Team

These are the combined efforts written in short form (b) (5)

That said, I think it demonstrates the main focus for each lab team and the need to be responsive to each other in real time as well as the HQ's here.

Few reminders:

- (b) (5) [REDACTED]
[REDACTED]
[REDACTED]
- Drafting begins on 26 July. We need to have our initial analysis done in in presentable form by mid-July to be useful. You'll see that I left the form question open to the group with some loose nods at concepts we would typically employ to convey our understanding. Please group think on a solution that you like and we'll do so from here as well.

We have the LANL BAR here for pushing through ODNI this week, (b) (6) is on point for that.

(b) (6) is on point for the "tools" question regarding any needs from IN-40.

(b) (6) and I will be out the rest of the week, I'll be available Monday.

Please plan on a status update next Wednesday 6/30, time tbd.

Thanks for all you are doing!

 =====

Colleagues,

I apologize it's been so long since I sent anything to you, but I spoke with (b) (3) (A), (b) (6) earlier, and wanted to give you some updates.

(b) (5)

(b) (5) [redacted] As always, if your lab gets questions about the analysis, please let us know.

HQ has received a few questions from Hill staffers asking for more information about DOE's position in the NIC Assessment, so we are moving forward with finalizing the Q&A memo we circulated in early September. We have incorporated some comments from other agencies, but in general most agencies did not have any comments. One thing I would like to check on with all of you, is whether any information that has come out in the past month causes you or your lab to think differently about anything we state in the Q&A memo. (b) (1) (A) [redacted]

[redacted]

[redacted] I haven't seen anything come out in the past month that I think could change assessments in other parts of the Note, but if anyone is aware of anything please let us know.

If you could get us a response by COB Friday that would be great, but if that is not achievable let us know when you think you can have a response.

Thanks again!

(b) (6)

We're still waiting on one last OC release, (b) (5) we're hoping to get this out. I have attached the version after our editors looked at it. There are several areas where I would propose lowering the classification, and a couple where we need to add some sourcing. (b) (1) (A)

[REDACTED]

Also, there is one bullet point where I just want to double check if you are still comfortable with it given the recent revelations. (b) (1) (A)

[REDACTED] Since you had the lead in drafting this, I wanted to get your thoughts first. I'm open to ideas for possible edits to that bullet, or deleting it entirely.

Let me know if you have any questions or concerns.

(b) (1) (A)

The proposal does not need to be a specific format. A word document or email is fine as long as it provides a brief explanation of the work, cost estimate, and likely time for completion of experiment(s) and write up.

Thanks, and let me know if you have any questions.
