Subject: CoV-2b sequences

Dear Simon,

I want to thank you again for agreeing to share betacoronavirus lineage B spike sequences with us. This will surely increase the impact of our story by providing a proof of principle with unpublished sequences.

We will move very quickly once we have them - these days it takes me just under 3 weeks to go from ordering synthesis of the RBD to having cell entry data.

Please let us know if you require anything else before sending the sequences.

Cheers,
-michael
