Dan,  
I don't yet know what PA is planning but we need to respond in some fashion. I believe the response needs to be direct and based on evidence and science rather than a lot of arm waving. And because Gillam is trying to signal the end of glyphosate, the response needs to be from Robb to show we are committed to safety.

Eric (314-694-1709)

I am currently away from my office and limited to my BlackBerry

Dan - I contacted Tom H and Janice to learn what their plans are for responding to this Reuters article. I believe this is a case where we need to craft a statement by Robb or Phil M that strongly challenges the multitude of claims organized by Gillam. This is the old where there is smoke there is fire argument. For a journalist, all claims are the same, even if they are misleading or outright wrong. Consequently the opponents know that all they need to do is make claims and the media will communicate them to the public.

We need a response to this article. I would like to discuss with you first thing on Monday.

Eric
