[Redacted]

I have made a few tracked additions in the attached. If you are OK with the following, you can accept all tracked changes and this should be the final version for submission to Critical Reviews in Toxicology once I receive an email from our legal department, hopefully today.

- page 2. Added "human and environmental" to the end of the abstract
- page 42. Added a few sentences to the exposure paragraph (kept this section within the same paragraph as the human exposure discussion, but am open to having separate paragraphs).
- page 46. Added the reference cited on page 42.

Thanks,

David
