Hi, Lisa –

I had a pretty good call with John yesterday. Tracey has set up a series of calls to discuss the program. John said later in the call that he thought it would be a good idea for me to be on those calls, so he was going to forward the invite, although I've not received it yet. I feel that he was receptive to the program suggestions I made and that we made some progress.

BTW, I didn't ask about it but figured out as he was talking that his earlier email comment about "Fleishman" helping with the allergy discussion was a typo. He was referring to Dr. Fleischer.

I am going to work on Ron's request to get the "worst studies" info on some slides. As I said below, I suspect he'd like that to help support his own talks on this subject, which is good all the way around. I'll of course share that with you guys as it may come in handy for you as well.

Hope you have a good day –

Lisa

**Subject:** From Ron Kleinman

See the information sent by Ron. He is on the same page as some of the others who are interested in being able to respond to the most common arguments head on. If you agree, I'll go through these and suggest how we might organize them as the basis for a session in the program.

I suspect Ron also would like to have a few slides on these that he can use when he is asked to speak independently about biotech.

Lisa

**Subject:** 10 worst anti-GMO studies

Lisa, I figured it might be a stretch getting these commentaries/papers, so I found this excellent review from the Genetic Literacy Project of a list of the 10 "best" anti-GMO studies that appeared on Earth Open Source. I also followed the links to some of the actual publications. This might be useful for the August mtg. Can you figure out a way to put this info on a slide or 2? Regards, Ron
