Do you think it would help to post more? I think just the MD addition is worthwhile.

Hi Ron,

Chassy's piece was quite good, yes, and we did help raise its profile significantly.

That said, if you change your mind, we could definitely leverage your perspective and increase focus on the issue under the Genetic Literacy banner; Bruce's piece was featured on Academics Review first. Your call.

Best,

Jon

Jon, I've been traveling for the past few days, back to Boston tonight. I read the commentary/post on the GLP website on Tues about the Roundup/breast milk samples and thought it was really excellent. It covered just about everything I had in my rough draft and laid it out beautifully and comprehensively. A former CEO at the Mass General once commented at the end of a mtg, when he noticed that there were still several hands in the air from people who wanted to respond to a question he posed, that it was clear that everything that needed to be said, had been said, it was just that everyone in the room hadn't had a chance to say it. So not wanting to be one of those hands in the air, I won't plan to send you anything more about this issue unless there's a need after there's more clarity about it (validated assay; circumstances and levels of maternal exposure, concurrent urine/blood/breast milk samples). Thanks again for offering me the opportunity and I very much hope I'll get to meet you one of these days. Regards, Ron

Ron,

That's perfectly fine. It's an important piece and best to get it right...we'll get it up and promote it when ready.

Jon

Hi Ron,

I'm a big fan of your work as well!

I'd be thrilled to have a post from you on the glyphosate milk issue...very important, as this article is turning into a "study" and already showing on various websites as "fact."

Our newsletter goes out on Tuesday mid-day if you'd have it ready by then...that gets the most circulation. If not, we could still run it any other time..it still would get great circulation.

Jon

Eric, thanks very much for the introduction. Jon, I've been a regular reader of the GLP website and appreciate it very much. If you'd consider a post from me, that would be great. I should have it together by early next week. Thanks and regards, Ron

Jon,

Dr. Ron Kleinman, Physician in Chief, MassGeneral Hospital for Children, is an advocate for getting the science right and helping fellow physicians and interested stakeholders to know what is important and factual. Ron is eager to post on the GLP website an article responding to concerns about glyphosate in breast milk. So, by this message, I am linking the two of you together. It would be great to see Ron's perspective made broadly available via the GLP site and newsletter.

Take Care,

Eric
