**Subject:** Draft OP Ed material  
**Attachments:** OP- EDs- Glyphosate and Cancer.docx

I have written 5 potential draft Op Eds for the medical toxicologists to work from. This also includes a general purpose couple of paragraphs on criticism of IARC generally that can be grafted in to the other versions

PLEASE NOTE that none of this has had any review by anyone..... just my shot at it.

We obviously don't want clones all over the place in the media- but this will give a good starting point and we can coordinate op-ed versions as needed.

I fully expect that you will be comfortable with most parts and not so good with others depending on your individual outlook- but this is NOT intended to tell you what to say- just grist for the mill to help you create what you want to say.

Dan
