Subject: RE: Glyphosate Toxicity Summary
Attachments: Glyphosate Tox Reviewcal.doc

Martin,

I have been struggling with this article for a couple of days - it is really poorly done. It needs organizational work and work on the accuracy of the "facts".

During one editing I had basically re-written the thing - then decided that was not a good thing to do so I tried to just correct the inaccuracies and was getting frustrated so I thought I would send you what I have and see if we could talk tomorrow.

Donna

Donna - I would be very appreciative if you'd take a few minutes, look this over, and make necessary changes. As you can see, it was written by the Invasive Plant Council for use in their newsletter.

Thanks,
Martin

Subject: Glyphosate Toxicity Summary

Martin,
You expressed an interest in the article I am writing on the toxicity of glyphosate herbicides. I am planning to publish the article in the next issue of the Noxious Times newsletter (an information source related to the control of noxious weeds in the state). I would appreciate your comments on the article before I send the newsletter to the publisher next month.

This version of the article does not address the surfactant issue in depth. I still have that version on a back burner for further work.

Thank you for your time.

Susan Monheit
