Larry,

Thank you very, very much for reviewing this on your time off - what a guy!!! I'll send our combined review off to Dougie and make his day.

Donna and I agree Douglas has regressed, not progressed - that guy really honks me off.

We also agree the combining of glyphosate and Roundup mucks things up, but Williams (and I think Kroes) wanted it this way. So for the sake of trying to bring some finality to this never-ending story, I'm not going to push breaking them back out.

Thanks again for your help!

Bill

Bill,

The attached includes my comments in "revision" format [generally blue text in brackets]. Unfortunately, I think that this may be going backwards with successive revisions. I think the mixing of formulations and glyphosate is pretty confusing and awkward. How is this being handled in other sections?

Larry
