such as IP Bangui
4. We agreed on the importance of involving OIE's wildlife working group – (OIE)
5. We will conduct a one-health monkeypox teleconference with each of the 10 countries (or groups of countries) – (FAO and WHO/AFRO to coordinate)
6. OIE/WHO/FAO all discussed the difficulties surrounding funding, FAO suggested broadening scope to include other zoonotic diseases. Approaching African Union, WAHO, etc. –(FAO and WHO/AFRO)
7. Promoting the expansion of the OIE VHF/Ebola surveillance project to include monkeypox surveillance, if monkeypox becomes listed as a country priority – (OIE to provide a list of the countries conducting the surveillance)
8. Hold monthly monkeypox calls to provide updates (WHO AFRO/HQ to coordinate)

With my best wishes,  
Charles

Global Virome Project Team

March 29, 2019

Peter Daszak  
President  
EcoHealth Alliance

Dear Peter,

I am very pleased to welcome you as a member of the Board of Directors for the Global Virome Project (GVP). The transition of the GVP into a legal and operational reality is both exciting and daunting. The Board of Directors will be critical to ensuring the GVP's long term success. This transition has been a long time in the making. Over the past two years, a network of international partners has been actively guiding the evolution of the GVP from a "scientific" proposal towards an operational reality. This "Steering Committee" has provided a strong 10 year vision that frames the GVP's way forward in three phases – an initial "incubation period", a longer term "steady state", and the "post GVP" period.

The Incubation Period is the critical first phase that is intended to "validate the operational and scientific scalability" of the GVP; mobilize initial funding; and, build out the GVP organization. The incorporation of the GVP and the establishment of the Board of Directors are vital first steps towards building out the GVP's organizational structure. In parallel, the first steps have been taken to launch the "validation" phase in Thailand and China. Both countries are in the process of establishing their respective national Virome projects (the Thai Virome Project and the China Virome Project). Further, a series of scientific and operational working groups, overseen by the Steering Committee and composed of international scientific and legal experts, have provided a sound technical, scientific, and operational framework for the GVP's field activities. Together the Steering Committee and the Working Groups have well positioned the GVP for this next, exciting step.

With the legal launch of the GVP, the Board of Directors will be responsible for setting the GVP's overarching direction, championing stakeholder engagement, and providing financial oversight. In the coming months, the Board of Directors will be specifically responsible for approving membership to a Scientific Advisory Group and for providing oversight of the operational work of the GVP's secretariat or "Hub". I will provide you with a more detailed

introduction to the current organizational and strategic plan for the GVP in a separate communication.

As some of you may be aware, I will be retiring from my current position at USAID later this summer. I intend to use my time, as a voluntary member of the Board of Directors, to help accelerate the transition of the GVP into a fully-functioning organization. I strongly believe the GVP has the potential to transform how the global community understands, prepares for, and responds to future viral threats – and in the end will make the world a far safer place. I look forward to working with you to make this vision a reality.

In the coming weeks each of you will receive an email and packet drafted by the law offices of Tarter Krinsky & Drogin LLP including resolutions and bylaws for the new 501 (c) 3. You will be asked to sign and return the resolutions to formally accept your appointment to the Board.

At your convenience I can arrange a phone conversation to provide you additional information and answer any questions you might have.

All the best,

A handwritten signature in blue ink, appearing to read "Dennis", with a stylized flourish at the end.

Dennis Carroll  
GVP Core Team

**Subject:** STOP Spillover

Happy weekend everyone,

I'm sure you've seen the STOP Spillover request for applications is just out today. USAID is looking to fund one award for \$100M with applications due June 1<sup>st</sup> – so I think we are operating under game plan consortium-all-in.

Hoping to get a meeting on our calendars early next week to discuss a plan - we'll follow up on monday to check your availability for Tues/Weds.

Attaching the full NOFO here, all 88 pages, enjoy!

Chris

Dear all,

Look forward to our P2-wide M&A call in an hour (12 EST, 9am PT). Please use EHA's additional domestic conference line: **REDACTED**

Agenda below, please also see attached .html file with some new global viral curve analyses from our team - something we've talked about for a long time now and have started looking at.

Cheers,  
Kevin

#### Agenda

- Viral Ranking - KJO gave PD brief update yesterday post-call
- M&A Fellow updates
- UCD candidate: Richard Su-Ire
  - confirmed: "Henipavirus risk in Ghana", June 1027
  - working to provide preliminary materials
  - Metabiota candidates
    - Received applications from Pacide Mbala and Jean Michel Takuo, one more pending
    -
- Viral Curves Global Analyses - see attached .html file
- AMR crowdsourcing using Wiki data - Damien
- Next Steps for Pathways - meeting to discuss additional data fields needed?
- Other items from group?

**Subject:** Monkey Pox and other zoonoses - West and Central Africa

Dear Billy and Jonna-

Wishing you a happy and healthy 2018!!

Charles, in cc, and FAO have been working together with WHO and OIE on a regular basis conducting periodic regional conference calls that were initially focused on Monkey pox in West and Central Africa but are now expanding somewhat to include other zoonotic diseases, as needed.

We would like to invite wildlife counterparts to participate in these calls and in light of your PREDICT Program as well as linkages to other wildlife organizations (Wildlife Health Specialist Group, CBD, or others), we wanted to ask if you had any advice on who we might ask to participate in these calls- To start, it may be easier if there was a central or west Africa regional wildlife focal point as we want to be cognizant of not having too many people on the call so if you have any thoughts on wildlife organizations/representatives to include, we would appreciate your suggestions.

Thanks and best wishes,  
Scott

On Jan 17, 2018, at 4:53 AM, Bebay, Charles (FAOCG) <[REDACTED]> wrote:

Dear all,  
Happy 2018!

My apologies for my delayed contribution. So far, the calls are mainly focused on Monkey Pox. Actually, this first teleconference on the surveillance of monkeypox was convened on the 18 December 2017 to provide an overview of monkeypox disease surveillance in both human and animal population in selected countries in Africa. We agreed on the following tasks/action points ;

1. Develop a draft public health toolkit for monkeypox by end of February 2018 (draft by WHO) and subsequently develop a roll out and dissemination plan for the tool kit
2. Create a list of one-health contacts (animal and human) in each of the 10 target countries (Cameroon, CAR, Congo, Côte d'Ivoire, DRC, Gabon, Liberia, Nigeria, Sierra Leone and South Sudan) – (FAO and WHO/AFRO)
3. Importance of involving research laboratories, such as IP Bangui
4. We agreed on the importance of involving OIE's wildlife working group – (OIE)
5. We will conduct a one-health monkeypox teleconference with each of the 10 countries (or groups of countries) – (FAO and WHO/AFRO to coordinate)
6. OIE/WHO/FAO all discussed the difficulties surrounding funding, FAO suggested broadening scope to include other zoonotic diseases. Approaching African Union, WAHO, etc. –(FAO and WHO/AFRO)
7. Promoting the expansion of the OIE VHF/Ebola surveillance project to include monkeypox surveillance, if monkeypox becomes listed as a country priority – (OIE to provide a list of the countries conducting the surveillance)
8. Hold monthly monkeypox calls to provide updates (WHO AFRO/HQ to coordinate)

With my best wishes,  
Charles

Dear Scott and Charles,

Happy New Year to you both.

Are there some specific goals or deliverables associated with the call and a standing agenda? Is the information discussed open for public dissemination or is more focused on gathering information to inform FAO, WHO and OIE but not to be shared more widely? I ask because if we are using USAID funds to support the discussions, we would want to be able to share the information with USAID/W, local Missions, etc.

Any additional information would be helpful to figure out how we might participate.

**Subject:** For our SWOT Workshop Tomorrow

Dear all,  
We are looking very forward to our first OHW-NG Objective 3 Virtual Workshop tomorrow, on the SWOT facing AFROHUN's Organizational Sustainability. Attached is the SWOT analysis presentation we will deliver and the agenda for the meeting that we discussed last week.

Please take a moment to review this presentation before tomorrow, and have it accessible during our meeting. We will be using polling, chat box, and group break-out features tomorrow, to make our session more interactive. To enable this, where possible, please log-in using your computers or the Zoom mobile app. However, we have included a conference line if that is not possible.

Thanks all,  
OHW-NG Obj 3 team

**Subject:** Re: STOP Spillover

Hi All,

We're looking at setting up a meeting Wednesday afternoon to discuss STOP Spillover. How does **noon PDT on Wed 5/6** work for everybody? We have a little wiggle room, so if slightly later Wed works better let us know.

Thanks,  
Nicole

**Subject:** STOP Spillover

Happy weekend everyone,  
I'm sure you've seen the STOP Spillover request for applications is just out today. USAID is looking to fund one award for \$100M with applications due June 1<sup>st</sup> – so I think we are operating under game plan consortium-all-in.

Hoping to get a meeting on our calendars early next week to discuss a plan - we'll follow up on monday to check your availability for Tues/Weds.

Attaching the full NOFO here, all 88 pages, enjoy!

Chris
