Henry – I made a few suggestions. Where possible I think it is helpful to provide an explanation of how Seralini's methods either contribute to or directly lead to misleading outcomes. This supports your premise that Seralini is abusing the scientific method to support his ideological opposition to GM crops and glyphosate. In some cases the consequences of the faulty study design may not be clear or understandable to some readers.

Eric

I cleaned up the text a bit and made a few additions.

Henry
I will look at it tomorrow.

Subject: Seralini

Eric and Dan,

Attached is my humble effort on the Seralini paper. I'd welcome any suggestions, large or small, but most especially, correction of any inaccuracies.

There's not a terrific hurry, but the sooner you get it back to me, the sooner I can get it into Forbes.

Thanks!

Henry
